PART A: NWFP MANAGEMENT AND MARKETING PLAN

1. Background

The cross-cutting management plan is prepared and developed for sustainable management of non-wood forest products falling within the protected area-based plan of Royal Manas National Park. The cross-cutting management plan is developed for Salapong NWFP management and marketing group.

The Non-Wood Forest Product (NWFP) management and marketing group is called Salapong Non-Wood Forest Product Management and Marketing Group, located in Tashibee *chiwog*. It is situated in Phangkhar *gewog*, within Zhemgang *Dzognkhag*. The group includes two villages, Barseling and Salapong, with a total of 20 households (HH) as a member.

Subsistence farming is the primary activity, though they also engage in small scale-commercial farming, such as cardamom plantations, orange orchards, and ginger cultivation. Based on their activities, they are largely self-sufficient in meeting most of their needs within the village. The average annual income per household is around Nu. 1 lakh, with the majority coming from cardamom and oranges.

The villagers have long depended on NWFP resources, collecting ferns (*Diplazium esculentum*), *dhamru* (*Elatostema lineolatum*), mushrooms and banana hearts mainly for their own consumption. They also gather cane shoot (*Plectocomia himalayana*), bamboo shoot and *Yula* (*Neomicrocalamus andropogonifolius*) mostly for small-scale or local markets. While they have not received formal training in NWFP management, they take care of the resources as if they were their own, ensuring sustainable use and preventing outsiders from harvesting in their village.

The villagers are eager to continue with the NWFP management and marketing group, as it allows them to manage NWFP species while generating income collectively. Additionally, they hope to pass on their handicraft skills to the younger generation, providing them with a potential source of income if that choose to pursue it.

The villagers did not achieve much during the previous plan period, as the plan was not fully implemented due to the COVID-19 pandemic and lack of market for their products. However, they managed to produce a few items like *Bangchung* and *Dapa*, which were sold locally. Despite these challenges, the group's membership grew from 17 to 20, indicating strong interest and a positive development for the group.

There are several reasons to reconsider the plan. First, the initial plan was not implemented due to the COVID-19 pandemic, which made it difficult to access markets, according to the village *Tshokpa* and committee members. They now see potential for income generation beyond community forest (CF). as they have a variety of NWFP products that can be better utilized by forming such groups.

2. Goal and objectives

The following are the goals and objectives for managing the NWFP management and marketing group:

- To generate income through the sale of NWFP and *Tsharzo* products.
- To promote the sustainable management of cane and bamboo resources
- To encourage the diversification of bamboo products within the village.

3. Description of NWFPs present in the area demarcated for management

Numerous NWFP species are found in the designated area. For years, local villagers have gathered and consumed ferns, *dhamru*, *Cinnamom sp.*, mushrooms, bamboo shoots, cane shoots, and wild potatoes primarily for household purposes. In addition to domestic use, the following NWFP species have potential for sale within Bhutan and for export, as shown in Table 1.

Table 1. Brief description on NWFPs for commercial purposes

NWFP name	Harvesting areas (name)	Parts harvested	Use/ purpose (traditional & others)	Harvesting season	Estimated quantity that can be collected in a year
Cane shoot (<i>Plectocomia himalayana</i>)	Serkem Lhabtsa	Young shoot	Young shoots used as vegetable	April-August	100 numbers
		Matured stem	Matured stem used to produce handicraft items	November-March	20 numbers
Bamboo (<i>Dendrocalamus hamiltonii</i>)	Tsangmaling, Tortoko	Young shoots	Young shoot used as a vegetable	June-September	500 kg
		culm	Weaving, construction	November-February	1000 numbers
Pipla (<i>Piper mullesua</i>)	Yungbaling	Fruit	Spice/medicine	September-November	150kg
Yula (<i>Neomicrocalamus andropogonifolius</i>)	Zorphangbi, Talam	Culms	<i>Bangchungs</i> and handicraft items	December-April	1000 culms
Dhamru (<i>Elatostema lineolatum</i>)	Badangchu, Yungbaling	Stem and leaves	Vegetable	Throughout the year	100 bundle
Mushroom	Parabi, Badangchu,	Talam, Tortoko	Vegetable and soup	January-October	500 packets
Wangpem (<i>Tupista nutans</i>)	Tsangmaling	Flower	Vegetable	October-November	50 bundles
Banana heart or banana flower	Tsangmaling	Flower	Vegetable	Whole year	100 numbers
Wild potatoes	Talam	Root	Food, special item for ceremony	October-March	100kg
<i>Cinnamomom sp</i>	Plamling	Dried Bark/root	Tea species & medicinal values	Jan-Dec	25kg
		leaves	Tea species	Jan-Dec	1000 bundles
Fern (<i>Diplazium esculentum</i>)	Parabi	Young shoots	Vegetable	March-September	100 bundles
Ging (<i>Calamus acanthospathus</i>)	Ongkhar	Cane	Handicraft	November-March	50 numbers

4. Harvesting prescriptions for sustainable NWFP harvesting

To promote sustainable resource management, collection will follow the NWFP group harvesting guidelines outlined in the plan. The Chairperson will inform group members of the activities based on timing or seasonality of the NWFP species. In accordance with forestry rules and regulations, a collection permit will be issued prior to the start of collection. The harvesting prescriptions for each resource are detailed in Table 2.

Table 2. Prescriptions for sustainable harvesting of NWFPs

NWFP species	Harvesting prescriptions for sustainable harvesting
Cane shoot (<i>Plectocomia himalayana</i>)	For mature stems: ✓ Cut cane stem only when matured ✓ Pull down as much of the cane as possible (avoid leaving cane parts high up in the tree). ✓ Cut only canes with a usable length of at least 10m. ✓ Harvest during winter as canes have a better quality during this season. ✓ Replant the lateral shoot that is attached to harvested cane. For shoots: ✓ Cut young shoot by bending the cane stem with the help of a hook long and strong stick using sharp knife ✓ Do not cut tree climbed cane for shoot ✓ Care shall be taken to avoid damaging sucker buds.
Bamboo (<i>Dendrocalamus hamiltonii</i>)	For culms: ✓ Cut culms above one node from the ground level ✓ Do not cut culms less than one year old ✓ Retain 50% of healthy culms in a clump ✓ Remove matured culms from center of the clump. ✓ Do not harvest the culms growing on periphery of the clump. For shoots: ✓ Collect bamboo shoots to a maximum of 25% from a clump ✓ Cut bamboo-shoots with a sharp knife at the ground level without damaging or wounding the other healthy ones ✓ After cutting and collecting the bamboo-shoot, cover that void place with topsoil ✓ Protect the remaining shoots and let them further develop into culms.
Pipla (<i>Piper mullesua</i>)	✓ Collect fruits only when fully mature. ✓ Harvest fruits only after the announced starting date for harvesting (Date is usually announced by the coordinator / Concern Forestry officials generally in September). ✓ Harvest fruits only by hand picking without damaging, cutting or uprooting the entire plant
Yula (<i>Neomicrocalamus andropogonifolius</i>)	✓ Harvest only culm from clump that has more than five culms. ✓ Harvest culms when it produces secondary shoot at the top. ✓ Retain at least two to three young healthy culms in each clump to favour more shooting in the following season.

Dhamru (<i>Elatostema lineolatum</i>)	✓ Collect plants that are 15cm and above. ✓ Retain stump of around 3” for sprouting of new shoots. ✓ Don’t uproot whole plant. ✓ Shouldn’t cut down trees and create more openings. ✓ Shouldn’t disturb its catchment area.
Mushroom	✓ Do not break down dry branches or host tree. ✓ Do not dig out whole fungus from the wood log ✓ Pluck it carefully ✓ Retain the younger ones (traditional knowledge base)
Wangpem (<i>Tupista nutans</i>)	✓ Collect only flowers by hand. ✓ Do not uproot mother plants. ✓ Do not expose plant root to direct sunlight.
Banana heart or banana flower	✓ Do not damage other young banana plants while harvesting banana heart ✓ Do not damage surrounding trees
Wild potatoes	✓ Do not pose damage to other surroundings ✓ Harvest wild potatoes only during their mature season
<i>Cinnamomum sp.</i>	✓ Avoid complete debarking of the trees ✓ Only debranch a few trees for spice and medicinal purposes
Fern (<i>Diplazium esculentum</i>)	✓ Harvests young shoot that are 15cm length. ✓ Don’t harvest all shoots coming up in season. ✓ Retain at least 50% of young shoot of last flush for the development of leaves. ✓ Don’t harvest the shoots that have developed to leaves.
Ging (<i>Calamus acanthospathus</i>)	✓ Select cane which are more than 10 m for cutting. ✓ Pull down the cane from treetop before cutting. ✓ Once pulled down cut it from the base. ✓ Do not damage young regeneration in process of pulling down. ✓ Do not pull down or cut flowering cane stem.

Table 3. Area and location of NWFP collection sites

Block name	Location	Area Acres)	NWFP Products
A	Tsangmaling	1.56	Bamboo, bamboo shoot
B	Badangchu, Yumaling	1.25	<i>Dhamru</i>
C	Parabi, Maja pong	0.47	Mushrooms
D	Parabi	2.95	Ging, Yula, cane shoot, wild potato
E	Talam, Plamling	3.12	<i>Cinnamomum sp.</i> , wild potato
F	Serkem Lhabtsa	2.51	Cane shoot
G	Zorphangbi	0.62	Yula
H	Talam	0.27	Yula
I	Tsangmaling	39.3	Bamboo, banana heart, <i>Wangpem</i> , <i>Dhamru</i> .
Total area		52.05	

All members showed great enthusiasm in identifying the various NWFP species present in their village. Participatory resource mapping was conducted, as illustrated in Figure 1, with an additional mapping of NWFP species shown in Figure 2. The detailed locations include the blocks and NWFP species as listed in Table 3.

6. Marketing and sales plan

The committee members and the group will attempt to sell NWFP resources in both raw and finished forms, depending on the market availability. The specific markets for each NWFP resource and the baseline targets are outlined in Table 4. Additionally, the committee members will negotiate prices based on market trends, as prices can fluctuate even within a week.

Table 4. Marketing and sales plan for NWFP group

NWFP	Potential market/buyer	Estimated quantity for sale per season(unit)	Form of product (dry or fresh)	Expected price per unit	Total (Nu.)
Bamboo shoot	Panbang, Pantang, Gelephu <i>Thromde</i>	180	Fresh & dry	800/kg	144000
Bamboo culm	Panbang, Pantang, Gelephu <i>Thromde</i>	1000	fresh	50/piece	50000
Pipla	Gelephu, local dealers	30	dry	200/kg	6000
Mushroom	Gelephu, Pangbang,	200	dry	350/kg	70000
Fern	Local only	100		30/bundle	3000
Dambru	Pantang, Gelephu <i>Thromde</i>	100	fresh	20/bundle	2000
<i>Cinnamom sp.</i>	Pantang, Gelephu <i>Thromde</i>	200	fresh	20/bundle	4000
Wild potato	Local market within Panbang	200	fresh	100/kg	20000
<i>Yula</i> products	Local market, Gelephu <i>Thromde</i>	7	dry	1000/ <i>bangchung</i>	7000
<i>Wangpem</i>	Local market, Gelephu <i>Thromde</i>	5	fresh	50/bundle	250

7. Marketing arrangements

All members will participate in marketing the NWFP products. The committee members, with support from relevant forestry officials and Royal Manas National Park management (RMNP), will facilitate exploring markets for these products. The group will aim to sell a variety of products, and the detailed marketing plans are provided in Table 5.

Table 5. Procedures for NWFP harvesting, marketing and sharing of income

Activity	Brief description of how the activities is carried out
Harvesting of products	✓ The harvesting of products will be conducted according to the management prescriptions specified for each NWFP species, as detailed in Table 2 of this plan.

Post-harvest practices	✓ The committee members will manage the harvested NWFP products prior to marketing and proceeding with the sale.
Marketing of the products	✓ The committee members will explore the market of different NWFP species. Marketing will be done in presence of all committee members and a few member representatives to ensure transparency within the group.
Identification of buyers	✓ Buyers for the NWFP will primarily be identified by the committee members. Concerned forest officials and members may also assist in identifying buyers to support the income generation of the NWFP management and marketing group.
Price fixing	✓ The committee members will determine the pricing after discussing and reaching a consensus with the group members to prevent any losses during the marketing of NWFP species.
Income sharing	✓ When all members participate in the collection and marketing of NWFP, 10% of the total income will be deposited into the group account, while the remaining 90% will be shared equally among all members. ✓ If only a few individuals are involved in both collection and marketing, 50% of the income will go to the group account, and the other 50% will be divided among those directly participating in the activity.
Raising of the community development fund	✓ A community development fund will not be implemented during this planning period due to budget constraints. However, if a need arises, 5% of the annual funds generated will be allocated for community development.
Payment to committee members for their service	✓ Committee members will receive 10% of the annual funds generated at the end of each year. Out of this amount, three committee members will share a portion as an incentive.

8. Benefits to the members

Each member of the NWFP management and marketing group holds equal rights to the benefits derived from their NWFP collection area. If all members actively participate in collection and marketing, 90% of the benefits will be shared, but if only a few members are involved, the share will drop to 50%. They also have equal rights to all the funds in the group's account. To financial projections, only the major NWFP species with market potentials are included, as shown in Table 6, based on the assumption that everything operates as planned.

Table 6. Financial projection and benefits to the members from sale of NWFPs

Sl.No	Particulars	Product name(s)			Total amount (Nu.)
		Bamboo shoot	Pipla	Mushroom	
1	Revenues				
a	Total quantity (unit)	180 kg	30kg	200kg	-
b	Market price (Nu per unit)	800	200	350	-

c	Total revenues from forest product sales (a*b)				
A	Total revenues	144000	6000	70000	
2	Expenses				
a	Packaging materials	1500	1200	1000	Cost of plastics
b	Royalty	360	600	800	Royalty on Forests Produce 2006
C	Transportation costs	3000	1000	1500	
D	Compensation fee to executive committee for marketing products	500	500	500	
E	Contribution to community development fund	3000	500	500	
F	Incidental expenses	1200	500	400	
B	Total expenses	9560	4300	4700	
C	Total benefit (net-income) of group members (Total revenues A – Total expenses B)	134440	1700	2300	
D	Average income to group members (C/ no of group members)	6772	85	115	Total members: 20
E	Price per unit paid to group members (C/1a)	746.88	56.66	11.5	

9. Benefits to the group

The group gains certain benefits by requiring annual membership fees and imposing fines for non-compliance with the committee's work plan and other fines. The financial projections are made on an annual basis, as illustrated in Table 7.

Table 7. Financial projection of the benefits to the group, the community development fund

Sl.No	Particulars	Amount (Nu.)
	Revenues	
1	Annual membership fees	10000
2	Annual contribution (fines & others)	1000
3	Contribution to the Community Development Fund (CDF) from sales of bamboo shoot	134440
4	Contribution to the CDF from sales of Pipla	1700
5	Contribution to the CDF from sales of product mushrooms	2300
6	Contribution to the CDF from sale of other NWFPs (<i>Cinnamomum sp.</i> , ferns, cane shoot, <i>Wangpem</i> , Yula products, etc.)	21000
A	Total revenues	1,70,440

	Expenses (Transportation, packing material cost, royalty, marketing, meeting expenses, others)	65,000
B	Total Expenses	65,000
C	Balance: Total revenues – Total expenses	105440

PART B: GROUP'S BY-LAW

10. NWFP management and marketing group

Membership arrangement and resignation	• All households residing in Salapong and Barseling villages are eligible to join as new members. • A household joining as a new member will be required to pay Nu.100 per month up to the current date and cover all the accumulated annual membership fees up to that point. • Acceptance of a new member into the group must be approved following discussions during a general meeting. • Once all expenses have been covered, a new member must abide by by-laws and will have equal rights to the benefits and resources. • If a member resigns from the group, they must forfeit any accumulated benefits or shares. Additionally, they are required to pay a Nu.10,000 penalty for leaving before completing the ten-year term. • If a resigned members or their children wish to rejoin later, they must be treated as new members under the same conditions. • In special cases, such as old age or disability, a member may be allowed to leave with their accumulated shares after discussion and agreement among the members.
Responsibilities and rights of members	• Carry out activities as outlined in the management plan. • Attend general meetings with members and committee meetings with all committee members, as outlined in the management plan. • Safeguard against illegal activities and avoid engaging in any unlawful actions in the collection area • Collect and harvest NWFP as per the management prescription.

11. Executive Committee of NWFP management and marketing group

Chairperson	Name: Dorji Cheten, Contact No: 17459267
Responsibilities of Chairperson	• To explore the market for bamboo and other NWFP resources • To chair all meetings associated with this plan • To oversee the planning of activities for the group • To address and settle disagreements and conflicts among members • To main PR among group members and traders • To organize and manage the marketing of NWFPs • To manage a joint account for the group with Treasurer

Secretary	Name: Pema Karpo, Contact No: 17249739
Responsibilities of Secretary	• Chair the meeting in absence of chairperson • Support the chairperson and group in planning the activities • Keep records of all group activities, including minutes of meeting • Keep records of tools and office correspondences
Treasurer	Name: Sangay Passang, Contact No: 17433903
Responsibilities of Treasurer	• To maintain records of cash transactions. • To collect membership fees and fines. • To manage financial arrangements. • To manage a joint account for this group with the Chairperson. • To issue receipts for any financial transactions, including fines and fees
Tenure of committee member	This NWFP management and marketing group has three committee members. the Chairperson, Secretary and Treasurer. All members will serve for the entire ten-year duration of the plan, demonstrating full dedication to the group by fulfilling their roles and responsibilities.
Incentives to the committee members	All committee members will receive a combined incentive of 10% from the annual fund generated each year. This 10% will be equally distributed among the committee members based on the records kept by the treasurer

14. Sources for generation of group fund

Membership registration fees	The NWFP management and marketing group members have decided not to charge a membership registration fee during this plan period
Annual contribution	Members will contribute Nu.500 annually as a membership fee for the entire 10-year plan period, with no increase during that time
Collection from sale proceeds	• If all members participate in the sale proceeds, 10% of the generated funds will be deposited for the group, while the remaining 90% will be distributed among the members after discussion with everyone. • If only a few members are actively involved in collecting NWFP products for sale, 50% of the amount will be deposited to the group account, while the remaining 50% will be shared after discussions with all the members.

15. Group Fund Management and utilization

- The NWFP management and marketing group will maintain their funds in a group account registered under the names of the Chairperson and Treasurer.
- If necessary, 5% of the funds from the annual collection will be allocated for office expenses each year.
- The authority for fund withdrawal rests with the Chairperson and Treasurer, who will determine a limit on a case-by-case basis during their general meetings.

- At least 25% of the group's funds will be retained in their group account to address administrative costs, such as reviewing the NWFP management and marketing plan after its expiration.
- The percentage of funds allocated for various purposes will be discussed case by case in the general meeting, not exceeding 10%. This includes support for welfare during natural disasters, community cultural activities, and assistance for disadvantaged group members.

16. Conflict resolution

- In the event of disputes or conflicts among communities regarding access to specific areas for NWFP harvesting, the issue will be referred to the village *Tshogpa*, *Gewog Tshogde* (GT), *Dzongkhag Tshogdue* (DT) for further decision.
- Conflicts or disputes within the NWFP Management Group that cannot be resolved by the members shall be forwarded to the coordinator for mediation. If the case remains unresolved, it will be forwarded to the Gewog Administration.
- If a conflict occurs between the NWFP Group and outsiders, the coordinator and the forest range office will submit the case to the Gewog Administration.

17. Meeting and purpose

- At least four committee meetings will be held each year to discuss strategies for collecting various NWFPs and related matters.
- Two general meetings will be held- one before and one after the collection of NWFPs to discuss plans, review the current fund status, and report on the group's progress.

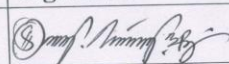

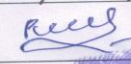

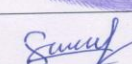

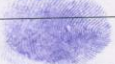

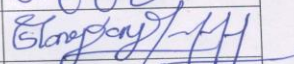

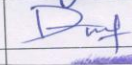

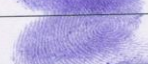

18. Penalties

- A penalty fee of Nu. 10,000/- must be paid for withdrawing from the NWFP management and marketing group.
- Members who do not pay their annual fees will incur a fine of Nu. 500 per month. The offender will continue to pay the full fine each month until the payment is made.
- If a member is absent from a work session or meeting, they will incur a fine of Nu.500/- for each instance.
- A member arriving late to a meeting or work session will be required to pay a fine of Nu.50 for each hour of delay.
- Collecting NWFPs during the off-season and not adhering to the agreed group norms will result in a fine equal to double the market price, in addition to any fines and penalties as specified by the Forest and Nature Conservation Act,2023, and FNCRR,2023.
- Committee members who misuse funds must repay the misused amount and pay a fine of 10% of that amount within a month. The individual will remain a member.
- If a selected committee fails to fulfill their responsibilities, they will not receive the 10% incentive from the annual income generated.
- If a member does not comply with the committee's directives regarding the specified activities, they may face a fine equivalent to one day's local wage rate or be terminated from the group without any benefits.
- If members or outsiders harvest NWFP resources without a valid permit, they will be subject to the existing forestry rules and regulations of Bhutan.

19. Powers of the Department

- The Department has the right to terminate the NWFP management and marketing group in case of any violation of the management plan prescription or in the event of inability to carry out the activities as per the plan.
