APPROVAL SHEET

Name of NWF's Management and Marketing Group:	Yumzang Semthuen Non-Wood Forest Produce management & marketing group.
Dzongkhag:	Trashigang
Gewog:	Sakteng
Village(s):	Joengkhar
No. of households:	55
Area (ha)	108 ha
Plan Period:	2023-2027

Prepared and submitted for approval

	Chairperson NWF Management & Marketing Group	Gup of the Gewog	Head, Social Forestry Section of Division/Park	Chief Forestry Officer of Division/Park
Signature:				
Name:	Pema Drakpa	Tshewang Zang Dorji	Tshewang Zang Dorji	Kesang Dorjee
Date:	27/4/2023	27/03/2023		Offg. CEO.

REVIEWED AND RECOMMENDED FOR APPROVAL

	Reviewing Officer, FRPMD	Chief forestry Officer, FRPMD	Head of the Department
Signature:			
Name:	Kerang Wangma	SONAM TOBGAY	
Date:	15-4-23	1-5-23	

Approved by;

NOTESHEET

Subject: Approval of NWFP Management Plans

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. In order to ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group. Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area. As such the Forest Resource Planning and Management Division had received and reviewed the following plans submitted and hereby submitted to seek approval:

1. Yumzang Semthuen NWFP Management & Marketing Group, Sakteng Gewog, Tashigang
2. Gangri Phuensum Ngomoen Tshogpa, Naro Gewog, Thimphu
3. Lauri Gaki Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
4. Momring Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
5. Thekcho Choling Goenpa Shingmein Tshogpa, Lauri Gewog, Samdrup Jongkhar
6. Woonthi Shingmein Natshok Thundrel Tshogpa, Lauri Gewog, Samdrup Jongkhar
7. Zangthi-Tshothang Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
8. Patpanadang Shingmein Dondrup Tshogpa, Lauri Gewog, Samdrup Jongkhar

As per the Forest and Nature Conservation Act of Bhutan, 1995, such plans are required to be approved by the head of the Ministry. Submitted for kind approval.

Dax Received No. 67
Date 3/5/2023

Part A: General Information

1. Background

Yumzang Semthuen Non-wood Forest Management and Marketing group is the sub-group of the Yumzang Semthuen community forest. The CF was established in 2009 in Joenkhar by Sakteng Wildlife Sanctuary encompassing an area of 450 ha with 55 household members actively participating in community forest management. It falls within Joenkhar Chiwog covering four villages; Joenkhar, Murbee, Serdham, and Bumpalock under Sakteng Gewog. It was established in the year 2009 with plan period of 10 years. The revised CF area covered 352 hectares with 60 households under Joenkhar Chiwog with population of 350.

The area falls under Cool Broadleaved forest with dominant species of *Rhododendron arboreum*, *Quercus lanata*, *Alnus nepalensis*, *Schima khasiana* and *Lyonia* species with under growth vegetation of *Daphne* species. Sokshing, private land, tsamdro and other government institutions located within the CF boundary were all excluded from the CF area. The grazing on Tsamdro within CF area is allowed without any restrictions as per the interest of community and recommendation made from the CFMG members.

The *Daphne* group will be a part of Yumzang Semthuen community forest where the members of community forest will also be a member of *Daphne* group and will be allowed to harvest the species as per the guideline within the community forest. The group was formed with an aim to improve the living standard through income generation and allow sustainable harvesting of the species. The marketing of the products shall be done adhering to the bylaws under this management plan.

2. Survey Method

A participatory mapping was done on Google earth after consultation with the community forest members of Joenkhar range. The area was demarcated, plotted and validated in the field. The total area was calculated using the google earth and the area was divided into 5 blocks namely Jangma Teng, Nuengma Nyesa, Paysang Churong, Bamchen Mo, Rechipa Zor. The area was divided in 5 blocks in order to allow rotational harvesting leading to proper growth of *Daphne* species. A sampling intensity of 1% was taken from the total estimated area to determine the numbers of plots. A sample plot to plot distance of 100m was determined using QGIS.

3. Goal and objectives

- Sustainable harvesting of *Daphne* within the Community Forest.
- Increased income generation to the group through the sale of *Daphne*.
- Conservation of *Daphne* species through proper harvesting techniques.

4. Description of Species

There are 5 species of Deynap in Bhutan: *Daphne involucrate*, *D. bholua*, *D. sureil*, *D. retusa* and *D. ludlowii*, and only one species of the genus *Edgeworthia*, namely *Edgeworthia gardneri* (Deykap). Both genus belong to the family of Thymelaeaceae. *Daphne bholua* is a shrub of 1-3.5 m in height and occurs in evergreen oak, spruce, hemlock, fir and blue pine forests at an altitude of 1950-3400 m.

In general Deynap grow well under shade on gentle slopes in moist conditions in rich organic humus overlying well-drained sandy loamy soils. It doesn't grow well on the southern aspect but thrives well on the other aspects. In general, flowering starts when the plant is about 2-3 years old during January to March while the seeds ripen in September.

For Deynap, under broad leaf forest on north facing slopes at an altitude between 2300 and 2700 m, the average growth is about 0.5 cm in diameter per year. The growth rate of Deynap is slower and coppices well when cut. However, the stem should be cut diagonally to avoid rotting of the remaining stump.

Table 1. Detail information on *Daphne* and its uses

<i>NWFP name</i>	<i>Harvesting area(s) (name)</i>	<i>Parts harvested</i>	<i>Use purpose (traditional & others)</i>	<i>Harvesting season (months)</i>	<i>Estimated quantity that can be collected in each season</i>
<i>Daphne bholua</i> (Deynap)	Jangma Teng, Nuengma Nyesa, Paysang Churong, Bamchen Mo, Rechipa Zor	Bark is harvested at 10cm from ground	Bark is harvested and dried for paper making	March to June	300 kg of dry weight can be collected from a block per year

5. Harvesting prescriptions for sustainable NWFP harvesting

- Cut the stem at 10 cm above the ground to promote regeneration of shoots through a coppice system. As a rule of thumb this is at the height of a fist with the thumb up. The bark is peeled off after the stem is cut.
- Cut the stem slanting to avoid rotting of the remaining stump.
Cut only stems of more than 3 cm in diameter at 10 cm from the ground; it is recommended to harvest as late as possible because the bark increment increases significantly over the years.
- Care should be taken not to destroy/damage the remaining young stands, seedlings and saplings of Deynap and Deykap while harvesting.
- Surrounding trees should not be felled in order to clear the area to ease the harvesting of Deynap and Deykap

- The walking distances from village till the harvesting areas (hours/days): 3 hours
- Estimated size of the harvesting areas (acres or ha) : approximately 108 ha/266 acres
- Estimated quantity of NWFP that can be collected per harvesting season from the area: 300kg
- The NWFP members will harvest *Daphne* from Jangma Teng block in the 1st year followed by Nuengma Nyesa, Paysang Churong, Bamchen Mo and Rechipa Zor in the 2nd, 3rd, 4th and 5th year respectively. During the first harvesting year except Jangma Teng block, rest of the block will be left undistributed for regeneration.

Table 2. Harvesting prescriptions for sustainable harvesting of *Daphne*

Name		Part(s) harvested	Use(s)	Market		Harvesting period	Remarks
Scientific	Local			Domestic	Export		
<i>Daphne bholua</i>	Dheynap (Dz), Kaga-tey, Kagati, Lokta in (Lh) Shigushing (Sh), Sinshing Namakarpoo (Traditional medicine)	Bark	Traditional Bhutanese paper	√	-	March to June	The harvesting area will be divided into 5 blocks for harvesting of <i>Daphne</i> . The harvesting will take place in one block each year and remaining blocks will be left undisturbed for regeneration. This way, the harvesting will be rotated over the five blocks in order to maintain the sustainable harvesting of <i>Daphne</i> resources (<i>Daphne</i> takes 5 years to produce stems of more than 3 cm in diameter)

Figure 1. Google map of *Daphne* collection area under Joenkhar Range

6. Marketing and sales plan

Daphne, a plant widely used in paper making during ancient times is a species of flowering shrub belonging to family Thymelaeaceae. The *Daphne* species found in Joenkhar area will be marketed to Trashiyangtse Dzongkhag coordinated by Chairman along with Secretary and treasurer. The group shall harvest an estimated quantity of 300 kg per season and will be sold to the outlet at a price of Nu. 65/kg generating a total revenue of Nu. 19,500 per year.

Table 3. Marketing and sales plan

NWFP	Potential market	Estimated quantity for sale per season (unit)	Form of Products (dry/fresh)	Expected price per unit	Total (Nu)
<i>Daphne Bholua</i> (Deynap)	Within Bhutan, Trashiyangtse	300kg	Dry	Nu. 65/kg	Nu.19,500

7. Marketing arrangements

The group shall harvest the *Daphne* species on a rotation basis for sustainability and to encourage proper growth. The species shall be harvested from March till June with every members involved in harvesting and collection time. Absentee during collection period will be fined Nu.400 per day. A proper harvesting technique will be used to harvest the species to avoid unnecessary damage to the plant. After drying, the species shall be transported to market lead by Chairman, Secretary and Treasurer. The executive committee responsible for marketing will be admissible of Nu. 500 per day to cover the food expenses and a transportation charge

of Nu. 6500 will be incurred for marketing the product to Trashiyangtse. The remnant revenue shall be deposited in the joint bank account.

Table 4. Procedure for NWFP harvesting, marketing and sharing of income

Activity	Procedures
Harvesting of products	Cut the plant at 10 cm above the ground level (the left stump will regenerate in the following growing season). Cut only stems that are more than 3 cm in diameter. Do not damage the remaining young stands, seedling and saplings Do not fell the surrounding trees in order to clear the area to ease harvesting. Harvesting of <i>Daphne</i> shall be done from March to June
Postharvest practices	Divide harvesting area into 5 blocks for <i>Daphne</i> . Harvesting is rotated over the 5 blocks so that harvesting takes place only in one block per year (<i>Daphne</i> takes 5 years to produce stems of more than 3 cm in diameter). By the time the harvesting rotation reaches the first block, the block becomes harvestable.
Marketing of products	The bark of the <i>Daphne</i> will be harvested and dried. The dried product will be marketed to Trashiyangtse by the executive committee.
Income sharing	The total benefit generated will be deposited in the joint bank account. Daily allowance will be admissible only during the time of marketing.
Raising of community development fund	NA
Payment to committee members for their service	Chairperson, Secretary and Treasurer will be responsible for marketing the products. A daily allowance of Nu. 500/- will be paid per person during the time of marketing/meeting.

8. Benefits to the member

As projected below (Table 5), the group shall sell an estimated quantity of 300 kg per season and generate a revenue of 19,500 with total benefit of Nu. 12,820. The total profit generated shall be deposited in the joint bank account. An Executive Committee (Chairperson, secretary & treasurer) shall be responsible for planning the marketing of the product and will be admissible for a daily allowance of Nu. 500 during the time of marketing.

Table 5. Financial projection from the sale of *Daphne*

Sl. No	Particulars	Total Amount (Nu)		
		<i>Daphne</i>		
1	Revenues			
a	Total quantity (unit)	300kg		
b	Market price (Nu per unit)	Nu. 65/kg		Nu. 19,500/-
c	Total revenues from forest product sales (a*b)			
A	Total revenues			Nu. 19,500/-
2	Expenses			
a	Packaging materials			
b	Royalty	Nu. 180		Nu. 180/-
c	Transportation costs	Nu. 6500		Nu. 6500/-
d	Compensation fee to executive committee for marketing products	NA		
e	Contribution to community development fund	NA		
f	Incidental expenses	NA		
B	Total expenses	Nu. 6680		Nu. 6680/-
C	Total benefit (net-income) of group members (total revenues A – total expenses B)			Nu. 12,820
D	Average income to group members (C/ no of group members)			Nu. 233
E	Price per unit paid to group members (C/1a)			42.7

Part B: Group's BY-LAW

Table 6. By-Law for NWFP group

NWFP management & marketing group members	Responsibilities and rights of members: ➤ Participate in planning and decision making process. ➤ Attend meetings when deemed necessary. ➤ Contribute labor force during harvesting and collection. ➤ Elect executive committee. ➤ Report illegal extraction/sale of <i>Daphne</i> by members or outsiders. ➤ Right to transparency for resources and financial transaction.
NWFP management and marketing group management committee	Chairperson: Hrangchung, 17363357 Responsibilities of Coordinator/Chairperson: ➤ Organize and conduct Meeting. ➤ Act as agent between Government and member for technical and financial support. ➤ Check the forest produce allotment before approval. ➤ Have power over monetary control. ➤ Attend meetings related to NWFP management both within and outside Dzongkhag. ➤ Resolve conflicts/issues within member and the outsiders. ➤ Provide clearances after field validation for developmental activities that might be necessary to produce within the area. ➤ Impose fines and penalties to the offenders.
	Secretary: Dawa Tshering, 17350252 Responsibilities of Secretary: ➤ Assist chairman to conduct meeting. ➤ Keep minutes of meeting. ➤ Prepare annual work plan in consultation with Chairperson and CFMG management committee. ➤ Record keeping of collection activity including labour attendance register. ➤ Present progress report during annual meeting. ➤ Accompany with Chairman for related work
	Treasurer: Jamyang Tashi, 17261519 Responsibilities of Treasurer: ➤ Present annual accounts (income and expenditure) during general meeting. ➤ Collect annual fees and deposit in common account. ➤ Keep financial record. ➤ Present financial report during general meeting. ➤ Accountability of financial matter related to NWFP.
Tenure of committee member	The executive committee of NWFP group and their tenure will be same as that of community forest which is for three years.

<i>Incentives to the committee members</i>	Executive committee shall be responsible for marketing of the products. A daily allowance of Nu. 500/day will be paid to the marketing team as an incentive and while attending a meeting. However during a meeting if food and lodging are provided, Nu.250/head will be admissible.
<i>Membership Registration fee and annual contribution</i>	A person who becomes a member of CF will become a member of NWFP group by default. An individual shall become a new member after paying new membership entry fee Nu.3000. He/she shall be accepted on contribution of Nu.100/- annually as membership fees.
<i>NWFP group fund management and utilization</i>	The fund generated will be deposited in joint saving account of CF but a separate record book will be maintained. The expenses for executive committee while marketing the product shall be met from the group fund.
<i>Conflict resolution</i>	In case disputes or conflicts among communities arise about access to certain areas for NWFP harvesting; the matter shall be put to the Gewog Tshogchung (GT) Dzongkhag Tshogdu (DT) for further decision. Conflicts within the NWFP Management Group, which cannot be resolved by the group members shall be forwarded to the coordinator for settlement. If the case cannot be resolved, it shall be forwarded to the Gewog Administration. In case there is a conflict between the NWFP Group and outsiders, the case shall be forwarded to the Gewog Administration by the Coordinator.
<i>Meeting and purpose</i>	Meetings will be integrated with the community forest annual meeting to ease expenditure and time. The group shall meet separately only during the time of emergencies.
<i>Penalties</i>	Absent from work: Nu. 400/- per occasion Absent from meeting: Nu. 300/- per occasion Non-members encroaching and collecting the NWFP species will be fined Nu. 100/- per kg (dry weight) Members not adhering to harvesting guidelines will be fined Nu.65/- per Kg (dry weight) *Weight will be calculated measuring the diameter at D10 and their corresponding dry weight.
