

**MANAGEMENT AND MARKETING PLAN
FOR
NEY KUENPHEN JAKPAI TSHOGPA (NWFP)**

**NEY CHIWOG, GANGZUR GEWOG, LHUENTSE
DZONGKHAG**

Plan Period from 20/12/2022 to 20/12/2027

NOTESHEET**Sub: Approval of NWFP Management and Marketing Plan**

The Non wood Forest Products are the important source of livelihood to many rural communities in the country. In order to ensure sustainable management of resources in the wild, management responsibilities are handed over to the communities through formation of Non wood Forest Products Management and Marketing Group. Further, it is mandatory for the group to prepare resources management and marketing plan and submit for approval by the head of the ministry through chief forestry officer of the area and the Social Forestry and Extension Division (SFED). Accordingly, the following community group have prepared plan and submitted to SFED to seek an approval. The main aims defined in the plan is to increase households additional income through sustainable management and marketing of NWFPs specified in the plan. The plans are:

1. Yangkharsheng Non wood Forest Product Management and Marketing Plan, Dramitse Gewog, Mongar.
2. Batasey NWFP Management and Marketing Group, Kikhorthang Gewog, Tsirang.
3. Ney Kuenphen Jakpai Tshogpa, Gangzur Gewog, Lhuntse.

As per the **Forest and Nature conservation Act of Bhutan, 1995** such plans are required to be approved by the head of the Ministry. Submitted for kind approval.

Part A: NWFP management and marketing plan

1. Background

Ney Kuenphen Jakpai tshogpa, a Non-wood Forest Products (NWFP) management and marketing group has 61 households from Ney and Zhesar villages respectively. The villages falls under Ney chiwog under Gangzur Gewog and has 115 households with population of 1050 people living inside Park area (Dzongkhag Portal, 2020). The registered members mainly depends on agricultural activities for livelihood and Non-wood Forest Products (NWFP) ar collected for income generation. Ney and Zhesar are the two largest villages under Ney Chiwog. This graph indicates the total number of participants hailing from both Ney village and Zhesar who have actively registered as the member for Ney Kuenphen Jakpai Tshogpa. By going through graph, Ney village has 34 participants and Zhesar has only 27 participants.

Paris Polyphylla is a perennial herbaceous plant that belongs to the family Melathiacea and has medicinal value. In Sharchop and Lhotsampkha, it is called Thogsampa and Satuwa respectively. The species has been recognized as one of the commercial crop which has potential to generate income for the household in recent years. The temperate genus Paris is a perennial herb with slender or thickened rhizomes, erect stem and bisexual flowers. The fruits are berry like capsule and contains many seeds. The diversity and abundance of Paris polyphylla and its associated species has largely declined due to illegal collection and unsustainable collection (SFED, 2012).

Few years back, the group members had no idea on its collection and marketing procedures. However, community had strong sense towards sustainable collection and access to market. A group represents diverse background and came all in one thought to establish group in order to achieve aims and objectives of the community. To generate income and to promote livelihood of communities, devise approaches towards sustainable collection are few objectives of the group wished to be accomplished by the end of plan period.

With this group formation, around 2609.9 Ha of state reserved forest land on which the Ney Chiwog communities have traditional right will be managed by 61 households. The boundaries of the area proposed to be managed are; In the east, Serdewa_Kinjiri with 648 Ha, Khanpalung_Yangringangchhu with 1731 Ha in south , Khargang_Druksum with 184 Ha in the west and Ney village_Kurichhu basin with 46.9 Ha in North.

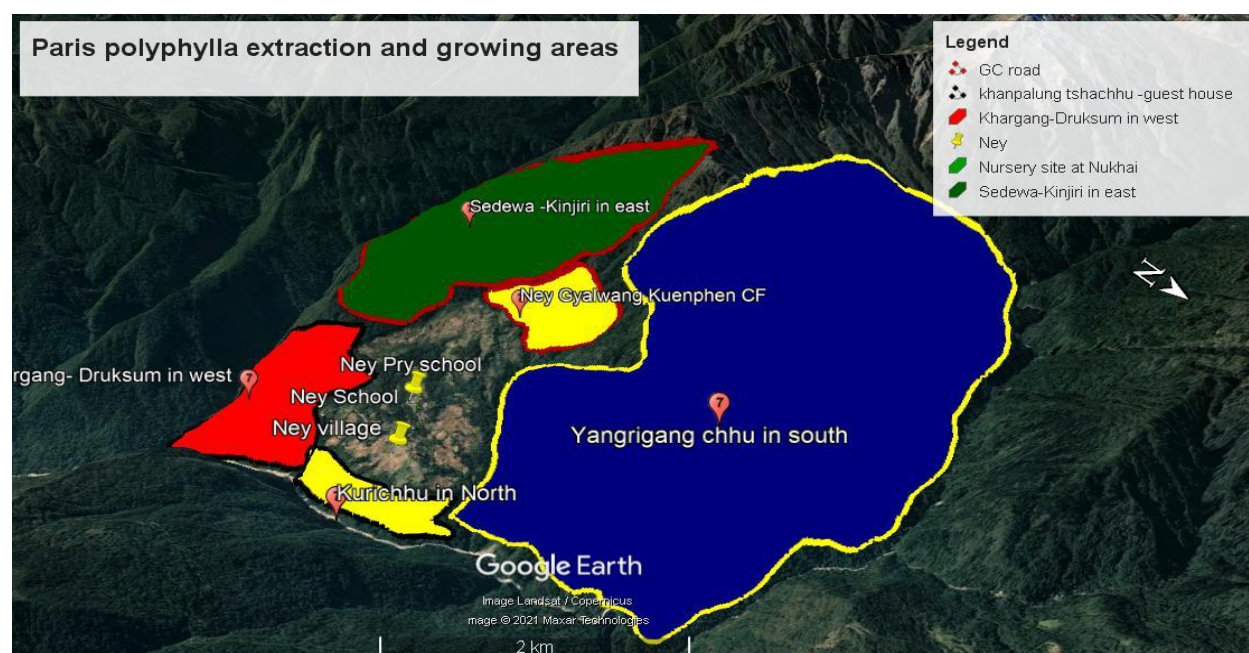

Dungkar Park Range has no reliable data on how collection and sale of *Paris Polyphylla* has brought positive impacts on socio-economic livelihood of community. However, in the recent years, it is noted that income generated from sale of *Paris polyphylla* has added amenities in the community. It was sold mostly to traders who visited their village.

The maize and paddy are the staple cereals grown by communities of Ney and Zhesar villages. Besides these, the communities also depends on vegetable farming and livestock as alternative source of income. Around 10% of the total registered members are literate. As the villages are surrounded by thick forest, there are notable non-wood forest products (NWFP) including *Paris Polyphylla*. To collect it for commercial purpose, a group has been formed and only hope community aspire is the formulation of official group which would better and expected to coordinate both collection sale. Through sale of products, it would alleviate the overall living condition of people living in the community.

1.1 Demographic information on its members

The public of Ney chiwog has proposed to set up group, Ney Kuenphen Jakpai Tshogpa with 61 households from Ney and Zhesar villages. According to the Gewog portal,Gangzur there are 115 households under Ney Chiwog of which only 61 (53%) of total households have registered as member in the group. Of the 61 households 34 (55%) are from Ney and 27 (44%) from Zhesar. Women dominate the membership, as 42 members are female and only 19 are male.

1.2 Area Information

Excluding private registered land, the group (61 households) will manage an area of 2609.9 ha which is 6263.76 acres. The elderly people and those participants who have experience about the places share that they can well manage state reserved forestland through NWFP group.

Sl No	Place	Direction	Area (Ha)
1	Serdewa-Kinjiri	East	648 Ha
2	Khanpalung tshachhu-Ynagrigangchhu	South	1731 Ha

3	Khargang-Druksum	West	184 Ha
4	Below Ney village and Kurichhu basin	North	46.9 Ha
	Total area	All directions	2609.9 Ha

Khanpalung tshachhu –Yangrigangchhu has highest area

Strategic location proposed above are the growing areas of *Paris Polyphylla* and they are hopeful to manage area through conducting patrolling as per the by-laws. The formation of Non-Wood Forest Product group would not only promote the overall livelihood of the community but it is a good opportunity to manage the State Forest Reserved Land (SRFL) collectively.

2. Goal and objectives:

2.1 Goal

Improve livelihood of communities through additional income opportunities

2.2. General Objectives

Increase income through sustainable management and marketing of *Paris polyphylla*

2.3 Specific Objectives

The specific objectives are as given below:

- To conserve wild *Paris polyphylla* and generate income from sale.
- To enhance easy access to market through institution of group marketing system.
- To institute good governance system in forest resource management.

3. Description of NWFPs present in the area demarcated for management by the group

The intensity of collection of *Paris polyphylla* rhizome is increasing every year posing threats to its sustainability and management in the future. It is found growing in and around Ney –Zhesar villages and ridges. The managing the sustainability of *Paris polyphylla* entirely depends on management by group members. The collection and sale of products would further boost local economy of the village. This will help alleviate the poverty and promote the livelihood of community.

Besides *Paris polyphylla* other NWFPs such as *Rubia spp*, *edible ferns* and *Acorus calamus* are found in the area. However, the communities wish to collect only *Paris polyphylla* based on the market value and availability.

Table 1: Brief description of NWFPs for commercial harvesting

NWFP species	Harvesting prescriptions for sustainable harvesting				
	Who	Where	When	What	How
<i>Paris polyphylla</i>	Members of Ney Kuenphen Jakpai Tshogpa	1. Khargang Druksum 2. Serdewa 3. Kinjiri 4. Yangrigang	October- November	Rhizomes	The harvesting shall be done as per the provisions and guidelines for harvesting NWFPs.

4. Harvesting prescriptions for sustainable NWFP harvesting

The sustainability of resources in the wild will depend on collection methods and its intensity and frequency of collection. In order to ensure sustainable collection of resources, quantity to be collected in a year and harvesting prescription to be followed are detailed in table 2.

Table 2: Harvesting prescriptions for sustainable harvesting

NWFP name	Harvesting area(s) (name)	Parts harvested	Use purpose (traditional & others)	Harvesting season (months)	Estimated quantity that can be collected in each season/annually
<i>Paris polyphylla</i>	Khargang-Druksuma	Rizhome	For trading	October & November	2000kg
	Serdewa				2000kg
	Kinjiri				1200kg
	Yangrigang chhu				1300kg

5. Marketing and sales plan

After tactful collection or harvest of *Paris polyphylla* have both domestic as well as exportable opportunities. Thus, products shall collect and marketed annually based on the availability of markets/buyers and price shall be as per the prevailing rates. The concise & prescriptive marketing and sale plans of *Paris polyphylla* is shown below: The sale of *Paris polyphylla* shall be in line with prevailing rules and regulation of NWFP framework and marketing procedures.

5.1 Sales plan and procedures.

As per the management plan, collection of NWFPs will initiate by individual members sooner after the announcement of collection season by the concern committee members prior to realizing collection permits.

The registered members of Ney Kuenphen Jakpai will leave for collection of product in season specified in table 04. The collection will also be carried out on rotational basis from the blocks. Those failing to join group for collection and patrolling may have to pay fines as per the by-laws.

Upon returning to home, the executive members of group shall instruct the every members to declare the products in the group for drying and packaging. From total sale amount only 40% will be given to the individual and 60% will directly go to group saving account.

The committee and group members will decide whether to call for auction or they may directly sell to valid NWFP license holders depending on the quantities and qualities. Based on the decision, group may also export upon acquiring required approval and documents. The group shall conduct meeting to endorse approval for marketing upon technical support from Dungkar Park Range Office. The auction or for sale through different methods can be announced through different channels to reach information to interested people.

Table 3: Marketing and sales plan

NWFP	Potential market/buyer	Estimated quantity for sale per season	Expected price per unit (Nu)	Annual Returns (Nu)
<i>Paris polyphylla</i>	Trade/sale	100kg	2000 @ per kg	200,000.00 for member(61 x 200,00.00)
		The above quantity is estimated based on the observation and experience shared and it may vary.	The rate for per kg will vary and 2000 per kg is based on the last year's rate. The price may vary and it would be applied as per market rate apart from auction.	The total sales may vary based on the quantity collected, total sale and price.
Total Revenue		For 100 kg	Total quantity shall be as per the rate (local market rate)	200,000.00
Total benefits to members in a year	For group, income generated from sale of product, 60% would be credited to group saving account and 40% shall be for individual.			
Actual benefits/members if work for maximum of 4 days				

6. Marketing arrangements

Prior to the collection, executive committee members will liaison with relevant traders and collect the demand ensuring that the group shall not trade with anyone without valid license or proper trading documents. If possible the group will convene meeting with trader and discuss on price, quality and quantity requirement of traders, means of transportation and other overhead expenses aspects shall deliberated during above event.

Depending on the demand, executive committee members and group will get transit permits/ITMO/IMO from the nearest Forest Range Office (Dungkar Park Range) and start collection. Based on the demand group members will maintain the standard of the products as agreed by trader (well-seasoned and dried (*Paris polyphylla*)).

6.1 Benefits to the members

The table below shows the financial projection of from sale of *Paris polyphylla* to the members.

Table 4: Financial projection of benefits to the members from NWFP sales

Sl. No	Particulars				Total Amount (Nu)	
1	Revenues	1st year	2nd year	3rd year	These values will vary based on certain factors.	
a	Total quantity (unit)	500 kgs	1000 kgs	1500kgs		
b	Market price (Nu per unit)	2000	2000	2000		
c	Total revenues from forest product sales (a*b)					
A	Total revenues					
2	Expenses					
a	Packaging materials or storing materials for NWFP
