Part I: NWFP management and marketing plan

1. Background/Introduction

The cross-cutting management plan for Tangpa Shingmen Menrig Detshen is formed for sustainable management of high-altitude medicinal plants (NWFPs) falling within the jurisdiction of the Wangchuck Centennial National Park.

Wangchuck Centennial National Park is one of the largest national parks in the country, covering 4,914 square kilometers spanning over five Dzongkhags and nine Gewogs. The park ranges from 1350 to 7500 meters above sea level, creating various environments from warm broadleaf forests to alpine meadows. The Park is crucial for the country's water supply, feeding four major rivers; Punatshangchu, Mangdichu, Chamkharchu, and Kurichu—important for generating hydropower. Because of its varied altitude, the park supports a wide range of plant and animal life, including over 693 types of plants, 44 mammals, 251 bird species, 246 butterflies, and 5 fish species. The Park headquarters is located in Bumthang, at Nasiphel, Chokhor Gewog. There are four Range Offices across the park: Dungkar Park Range in the east, Sephu Park Range in the west, and Nubi and Chokhor Park Ranges in the center.

The Tang Guard Post is located at Taseygang, about one kilometre from the Messithang Gewog Center. It caters to public services to Tandigang and Khangrab Chiwog of Tang Gewog. The Tang Guard post covers an area of 263.29 sq. km with altitude ranging from 2700masl to 5400 masl, there are 47 households residing within the park and the majority of the communities that reside inside the park depend on agriculture and livestock for their livelihood.

Due to the diverse vegetation in nature from cool-broad leaved forest to alpine-scrub, the Park Range is home to various species of wild flora and fauna species. Some of the key species of wildlife found are Tiger, Red Panda, Bhutan Takin, and Musk Deer. Various species of high-altitude medicinal herbs are also found in the Cordyceps growing regions. Due to a lack of management plan, some species are illegally harvested by park residents and outsiders. The commonly collected species are *Nardostachys spp*, *Neopicrorhiza spp*, *Parispolyphylla spp*, *Ophiocordyceps sinensis*, *Rhodo spp*, *Juniper spp*. The formation of Tangpa Shingmen Menrig Detshen (TSMD) with 81 households will lead to sustainable management of high-altitude NWFPs and curb illegal harvest in their jurisdictions.

2. Management Goal/Objectives

- i. To sustainably manage, harvest, and market Non-Wood Forest Products in a way that supports conservation, enhances livelihoods, and promotes biodiversity.
- ii. Improve livelihoods by enhancing income-generating opportunities through the sale of NWFPs.
- iii. Establish mechanisms for regularly monitoring and evaluating NWFP management practices to ensure compliance with sustainability standards

3. Description of NWFPs present in the area demarcated for management by the group

Based on medicinal value and usefulness in home remedies the member of the NWFPs group proposed the collection of NWFPs as per the growing areas in different locations.

NWFP Local Name	Botanical Name	Name of Harvesting Area(s)	Description
Putashing	<i>Neopicrorhiza scrophulariifolia</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	• Dig up only mature rhizomes • Harvest rhizome only during the harvesting season • Do not uproot the entire plant • Leave the mother plant intact with a small portion of rhizome/root in the soil for its regeneration in the following year
Pangpoe	<i>Nardostachys jatamansi</i>	Surey, Chala, nepthokor, Kesbe brokser, Benzemi brokser, Chungling, Prakar chen, Thuen, Semori, Yangmari, Tsangkha phola	• Dig up and collect the rhizome by using a sharp knife • Do not uproot the entire plant • Leave the mother plant intact with a small portion of rhizome/root in the soil
Balu	<i>Rhododendron anthopogon</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	• Use sharp knife/scissors to cut branches to collect leaves and twigs
Sulu	<i>Rhododendron setosum</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	• Collect at maximum 20% of the leaves and twigs from an individual shrub to avoid over-harvesting
Tshendu	<i>Aconitum spp.</i>	Thowadra, Nathang, Kesbe brokser	• Toots are collected • Collect only 50% of the plants
Genshing	<i>Panax psuedogenseng</i>	Dazhim, Nang, Hemlock Forest	• Toots and rhizome are collected

			• Collect only 40-50% of the plants for sustainable
Tshengen Meto	<i>Meconopsis spp.</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	• Flowers and fruits • Used as medicals purpose
Wanglag	<i>Dactylorhiza hatagirea</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	• After shedding of flowering and turning of leaves and stem in yellow colour, it is ready to collect only 50% of the rhizomes are allowed to be collected as it may become extinct in future.
Jeli Namcho	<i>Exidia recisa</i>	Murti, Rakphai, Sangsama, Kharta, Phaiphala, Bonat, Phagchung, Tazambee, Sumthang Yungma, Khrithang, Ramzhi	• The collectors are instructed to collect without felling its mother trees • Do not set up fire as all the mother trees will wipe up
Dhem	<i>Maianthemum oleraceum</i>	Surey, Sangsama, Chala, Phubtha, Thuen, Semorey, Yangbari, Tsangkar	• Collects only young shoot • Its plenty and sustainability have not been questioned so far • Use as vegetables
Lhagob	<i>Allium pratii</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	• Used for vegetables • Got medicinal values too
Dungop	<i>Allium rhabdotum</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong,	• Used for vegetables • Got medicinal values too

		Totri, Benzemi brokser, Kesbe brokser	
Teyshing	<i>Hippophae rhamnoides</i>	Murti and whole Tang areas	- Do not cut mother trees - Collect only fruits - Medicals are high
Brangzhung	<i>Drosera peltata</i>	Murth, Wobthang, Shingma	- Whole plants - Only 70% is allowed for collection
Shoop	<i>Juniperus spp.</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Kesbe brokser	- Only leaves are allowed for collection - Do not cut the tree/branches (falls under special class category)
Tsab tseb	<i>Pleurospermum amabile</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	- whole plant materials - collect only 30% of the plants
Dungshing	<i>Tsuga dumosa</i>	Praker chen, Febila, Surey	- Only leaves are allowed for collection - Do not cut the tree/branches (falls under special class category) - Do not fell mother trees
Shaw rapchu	<i>Thamnia vermicularis</i>	Chungling, Thuen, Nathang, Surey	- Collects leaves only - Use a sharp dragger while cutting
Tsem	<i>Fritillaria cirrhosa</i>	Nathang, Yangmari	- Used only leaves for local tea preparations - Do not cut mother trees
Tsigka	<i>Gerardiana spp.</i>	Namdating, Gamling broksar, Nathang, Semgang, Chungling, Khargang, Dubala phu, Tshomekshi, Phala, Nazham lum, prakar chen, Gabcha pong, Totri, Benzemi brokser, Kesbe brokser	Collected rhizome

4. Trends of NWFPs collected for the past three years

Sl. No	Species	Local Name	Quantity of harvested dried NWFP (Kg) over last 3 years			Average dried NWFP production (Kg)	Name of areas
			Year 1	Year 2	Year 3		
1	<i>Neopicrorhiza scrophulariifolia</i>	Putashing	2000	1500	1200	1566.66	Already mentioned above
2	<i>Nardostachys jatamansi</i>	Pangpoe	100	100	90	96.66	
3	<i>Rhododendron anthopogon</i>	Balu	2000	1500	2000	1833.33	
4	<i>Rhododendron setosum</i>	sulu	1500	2000	1400	1633.33	
5	<i>Aconitum spp.</i>	Tshendu	0.5	1	1	0.88	
6	<i>Panax psuedogenseng</i>	Genshing	1	2	3	2	
7	<i>Meconopsis spp.</i>	Tshengen meto (མེ་ཁྲོན་མེ་ཏོག)	1.5	2	2.5	2	
8	<i>Dactylorhiza hatagirea</i>	Wanglag	2	3	2	2.33	
9	<i>Exidia recisa</i>	Jeli namcho	10	9	11	10.00	
10	<i>Maianthemum oleraceum</i>	Dhem	20	50	60	43.33	
11	<i>Allium pratii</i>	Lagob	3	4	4	3.66	
12	<i>Allium rhabdotum</i>	Dungop	2	3	4	3.66	
13	<i>Hippophae rhamnoides</i>	Teyshing	4	7	12	7.66	
14	<i>Drosera peltata</i>	Brangzhung	10	10	10	10	
15	<i>Juniperus spp.</i>	Shoop	3500	4000	4500	4000	
16	<i>Pleurospermum amabile</i>	Tshab tseb	1	1	1.5	1.17	
17	<i>Tsuga dumosa</i>	Dungshing	3500	4000	4500	4000.00	
18	<i>Thamnia vermicularis</i>	Shaw rapchu	1	1	1.5	1.16	
19	<i>Fritillaria cirrhosa</i>	Tsigka	5	8	7	6.66	
20	<i>Gerardiana spp.</i>	Tsem	10	12	15	12.33	

5. Description of NWFPs present in the area demarcated for management by the group

Based on medicinal value and usefulness in home remedies the member of the NWFPs group proposed the collection of NWFPs as per the growing areas in different locations.

Sl. No	Scientific Name	Local Name	Collection season	Cost/Kg/Sack	Parts Used
1	<i>Neopicrorhiza scrophulariifolia</i>	Putashing	August-November	1000/kg	Rhizome
2	<i>Nardostachys jatamansi</i>	Pangpoe	August-October	500/kg	Rhizome

3	<i>Rhododendron anthopogon</i>	Balu	August- October	800/sack	Leaves
4	<i>Rhododendron setosum</i>	Sulu	August- October	800/	Leaves
5	<i>Aconitum spp.</i>	Tshendu	August- October	NA	Rhizome
6	<i>Panax pseudoginseng</i>	Genshing	September- November	1250/kg	Rhizome
7	<i>Meconopsis spp</i> (Excluding <i>M. gakyidiana</i>)	Tshegen Metog	September- November	600/sack	Whole plants
8	<i>Dactylorhiza hatagirea</i>	Wanglag	August- October	1000/kg	Flower
	<i>Exidia recisa</i>	Jelli Namchu/	All year round	15000/kg (dry)	Whole plants
10	Yellow Chanterelle	Sese Shamu	All year round	500/kg (dry)	Whole plants
11	<i>Maianthemum oleraceum</i>	Dhem	June -August	1250/kg (dry)	Whole plants
12	<i>Allium pratii</i>	Lagob	June-August	70/packet	Whole plants
13	<i>Allium rhabdotum</i>	Dungop	June-August	70/packet	Whole plants
14	<i>Hippophae spp./ sea-buckthorn</i>	Teyshing	November- December	100/kg (wet)	Fruits
15	<i>Drosera peltata</i>	Brangzhung	June-August	800/kg (dry)	Whole plants
16	<i>Juniperus spp.</i>	Shoop	All year round	800/sack	Branches
17	<i>Pleurospermum amabile</i>	Tshab tseb	August- October	100/kg	Whole plants
18	<i>Abies densa</i>	Dungshing	All year round	800/sack	Branches
19	<i>Thamnolia vermicularis</i>	Shaw rapchu	All year round	700/kg (wet)	Whole plants
20	<i>Fritillaria chirrhosa</i>	Tsigka	Septmber- October	1000/kg (dry)	Rhizome
21	<i>Ephedra gerardiana</i>	Tsem	All year round	200/kg (dry)	Whole

6. Brief description of commercial and harvesting season in each season.

Local name of NWFPs	Harvesting area name	Parts harvested	Use/Purpose (Traditional and others)	Harvesting season	Estimated quantity
Putashing	Mentioned already	Rhizome	Medicines	Aug-Nov	16000kgs
Pangpoe	Mentioned already	Rhizome	Medicines and Incense	Aug-Oct	100kgs
Balu	Mentioned already	Leaves	Incense	Aug-Oct	190 kgs
Sulu	Mentioned already	Leaves	Incense	Aug-Oct	1650 kgs
Tshendu	Mentioned already	Rhizome	Medicines	Aug-Oct	1.5 kgs
Genshing	Mentioned already	Rhizome	Medicines	Sept-Nov	3 kgs
Tshengen Meto	Mentioned already	Flowers	Medicines	Sept-Nov	3 kgs
Wanglag	Mentioned already	Rhizome	Medicines	Aug-Oct	2.5 kgs
Jeli namcho	Mentioned already	Whole	Vegetables & medicines	All year round	10 kgs

Sew shamong	Mentioned already	Whole	Vegetables & medicines	All year round	72 kgs
Dhem	Mentioned already	Tender shoots	Vegetables	Jun -Aug	44 kgs
Lagob	Mentioned already	Rhizome and leaves	Vegetables & medicines	Jun-Aug	4 kgs
Dungob	Mentioned already	Rhizome and leaves	Vegetables & medicines	Jun-Aug	4 kgs
Teyshing	Mentioned already	Fruits	Medicines	Nov-Dec	8 kgs
Brangzhung	Mentioned already	Whole plants	Medicines	Jun-Aug	10 kgs
Shoop	Mentioned already	Whole plants	Incense	All year round	4000 sacks
Tshab tseb	Mentioned already	Whole plants	Yama medicines	Aug-Oct	2 kgs
Dungshing	Mentioned already	Whole plants	Incense	All year round	4000 sacks
Shaw rapchu	Mentioned already	Whole plants	Incense	All year round	1.5 kgs
Tsiga	Mentioned already	Rhizome	Medicines	Sept- Oct	7 kgs
Tsem	Mentioned already	Whole plants	Medicines	All year round	12.5 kgs

7. Harvesting prescriptions for sustainable harvesting of NWFPs

7.1 Collection Guidelines

- Two collectors from each household are allowed to gather forest resources. If the initial permit holder is unable to collect, another person from the same household may replace them with approval from the Chairman.
- The Chairman will apply for the permit through the Online Forest Service (OFS) after compiling a list of willing members.
- The Range Office will issue transit permits and collect royalty.
- According to group by-laws, the NWFP executive committee will monitor the illegal collection of resources beyond the allotted time. If Committee members detect any illegal collection, they will impose fines will be deposited into the group account.
- If Forestry officials need to intervene, fines will be collected according to government rules and regulations.
- Depending on this group's severity and frequency of illegal collection and selling, warning letters regarding suspension or cancellation of the NWFP Group certificate may be issued by DoFPS, WCNP, and Tang Guard Post, of Chokhor Park Range.

Table 1: Prescriptions for sustainable harvesting of NWFPs

NWFP Species	Basic guidelines and harvesting prescriptions
Putashing	▪ Dig up only mature rhizomes ▪ Harvest rhizome only during the harvesting season ▪ Do not uproot the entire plant ▪ Leave the mother plant intact with a small portion of rhizome/root in the soil for its regeneration in the following year
Pangpoe	▪ Dig up and collect the rhizome by using a sharp knife ▪ Do not uproot the entire plant ▪ Leave the mother plant intact with a small portion of rhizome/root in the soil for its regeneration in the following year
Balusulu	▪ Use a sharp knife/scissors to cut branches in order to collect leaves and twigs ▪ Collect a maximum of 20% of the leaves and twigs from an individual shrub to avoid over-harvesting
Tshendu	▪ Roots and rhizomes are collected ▪ Collect only 50% of the plants
Genshing	▪ Harvest mature ginseng by using a stick or trowel ▪ Do not collect immature plants before the seeds dispersal, so that we can maintain sustainability
Tshengen meto	▪ Flowers and fruits
Wangpo lagpa	▪ After shedding of flowering and turning of leaves and stem in yellow colour, it is ready to collect only 50% of the rhizomes are allowed to be collected as they may become extinct in future.
Jeli namcho	▪ The collectors are instructed to collect without felling its mother trees ▪ Do not set up fire as all the mother trees will wipe up
Sew shamong	▪ The collectors are instructed to collect without digging the soil ▪ Do not drug up the soil to maintain sustainability
Dhem	▪ Whole plants are used for curry and medicines too ▪ Do not uproot whole plants and collect only 70% of the plants
Lagob	▪ Whole plants are used for curry and medicines too ▪ Do not uproot whole plants and collect only 70% of the plants
Dungob	▪ Whole plants are used for curry and medicines too ▪ Do not uproot whole plants and collect only 70% of the plants
Teyshing	▪ Do not cut mother trees ▪ Collect only fruits
Brangzhung	▪ Whole plants ▪ Only 70% is allowed for collection
Shoop	▪ Only leaves are allowed for collection ▪ Do not cut the tree/branches (falls under special class category)
Tshab tseb	▪ whole plant materials ▪ collect only 30% of the plants
Dungshing	▪ Collect leaves ▪ Cut only branches ▪ Do not cut whole trees

Shaw rapchu	- Collects leaves only - Use a sharp dragger while cutting
Tsiga	- Collected rhizome - Collect only 70% from the collection sites
Tsem	- Used only leaves for local tea preparations - Do not cut mother trees

7.2 General information on the NWFP Collection Site

The sites for NWFP collection are chosen based on where the resources are available and the area covered by traditional community pasture land use boundary. After group discussion, it was decided to collect the NWFPs on a sustainable basis from the areas and in total there are 13424.95 hectares (33159.62 acres) as per the map demarcated by the group and the areas are as follows:

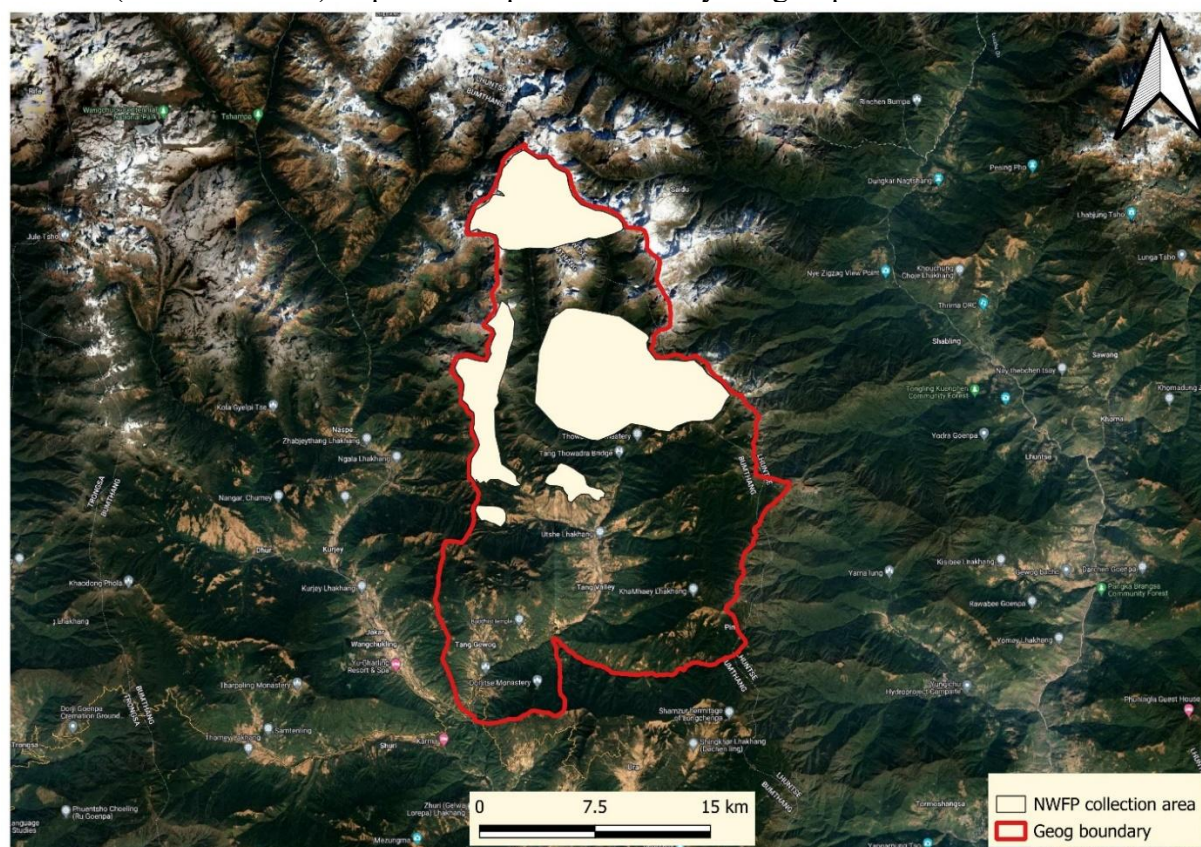

Figure 2: Google map showing collection sites

NWFP collection map

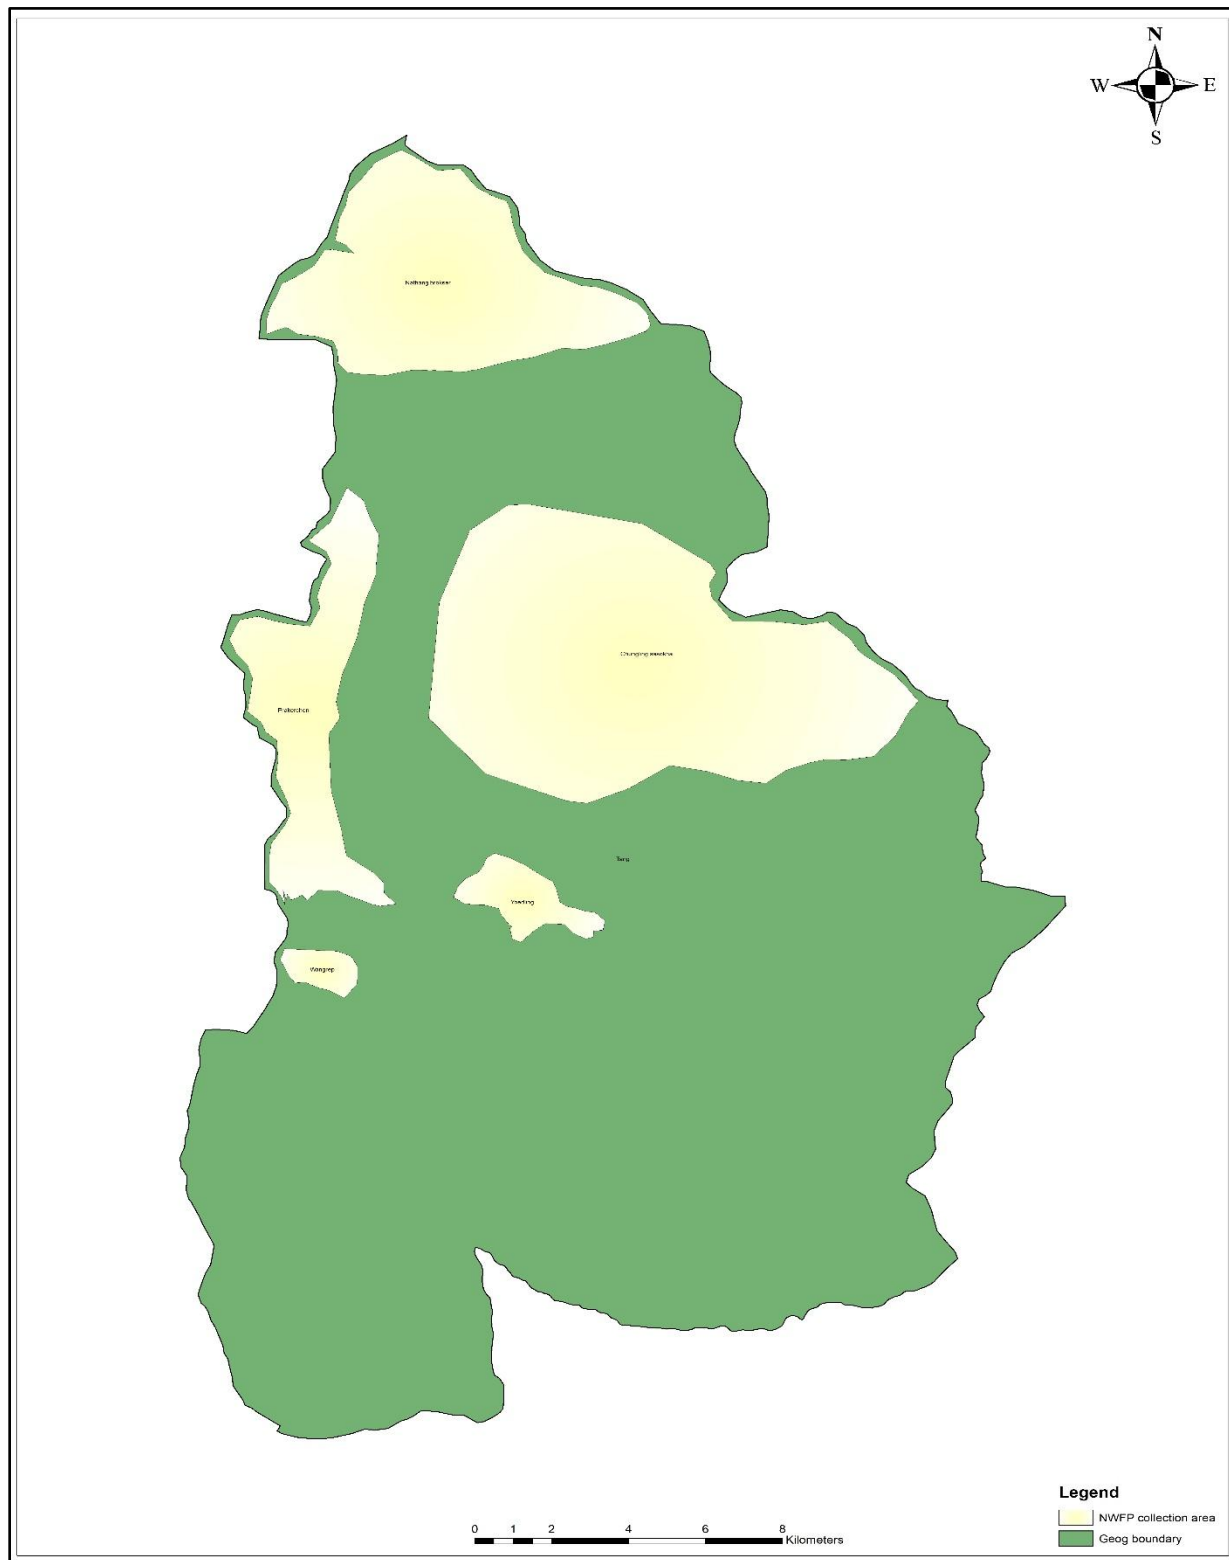

Figure 3: NWFP collection area for the group

8. Marketing and Sales plan

All NWFP products will be brought to a centralized location in Tang Gewog for sale through an approach that ensures fairness and transparency, with sales overseen by local leaders and NWFP committee members. By centralizing the sale process, transparency is upheld, protecting both sellers and buyers from unfair practices. Since different NWFP species have varying market demands and values, the executive committee may consider holding species-specific auctions or grouping similar products. This would simplify the auction process, make it easier for buyers to participate, and avoid the complexities of pricing dissimilar products in the same auction.

To maintain control over market pricing and ensure fair practices, individual sellers are prohibited from selling products directly to separate buyers. All sales must occur in the presence of designated officials, ensuring transparency and fairness for both parties. This restriction helps maintain a structured market that benefits the entire community.

The NWFP management committee will collect 5% of the total sales revenue from each seller. This fee will be contributed to the group's operational fund and deposited into a designated group account. The revenue collected will support future management activities, community development projects, or reinvestment into NWFP value chains, ensuring long-term sustainability and community benefit.

Auctions will be open to multiple buyers, including local traders and external markets. By allowing broader participation, competition is increased, which may drive up prices and provide sellers with better opportunities to maximize their earnings. To further refine the auction process, the executive committees could conduct market research to identify high-demand species and ensure the auction strategy is adapted accordingly. This proactive approach would help align the auctions with market demands, maximizing economic benefits for the community.

Table 2: Marketing and sales plan

NWFP (Local Name)	Potential market/ buyer	Estimated quantity for sale per season	Form of products (dry/fresh)	Expected price per unit (Nu)	Total (Nu)
Puta shing	Exporters/ TMD and local buyers	16000kgs	Dry	1000.00	16,000,000
Pangpoe		100kgs	Dry	500.00	50,000
Balu		190 kgs	Dry	800.00	152,000
sulu		1650 kgs	Dry	800.00	1,320,000
Tshendu		1.5 kgs	Dry	1250.00	1,875
Genshing		3 kgs	Dry	1250.00	3,750
Tshengen meto		3 kgs	Dry	600.00	1,800
Wanglag		2.5 kgs	Dry	1000.00	2,500
Jeli namcho		10 kgs	Dry	15000.00	150,000
Sese shamong		72 kgs	Dry	500.00	36,000
Dhem		44 kgs	Dry	1250.00	55,000
Lagob		4 kgs	Dry	70.00	280

Dungob		4 kgs	Dry	70.00	280
Teyshing		8 kgs	wet	100.00	800
Brangzhung		10 kgs	Dry	800.00	8,000
Shoop		4000 sacks	Dry	800.00	3,200,000
Tshab tseb		2 kgs	Dry	100.00	200
Dungshing		4000 sacks	Dry	800.00	3,200,000
Shaw rapchu		1.5 kgs	wet	700.00	1,050
Tsiga		7 kgs	Dry	1000.00	7,000
Tsem		12.5 kgs	Dry	200.00	2,500
Total Nu.					24,193,035

8.1 Marketing arrangements

- 1) All group members have equal access to the collection as per the management plan.
- 2) All NWFPs collected shall be sold through auction for which time and venue shall be fixed by Gewog administration.
- 3) The executive committee shall announce the auction date and venue to the group and shall organize the auction
- 4) Sale of NWFPs outside of the designated auction site and the period shall be considered an offence.
- 5) From every member, 5% of the sale amount from the auction shall be contributed to the group fund.

8.2 Benefits to the group

The management of the resources by the TSMD shall benefit the members as follows:

- 1) Monitor and have control over the resources from external illegal collectors.
- 2) Raising group funds will further benefit individual members from interest-free or low-interest loans or financial arrangements.
- 3) Alternative income generation besides livelihood on livestock products.

Table 3: Financial projection to the group from NWFP sales

Part II: Group's By-Law

1. Membership arrangement

Any person belonging to Tang Gewog holding gung, thram, and census registered in Tang Gewog shall have equal opportunity and rights to become a member of Tangpa Shingmen Menrig Detshen. Those families residing separately from the main household and running family independently shall be allowed to be NWFP members. Currently, the group has 83 households as a NWFP user group.

However, the following terms and conditions shall need to be fulfilled.

- Any new households willing to join the NWFP group will be allowed after submitting a written application to the Chairman.
- The executive committee members led by the Chairman will hold a review meeting to accept/reject the new membership
- Upon acceptance, the applicant must pay an entry fee of Nu.2000 if he/she joins in the first year, Nu.4000 in the second year, and Nu.5000 from the third year it will increase Nu.1000.00 yearly of the management plan to compensate for the activities carried out by other members. New members should comply with the management plan and group by-laws.

1.2 Membership withdrawal

Any member has the right to resign or withdraw from the group. However, his/her resignation from the group shall be accepted fulfilling the following terms and conditions.

- Submit withdrawal application to the Chairman.
- The Chairman will call for executive committee members to convene a review meeting.
- Acceptance or rejection shall be notified in writing by the Chairman
- Upon acceptance of membership withdrawal from the group, he/she can withdraw without paying any penalty.
- Once withdrawn from the group he/she will not be entitled to any benefits from the group and will not be allowed to register as a new member.

2. Responsibilities and rights of members

- All members have equal rights over the utilization of NWFPs within the demarcated areas and therefore have equal responsibility to protect and utilize the resources sustainably in all times to come.
- The group members shall work cooperatively for the benefit of the NWFP group at large.
- All group members shall attend meetings compulsorily and with enthusiasm whenever required.
- The group shall manage the NWFP resource on a sustainable management system.
- Ensure and maintain quality products during the time of auction.
- Monitor the demarcated areas to prevent illegal harvesting of NWFPs.
- Report to the Chairman of any illegal collectors are intercepted or observed
- Contribute labour during harvesting, marketing & enrichment activities.
- Right to elect as well as terminate executive members with the majority vote of two-thirds members present.

- The group shall protect/stop outsiders from collecting resources within the group's designated area.
- Every member shall avail collection permit after paying the permit fee and agreed royalty.
- All executive members will be directly terminated from the post if he/she indulges in the misuse of group fund

2.1 Roles and responsibilities of the Executive committee

Chairman

- Coordinate and chair the meeting.
- Coordinate the auctioning of the products in collaboration with the concerned Gewog Administration
- Solve conflicts that arise within the group or with outsiders.
- Explore market opportunities for NWFPs.
- Seek training and technical support from relevant organizations.
- Coordinate auction for the sale of products depending upon the volume of NWFPs collected.
- Ensure execution of management and marketing plans by the members.
- Announce harvesting season as per the management plan.
- Represent the group during the meeting or training outside the Chiwog/Gewog and Dzongkhag.
- He/she is the co-signatory (Secretary and Treasurer) for cash withdrawal from the bank.
- Liaison with concerned Agencies and traders and fix dates, price, and venues for marketing of NWFPs
- Maintain attendance registers for the groups
- Facilitate preparation of an annual work plan.
- To review the by-laws in consultation with the Tang Guard Post, and other relevant agencies.
- Shall be responsible for the availing permits for the group
- Maintain records on NWFPs collected and sold in a year and submit reports to concerned agencies or authorities

Secretary

- Chair the meetings in the absence of the Chairman.
- Assist the Chairman.
- Maintain records and share meeting minutes with relevant stakeholders.
- Assist the Treasurer in maintaining the cashbook and bank book.
- Check the quality of the products to ensure quality products are brought by members for sale.
- Maintain records of quantity collected, harvested records, and sale records.
- Prepare annual progress reports and submit them to the Chairman.
- Draft official correspondences and submit them to the Chairman for signing.
- Maintain stock registers for the group.
- Disseminate the latest market information to the members of the group.
- He/she is the joint signatory (Coordinator, Treasurer) for fund withdrawal from the bank.

- Present the physical progress and administrative process adopted by the group in the annual meeting.

Treasurer:

- Maintain cash transaction records
- Present accounts status and expenditure details during the annual general meeting of the group.
- Attend the auction with other members of executive committees.
- Serve as secretary when absent.
- Collect the fine and annual membership fees and deposit in the group saving account.
- Maintain financial records of quantity collected & quantity sold.
- Collect permit fees from members and hand them over to the range office.
- Co-sign with the Chairman while withdrawing funds from the Bank.
- Collect all contributions/donations and deposit to the group account.
- Maintain all records of withdrawal and deposit of expenditures of group fund.

Resoop

- He/she shall serve the term for one year.
- He/she shall inspect sites based on the order of the Chairman on a need basis and an ad-hoc basis.
- He/she shall submit the written report to the Chairman and a copy will be submitted to the Park Range Officer.
- All Resoops should be united to apprehend the offenders or illegal collectors and handover to the Chairman and settle the case with committee members

3. Tenure of Committee Members

- The committee members shall serve the term for 5 years provided he or she has willingness or no complaints from group members. Their selection will be based on 3rd majority of votes.
- Withdrawal or change of Committee members shall be discussed and decided during annual meeting.
- Resoops shall serve for one year and change as per the sequence appointed by committee members.
- The Resoop will be appointed by executive members on yearly

3.1 Incentives to the Committee Members

- Executive members will receive Daily Subsistence Allowance (DSA) and mileage reimbursement during revenue-generating activities based on group revenue and the number of group members involved.
- The committee members (Chairman, Secretary, and Treasurer) have agreed that they will not claim DSA during official meetings and tours if there are no other sources of funding Travel Allowance (TA) for committee members will be by the Bhutan Civil Service Rules 2023 (Nu.16/km).

- Committee members must obtain approval from the Gewog Thrizin for any official meetings and tours.

4. Source of Group of Fund

The following are the sources of fund for the group

- Membership registration fees collected from new members.
- Annual membership fee collection
- Fines from absentees in work and general group meetings.
- Fines from illegal sale and illegal harvesters.
- From sale of products seized during the patrolling.

4.1 Membership registration fees

New members who wish to join the group have to pay a sum of Nu.2000 if the applicant joins in the first year, Nu.4000 in the second year and Nu.5000 in the third year and will increase Nu.1000.00 every year of the management plan as membership registration fee. The treasurer of the group will collect and deposit in the group savings account within two weeks and maintain a cash deposit for future reference.

4.2 Annual contribution

- The group agreed to contribute Nu.100 as a membership fee in the first year and Nu.100 in the second and third years respectively. The annual membership fee shall be collected by the Treasurer during the annual meeting and he/she shall present all the financial transactions of one year on that day to maintain transparency.
- If the group members fails to pay the yearly membership, the membership fees shall increase double of the fees

4.3 Group fund management and utilization

- The funds in the bank shall be withdrawn by committee members only after a common consensus with group members. Such a decision will be taken during the Annual General Meeting.
- Donations and contributions shall be directly deposited in the group account by the treasurer.
- All the fines and penalties imposed and accumulated shall be deposited in the group account and maintain bank receipt for future reference.
- If the NWFP group gets cancelled permanently due to any reason, the total amount saved in the bank group account shall be divided among the active members

4.4 Loans and its Procedures

After accumulation of Nu.100, 000 group fund, committee members can allocate their fund for loan.

Eligibility criteria for loans

- Both group member and non-member can avail loan from the group fund but it has to be decided by the committee members.
- The borrower must be of 18 years and above.

- Only one member of the household is eligible for a loan at a time and should not have an outstanding loan from the group.
- The loan shall be disbursed only upon the drawing of an agreement between the borrower and the committee member.
- The loan shall be disbursed only upon the drawing of an agreement between the borrower and the committee member in the presence of Jabmi/witness.

4.5 Loan amount and ceiling

- The maximum amount of the loan of Nu.90, 000/- shall be disbursed to each applicant.
- The interest rate of 9% shall be charged per annum to the group members and 10 % to the non-members on the amount of loan availed.

4.6 Loan Term

- The repayment of the loan shall be within 2 years from the date of borrowing.
- However, all loans and other dues must be cleared before the expiry of the management plan.

4.7 Repayment Schedule and Process

- The borrowers have the freedom to pay the principal amount and interest within a term of the borrowing period.
- However, if the borrower fails to pay on the due date, he/she shall pay a penalty of 24 % annually.
- The treasurer must maintain proper records of all financial transactions.

4.8 Loan Approval and Disbursement Process

- Upon fulfilling the eligibility criteria, an applicant can apply to committee members.
- The borrower and Committee member shall sign the loan agreement before the loan disbursement.
- The loan agreement shall be prepared in two copies, one for the NWFP Management Committee and one for the borrower.
- The NWFP Management Committee shall withdraw/transfer the amount from their respective bank account and disburse to the borrower.

5. Conflict Management

Any conflict or dispute within the group or with outsider, shall be solved by the Chairman and executive committee. If the Committee members can't solve, the case shall be forwarded to Gewog Administration and if deemed necessary to Park Management.

6. Meeting and Purpose

- Group general meetings will be held once a year to present the activities conducted, present financial status, discuss any uprising issues, and collect the annual membership fee.

- The date of the meeting will be informed by the Chairman upon discussion with Committee members.
- An emergency meeting will be held upon notification from the Chairman.
- Executive Committee meetings will be held in social media groups to discuss any NWFP group-related issues.
- Nu.800 will be charged for any absentee in the meeting.

7. Fines and Penalties

It will be mandatory to obtain a collection permit. If any individual members are found collecting NWFPs without a collection permit and in the wrong season the following penalties shall be imposed.

Table 5: Fines and Penalties

Sl. No	Type of offence	Target	Fines (Nu.)	Remarks
1	Collection of NWFPs in the wrong season & without a permit	Group members	As per FNCRR 2023 (Fine, compensation and fair market value)	
			As per FNCRR 2023 (Fine, compensation and fair market value)	
			As per FNCRR 2023 (Fine, compensation and fair market value)	
		Group members helping outsiders in collecting NWFPs	As per FNCRR 2023 (Fine, compensation and fair market value)	
			As per FNCRR 2023 (Fine, compensation and fair market value)	
2	Collection of NWFPs in demarcated NWFP area	Non-group members or outsiders will be imposed per FNCRR 2023 (Fine, compensation, and fair market value)		
3	Absent from Meeting	500/- per occasion		
4	Misconduct by Executive members	All executive members	Any misuse of group funds shall be dealt with as per the NWFPs management plan and bylaws	No warning
5	illegal collection of NWFPs by Executive members		Warning and product seized	1 st time
			Terminate from group	2 nd time
6	Delay of membership fees	To collect membership from all members	As per the NWFP management plan	Need to pay double of fees

8. Power of the Forest Department

As per Chapter 7, Section 264 of the Forest and Nature Conservation Rules and Regulation 2023, the Department of Forests and Park Services may terminate Non-Wood Forest Management Group based on the report and recommendation from the Division or Park Office. The export of CITES listed species shall be based on the NDF report approved by the Department.

Appendix I: NWFP Committee Member Name List

Sl. No	Name	Role	CID No	Contact No
1	Sonam Tobgay	Chairman	1010300	
2	Pelden Singye	Secretary	1010300	77759632
3	Tshering Wangdi	Treasurer	1010300	

Note: The aforementioned Committee members should take sole responsibility particularly to assign the work to every Resoops for monitoring the collection sites.

List of Resoop for the year 2024-2025

Sl.No	Name	CID #	Village
1	Dorji Wangdi	10103002206	Tandingang
2	Ugyen Rinzin	10103001001	Khangrab
3	Tashi Dorji	10103001936	Sarmet
4	Tshering	10103001279	Kuenzangdra

Pictorial guide for villagers with harvesting guidelines

Sl.No	Botanical Name	Local Name	Basic guidelines and harvesting prescriptions
1	<i>Dactylorhiza hatagirea</i>	Wanglag 	✓ After shedding of flowering and turning of leaves and stem in yellow colour, it is ready to collect only ✓ 50% of the rhizomes are allowed to be collected as they may extinct in the future.
2	<i>Neopicrorhiza scrophulariifolia</i>	Putashing 	✓ Dig up only mature rhizomes ✓ Harvest rhizome only during the harvesting season ✓ Do not uproot the entire plant ✓ Leave the mother plant intact with a small portion of rhizome/root in the soil for its regeneration in the following year
3	<i>Pleurospermum amabile</i>	Tsab tsep 	✓ whole plant materials ✓ collect only 30% of the plants
4	<i>Nardostachys jatamansi</i>	Pangpoe 	✓ Dig up and collect the rhizome by using a sharp knife ✓ Do not uproot the entire plant ✓ Leave the mother plant intact with a small portion of rhizome/root in the soil for its regeneration in the following year
5	<i>Exidia recisa</i>	Jili Namchoo 	✓ The collectors are instructed to collect without felling its mother trees ✓ Do not set up fire as all the mother trees will wipe up
6	<i>Rhododendron anthopogon</i>	Balu 	✓ Use sharp knife/scissors to cut branches in order to collect leaves and twigs
7	<i>Juniperus spp.</i>	Shoop 	✓ Only leaves are allowed for collection ✓ Do not cut the tree/branches (falls under special class category)

8	<i>Drosera peltata</i>	Brangzung 	✓ Whole plants ✓ Only 70% is allowed for collection
9	<i>Aconitum spp.</i>	Tsendhu 	✓ Entire roots ✓ Prescribe only 30% collection
10	<i>Meconopsis spp.</i>	Tshengen Meto 	✓ Flowers and fruits
11	<i>Fritillaria cirrhosa</i>	Tsiga 	✓ Dried bulbs are Collected ✓ The host plants should not be cut as it may affect the sustainability in the future
12	<i>Paris polyphylla</i>	Thogsumpa 	✓ Require hoe to collect ✓ Need to collect mature ones and not all the plants
13	<i>Hippophae rhamnoides</i>	Teyseng (Eng:Sea buckthron) 	✓ Do not cut mother trees ✓ Collect only fruits
14	<i>Saussurea spp.</i>	Azhangbepa 	✓ Collected only flowering parts ✓ The host plant should not dig
15	<i>Allium rhabdotum</i>	Mekam	✓ Whole plants are used for curry and medicines too ✓ Do not uproot whole plants and collect only 70% of the plants

			
16	<i>Tsuga dumosa</i>	Dhungshing 	✓ Collect leaves ✓ Cut only branches ✓ Do not cut whole trees
17	<i>Gentiana elwesii</i>	Pangja meto 	✓ Collects only flower ✓ Do not destroy the plants
18	<i>Thamnia vermicularis</i>	Shawgirapchu 	✓ Collect as per collection guidelines
19	<i>Gerardiana spp.</i>	Tsem 	✓ Collects leaves only ✓ Use a sharp dragger while cutting
