NOTESHEET

Sub: Approval of Non wood Forest Products Management and Marketing Plan

The Non wood Forest Products are the significant source of livelihood to many rural communities in the country. Accordingly, to ensure sustainable management and collection of resources the management and marketing plans are developed by the forest field division in line with Interim Framework for Management and Marketing of Non wood Forest Products. The plans are;

- 1) Labar Non-wood Forest Product Management and Marketing Plan.
- 2) Khenzor Non-wood Forest Product Management and Marketing Plan.
- 3) Bongmar Non-wood Forest Product Management and Marketing Plan.
- 4) Wongchelu Non-wood Forest Product Management and Marketing Plan.
- 5) Tokari Non-wood Forest Product Management and Marketing Plan.
- 6) Drupthop Non-wood Forest Products Management and Marketing Plan.
- 7) Tsangkhar Non-wood Forest Products Management and Marketing Plan.
- 8) Tsakaling Gewog Non-wood Forest Products Management and Marketing Plan
- 9) Serzhong and Menchuna Non wood Forest Product Management and Marketing Plan.

In accordance with Forest and Nature Conservation Rules and Regulations (amended) 2020 Chapter III section 142(7) approval needs to be sought from the Ministry.

Submitted for approval.

Submitted by,

(Karma Jigme Temphe)
Chief Forestry Officer

Recommended for Approval

PART A: NWFP management and marketing plan

1. Introduction

Tsakaling Gewog is one of the smallest Gewog under Mongar Dzongkhag Administration and covers an area of 72 Sq. Km and has 359 households. The Gewog is connected with Gewog centre road and it is 42 kilometres away from Mongar town. It is bordered by Lhuentse Dzongkhag to the west and Chali Gewog to the north. The Gewog is covered with chirpine forests and dominated by cool broadleaved forests in the NWFP growing areas.

The plan was approved in the year 2018. The revised NWFP management & marketing plan consists of 46 households of Tsakaling, Nyartse, Drongtoe, Tormashong, Kaling-Thumling villages with total area of 5578 hectares.

The group formation had immensely benefited the group members through income generation from the sale of NWFP products during the three years plan period. Based on the evaluation report, it was learned that the poor disadvantaged members/households had the privilege and opportunities to collect and market NWFP products generating income to meet their daily basic needs of the household members. It was also learned that the management & marketing of the NWFP products had been done according to the harvesting guidelines and prescriptions provided without compromising the sustainability of the available NWFP resources. *Rubia cordifolia* is the only NWFP product collected and marketed besides other available NWFP resources in the designated collection areas during the 3 years plan period. According to the records maintained, the group members had collected and marketed 10104 kilograms generating an income of Nu.5,05,200 signifying the significant achievements of the group through sustainable harvesting and management.

The revision of NWFP Management & Marketing Plan is strongly based on the results and findings of evaluation report of the past 3 years plan period besides willingness and interests of the group members emphasizing the benefits and advantages functioning as a group. The plan revision is also based on the previous management & marketing plan guided by guidelines and harvesting prescriptions and as per the requirements of Forests & Nature Conservation Rules & Regulations, (FNCRR), 2017. Hence, the revised Management & Marketing plan shall be implemented and valid for another 5 years plan period upon approval from Department to sustainably harvest and market NWFP products with the following objectives.

2. Goals and objectives:

- To ensure sustainable collection/harvesting of locally available NWFPs through holistic scientific and traditional management systems.
- To generate additional cash income from sale of NWFP products.

3. Description of NWFPs:

Table 1: Brief description of NWFPs for commercial harvesting

<i>NWFP name</i>	<i>Harvesting area(s) (name)</i>	<i>Parts harvested</i>	<i>Use purpose (traditional & others)</i>	<i>Harvesting season (months)</i>	<i>Estimated quantity that can be collected¹</i>
<i>Rubia cordifolia</i> (Tsoy)	Dhamaley, Leyphupa, Tsepchungla, Pangsela, Phukabadep, Chamgor, Gangkarbadep, Chaksanaka, Prachokla Whopshela, Shawapese, Pemadrangsa, Tawpobadep, Dolaptang, Pangkarla/ Yabi, Remay, Manbar and Takophung	Entire plant	Dye & medicine	November – February	5000 kgs
<i>Paris polyphylla</i> (Jakpa Thoksampa)	Prachokla, Petsongbi, Shawagonpa, Murtilla, Raksha badep Ngonngonla, Kektongbadep,	Rhizome	Medicine	October- November	20 kg
<i>Plectocomia himalayana</i>	Nimadrosa/Bobola, Chasbadep, Ongorla	Young shoots and matured stems	Young shoots as vegetable. Matured stem as raw material or handicraft items	Winter time for mature stems and shoots in 4 th Bhutanese calendar month	Domestic purpose

¹ Based on ocular estimation

<i>Daphne spp.</i> (Shokshog)	Gapobadep, Prachogla, Chaskahrbadep, Thongja Sinmoabanchang, Prachola, Tormashong Badepsarpa, Laijabey	Bark	Traditional Bhutanese paper	March – June	1000 kgs
<i>Zanthoxylum</i> (yerma)	Shawabesi, korshalong, Dongrig, Pembrangsa, Yabi, Tokaphu	Fruit	Spices, medicine	August – September	50 kg
<i>Ferns</i>	-Do-	Young shoot	Vegetables	March – September	2000 bundles
<i>Elatostema</i> <i>lineolatum</i> (Damroo)	-Do-	Stem and leaves	Vegetables	Any time	500 bundles
<i>Pouzolzia</i> spp.	Peytshongbii, Teytsachu, Tsakaling, Tormashong	Bark	Adhesive, Incense	August- February	100 kgs

4. Harvesting prescriptions for sustainable NWFP harvesting

The harvesting of the NWFP products from the designated areas shall be done following the harvesting prescriptions as per the Interim Framework for Management & Marketing of Non-Wood Forest Products, 2011 provided below and harvesting guidelines to fulfil the objective of sustainable management and utilization of the NWFP resources.

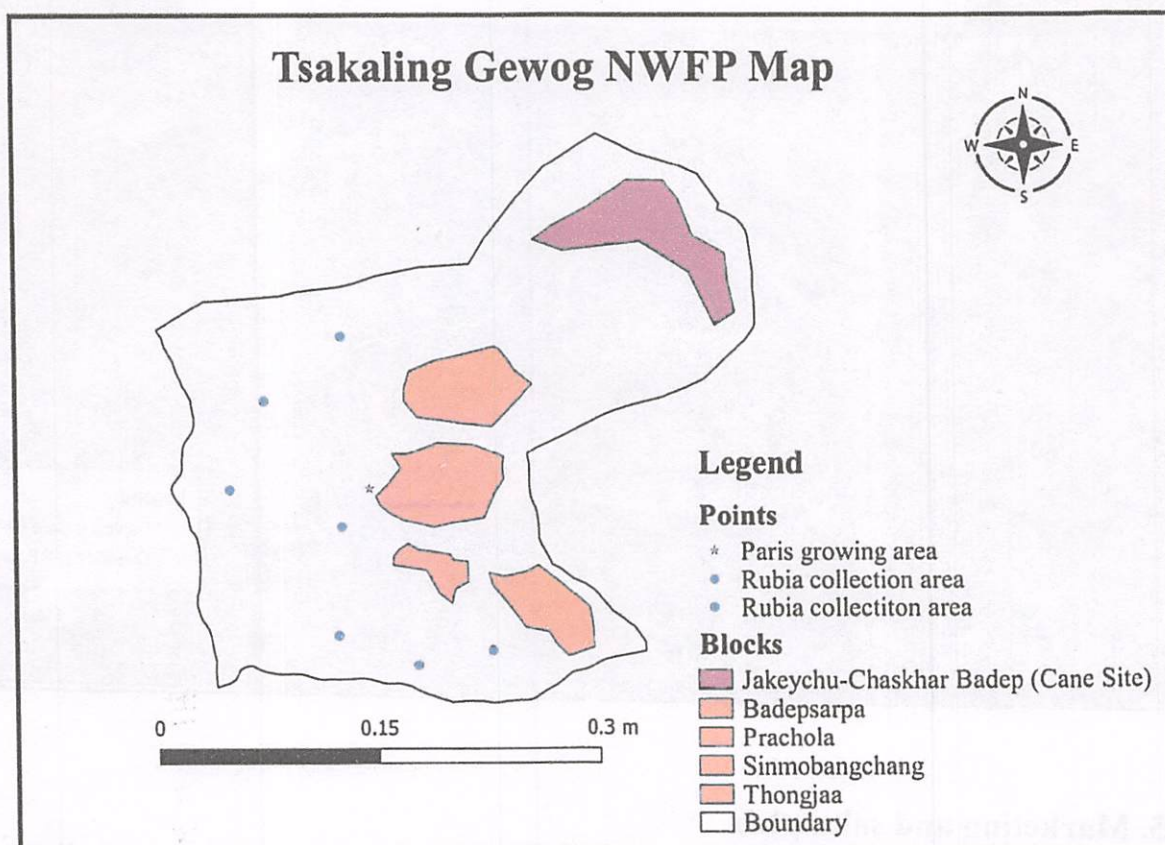

Table 2: Harvesting prescriptions for sustainable harvesting (As per the Interim Framework for Management & Marketing of Non-Wood Forest Products, 2011)

<i>NWFP species</i>	<i>Harvesting prescriptions for sustainable harvesting</i>
<i>Rubia cordifolia</i> (La-nyi-roo)	• Harvest stems of <i>Rubia</i> after seed dispersal, this is mainly from February to April, but might start as early as November in the southern parts of Bhutan, depending on the climate and altitude • Use sharp sickle or knife for the collection or harvesting of the upper part of the plant. • Cut the plant at 5 cm above ground level. • Leave at least 10% of the plants without collecting or harvesting any raw materials from them (these plants shall act as seed plants for natural regeneration). • Do not collect roots.

	Do not uproot entire plants
<i>Paris polyphylla</i> (Jakpa Thoksampa)	- October – November is the most appropriate time because by this time, the bud emerges from the rhizome which remains dormant underground till next germination period - Leave some portion of the rhizome with bud underground while harvesting the rhizome of the plant, it will be more sustainable and would help in conserving the plant population in near future - Do not harvest the plant before the seed dispersal
<i>Plectocomia himalayana</i> (Patsha)	For mature stems - Cut cane stem only when mature, to be recognized by: - Loosening of leaf sheath from the lower part of the cane stem - Exposure of lowest part of the stem - Turning to yellow-reddish along the entire stem length - Diameter over the entire length of the cane is the same (the diameter at the lower part of the cane is reduced) - Pull down as much of the stem as possible (avoid leaving cane parts high up in the tree) - Cut only canes with a usable length of at least 10 m. - Discard at maximum 1.2 to 1.5 metres from the top end. - Harvest during winter as canes have a better quality during this season (lower water content and more durable) For cane shoots - Cut young shoot by bending the cane stem with the help of a long and strong stick with a hook - Do not cut the entire cane for the sake of collecting shoots - Cut the leading shoot with a sharp knife diagonally (not straight in order to avoid rotting of the remaining stump); leave lateral shoots - Care shall be taken to avoid damaging sucker buds (these will later develop into lateral shoots) Guidelines for both mature stems and cane shoots - Uprooting, cutting of rhizomes / suckers shall be avoided. - Trees supporting the canes shall not be felled - The debris after harvesting canes should be taken outside the cane area in order to avoid infection with insect borers or fungi
<i>Daphne</i> spp. (Shokshog)	- March - June - Cut the plant at 10 cm above the ground level (the left stump will regenerate in the following growing season). - Cut only stems that are more than 3 cm in diameter.

	• Do not damage the remaining young stands, seedling and /or saplings • Do not fell the surrounding trees in order to clear the area to ease harvesting • Divide harvesting area into 5 blocks for Daphne. Harvesting is rotated over the 5 blocks so that harvesting takes place only in one block per year (Daphne takes 5 years to produce stems of more than 3 cm in diameter).
<i>Zanthoxylum</i> spp.	• Harvesting of fruits starts from August - September • Harvest fruit by handpicking if possible climbing on trees. • Use long bamboo poles with a hook to facilitate picking of the fruit. • Collect only 70% of the fruits and leave 30% to allow natural regeneration. • Do not lop or cut branch to collect fruit if such method practice, the production in the following years will reduce. • Do not cut down the tree for collection of fruit
<i>Diplazium esculentum</i>	• March - September • Harvests young shoot that are 15cm length. • Don't harvest the entire shoot coming up in season. • Retain at least 50% of young shoot of last flush for the development of leaves. • Don't harvest the shoots that have developed to leaves. • Don't cut down trees which provide shade to the plant.
<i>Elatostema lineolatum</i>	• Collect plants that are 15cm and above. • Retain stump of around 3" for sprouting of new shoots. • Don't uproot whole plant. • Shouldn't cut down trees and create more opening. • Shouldn't disturb its catchment area.
<i>Pouzolzia</i> spp.	• Cut the plant at 10 cm above the ground level (the left stump will coppice in the following growing season). • Do not damage the remaining young stands/ seedlings/ saplings • Felling of surrounding trees to ease harvesting is prohibited. • Leave at least 10% of the plants to allow natural regeneration. • Harvesting of roots is strictly prohibited for ecological reasons

Map of the NWFP harvesting areas (based on traditional boundaries, customary practices and availability of NWFP resources)

Google Map of Tsakaling Gewog NWFP growing and harvesting/collection areas

5. Marketing and sales plan

The marketing and sales plan for different types of NWFPs that are expected to be collected and marketed by the group to the traders with approximate quantity and the price per unit and total value of the expected sales are described in table 3 below:

Table 3: Marketing and sales plan

<i>NWFP</i>	<i>Potential market</i>	<i>Estimated quantity for sale per season (unit)</i>	<i>Expected price per unit</i>	<i>Total (Nu)</i>
<i>Rubia cordifolia</i> (Tsoy)	Local traders/dealers	5000 Kg (Dried)	50.00	250000.00
<i>Paris polyphylla</i> (Jakpa Thoksampa)	Traders	20 Kg (Dried)	3000.00	60000.00
Cane shoot from harvested canes for making cane products	Mongar Vegetable Market	500 Nos	60.00	30000.00
Basket (sokhadong)	Local community	20 Nos	350.00	7000.00

Basket (shingphrokpa)	Mongar town & local community	30 Nos	400.00	12000.00
<i>Daphne (Shokshog)</i>	Daphne factory at Ngatshang & T/yangtse	1000 kg	35.00	35000.00
<i>Zanthoxylum</i>	Mongar Vegetable Market	50 kg	200.00	10000.00
Ferns	Mongar Vegetable Market	1000 bundles	20.00	20000.00
Damroo	Mongar Vegetable Market	500 bundles	15.00	7500.00
<i>Pouzolzia</i> spp.	Incense factories	100 kgs	300.00	30000.00

6. Marketing arrangements

The harvesting and collection of NWFP products shall be done individually from the designated areas following the harvesting guidelines. The harvested and collected products should be dried or treated with necessary treatments to maintain the quality of the products in order to fetch expected prizes. The Chairperson shall look for demand of NWFPs and potential buyers before onset of products collection season with support of forestry staffs. The NWFP products should be always marketed or sold to the authorized or licensed traders/buyers/dealers. The sale of products shall be coordinated by the chairperson collecting the products harvested by the individual members of the group. The sale of NWFP products on credit basis to the traders/buyers shall not be entertained by the chairperson to avoid unnecessary disruptions among the members. The sale of products individually shall not be entertained and should be done in groups organised by the Chairperson deducting 5 % of the sales and maintain proper records of the products collected and marketed.

7. Benefits to the members

The members shall benefit as all members participating in the group shall have equal rights for collection of NWFPs and access to market. The income generated from the sale of products benefits to school going children to pay fees and buy uniforms and other necessities, buy daily food items, pay rural tax and creates employment opportunities to the rural communities. It also

helps to conserve forests and environment from forest fire, illegal harvesting and minimizes the human-wildlife conflicts.

8. Benefits to the group

The group members shall be accessible to collect locally available NWFPs from the adjacent NWFP growing forest areas and can easily market NWFPs in a group and the resources collection shall be on a sustainable basis. The group members shall also be benefitted from the membership fees collection as it would accumulate in the group saving account. The 5% deduction from the sale of the products shall be accumulated in the group account besides income generation of the members from the sale of products.

Table 5: Financial projection of the benefits to the group, the community development fund (optional)

Sl. No	Particulars	Amount (Nu)
	Revenues	
1	Membership fees	4600.00
2	Contribution to the Community Development Fund (CDF) from sales of product 1 (<i>Rubia</i>)	
3	Contribution to the CDF from sales of product 2 (<i>Daphne</i>)	
4	Contribution to the CDF from sales of product 3 (<i>Satuwa</i>)	
5	Contribution to the CDF from sales of product 4 (Cane products)	
6	Contribution to the CDF from sales of product 5 (<i>Zanthoxylum</i>)	
5	Fines for absentees in group meeting	200.00
A	Total revenues	
	Expenses (only include expenses that will be paid from the group funds)	
	Stationeries	
	Refreshment during meeting	
B	Total Expenses	
C	Balance: Total revenues – total expenses	

PART B: By-laws: Group regulations and norms

1. Members of the NWFP management & marketing group	Village	Number of member households	Geog
	Kaling, Thumling, Nyerste and Tormashong	46	Tsakaling
	Responsibilities and rights of members: • Have rights to harvest and market any available NWFPs as per the management plan prescription. • To follow the procedures and rules of the group as outlined in the NWFP management plan. • Participation in group planning and decision-making. • Participation in group meetings. • Be responsible for sustainable management of the NWFPs Management Unit, in accordance with the approved management plan and by-laws; • Ensure that no person collect, use, remove, damage, or destroy any forest produce from the NWFP Management Unit without authorization; and • Take action in case of any violation of the Management Plan or the by-laws by the member of the group or other outsiders.		

2. Executive committee	
2.1 Chairperson	Name of Chairperson: Mr. Jigme Tenzin
	Responsibilities of Coordinator/ Chairperson: • Head/chair the group • Countersigns financial transaction and authorization to withdraw cash from the bank account with treasurer. • Chair all meetings related to the plan. • Resolve disputes and conflicts among members and outsiders. • Maintain contacts with traders, arrange & coordinate collection and marketing of NWFPs.

	• Facilitate in maintaining records & data.
--	---

2.2 Secretary	Name of Secretary: Jambay Mo
	Responsibilities of Secretary: • Assist and officiate the Chairperson during his/her absence. • Maintain record keepings of the group. • Keep minutes of group meetings. • Prepares Annual Progress Report and other correspondences.

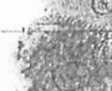

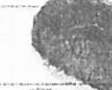

2.3 Treasurer	Name of Treasurer: Shacha Dorji
	Responsibilities of Treasurer: • Maintain cash transaction records • Collect membership fees and deposit in bank • Look after overall financial transaction in collaboration with the executive members • Present annual expenditure and income of the group to the members during meeting
3. Compensation to the executive committee for marketing	• The group members discussed and decided to not compensate or pay incentives to the executive members for arranging the marketing of products • Whatever more price the products fetch shall be profit of the executive members however, the price shall be agreed between group and executive members • No members shall make any complain

4. Membership fee and purpose	• Each member shall contribute Nu.100/- annually and shall be collected in 1st month of Bhutanese calendar • The membership fees collected from group members shall be deposited in community development fund and shall be distributed at the end of the management plan expiry within the members if the group discontinues • Community development fund shall not be withdrawn from bank in the course of time • Some amount of membership fees shall be utilised as expenses to meet taxi fare and other expenses • The saving from membership fee shall not be utilised to meet expenses for marketing costs.
5. Community development fund and utilization of fund	• The NWFP Group members discussed to have community development fund and decided to deduct 5% income from the sale proceed of NWFPs to raise the group fund. • Except, for opening the group saving account with Bhutan Development Bank Limited (BDBL) any expenses shall not be made from common fund. • The fund will be used to buy stationeries for the group and for refreshment during the group meetings.

6. Conflict resolution	• In case disputes or conflicts among communities arise about access to certain areas for NWFP harvesting; the matter shall be put to the Gewog Tshogdey (GT) Dzongkhag Tshogdue (DT) for further decision. • Conflicts or disputes within the NWFP Management Group, which cannot be resolved by the group members shall be forwarded to the Coordinator for settlement. If the case cannot be resolved, it shall be forwarded to the Gewog Administration. • In case there is a conflict between the NWFP Group and outsiders, the case shall be forwarded to the Divisional Forest Office and Gewog Administration by the Chairperson.
-------------------------------	---

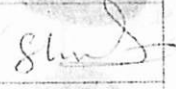

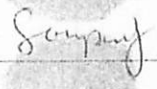

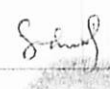

7. Penalties	• The fines and penalties shall be levied or imposed as per the rules 135 to 165 under Forest & Nature Conservation Rules & Regulations (FNCRR), 2017 and other relevant Rules and Acts based on the degree of offence committed by the offender.
8. Authority of the Department	At Par Chapter III, Section 155 of FNCRR, 2017, the Department shall: • Suo moto or on the request by the NWFMG take action against violator of the Act, Rules or Management Plan: • Inspect, monitor, review the records of and otherwise supervise the activity of the NWFMG; and • Take action including cancellation of the NWFMG certificate if the NWFMG or any of its members who violate the provision of the Management Plan or any provision under this Chapter.
