INTRODUCTION

Yengkartseng village falls under Bazor-Yengkartseng Chewog of Dramitse Gewog, Mongar Dzongkhag. It is 7 km away from Dramitse Gewog center. There are 135 households in the Chewog. Yengkartseng Non-Wood Forest Products Management & Marketing Group (NWFPMMG) was established in the year 2018. The management plan expired in March, 2022 and was revised for another five years.

The NWFPMMG consists of 15 household as members. The group will manage and collect NWFP resources from 305 hectares area which falls within State Reserve Forest Land (SRFL). The forest type is cool broad-leaved. The group will collect resources such as *Daphne* and *Rubia cordifolia* from the identified area located at an altitude range of 1307 to 2800 meter above sea level. The area extends from Acho Lamo to Dawaipangthang in the north, runs down from Bapsharang to Helongdrang, to the east is Helongdrang and Yengkartseng Zor and settlement to the west. For the management purpose, area has been divided into two blocks Viz. *Daphne* block and *Rubia cordifolia* block.

The main goal of the NWFPMMG is to enhance household's additional income and improve living standard of the rural people by harvesting *Rubia cordifolia* (*la-nyi-roo*) and *Daphne spp* (Shogoo). To ensure sustainability of the NWFPs, appropriate harvesting guidelines and clauses were prescribed as per the interim framework for management & marketing of NWFP, 2011 and FNCRR, 2017 respectively. The management plan is divided into two parts. Part one deals with management and marketing of NWFPs and part II on By-laws defining norms of the group governance. The marketing of the NWFP resources shall be done as per the group By-laws.

During the first plan period the group could make income of **Nu. 58,000/-** and has not made any expenses. This has been generated from the monitoring and evaluation report maintained by the Divisional Forests Office (DFO), Mongar. The cash income earned from sale of different resources is given in the table 01.

Table 1: NWFPs harvested and cash income generated in 1st plan period

Sl. No	Item	Qty harvested & sold	Amount Nu.	Remarks
1	<i>Daphne</i> bark	600 Kgs	30000.00	Sold to Ugyen Dorji paper factory, Ngatshang
2	<i>Rubia cordifolia</i>	800 Kgs	28000.00	Sold to Traders
Total			58000.00	

PART I: NWFP MANAGEMENT & MARKETING PLAN

1. Goal and Objectives

The main goal of the NWFMMG is to enhance the household economy and improve living standard of rural people with no major disturbances to the ecological function of the forest lands. Accordingly, the objective is to harvest and market the NWFP in sustainable manner.

2. Description of NWFP

The NWFPs like *Artemisia spp.* (Khempa), *Daphne spp.* (Dheynap), *Diplazium esculentum* (Dhawai), *Elatosteme lineolatum* (Drimom), *Paris polyphylla* (Thoksampa), *Rubia cordifolia* (La-nyi-roo), *Gaultheria spp.*, ferns, mushroom (Pimparong, Zhulay bammung, Sisi shamu), etc are found. However, in the revised plan period only *Rubia cordifolia* and *Daphne* will be harvested for commercial purpose. The *Daphne* will be harvested only once in the plan period.

Table 2: Brief description of NWFPs for commercial harvesting

NWFP Name	Harvesting Area (s)	Parts harvested	Use/ Purpose	Harvesting Season	Estimated Qty that can be harvested in a year
La-nyi-roo (Sh)	Yengkartseng, Helongdrang, Dhurphe	Entire plant	Dye, Medicine	November to February	1500 Kgs
Shogoo (Sh)	Bapsharang, Lemi, Acho Lamo	Entire plant	Traditiona l Paper	March to June	600 kgs

3. Harvesting Prescriptions for Sustainable Management of NWFP

The members will be entitled to harvest *Rubia cordifolia* (La-nyi-roo) after obtaining valid permit from the Divisional Forests Office (DFO). No royalty shall be levied for other available NWFPs collected for domestic use. The non-members shall be allowed to harvest NWFPs as per the FNCRR, 2017 except, *Rubia cordifolia* and *Daphne* as mentioned in table 2. The NWFPMMG shall carry out NWFP harvesting activity in the appropriate season as prescribed in table 1. The harvesting guidelines are elaborated in table below:

Table 3: Harvesting prescription for sustainable management of NWFP

NWFP Species	Harvesting Prescription
La-nyi-roo (Sh)	• Harvest stems of <i>Rubia</i> after seed dispersal, this is mainly from February to April. • Use sharp knife/scissors for the collection of upper parts of the plant • Cut the plant at 5 cm above the ground level • Leave at least 10% of the plants without harvesting any raw material from them • Do not collect roots • Do not uproot entire plant
Shogoo (sh)	• Harvest <i>Daphne</i> bark from March to June • Cut the stem at 10 cm above the ground to promote coppicing from the stump. As a rule of thumb, this is at the height of a fist with the thumb up. The bark is peeled off after the stem is cut. • Cut the stem slanting to avoid rotting of the remaining stump • Cut only stems of more than 3 cm in diameter at 10 cm from the ground; it is recommended to harvest as late as possible because the bark increment increases significantly over the years • Take care and do not destroy/damage remaining stands, seedlings and saplings of <i>Daphne</i> while harvesting
