

Gamung Non-Wood Forest Product Management and Marketing Plan

**SHUMAR GEWOG: PEMAGATSHEL
DZONGKHAG**

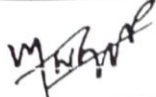

PLAN YEAR: 2023-2028

(2nd Revision)

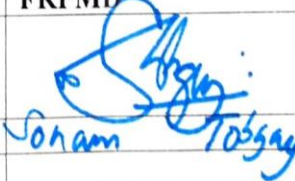

Approval Sheet

Name of Community Forest	Gamung NWFP Plan
Village	Gamung
Chiwog	Shali-Gompung
Gewog	Shumar
Dzongkhag	Pemagatshel
No. Of HH	31
Area (hectare)	270.59
Plan Period	2023-2028

Prepared and Submitted for Approval:

	Community Forest management Group	Forestry Representative (CFMP facilitator)	Geog Administrative	Forest Resource Planning and Management	Divisional Forest Office
Signature					
Name	Mr. Bajay	Mr. Tshewang Namgay	Mr. Sonam Dhendup	Mr. Tshering Phuntsho	Mr. Tshering Dendup
	Chairperson	Forest Ranger	Gup	Section Head	Chief Forestry Officer

Reviewed and recommended for approval:

	Reviewing Officer, FRPMD	Chief Forestry Officer, FRPMD	Head of Department, DoFPS
Signature			
Name	Kezang Wangmo	Sonam Tobgay	
Date	10/7/2023		

Approved By:

SECRETARY
Ministry of Energy & Natural Resources

Acronyms

CFD	Community Development Fund
CFO	Chief Forestry Officer
DAMC	Department of Agriculture and Marketing Cooperatives
DoFPS	Department of Forests and Park Services
HHs	Households
Masl	Meter above sea level
NTFPs	Non-timber Forest Products
NWFPs	Non-Wood Forest Products
ToR	Terms of Reference

EXECUTIVE SUMMARY

Gamung Non-Wood Forest Product (NWFP) Management Group was initially formed in the year 2014. The Non-Wood Forest Product (NWFP) Marketing and Management Group consist of 31 interested households. The Gamung community falls under Shumar Gewog and it is located about 13 km away from the Gewog center. It is connected with the farm road. The group members partially depend their livelihood on forest resources such as collection of NWFP for additional earning. During the previous plan period, the group members collected three main NWFP species namely *Rubia cordifolia*, *Pouzolzia sanguine* and *Piper pedicellatum* that are locally available.

The main objective of the group is for sustainable management and utilization of the NWFPs. In the previous plan period, the group members agreed to work as per the harvesting prescriptions of the plan. The group also agreed to conserve the resources to use them efficiently and avoid going against the provisions of groups by-laws. The group members will collect the NWFPs from seven collection sites which are specified in the management plan.

The income generated from collection of NWFP helps to supplement the expenditure incurred for school going children and other household expenditures. In general, it has helped to improve the living standard of the group members. The group has saved Nu. 179,358.99/- in their group saving account.

Management Plan consists of two parts; Resource management and group by-laws. The management part covers the brief description of NWFPs, harvesting prescriptions, maps of NWFPs harvesting areas and marketing plans. The by-law consists of membership arrangement, executive committee formation procedures, Term of reference (ToR) of Chairperson, Secretary and Treasurer, compensations, membership fee, community development fund, conflict resolution and penalties.

The term of management plan is for five years and will be effective from beginning of 2023 to 2028. During the period, the group will have right to collect mentioned NWFPs as per the harvesting guidelines prescribed in the plan and ensure sustainability of resources for future use.

PART A: NWFP MARKETING AND MARKETING PLAN

1. Background

Gamung Non-Wood Forest Product (NWFP) Management Group was initially formed in the year 2017. The Non-Wood Forest Product (NWFP) Marketing and Management Group consist of 31 interested households. The Gamung community falls under Shumar Gewog and it is located about 13 km away from the Gewog center. It is connected with the farm road. The group members partially depend their livelihood on forest resources such as collection of NWFP for additional earning. During the previous plan period, the group members collected three main NWFP species namely *Rubia cordifolia*, *Pouzolzia sanguine* and *Piper pedicellatum* that are locally available.

The first plan got approved in 2017 and expired in 2020. Due to covid-pandemic the plan could not be revised.

2. Objectives:

- To ensure sustainable harvesting of NWFPs.
- To achieve self-sufficiency through sustainable management and marketing of NWFP resources.

3. NWFP Descriptions for commercial harvesting

The NWFP species for commercial harvesting are identified and their descriptions are provided below:

3.1 *Piper pedicellatum*

Local name: (Pansay) is a perennial plant that grows as bushes to a height of 1-2 meter. It has smooth dark greenish leaves. Pipla is a dioecious plant, meaning that it has unisexual reproductive units with male and female plants separately. Only the female plants bear round berries that have commercial value. The fruits start ripening in August to September.

Pipla thrives widely under the canopy of broadleaf forests or in an open area within the altitudes ranges of 200-2200 masl in Pemagatshel Dzongkhag, and in some other sub-tropical forests around the country. It is a shade demander and thrives mostly in damp and moist soil.

Uses

The fruits have distinctive sour and hot taste that can be used for medicinal purposes, and also used as a species. In Bhutanese Traditional Medicine, recognize Pipla as powerful stimulations for the digestive and respiratory system as a rejuvenating agent, longevity enhancer and tonic for the immune system.

Figure 1. *Piper pedicellatum*

3.2. *Rubia cordifolia*

Rubia (local name Laniru) is a perennial scrambling or climbing herbs or sub-shrubs of around 80 species native to various parts of the world. It can grow up-to 1.5 m in height. The evergreen leaves are 5-10 cm long and 2-3 cm broad, produced in whole whorls of 4-7 star like around the central stem. It climbs with tiny hooks at the leaves and stem. The flower usually appears from June to August. It grows along the forest edge and clearings, scrub vegetation, dune forest, less commonly in grassland and open and rocky areas. It grows up to the elevation of 2600 masl.

Figure 2. *Rubia cordifolia*

Uses

Rubia is an economically important source to use as colorant. The plants roots contain an anthracenes compound that gives its red color to a textile dye. It also used as a colorant especially for paints. In Bhutan it is locally used in coloring and treating threads on weaving.

3.3. *Pouzolzia sanguinea* (Yongjiba)

There are 35 *Pouzolzia* species widely spread from East Asia, Southern China, Northern India, Nepal, Bhutan, Thailand, Laos and Indonesia. *Pouzolzia sanguinea* is an evergreen shrub growing in warm broadleaved forest, thickets and edge of woods, dry valleys, roadside and in the patches of abandoned cultivation at an elevation of 300-2300 masl.

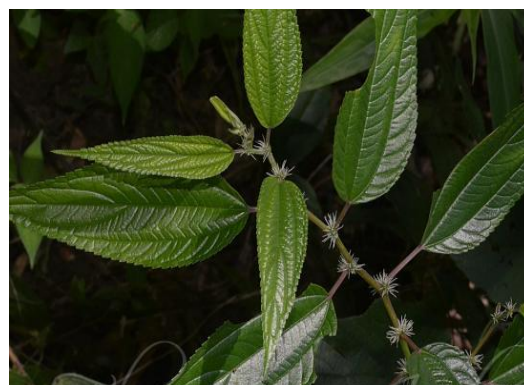

Figure 3. *Pouzolzia sanguinea*

Uses

The paste made from the roots of *Pouzolzia sanguinea* is applied to boils. A fiber obtained from the barks is used in making rope, nets, etc. In Bhutan, it is popularly used as one of the ingredients in incense manufacturing process as it is adhesive in nature.

3.4. *Viscum* spp. (Nye-shing jorma)

Viscum is a genus of about 70-100 species of mistletoes, native to the temperate and tropical regions of Europe, Africa and Asia. Traditionally, the genus has been placed in its own family Viscaceae, however depth research was done later and was found most suitable to place in the family of Santalaceae.

They are woody, obligate hemi-parasitic shrubs with branches 15-80 centimeters (5.9–31.5 in) long. Their hosts are woody shrubs and trees. The foliage is verticillately branching, with opposite

pairs or whorls of green leaves which perform some photosynthesis, but with the plant drawing its mineral and water needs from the host tree. Different species of *Viscum* tend to use different host species.

Uses

In Bhutan, it is much famous and treat special in preparing a good flavour of butter tea (Suja). Hence, several rural folks generate income through selling this product as end product to be used as main ingredients in Suja preparation.

Figure 4. *Viscum spp*

Table 1. Description and details of NWFPs

NWFPs	Collection area (name)	Parts harvested	Use purpose (traditional and others)	Harvesting season (months)	Estimated quantity that can be collected
Pansay (<i>Piper pedicellatum</i>)	Menchawong, Sangthaphu, Khenamgyel, Bomnangnang,	Fruits	Spices & medicine	Fruits are fully mature usually from mid-July to September	75 kgs
La-nyeeru (<i>Rubia cordifolia</i>)	Dhalphung, Yuelay, Sangthaphu,	Entire plant	Dye/colorant	November to February	300 kgs
Youngjiva (<i>Pouzolzia sanguinea</i>)	Dhalphung, Yuelay, Sangthaphu, Menchawong	Bark	Adhesive and incense making	August to February	750 kgs
Nyeshing jorma (<i>Viscum nepalensis</i>)	Khandromwong	Entire plants	Ingredients for tea/Suja preparation	Sept to February	50 Kgs

4. Harvesting prescriptions

The harvesting prescriptions are prepared in line with the framework developed by the Department for sustainable resource harvesting by the group members. The harvesting prescriptions for each species are provided below and the members have to follow these procedures while harvesting the species from the identified areas.

In case of *Rubia* harvesting, the guidelines for resource assessment and management of *Rubia cordifolia* was developed by the Department for effective planning and sustainable utilization of the resources found in their areas.

Table 2. Harvesting prescriptions for sustainable harvesting of NWFPs.

NWFP species	Harvesting prescriptions for sustainable harvesting
Pansay (<i>Piper pedicellatum</i>)	✓ Collect fruits only when fully mature. ✓ Harvest fruits only on announced date to start for harvesting (Date is usually announced by the coordinator in consultation with GFR as per the season mentioned in plan). ✓ Harvest fruits only by hand picking without damaging, cutting or uprooting of the entire plants. ✓ Do not cut the host tree to ease collection. ✓ Do not cut the entire portion of the tree
La-nyee roo (<i>Rubia cordifolia</i>)	✓ Do not uproot entire plants. ✓ Do not collect roots. ✓ Use sharp scissors for the collection of upper part of the plant. ✓ Maintain 5 cm at the ground level while cutting the upper parts. ✓ To retain as the seed plant for natural regeneration, leave at least 10% of the plants without harvesting. ✓ Should collect after the announcement made by coordinator in consultation with GFR to collect on each season (As per the season mentioned in plan). For the collection of <i>Rubia</i>, the identified collection sites should be divided into three areas for rotational harvesting of the species. Each season, the species shall be collected from one area and move to the next area in the next harvesting season and that way the species will get ample time for its regeneration and sustainable harvesting (<i>Rubia</i> takes three years for regeneration).
Youngjiva (<i>Pouzolzia sanguinea</i>)	✓ To retain the stump for coppicing in the following growing season, maintain at least 10 cm to the ground level while harvesting. ✓ Do not harvest or collect the remaining young stands/seedling/saplings. ✓ Felling the surrounding trees to ease harvesting is prohibited. ✓ To retain as the seed plant for natural regeneration, leave at least 10% of the plants without harvesting. ✓ Collection of roots is strictly prohibited for ecological reason.
<i>Viscum nepalensis</i>	✓ Do not cut down the host plant to ease collection. ✓ Do not collect the whole bunch. Leave at least 25% for flowering and fruiting.

5. Map of the collection area

The community during the revision of plan had suggested some area which is not much potential for collection and not included in the previous plan to incorporate in the following plan period. Therefore, the sites were visited to study the potentiality of and accordingly included in the plan for management as per the plan prescription. The areas which are included in the management regime are demarcated with a rocky cliff and ridges from east, Demri River from north and west and a perennial stream and cultivated land to the south.

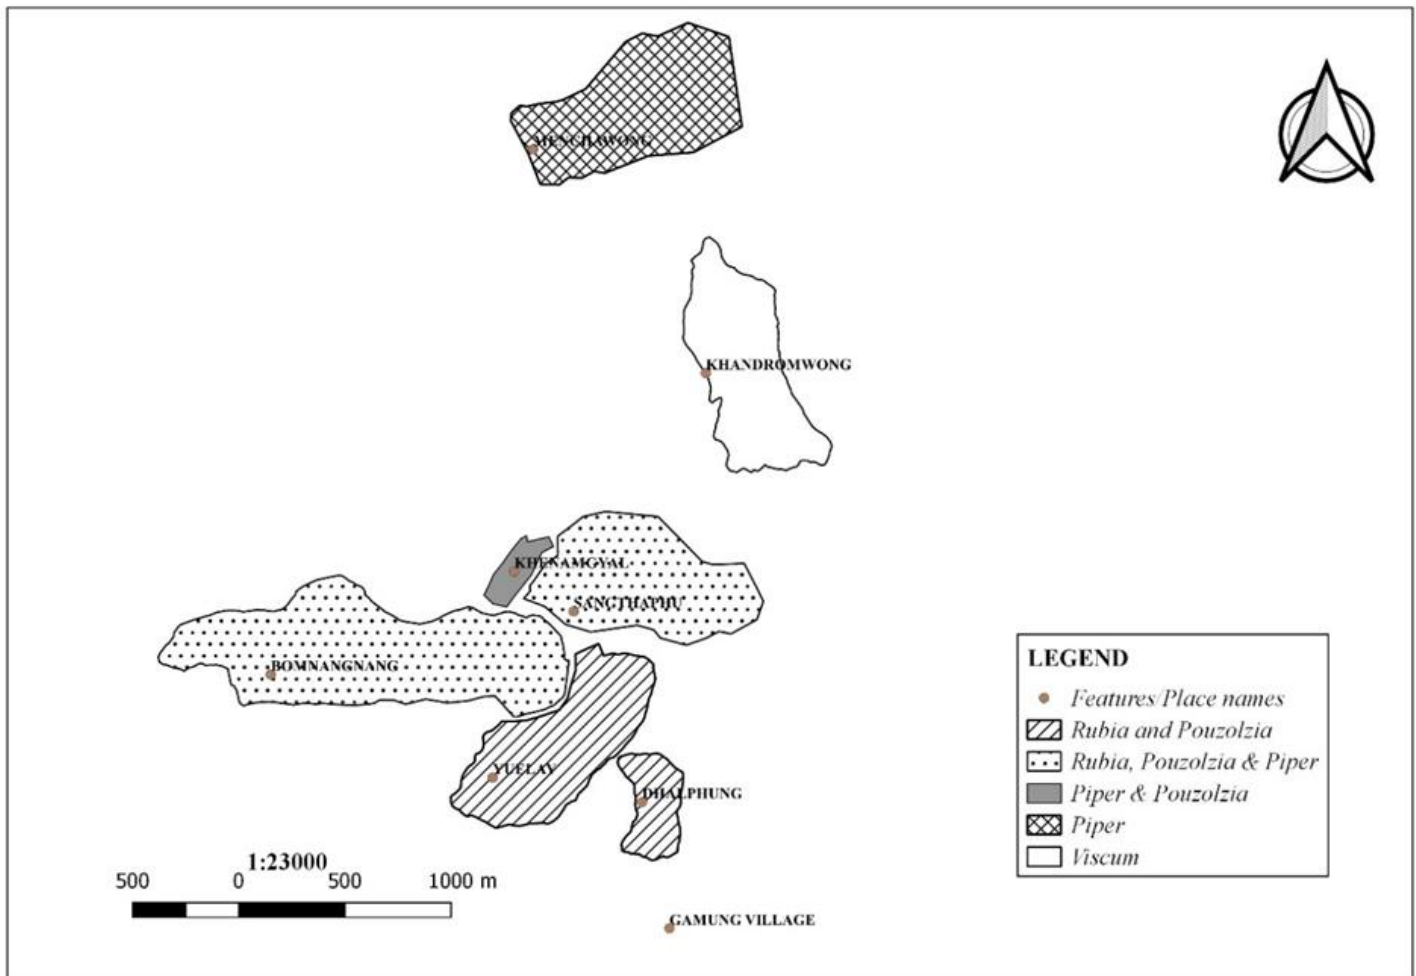

Figure 5. NWFP collection areas.

5.1. GPS Coordinates of the prominent features and places.

Table 3. GPS coordinates of the prominent and places.

Sl.No	Place Name	Latitude	Longitude	Remarks/NWFP species availability
1	Menchawong	27.102085°	91.374999°	<i>Piper spp.</i>
2	Sangthaphu	27.081683°	91.379591°	<i>Piper spp</i> , <i>Pouzolzia sp</i> and <i>Rubia spp.</i>
3	Yuelay	27.075414°	91.372750°	<i>Rubia spp.</i> and <i>Pouzolzia spp.</i>
4	Khandrowong	27.092501°	91.383092°	<i>Viscum nepalensis</i>
5	Dhalphung	27.074308°	91.379842°	<i>Rubia spp.</i> and <i>Pouzolzia spp.</i>
6	Bomnangnang	27.079897°	91.362256°	<i>Piper spp</i> , <i>Pouzolzia spp.</i> and <i>Rubia spp</i>
7	Khenamgyel	27.084166°	91.373885°	<i>Piper spp.</i> and <i>Pouzolzia spp.</i>

6. Marketing and sales plan of NWFPs

The group members had planned to collected the quantity as reflected in the table below on a yearly basis. The collected NWFP species will be sold within the country, to those traders bearing valid trading license and each species shall be sold at an expected price. In this way the members will benefitted through this group.

Table 4. Marketing and sales plan for NWFPs.

NWFP name	Potential market	Estimated quantity for sale per season	Expected price per unit	Total Nu.
Pansay	Trader holding trading license	75 kgs	180	13,500.00
<i>Rubia</i>	Trader holding trading license	300 kgs	55	16,500.00
Youngjiva	Trader holding trading license	750 kgs	55	41,250.00
<i>Viscum nepalensis</i>	Will use as raw materials and sell as an end product to market	50 Kgs	500	25000.00

7. Collection and Marketing scheme

The chairman will bear the sole responsibility in obtaining the collection permit from the concern Forest Range Office, a week ahead of the onset of the time. The coordinator shall announce the starting date, duration and the closing date in consultation with the forest office.

The group members will collect the NWFPs mentioned in this plan individually, after which they should store properly as per the market requirement demand and segregate products as per the

standards required by the trader. The executive committee members will collect the NWFPs product to the auction yard and inform to the concern forestry official/DAMC. The concern forestry official/DAMC will then organize NWFPs auction to various NWFPs traders. The auction will be organized in the presence of Chairman from the respective NWFPs groups as a representative on behalf of the group.

The executive members may deduct the expenditure such as transportation, community fund and compensation before making payment to the group. The sharing of income to the individual group member will be done based on the quantity of NWFPs collected by the respective members after deduction of all necessary expenditure.

8. Benefits to the members

The individual members will have the right to collect NWFPs based on harvesting prescription as reflected in the management plan during the harvesting period. Based on the quantity of NWFPs harvested, individual will receive their share after deducting all the expenses.

Table 5. Financial projection and benefits to the member from sale of NWFPs.

Sl.No	Particulars	NWFP species				Amount (Nu.)
		<i>Rubia cordifolia</i>	<i>Pouzolzia sanguine</i>	<i>Piper pedicellatum</i>	<i>Viscum spp</i>	
1	Revenue					
a	Total quantity (unit)	300	750	75	50	
b	Market price (Nu/unit)	55	55	180	500	
c	Total revenue from forest product sale (a*b)	16500	41250	13500	25000	
A	Total Revenues					96250
2	Expenses					
a	Packaging material	Nil	Nil	Nil	Nil	
b	Royalty	4800	1500	1500	250	
c	Transportation costs	Nil	Nil	Nil	Nil	
d	Compensation fee to executive members	Nil	Nil	Nil	Nil	
e	Incidental expenses	Nil	Nil	Nil	Nil	
B	Total expenses					8050
C	Total benefit (net-income) of group members (Total	11700	39750	12000	24750	88200

	revenues A – Total expenses B)					
D	Average income to group members (C/ no of group members)	377.42	1282.3	387.1	798.4	2845.2
E	Price per unit paid to group members (C/1a)	39	53	160	495	188 (average amount per unit from each product)

9. Benefits to the group

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability in perpetuity.

Table 6. Financial projection of the benefits to the group, the community development fund.

Sl.No	Particulars	Amount (Nu.)
	Revenues	
1	Membership registration fee	3100
2	Annual contribution	00
3	Contribution to the Community Development Fund (CDF) from sale of product 1 (10% of total income from sale of product)	1750
4	Contribution to the CDF from sale of product 2 (10% of total income from sale of product)	4125
5	Contribution to the CDF from sale of product 3 (10% of total income from sale of product)	1350
6	Contribution to the CDF from sale of product 3 (10% of total income from sale of product)	2500
A	Total revenue	12825
	Expenses (only include expenses that will be paid from the group funds)	8050
B	Total expenses	8050
C	Balance: Total revenue – Total expenses	4775.00

PART B: BY-LAWS

10. Members of the NWFP management & marketing group

Village	Number of member (HHs)	Gewog
Gamung	31	Shumar
✓ All communities under Gamung village holding Gung and Thram are eligible for the membership ✓ New members willing to join the group must first write an application to the chairman of the group. Thereafter, the applicants shall call for member meeting for the final decision for the acceptance of new members from the existing members. ✓ New members joining the group should bear the total share of benefit that the individual member can avail from the group fund generated by the existing members. ✓ Members losing interest and opting to resign from the group must leave the group without availing any benefit from the group, however the members resigning due to old/disability/single headed shall be relieved from the group with his or her share / benefit from the group.		

11. Executive committee

Sl.No	Name	Gender	Designation	Contact no.
1.	Bajay	Male	Chairperson	77882593
2.	Wangchuk Dorji	Male	Secretary	17933515
3.	Sonam Drupchu	Male	Treasurer	77782322

11.1. Responsibilities of Chairperson/Coordinator

- ✓ Chair all kinds of meeting.
- ✓ Supervise all NWFP related activities as per the prescribed management plan.
- ✓ Maintain relationship with government and all related agencies.
- ✓ To obtain collection permit a week before from the Forest Range Office as mentioned in the harvesting guideline.
- ✓ Fix date of collection and make an announcement to the group member.
- ✓ To inform the members and collect NFWPs for auction.
- ✓ To confirm date and time for auction in consultation with BO/RO/DAMC and inform traders accordingly on venue and time.
- ✓ To resolve the disputes and conflict among the members.
- ✓ To enforce the fine and penalty as per the norms of the group.
- ✓ To submit final report of the product type and income generated to the Gewog Forest Office and whenever deems necessary.
- ✓ Act as the overall manager of the group fund.

11.2. Responsibilities of Secretary

- ✓ Chair the meeting in absence of Chairperson.
- ✓ Provide assistance to the Chairman.
- ✓ Maintain records of the activities implemented.
- ✓ Write official correspondence and maintain minutes during meeting conducted.
- ✓ Assist in enforcing penalties

11.3. Responsibilities of Treasurer

- ✓ To maintain proper record of all financial matters and present during the annual general meeting to Committee and the group members.
- ✓ Officiate and assist the Chairperson or Secretary in their absence in functioning of the group.

12. Compensation to the executive committee for marketing

The committee members had agreed to serve the groups for another 5 years for the smooth functioning of the group. The committee has agreed to serve without compensation. However, if the committee has to make travel without payment, the expenditure will be made from group's fund.

13. Membership fee

As to generate the group income, the members had agreed to continue with the existing trend of contributing an annual fee of Nu. 100 per household which will be collected by treasurer.

14. Community development fund and utilization of fund

In order to generate income for the group, the members have identified the possible sources of fund such as membership fee, fines and penalties, 10% contribution through sale of different species of NWFPs. Further, all members have agreed to contribute the amount for three kilograms of each species sale value except for *Piper spp.* and *Viscum spp.*

15. Meetings and purpose

The group members will gather once a year to update on the activities implemented by the group for one year. Accordingly, the executive members will give an update on the information related to the total income generated from sale of NWFPs in a year, total membership collections provided by each member, total income shared to each member after sale of the NWFPs and total amount

deposited in the group account. They will also provide information related to fine and penalties collected by the group, if any. The executive members will also update the group on the information related to the NWFP meeting attended by them with other stakeholders. Adhoc meeting may be conducted at any time.

16. Conflict resolution

1. In case there is a conflict between the NWFP Group members and outsiders, the case shall be forwarded to the Divisional Forest Office/Gewog Administration and if the case remains unsolved, the case will be forwarded to higher authority.
2. Any conflict or dispute on NWFP matters arises among the group members, the matter will firstly be resolved by the Chairman.
3. If the dispute or conflict remains unsolved by the Chairman, it will be forwarded to the Beat office for further settlement.
4. If the conflict still remains unsolved, the case will be forwarded to the Forest Range Office/Divisional Forest office/ Gewog Administration.
5. If the Divisional Forest Office/Gewog Administration cannot resolve the conflict/ dispute, the case will be forwarded to higher authority for further action.

17. Fines and Penalties

The fine and penalties will be imposed for the following:

- ✓ Villager/members collecting the NWFP species without obtaining permit.
- ✓ Members not attending the group meetings and related activities of the group as and when informed by the executive members.
- ✓ Selling of the NWFP species individually without informing the group/members
- ✓ Illegal collection of NWFP species by the non-members as well as outsiders.

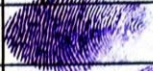

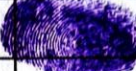

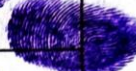

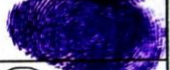

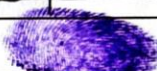

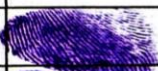

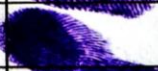

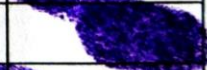

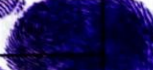

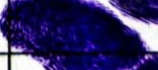

Table 7. Fines & penalties

Offences	Penalties (Nu.)
Meeting absentee	Nu. 100/-
Labour absentee	Nu. 150/-
Illegal selling of products	Nu. 1,500/-
Collection by non-members	Nu. 3,000/-

18. Group Members
