EXECUTIVE SUMMARY

This Management Plan focuses on the Sustainable Management of Non-Wood Forest Products (NWFPs) in Kerong village under Choekhorling Gewog, Pema Gatsel. The objective is to ensure the resources are utilized in a way that increases income generation and improves livelihoods while ensuring the long-term sustainability of resources in the forest.

*Kerong village is composed of about 50 households from which the Non-Wood Forest Products (NWFPs) Management Group comprised of 36 members from 36 households. The village lies at Geo-coordinates of Latitude: **26.901645°N** and Longitude: **91.329267°E**.*

The entire population depends on livestock and agriculture at the subsistence level which is confined to growing cereal and vegetables. However, few have taken up farming activities at the commercial level. Other than cereals and vegetables, communities have been relying on cardamom and oranges for income and livelihood where they make an average income of Nu.30,000/- to 50,000 annually.

However, due to climate change, cardamom and orange production became unreliable due to the gradual dying of orange trees and poor production. In this regard, they equally depend on forest resources for income and their livelihood.

*The Kerong NWFP collection areas cover an area of 456.71 hectares at 10 different locations. In the past, the management group focused on collecting *Rubia cordifolia*. However, with the revised management plan, they have targeted collecting and marketing more than 10 species of NWFPs, considering the availability of resources.*

This management plan covers management prescriptions, marketing and sale plans, By-laws, and other aspects of management. The management plan is developed as per the FRAMEWORK FOR MANAGEMENT AND MARKETING OF NON-WOOD FOREST PRODUCTS (2022).

PART 1: NWFP MANAGEMENT AND MARKETING PLAN

1.1 Background

The cross-cutting management regime for sustainable management of Non-Wood Forest Products (NWFPs) falls under Choekhorling Gewog. The identified collection sites or management area do not fall into any other management regimes such as the Local Forest Management Area (LFMA), Forest Management Unit (FMUs), and Community Forest (CF). The cross-cutting management plan for Kerong NWFP is prepared for sustainable management and marketing of NWFPs.

The collection of NWFPs shall be in line with prescribed management plans ensuring that resources are collected without compromising the ecological balance. Management activities include issuing permits, monitoring harvesting practices, and involving local communities in decision-making processes. By integrating sustainable practices and community participation, aims to enhance the livelihoods of local communities while contributing to the broader goals of forest conservation and biodiversity protection.

The Kerong Non-Wood Product Management group was formulated in 2015 with 34 members, and the plan expired in 2020. The village lies at Geo-coordinates of Latitude: **26.901645°N** and Longitude: **91.329267°E** and at an altitude of 300–1000 meters above sea level.

The entire population depends on livestock and agriculture at the subsistence level which is confined to growing cereal and vegetables. However, few have taken up farming activities at the commercial level. Other than cereals and vegetables, communities have been relying on cardamom and oranges for income and livelihood where they make an average income of Nu. 5, 000/- to 50,000 annually.

However, due to climate change, cardamom and orange production became unreliable due to the gradual dying of orange trees and poor production. In this regard, they equally depend on forest resources for income and their livelihood.

The Kerong NWFP collection areas cover an area of 456.71 hectares at 10 different locations namely, *Demnangkhoi, Dotak, Gurgang, Jamari-Gonglam Ra, Meriphu-Jagartala, Migtala, Rashi Goi, Roinang Gonpa, Sachilu, and Shonangzor*.

The focused NWFPs for collection includes *Calamus species* (Menji), *Plectocomia himalayana* (Patsha), *Tupistra nutans* (Thormom), *Elastoma species* (Damru), Fiddle head (Dawai), Mushroom (Bamung), *Rubia cordifolia* (Laniru), *Thysanolaena maxima* (Brang phaksam),

Castanopsis species (Tshatse) and *Neomicrocalamus andropogonifolius* (Ringsho). From 10 species of different NWFPs, the main NWFP product for collection is *Rubia cordifolia*.

The Kerong NWFP Management group members greatly benefited from the collection and sale of NWFP products. It has been contributing to them as the main alternative source of income for livelihoods. They have savings of **Nu. 99,200/- (Ninety-nine thousand two hundred)** accumulated contributions from the sale of NWFPs and membership fees.

However, increasing pressure from illegal collectors from Nganglam town and the nearby villages were some of the issues leading to exploitation and over harvesting. Therefore, to strengthen the protection and ensure the sustainable harvesting of resources, the group members propose to continue and revise the management plan.

Past Management Plan

The group successfully collected a total of 4603 kilograms of *Rubia cordifolia* generating an income of **Nu. 322210/-** through the sale of Non-Wood Forest Products. The main NWFP collected was *Rubia cordifolia*. The group has accumulated savings of **Nu. 96,200.00** which comes from membership fees and a **5% deduction** on the quantity of products sold. These funds strengthen the group's financial base, enabling future initiatives and promoting the sustainable management of resources.

The executive committee and group members have made significant contributions to the sustainable management of NWFPs and their collection sites. The executive committee issued collection permits, ensuring compliance with sustainable practices. During permit issuance, members gathered to discuss challenges, share insights, and address concerns related to resource management. Clear guidelines on collection modalities and prescribed procedures were provided to all members to prevent overharvesting and ensure resource sustainability. The NWFPs were sold through an **auction system**, ensuring transparency and fair price determination. These collective efforts underline the commitment of the group to sustainable practices and effective resource utilization.

Kerong NWFP Management group has maintained good records and bookkeeping. However, there is still a need to strengthen capacity-building efforts focusing on sustainable resource management and improving record-keeping practices. Strengthening these areas will enhance the group's operational efficiency and support the long-term sustainability of NWFP activities.

With renewed ideas and experiences, the group aspires to contribute to the nation's economy and improve their own livelihoods through sustainable management of resources with the following objectives:

1. Sustainable management of NWFPs to improve livelihoods and income generation.

2. Protection of forests and conservation of biodiversity through responsible harvesting and processing practices.
3. Facilitation of marketing and sales to generate income and promote the local economy.

1.2: Short descriptions of NWFP Products.

Figure 1. Image of NWFP to be collected by the group members

Description of NWFPs

I. *Calamus erectus* (**Menji**) is a climbing palm that grows in the tropical and subtropical regions of Asia. The roots of this plant are commercially used in basket

weaving, handicrafts, and furniture making.

II. *Plectocomia himalayana* (**Pharshi/Patsha**) is a species of palm found in the Himalayan region. The leaves of this palm are utilized

	for thatching roofs, making baskets, and weaving mats. The shoots are used as vegetables and delicacy.		been known to aid in digestion, reduce cholesterol levels, and boost immunity.
III.	<i>Tupistra nutans</i> (Thormom) is a herbaceous plant belonging to the Asparagaceae family. It is found in the tropical forests of Southeast Asia and has both medicinal and ornamental uses. The plant is used in traditional medicine to treat respiratory diseases and as a natural insecticide.	VII.	<i>Rubia cordifolia</i> (Laniru) is a perennial climbing plant found in the tropical regions of Asia and Africa. The roots of this plant are used in traditional medicine to treat skin diseases, fever, and rheumatism.
IV.	<i>Elatostema species</i> (Damru) is a plant that consists of several species which are distributed in the tropical regions of Asia. The leaves of this plant are used in traditional medicine as a pain reliever, to treat inflammation and fever. It is widely consumed as a vegetable in Bhutan.	VIII.	<i>Thysanolaena maxima</i> (Tsakusha) is a species of grass that grows in the tropical and subtropical regions of Asia. The leaves of this plant are used for handicrafts, furniture, and fencing material.
V.	Fiddle-head (Dawai) is the young, coiled fronds of various fern species that are used as a delicacy in many cultures worldwide. The fronds have a unique texture and flavor and are used in a variety of dishes.	IX.	<i>Castanopsis indica</i> (Nuts), commonly known as Indian Chestnut, is a species of tree found in the Indian subcontinent. The nuts of these trees are edible and have a sweet taste. They are also used in traditional medicine to treat diarrhea and fever.
VI.	Edible mushrooms are fungi that are commonly used in cooking and have various health benefits. They are a great source of vitamins, minerals, and antioxidants and have	X.	<i>Neomicrocalamus andropogonifolius</i> (Ringsho) is a species of bamboo found in the tropical regions of Asia. The shoots of this bamboo are edible and used in cuisine as a delicacy. They also have medicinal properties to treat fever and inflammation. In Bhutan, the species is widely used for production of handicrafts.

Table 1: Block description of individual NWFPs species

NWFP name	Collection area (name)	Parts harvested	Use purpose (traditional and others)	Harvesting season (months)	Estimated quantity that can be collected
<i>Calamus acanthospathus</i> (Menji)	Jagratala, Miriphu, Migtala	Shoots, Cane	Vegetables, Handicrafts and furniture	February-March	35 Head loads.
<i>Plectocomia Himalaya</i> (Pharshi/Patsha)	Jagartala, Miriphu, Dotak	Shoots, Stems	Vegetables, Handicrafts and furniture	February-March	50 Pieces
<i>Tupistra nutans</i> (Thormom)	Jagartala, Miriphu, Dotak, Jamari	Inflorescence	Vegetables	October - November	40 Kilogram
<i>Elatosteme lineolatum</i> (Damru)	Jagartala, Miriphu, Shonangzor, Migtala, Dotak, Sachilu, Demangkhoi.	Stem and leaves	Vegetables	February - March	110 Kilograms
Ferns (Dawai)	Sachilu, Rashi Goi, Gonglam Ra, Shonangzor, Miriphu, Jagartala	Fiddle-Head	Vegetables	March - May	200 bundles
Edible mushrooms (Bamung)	Jagartala, Shonangzor, Bali, Gurgang, Jamari	Whole	vegetables	March - September	25 Kilograms
<i>Rubia cordifolia</i> (Laniru)	Sachilu, Rashi Goi, Gonglam Ra, Migatala, Gurgang, Bali, Shonangzor, Demangkhoi	Whole parts	Dyes and medicinal purposes	October - November	900 Kilograms
<i>Thysanolaena maxima</i> (Tsakusha)	Shonangzor, Gonglam Ra, Migtala, Bali, Gurgang.	Inflorescence , leaves	Brooms, fodder	January - February	200 bundles
<i>Castanopsis indica</i> (Nuts),	Bali, Gurgang, Migtala, Jamari	Nuts	Food	August - September	60 kilograms
<i>Neomicrocalamus andropogonifolius</i> (Ringsho)	Dotak, Migatala, Roinang Gonpa	Culms and Shoots	Bangchung and other handicrafts, vegetables	December - April	50 bundles
<i>The AHL is average quantity calculated based on the quantity harvested for past five years.</i>					

1.3: Harvesting prescriptions for sustainable NWFP harvesting

Table 2: Harvesting prescriptions for sustainable NWFP harvesting.

NWFP species	Harvesting prescriptions for sustainable harvesting
<i>Calamus erectus</i> (Menji)	• Select a cane that is more than 10 m for cutting. • Pull down the cane from the treetop before cutting. • Once pulled down cut it from the base. • Do not damage young regeneration in the process of pulling down. • Do not pull down or cut flowering cane stem.
<i>Elatosteme lineolatum</i> (Damru)	• Collect plants that are 15 cm and above. • Retain stump of around 3” for sprouting of new shoots. • Do not uproot the whole plant. • Shouldn’t cut down trees and create more opening. • Shouldn’t disturb its catchment area.
<i>Neomicrocalamus andropogonifolius</i> (Ringsho)	• Harvest only culm from clump that has more than five culms. • Harvest culm when it produces secondary shoot at the top. • Retain at least two to three young healthy culms in each clump to favor more shooting in the following season.
<i>Plectocomia Himalaya</i> (Pharshi/Patsha)	• For mature stems • Cut cane stem only when matured. • Pull down as much of the cane as possible (avoid leaving cane parts high up in the tree) • Cut only canes with a usable length of at least 10 m. • Harvest during winter as canes have a better quality during this season. • Replant the lateral shoots that are attached to harvested cane. • For cane shoots Cut young shoot by bending the cane stem with the help of a hook long and strong stick using sharp knife. • Do not cut tree climbed cane for shoot. • Care shall be taken to avoid damaging sucker buds.
<i>Rubia cordifolia</i> (Laniru)	• Use sharp scissors for the harvesting of the upper part of the plant. • Cut the plant at 5 cm above ground level. • Leave at least 10% of the plants without collecting or harvesting any raw materials from them (these plants shall act as seed plants for natural regeneration). • Do not collect roots. • Do not uproot entire plants
<i>Thysanolaena maxima</i> (Tsakusha)	• Do not damage the rhizomes in order to allow natural regeneration • Cut the matured stem right from base
<i>Tupistra nutans</i> (Thormom)	• Collect only flowers by hand. • Do not uproot mother plants. • Do not expose plant roots to direct sunlight.

Figure 2. Sketch map of NWFP collection area

1.4: Marketing and sales plan

Table 3: NWFP Marketing and Sales plan

NWFP name	Potential market	Estimated quantity for sale per season	Expected price per unit	Total Nu.
<i>Calamus acanthospathus</i> (Menji)	Local Market (Nganglam town and vegetables vendors).	35 Head loads.	300	10500
<i>Plectocomia Himalaya</i> (Pharshi/Patsha)		50 Pieces	60	3000
<i>Tupistra nutans</i> (Thormom)		40 Kilogram	200	8000
<i>Elatosteme lineolatum</i> (Damru)	Indian Market (Neighboring Indian town).	110 Kilograms	20	2200
Ferns (Dawai)		200 bundles	20	4000
Edible mushrooms (Bamung)	Trader (Non-perishable NWFP products will be sold through auction)	25 Kilograms	150	3750
<i>Rubia cordifolia</i> (Laniru)		900 Kilograms	80	72000
<i>Thysanolaena maxima</i> (Tsakusha)		200 bundles	30	6000
<i>Castanopsis indica</i> (Nuts),		60 kilograms	200	12000
<i>Neomicrocalamus andropogonifolius</i> (Ringsho)		50 bundles	100	5000
Expected annual income from sale of NWFP products				126450/-

1.5: Marketing arrangements

The Executive Committee and members will communicate with local vegetable vendors in Nganglam town and assess the demand in neighboring towns and share information on the price and quantity demand of the market. For other Non-perishable NWFP products like *Rubia cordifolia* and soft brooms, the members and Executive Committee have decided as follows;

- ❖ The Chairman will collect the information on NWFP products collected by each member against the collection permit issued to members.
- ❖ The Executive Committee will then furnish the report to Gewog Ranger about the availability of NWFP products and quantity and submit it to Gewog Ranger whenever asked.
- ❖ Gewog Ranger will then accordingly compile the report and submit it to the Division office through the Range Office.
- ❖ The Chairman and Executive Committee will then take the NWFP products to the auction yard upon announcement of auction notification.
- ❖ The Executive Committee will ensure the quality of products before taking the species to the auction yard.
- ❖ Once the auction is complete, the Executive member will maintain a proper and clear sale record and deduct the expenditure such as transportation cost and other expenditure incurred during the sale of products.
- ❖ Then the amount will be handed over to concern member against the quantity of product registered in stock register.

1.6: Benefits to the members

- ❖ Any individual registered as a member of this group shall have equal opportunities and access to any resources prescribed in this management plan.
- ❖ They will have legal right to collect and sell any NWFP products within Bhutan as prescribed by the management plan and govern by relevant act and rules.

Table 4: Benefits to member mechanism

SN	Particulars	Benefits
1	Income from the sale of NWFP products	Individual members will benefit based on market value and quantity sold.
2	Expenses	• Transportation • 5% contribution to Group account

1.7: Benefits to the group

- ❖ From the community fund, the group will be able to support the welfare of individual members, thereby enhancing socioeconomic development.
- ❖ Moreover, the group can also save the community fund which they can use for sanctioning member's loans at the low interest rates.
- ❖ Fund can be used for any livelihood support activities in the group.

- ❖ The group can also take up activity in a more participatory manner to enhance the productivity through introduction of a better management system. In addition, the problem of pressure from outsiders on illegal harvesting can be addressed.

Table 5: Financial projection for the group

SN	Particular	Amount
Income sources		
1	Membership fees (36 member x Nu. 100)	3600 to be deposited in the group account.
2	Sale of NWFP Products	5% of total amount from sale of products will be deposited in group account.
3	• Fine and penalties • Permit fees	Include collection permit fees
4	Other sources (Donations and loan interest).	
Expenditure		
1	Transportation cost	Travel expenses of Nu.600/- for any executive member to be compensated during meetings, training, and work related to the group.
2	Administrative cost	Any administrative cost is to be discussed and decided during the general meeting.

PART 2: BY-LAWS-GROUP REGULATIONS AND NORMS

2.1: Name of the Group: Kerong Non-Wood Forest Products Management Group. The Kerong Non-Wood Forest Product Management Group is composed of 36 members from Kerong Village under Choekhorling Gewog.

2.2: Membership arrangement

- ❖ All the households with valid Gung registered in the village are eligible to become members.
- ❖ Those households who have not joined the group during the initiation of the group and wish to be member will be entertained after depositing the membership fee (Membership fee x number of years) and the individual share accumulated till that day.
- ❖ Members leaving the group due to old age, resettlement program, illness, and due to unavoidable circumstances will be paid 70% of his/her shares accumulated till the day of leaving.
- ❖ Members leaving the group without genuine reason or due to loss of interest will not be given any benefits from the group.
- ❖ Any member not following the management plan and by-laws of the group will be served a warning and if repeated for the second time, the offender will be terminated from the group without any benefit.

2.3: Responsibilities and rights of members

- ❖ The group members participating in this management group will have equal rights and responsibilities for controlling, protecting, managing and harvesting in the identified collection areas.
- ❖ The individual members will not have the rights to collect and harvest at their own will for commercial purposes unless the Chairman fixed the date **OR** after obtaining a collection permit.
- ❖ Every member of the group will have equal access to report to the committee members for violation of the management rules.

2.4: Executive Committee

The executive committee member's tenure will be for 10 years. Any committee member not performing their duties as desired and in accordance with by-laws and relevant Acts and Rules, he/she will be terminated before the expiry of the tenure. The vacant post shall be filled immediately through a unanimous decision of one-third of the group members in the assembly.

Table 6: Executive members of the group

SN	Name	Responsibility	Contact Number
1	Sangay Tempa	Chairman	17729522
2	Sonam Chophel	Secretary	17456007
3	Dorji Tshewang	Treasurer	17822132

2.5. Responsibilities of Chairperson

- ❖ To chair the group meeting.
- ❖ To resolve disputes among the members.
- ❖ To maintain contact with traders and inform the members of the date and venue.
- ❖ To coordinate the sale to traders on the agreed date and venue.
- ❖ To prepare an annual report and submit it to Gewog Ranger.
- ❖ To ensure that the group members carry out the activities as per the prescribed management plan, relevant Act, and Rules.
- ❖ To countersign the documents related to financial transactions.
- ❖ Initiate and supervise the collection of membership fees, fines, and penalties from defaulters.

2.6. Responsibilities of Secretary

- ❖ Provide assistance to the Chairman.
- ❖ Officiate as Chairperson during his absence.
- ❖ Maintain records of any activities implemented related to Pipla management and marketing.
- ❖ Keep minutes of meetings and circulate to relevant agencies.
- ❖ Write official correspondence.
- ❖ Compile the progress report and submit it to the Range Office, Nganglam with a copy to the Divisional Forest Office, annually.
- ❖ Write caution letters to the members who do not abide by the group norms.

2.7. Responsibilities of Treasurer

- ❖ To maintain the financial matters and present the details of funds to the Committee and the group members.
- ❖ Officiate Chairperson or Secretary in their absence.
- ❖ Maintain the cash transaction record, submit expenditure statement to the Chairman, and present it to the general members in meetings.
- ❖ Collection of annual membership fees from the group members.
- ❖ Taking care of financial arrangements in the group

2.8. Compensation to the Executive Committee

Any Executive Committee or members representing Kerong NWFP Management Group for meetings, workshops, trainings, sale of NWFP, and any related activities, he/she will be compensated Nu. 600/- per occasion. The compensation shall be applicable only if travel is within Nganglam. If he/she has to travel beyond Nganglam, the compensation will be discussed during the general meeting and will be compensated. For transparency, the concern must furnish a report with any relevant documents attached (Bills, Office order).

2.9. Membership fees

The Kerong NWFPs Management group has agreed to contribute an annual membership fee of Nu.100/-

2.10. Community development fund and utilization of funds.

Membership fees, visitor donations, collection of fines and penalties, interest from loans, and a 5% deposit from the sale of NWFPs are the potential sources of group funds.

- ❖ The Chairman, Secretary, and Treasurer are joint signatory authority of the Bank Account.
- ❖ All sales and expense details should be well maintained by the Chairman, Secretary, and Treasurer and it should be in the notice of members.
- ❖ All expenditures incurred on behalf of the group will be met from the Joint Account. Technical support will be sought from the concerned forest office.
- ❖ Fund utilization for the benefit of group and its members will be decided in a general meeting in the presence of concerned forestry official.

2.11: Loan and procedures

The loan is eligible to any members of this management plan and shall be governed by these By-laws;

Table 7: Loaning mechanism

SN	Loan ceiling amount (Nu.)	Interest	Loan term	Remarks
1	50,000/-	5 % per Annum	2 Years	The loaning will be entertained only if the saving exceeds Nu. 70000/-
❖ Loan is applicable only to members of this management group. ❖ Applicant shall write an application to the Executive Committee reasoning the need and shall be verified and decided by the Executive Committee. ❖ Loan agreement should be dually signed by the guarantor, witness, and Executive Committee. ❖ Failures to pay the loan within the stipulated time will lead to a penalty of 7%. However, the loan term will be extended for another 1 year. ❖ Non-payment of loans within an extended period shall be governed by the Financial Rules and Regulations of the Kingdom of Bhutan.				

2.12. Meeting

- ❖ General meetings will be conducted twice a year.
- ❖ Committee meetings will be conducted any time as and when required (However, a minimum of 4 times in year).
- ❖ The general meeting will be conducted during collection season and when required.
- ❖ The Secretary shall maintain the minutes of the meeting (Name of participants, purpose of meeting, and resolutions of meeting).

2.13. Conflict resolution

- ❖ Any conflict within the NWFP Management group related to NWFP and related issues shall be resolved by the Chairman and Executive Committee.
- ❖ For Any conflict related to NWFP with outsiders, the Executive Committee should forward the case to the nearest Forest Office and Gewog Administration through Chiwog Tshogpa.
- ❖ If the case is beyond the capacity of the Gewog Administration and Forest Office, it will be forwarded to the Court.

2.14. Offense and Penalties

Table 8: Description of Fine and penalties

SN	Offense	Penalties
1	Failing to attend the meeting	Nu. 300/- per occasion.
2	Repeatedly fails to attend meetings	Nu. 600/- (100% of the previous amount of Nu. 300/-)
3	If members fail to collect NWFP and do not contribute to themselves and the group	A fine of Nu. 200/- shall be imposed annually.
4	Selling of NWFP products independently without consent and ideas of colleagues.	A fine of Nu.1500/- to both seller and buyers and the product will be confiscated by the group.
5	Illegal collection by Non-members/outsideers.	The offender shall be fined Nu. 2000/- and the product shall be seized by the group
6	No members shall collect NWFPs for commercial purposes without a valid permit.	The member shall be fined at market value per unit and the product will be seized.
7	Misuse of NWFP group fund.	The offender shall impose a penalty of 24% annually. The offender will be given a stipulated time to reimburse the amount. The amount shall be deposited along with the amount misused within the given dateline.

2.15. Responsibility of Gewog Ranger/ Nganglam Range Office

- ❖ Coordinate and support groups in the supply of materials and organization of training to strengthen NWFP management, processing, post-harvest, marketing, record keeping, and governance.
- ❖ Monitor the implementation of the group's plan and verify the records maintained by management committee members.
- ❖ Prepare an annual monitoring report and submit it to the Division.
- ❖ Conduct and coordinate a mid-term review and a final evaluation of the implementation of the plan.
- ❖ Facilitate and support in the conflict/case resolution and management.

- ❖ Facilitate/Conduct patrolling and inspection in NWFP collection areas.
- ❖ The certificate shall be cancelled after submission of recommendation to the Department of Forests and Park Services (DoFPS) if the performance of the group is not as per the prescribed Management Plan as per FNCRR 2023.

2.16. Responsibilities Gewog Administration

- ❖ Support in conflict resolution and management that are forwarded to the Gewog Tshogdu by the Chairman.
- ❖ Support group in the supply of materials and organization of training to strengthen NWFP management, processing, post-harvest, marketing, record keeping, etc.

2.17. Power of the Department

- ❖ The DoFPS shall inspect, monitor, review the records, and supervise the activities of the group.
- ❖ The DoFPS has the right to cancel the group in case of any violation of the prescribed Management Plan and in the event of inability to carry out the activities as per the plan.
