EXECUTIVE SUMMARY

This cross-cutting management plan focuses on the sustainable management of Non-Wood Forest Products (NWFPs) in Ngangray village under Dechenling Gewog, Pema Gatshel Dzongkhag. The objective is to ensure the resources are utilized in a way that increases income generation and improves livelihoods while ensuring the long-term sustainability of resources in the forest.

*Ngangray village is composed of 22 households registered as Non-Wood Forest Products (NWFPs) Management Group. The village is located at Geo-coordinates of Latitude: **26.912840°N** and Longitude: **91.212755°E**.*

The entire population depends on livestock and agriculture at subsistence level which is confined to growing cereal and vegetables. However, few have taken up farming activities at the commercial level. Other than cereals and vegetables, communities have been relying on cardamom and oranges for income and livelihood where they make an average income of Nu.5,000/- to 40,000 annually.

However, due to climate change, cardamom and oranges have become unreliable due to the gradual dying of orange trees. In this regard, the people equally depend on forest resources for income generation and livelihoods.

*The Ngangray NWFP collection areas cover an area of **739.83** hectares at 7 different locations. In the past, the management group focused on the collection of *Rubia cordifolia*, *Piper pedicellatum*, and *Pouzolzia sanguinea*. However, with the revised management plan they have targeted to collect and market more than 7 species of NWFPs considering the availability of resources in the wild.*

This management plan covers management prescriptions, marketing and sale plans, By-laws, and other aspects of management. The management plan is developed as per the Framework for Management and Marketing of Non-Wood Forest Products (2022), National Strategy for Development of Non-Wood Forest Products (2020), Forest and Nature Conservation Code of Best Management Practices of Bhutan, Forest and Nature Conservation Act of Bhutan (2023) and Forest and Nature Conservation Rules and Regulations (2023).

PART 1: NWFP MANAGEMENT AND MARKETING PLAN

1. Background

The cross-cutting management plan for management of the Non-Wood Forest Products (NWFPs) falls under the Dechenling Local Forest Management Area (LFMA). This area-based plan is guided by the principles outlined in the Forest and Nature Conservation Code of Best Management Practices of Bhutan, which ensures that forest resources are utilized sustainably while maintaining ecological integrity.

The Local Forest Management Area (LFMA) is a broad-based plan designed to support the sustainable management of forests within a defined geographic region. It focuses on balancing resource utilization with conservation goals by providing a structured framework for the management of timber and non-wood forest products, biodiversity, and ecosystem services. Under this plan, specific areas are designated for activities such as NWFP collection, community forestry, and conservation to promote rural livelihoods while safeguarding forest health.

In the case of the Dechenling LFMA, the plan includes measures for the regulated harvesting of NWFPs, ensuring that resources are collected without compromising the ecological balance. Management activities include issuing permits, monitoring harvesting practices, and involving local communities in decision-making processes. By integrating sustainable practices and community participation, the LFMA aims to enhance the livelihoods of local communities while contributing to the broader goals of forest conservation and biodiversity protection.

The Ngangray Non-Wood Product Management group was formulated in 2016 with 32 members, and the plan expired in 2021. The village lies at Geo-coordinates of Latitude: **26.912840°N** and Longitude: **91.212755°E**.

The entire population depends on livestock and agriculture at subsistence level which is confined to growing cereal and vegetables. However, few have taken up farming activities at the commercial level. Other than cereals and vegetables, communities have been relying on cardamom and oranges for income and livelihood where they make an average income of Nu.5,000/- to 40,000 annually.

However, due to climate change, cardamom and orange production became unreliable due to the gradual dying of orange trees and poor production. In this regard, they equally depend on forest resources for income and their livelihood.

The Ngangray NWFP collection areas cover an area of 739.83 hectares at 9 different locations. The focused NWFPs for collection include *Elatosteme species* (Damru), Fiddlehead (Dawai), *Rubia cordifolia* (Laniru), *Pouzolzia sanguinea* (Yongiba), *Dendrocalamus hamiltonii* (shoot) and *Thysanolaena maxima* (Brang phaksam). From 7 species of different NWFPs, the main NWFP products for collection are *Rubia cordifolia*, *Piper pedicellatum*, and *Pouzolzia sanguinea*.

The Ngangray NWFP Management group members greatly benefited from the collection and sale of NWFP products. These NWFPs had been the alternative source of income generation for livelihood improvement.

However, increasing pressure by illegal collectors from Nganglam town and nearby villages was observed as an issue leading to the exploitation and over-harvesting of NWFP resources. Therefore, to strengthen the protection and ensure the sustainable harvesting of NWFP resources, the group members propose to continue and revise the management plan.

Past Management Plan

The group successfully collected a total of 550 kilograms of *Rubia cordifolia* and 661 kilograms of *Piper species*, generating an income of **Nu. 1,65200/-** through the sale of these Non-Wood Forest Products (NWFPs). The group has accumulated savings of **Nu. 35,000**, which comes from membership fees and a **5% deduction** on the quantity of products sold. These funds strengthen the group's financial base, enabling future initiatives and promoting the sustainable management of resources.

The executive committee and group members have made significant contributions to the sustainable management of NWFPs and their collection sites. The executive committee issued collection permits, ensuring compliance with sustainable practices. During permit issuance, members gathered to discuss challenges, share insights, and address concerns related to resource management. Clear guidelines on collection modalities and prescribed procedures were provided to all members to prevent overharvesting and ensure resource sustainability. The NWFPs were sold through an auction system, ensuring transparency and fair price determination. These collective efforts underline the commitment of the group to sustainable practices and effective resource utilization.

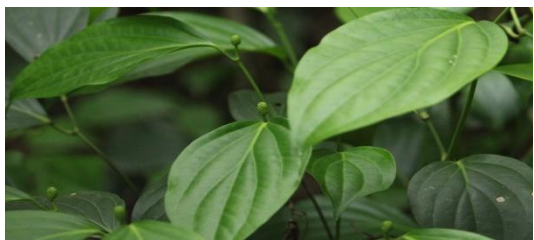

Despite several training sessions on record and bookkeeping, the group's record-keeping practices remain unsatisfactory. Frequent changes in the executive committee and limited literacy among its members have been significant challenges. The lack of literate youths in the villages further compounds the issue. To address these challenges, capacity-building efforts will be prioritized, focusing on sustainable resource management and improving record-keeping practices. Strengthening these areas will enhance the group's operational efficiency and support the long-term sustainability of NWFP activities.

With renewed ideas and experiences, the group aspires to contribute to the nation's economy and improve their livelihoods through sustainable management of resources with the following objectives:

1. Sustainable management of NWFPs to improve livelihoods and income generation.
2. Protection of forests and conservation of biodiversity through responsible harvesting and processing practices.
3. Facilitation of marketing and sales to generate income and promote the local economy.

1.2: Short descriptions of NWFP Products.

Figure 1: Image of NWFP to be collected for income and better livelihood

I.

Piper nigrum (Bonzalo). Commonly known as black pepper is found in India and Bhutan. Dried fruit is commonly used as a spice and seasoning. The plant is said to treat a variety of ailments such as digestive issues, respiratory problems, and joint pain.

II.

Elatostema species (Damru) is a plant that consists of several species which are distributed in the tropical regions of Asia. The leaves of this plant are used in traditional medicine as a pain reliever, to treat inflammation and fever.

III.

Fiddle-head (Dawai) is the young, coiled fronds of various fern species that are used as a delicacy in many cultures worldwide. The fronds have

a unique texture and flavor and are used in a variety of dishes.

IV.

Rubia cordifolia (Laniru) is a perennial climbing plant found in the tropical regions of Asia and Africa. The roots of this plant are used in traditional medicine to treat skin diseases, fever, and rheumatism.

V.

Thysanolaena maxima (Tsakusha) is a species of grass that grows in the tropical and subtropical regions of Asia. The leaves of this plant are used for handicrafts, furniture, and fencing material.

Cross-cutting Management Plan for Ngangray Non-Wood Management Group, Dechenling Gewog (Second revision)

VI. *Pouzozia sanguinea* (**Yongiba**): is a plant belonging to the nettle family found in Asia. It is widely used for the treatment of various ailments such as coughs, malaria, and wounds. In Bhutan, the products are used as raw materials for incense making.

animals. The shoots are rich in nutrients such as fiber, calcium, and iron.

VII. *Dendrocalamus hamiltonii* (**Tso**): Has a variety of uses including in construction, handicrafts, and as a food source for both humans and

Table 1: Block description of individual NWFP species

NWFP name	Collection area (name)	Parts harvested	Use purpose (traditional and others)	Harvesting season (months)	Estimated quantity that can be collected
<i>Rubia cordifolia</i> (Laniru)	Ngorphujanb, Kurungtsong	Stem	Medicine and Dyes	November - February	100 Kilogram
<i>Pouzolzia sanguinea</i> (Yongiba)	Ngorphujab, Pelingsong, Mazoritoe, Ragshari, Khominborang	Bark/Stem	Medicine and incense making	August - February	200 Kilogram
<i>Elatosteme lineolatum</i> (Damru)	Badala, Bayringmo, Kurungtsong)	Stem and leaves	Vegetables	February - March	100 Kilograms
Ferns/ Fiddlehead (Dawai)	Bayringmo, Kurungtsong, Pelingsong	Fiddle-head	Vegetables	March-May	100 bundles
<i>Piper nigrum</i> (Bonzalo)	Ngorphujab, Bayringmo, Yangkholom, Zalaborang, Badala, Pelingsong, Mozarito, Ragshari, Khomin Borang, Kurungtsong	Fruits	Medicines, spices	September - November	350 Kilograms
<i>Thysanolaena maxima</i> (Tsakusha)	Ngorphujab, Bayringmo	Inflorescence, leaves	Brooms, fodder	January - February	200 bundles
<i>Dendrocalamus hamiltonii</i>	Bayringmo, Yangkholom, Kurungtsong	Shoots	Vegetables	For culms: November to Feb. For shoots: June to September	1200 Kilogram

The AHL is average quantity calculated based on the quantity harvested for past five years.

1.3: Harvesting prescriptions for sustainable NWFP harvesting

Table 2: Harvesting prescriptions for sustainable NWFP harvesting.

NWFP species	Harvesting prescriptions for sustainable harvesting
<i>Piper nigrum</i> (Bonzalo)	- Do not uproot or cut down the entire climber. Collect fruits only when fully mature. - Harvest fruits only after the announced starting date for harvesting (The date is usually announced by the coordinator/Beat or Range Offices). Harvest fruits/spikes by hand picking without damaging the plant or by cutting a few fruit-bearing branches. - Do not cut down the host tree to ease harvesting. - Do not cut the entire fruiting portion of the plant.
<i>Elatosteme lineolatum</i> (Damru)	- Collect plants that are 15cm and above. - Retain stump of around 3” for sprouting of new shoots. - Do not uproot the whole plant. - Should not cut down trees and create more openings. - Shouldn’t disturb its catchment area.
<i>Pouzolzia sanguinea</i> (Yongiba)	- Cut the plant 10 cm above ground level. - Do not damage the remaining young stands/ seedlings/ saplings. - Should not cut down surrounding trees to ease harvesting. - Leave at least 10% of the plants to allow natural regeneration. - Harvesting of roots is strictly prohibited for ecological reasons
<i>Rubia cordifolia</i> (Laniru)	- Use sharp scissors for the harvesting of the upper part of the plant. - Cut the plant 5 cm above ground level. - Leave at least 10% of the plants without collecting or harvesting any raw materials from them (these plants shall act as seed plants for natural regeneration). - Do not collect roots. - Do not uproot entire plants
<i>Thysanolaena maxima</i> (Tsakusha)	- Do not damage the rhizomes in order to allow natural regeneration - Cut the matured stem right from the base
<i>Dendrocalamus hamiltonii</i>	For culms: - Cut culms above one node from the ground level. - Do not cut culms less than one year old - Retain 50% healthy culms in a clump - Remove matured culms from the center of the clump. - Do not harvest the culms growing on the periphery of the clump. For shoots: - Collect bamboo shoots to a maximum of 25% from a clump - Cut bamboo shoots with a sharp knife at the ground level without damaging or wounding the other healthy ones. - After cutting and collecting the bamboo shoot, cover that void place with topsoil. Protect the remaining shoots and let them further develop into culms

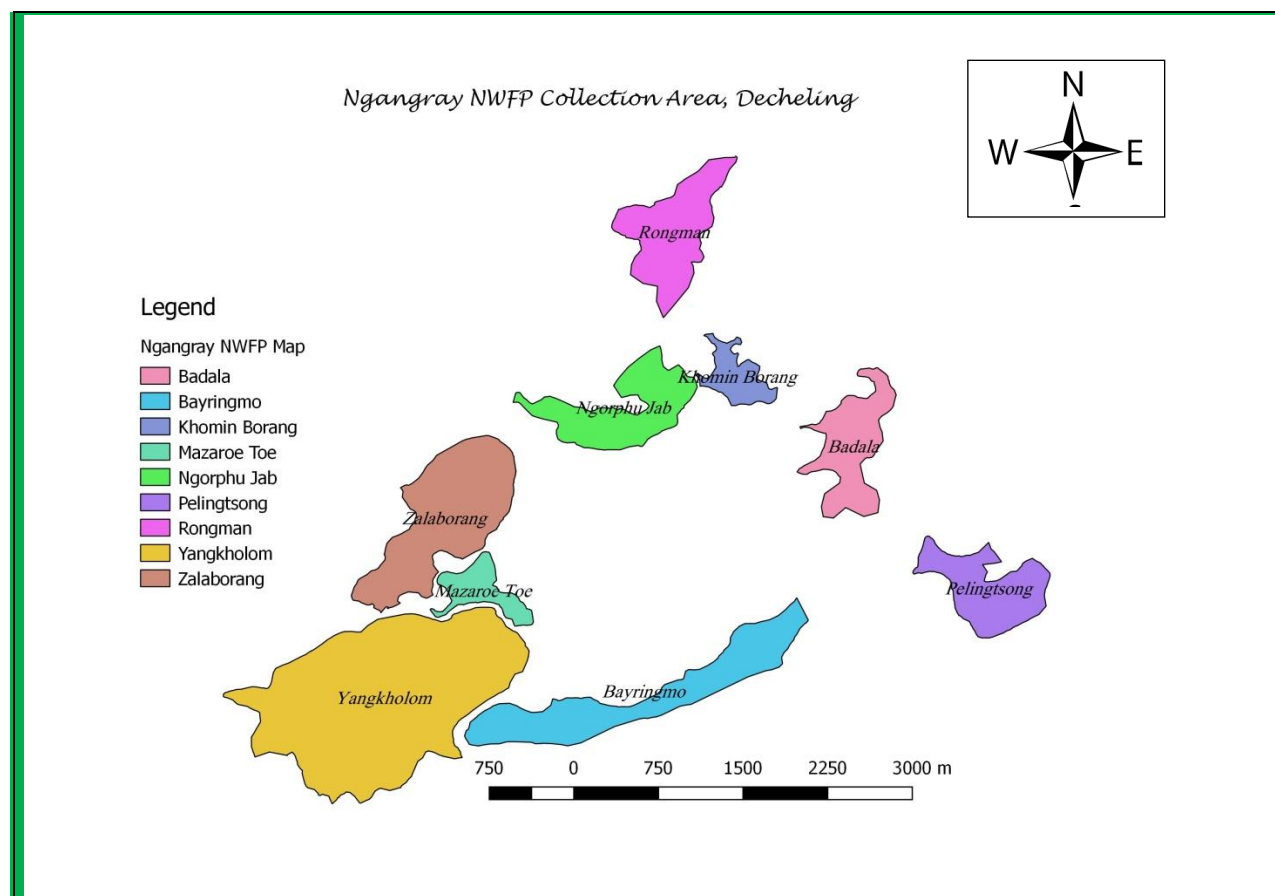

Figure 2: Sketch map of the NWFPs collection area.

1.4: Marketing and sales plan

Table 3: NWFP Marketing and Sales plan

NWFP name	Potential market	Estimated quantity for sale per season	Expected price per unit	Total Nu.
<i>Piper nigrum</i> (Bonzalo)	Local Market (Nganglam town and vegetable vendors).	350 Kilograms	200	70000
<i>Pouzolzia sanguinea</i> (Yongiba)		200 Kilograms	70	14000
<i>Elatosteme lineolatum</i> (Damru)	Indian Market (Neighboring Indian town).	100 Bundles	20	2000
<i>Rubia cordifolia</i> (Laniru)		100 Kilograms	200	20000
Ferns (Dawai)	Trader (Non-perishable NWFP products will be sold through auction)	100 bundles	20	2000
<i>Dendrocalamus hamiltonii</i> (Tso nyom)		1200 kilograms	100	120000

Cross-cutting Management Plan for Ngangray Non-Wood Management Group, Dechenling Gewog (Second revision)

<i>Thysanolaena maxima</i> (Tsakusha)		200 bundles	30	6000
Expected annual income from sale of NWFP products				234000/-

1.5: Marketing arrangements

The executive committee and members will communicate with local vegetable vendors in Nganglam town and assess the demand in neighboring towns and share information on the price and quantity demand of the market. For other non-perishable NWFP products like *Rubia cordifolia* and soft brooms, the members and executive committee have decided as follows:

- ❖ The Chairman will collect the information on NWFP products collected by each member against the collection permit issued to members.
- ❖ The executive committee will then furnish the report to Gewog Ranger about the availability of NWFP products and its quantity and submit it to Gewog Ranger whenever asked.
- ❖ Gewog Ranger will then accordingly compile the report and submit it to the Division office through the Range Office.
- ❖ The chairman and executive committee will then take the NWFP products for the auction yard upon announcement of auction notification.
- ❖ The executive committee will ensure the quality of products prior to taking it to the auction yard.
- ❖ Once the auction is complete, the executive member will maintain a proper and clear sale record and deduct the expenditure such as transportation costs and other expenditures incurred during the sale of products.
- ❖ Then the amount will be handed over to the concerned member against the quantity of product registered in the stock register.

1.6: Benefits to the members

- ❖ Any individual registered as a member of this group shall have equal opportunities and access to any resources prescribed in this management plan.
- ❖ They will have the legal right to collect and sell any NWFP products within Bhutan as prescribed by the management plan and governed by relevant acts and rules.

Table 4: Benefits to member mechanism

Sl. No.	Particulars	Benefits
1	Income from the sale of NWFP products	Individual members will benefit based on market value and quantity sold.
2	Expenses	• Transportation • 5% contribution to the group account from the sale of NWFP products.

1.7: Benefits to the group

- ❖ From the community fund, the group will be able to support the welfare of individual members, thereby enhancing socioeconomic development.
- ❖ Moreover, the group can also save the community fund which they can use for sanctioning member's loans at low interest rates.
- ❖ Fund can be used for any livelihood support activities in the group.
- ❖ The group can also take up activity in a more participatory manner to enhance the productivity through introduction of a better management system. In addition, the problem of pressure from outsiders on illegal harvesting can be addressed.

Table 5: Financial projection for the group

SN	Particular	Amount
Income sources		
1	Membership fees (22 members x Nu. 100)	2200 to be deposited in the group account.
2	Sale of NWFP Products	5% of the total amount from the sale of products will be deposited in the group account.
3	Fine and penalties Permit fees	Include collection permit fees
4	Other sources (Donations and loan interest).	
Expenditure		
1	Transportation cost	Travel expenses of Nu. 600/- for any executive member or any member of the group to be compensated during meetings, training, and work related to the group.
2	Administrative cost	Any administrative cost is to be discussed and decided during the general meeting.

PART 2: BY-LAWS-GROUP REGULATIONS AND NORMS

2.1: Name of the Group: Ngangray Non-Wood Forest Products Management Group. The Ngangray Non-Wood Forest Product Management Group is composed of 22 members from Ngangray and Dungphu and Yebashing Village under Dechenling Gewog.

2.2: Membership arrangement

- ❖ All the households with valid Gung registered in the village are eligible to become members.
- ❖ Those households who have not joined the group during the initiation of the group and wish to be members will be entertained after depositing the membership fee (Membership fee X Number of year) and the individual share accumulated till that day.
- ❖ Members leaving the group due to old age, resettlement program, illness, and due to unavoidable circumstances will be paid 50% of his/her shares accumulated till the day of leaving.
- ❖ Members leaving the group without genuine reason or due to loss of interest will be fined Nu. 5000/- and no benefits will be entertained.
- ❖ Any member not following the management plan and by-laws of the group will be served a warning and if repeated for the second time, the offender will be terminated from the group without any benefit.

2.3: Responsibilities and rights of members

- ❖ The group members participating in this management group will have equal rights and responsibilities for controlling, protecting, managing, and harvesting in the identified collection areas.
- ❖ The individual members will not have the rights to collect and harvest at their own will for commercial purposes unless the chairman fixed the date OR after obtaining a collection permit.
- ❖ Every member of the group will have equal access to report to the committee members for violation of the management rules.

2.4: Executive Committee

The executive committee member's tenure will be for 10 years. Any committee member not performing their duties as desired and in accordance with by-laws and relevant acts and rules, he/she will be terminated before the expiry of the tenure. The vacant post shall be filled immediately through the unanimous decision of one-third of the group members in the assembly.

Table 6: Executive members of the group

SN	Name	Responsibility	Contact Number
1	Dorji Wangchuk	Chairman	17990594
2	Jigme Wangchuk	Secretary	17512170
3	Minjur Thinley	Treasurer	77700321

2.5. Responsibilities of Chairperson

- ❖ To chair the group meeting.
- ❖ To resolve disputes among the members.
- ❖ To maintain contact with traders and inform the members of the date and venue.
- ❖ To coordinate the sale to traders on the agreed date and venue.
- ❖ To prepare an annual report and submit it to Gewog Ranger.
- ❖ To ensure that the group members carry out the activities as per the prescribed management plan, relevant act, and rules.
- ❖ To countersign the documents related to financial transactions.
- ❖ Initiate and supervise the collection of membership fees, fines, and penalties from defaulters.

2.6. Responsibilities of Secretary

- ❖ Provide assistance to the Chairman.
- ❖ Officiate as Chairperson during his absence.
- ❖ Maintain records of any activities implemented related to Pipla management and marketing.
- ❖ Keep minutes of meetings and circulate to relevant agencies.
- ❖ Write official correspondence.
- ❖ Compile the progress report and submit it to the Range Office, Nganglam with a copy to the Divisional Forest Office, annually.
- ❖ Write a warning letter to the members who do not abide by the group norms.

2.7. Responsibilities of Treasurer

- ❖ To maintain the financial matters and present the details of funds to the Committee and the group members.
- ❖ Officiate Chairperson or Secretary in their absence.
- ❖ Maintain the cash transaction record, submit expenditure statement to the Chairman, and present it to the general members in meetings.
- ❖ Collection of annual membership fees from the group members.
- ❖ Taking care of financial arrangements in the group

2.8. Compensation to the Executive Committee

Any executive committee members representing Ngangray NWFP Management Group for meetings, workshops, training, sales of NWFP, and any related activities, he/she will be compensated Nu.500/- per occasion. The compensation shall be applicable only if travel is within Nganglam. If he/she has to travel beyond Nganglam or within Pema Gatsel, Nu. 1000/- shall be claimed as compensation for expenditure. The concern must furnish a report with relevant documents attached (Bills, Office order) for transparency.

2.9. Membership fees

The Ngangray NWFPs Management group has agreed to contribute an annual membership fee of Nu.100/-

2.10. Community development fund and utilization of funds.

Membership fees, visitor donations, collection of fines and penalties, interest from loans, 5% deposit from the sale of NWFPs are the potential sources of group funds

- ❖ The Chairman, Secretary, and Treasurer are the joint signatory authority of the Bank Account.
- ❖ All sales and expense details should be well maintained by the Chairman, Secretary, and Treasurer and it should be in the notice of members.
- ❖ All expenditure incurred on behalf of the group will be beard from the Joint Account. Technical support will be sought from the concerned forest office.
- ❖ Fund utilization for the benefit of the group and its members will be decided in a general meeting in the presence of a concern forestry official.

2.11: Loan and procedures

The loan is eligible to any members of this management plan and shall be governed by these By-laws;

Table 7: Loaning mechanism

SN	Loan ceiling amount (Nu.)	Interest	Loan term	Remarks
1	40,000/-	2 % per Annum	3 Years	The loaning will be entertained only if the saving exceeds Nu. 50000/-
❖ Loan is applicable only to members of this management group. ❖ Applicant shall write an application to the Executive Committee reasoning the need and shall be verified and decided by the Executive Committee. ❖ Loan agreement should be dually signed by the guarantor, witness, and executive committee. ❖ Failures to payment of loan within stipulated time will lead to a penalty of 24%. ❖ Non-payment of loan shall be governed by financial rules and regulations of the Kingdom of Bhutan.				

2.12. Meeting

- ❖ General meetings will be conducted twice a year.
- ❖ Committee meetings will be conducted any time as and when required (However, a minimum of 4 times in year).
- ❖ The general meeting will be conducted during the collection season and when required.
- ❖ The Secretary shall maintain the minutes of the meeting (Name of participants, purpose of meeting, and resolutions of meeting).

2.13. Conflict resolution

- ❖ Any conflict within the NWFP Management group related to NWFP and related issues shall be resolved by the Chairman and executive committee.

- ❖ For any conflict related to NWFP with outsiders, the executive committee should forward the case to the nearest Forest Office and Gewog Administration through Chiwog Tshogpa.
- ❖ If the case is beyond the capacity of the Gewog Administration and Forest Office, it will be forwarded to the Court.

2.14. Offense and Penalties

Table 8: Description of Fine and penalties

SN	Offense	Penalties
1	Fails to attend the meeting for the first time	Nu. 200/- per occasion.
2	Failures to attend the meeting for the second time.	Addition of 50% to previous fine OR Nu. 300/-
3	If members fail to collect NWFP and do not contribute to themselves and the group	A fine of Nu. 500/- shall be imposed annually.
4	Selling of NWFP products independently without consent and ideas of colleagues.	The case will be dealt with as per FNCRR-2023
5	Illegal collection by non-members/outsideers.	The case will be dealt with as per FNCRR-2023
6	No members shall collect NWFPs for commercial purposes without a valid permit.	A fine of Nu.1000/- will be imposed for every individual
7	Misuse of NWFP group fund.	The offender shall impose a penalty of 24% annually. The offender will be given stipulated time to reimburse the amount. The amount shall be deposited along with the amount misused within the given dateline.

2.15. Responsibility of Gewog Ranger/ Nganglam Range Office

- ❖ Coordinate and support groups in the supply of materials and organization of training to strengthen NWFP management, processing, post-harvest, marketing, record keeping, and governance.
- ❖ Monitor the implementation of the group's plan and verify the records maintained by management committee members.
- ❖ Prepare an annual monitoring report and submit it to the Division.
- ❖ Conduct and coordinate a mid-term review and a final evaluation of the implementation of the plan.
- ❖ Facilitate and support in the conflict/case resolution and management.
- ❖ Facilitate/Conduct patrolling and inspection in NWFP collection areas.

- ❖ The certificate shall be canceled after submission of recommendation to the Department of Forests and Park Services (DoFPS) if the performance of the group is not as per the prescribed management plan as per FNCRR-2023.

2.16. Responsibilities Gewog Administration

- ❖ Support in conflict resolution and management that are forwarded to the Gewog Tshogdu by the Chairman.
- ❖ Support group in the supply of materials and organization of training to strengthen NWFP management, processing, post-harvest, marketing, record keeping, etc.

2.17. Power of the Department

- ❖ The DoFPS shall inspect, monitor, review the records, and supervise the activities of the group.
- ❖ DoFPS has the right to cancel the group in case of any violation of the prescribed management plan and in the event of inability to carry out the activities as per the plan.

2.18. Ngangray NWFP Management Group Membership
