EXECUTIVE SUMMARY

The cross-cutting management plan focuses on the sustainable Management of Non-wood Forest Products (NWFPs) in Yangmalashing and Mendrelgang village under Decheling Gewog,

Pemgatshel. The objective is to ensure the resources are utilized in a way that increases income generation and improves livelihoods while ensuring long-term sustainability of resources in the forest.

*Yangmalashing chiwog is composed of about 50 households from which Non- Wood Forest Products (NWFPs) Management Group comprised of 34 members from 34 households. The village lies at Geo-coordinates of Latitude: **26.889932°N** and Longitude: **91.284590°E**.*

The entire population depends on livestock and agriculture on subsistence level which is confined to growing cereal and vegetables. However, few have taken up farming activities at commercial level. Other than cereals and vegetables, communities have been relying on cardamom and oranges for income and livelihood where they make an average income of Nu.10,000/- to 50,000/- annually.

However, due to climate change, the cardamom and oranges production became unreliable due to gradual dying of orange trees and poor production. In this regard, they equally depend on forest resources for income and their livelihood.

*The Yangmalashing NWFP collection areas cover an area of **477.55** hectares at **9** different locations. In the past, the management group focused on the collection of *Rubia cordifolia*, *Piper pedicellatum* and *Pouzolzia sanguinea*. However, with a revised management plan they have targeted to collect and market more than **11 species** NWFPs considering availability of resources.*

*Since the establishment of the Management group, the group had group saving of Nu. **45455/-** from which **Nu.6800/-** was cash in hand which is to be deposited into common bank.*

This management plan covers management prescriptions, marketing and sale plans, By-laws and other aspects of management. The management plan is developed as per the FRAMEWORK FOR MANAGEMENT AND MARKETING OF NON-WOOD FOREST PRODUCTS (2022).

PART 1: NWFP MANAGEMENT AND MARKETING PLAN

1.1: Background

The cross-cutting management plan for sustainable management of Non-Wood Forest Products (NWFPs) falls under the Dechenling Local Forest Management Area (LFMA). This area-based plan is guided by the principles outlined in the Forest and Nature Conservation Code of Best Management Practices of Bhutan, which ensures that forest resources are utilized sustainably while maintaining ecological integrity.

The Yangmalashing Non-Wood Product Management group was formulated in 2014 with 29 members, and the plan expired in 2022. The village lies at Geo-coordinates of Latitude: **26.889932°N** and Longitude: **91.284590°E**.

The entire population depends on livestock and agriculture on subsistence level which is confined to growing cereal and vegetables. However, few have taken up farming activities at commercial level. Other than cereals and vegetables, communities have been relying on cardamom and oranges for income and livelihood generating an average income of Nu.10,000/- to 50,000/- annually.

However, due to climate change, the cardamom and oranges production became unreliable due to gradual dying of orange trees and poor production. In this regard, they equally depend on forest resources for income and their livelihood.

The Yangmalashing NWFP collection areas cover an area of 477.55 hectares at 9 different locations. The focused NWFPs for collection include; *Elatostema species* (Damru), Fiddle head (Dawai), *Rubia cordifolia* (Laniru), *Pouzolzia sanguinea* (Yongiba), *Piper pedicellatum* (Bonzalo), *Dendrocalamus hamiltonii* (shoot), Mushroom, *Tupistra nutans* (Thormom), *Plectocomia himalayana* (Patsha), *Neomicrocalamus andropogonifolius* (Ringsho) and *Calamus species*. From 11 species of different NWFPs, the main NWFP products for collection are *Rubia cordifolia*, *Piper pedicellatum* and *Pouzolzia sanguinea*.

The Yangmalashing NWFP Management group members were greatly benefited from collection and sale of NWFP products. It has been contributing them as one of the main alternative source of income for livelihoods.

However, increasing pressure by illegal collectors from Nganglam town and nearby village was big issues leading to exploitation and over harvesting. Therefore, to strengthen the protection and ensure the sustainable harvesting of resources, the group members propose to continue and revised the management plan.

With renewed ideas and experiences, the group aspires to contribute to nation's economy and improve their own livelihoods through sustainable management of resources with following objectives:

1. Sustainable use of NWFPs to improve livelihoods and income generation.
2. Protection of forests and conservation of biodiversity through responsible harvesting and processing practices.
3. Facilitation of marketing and sales to generate income and promote the local economy.

1.2: Short descriptions of NWFP Products.

Piper nigrum (Bonzalo) 	Commonly known as black pepper is found in India and Bhutan. Dried fruit is commonly used as a spice and seasoning. The plant is said to treat variety of ailments such as digestive issues, respiratory problems, and joint pain
Elatostema species (Damru) 	A plant that consists of several species which are distributed in the tropical regions of Asia. The leaves of this plant are used in traditional medicine as a pain reliever, to treat inflammation, and fever.
Fiddle-head (Dawai) 	Young, coiled fronds of various fern species are used as a delicacy in many cultures worldwide. The fronds have a unique texture and flavor and are used in a variety of dishes.
Rubia cordifolia (Laniru) 	A perennial climbing plant found in the tropical regions of Asia and Africa. The roots of this plant are used in traditional medicine to treat skin diseases, fever, and rheumatism.
Pouzozia sanguinea (Yongiba) 	A plant belonging to nettle family found in Asia. It is widely used for the treatment of various ailments such as coughs, malaria, and wounds. In Bhutan, the products are used as raw materials for incense making
Dendrocalamus hamiltonii (Tso) 	Has a variety of uses including in construction, handicrafts and as a food source for both human and animals. The shoots are rich in nutrients such as fiber, calcium, and iron

<i>Tupistra nutans</i> (Thormom) 	Herbaceous plants belong to the Asparagaceae family. It is found in the tropical forests of Southeast Asia and has both medicinal and ornamental uses. The plant is used in traditional medicine to treat respiratory diseases and as a natural insecticide.
<i>Neomicrocalamus andropogonifolius</i> (Ringsho) 	A species of bamboo found in the tropical regions of Asia. The shoots of this bamboo are edible and used in cuisine as a delicacy. They also have medicinal properties to treat fever and inflammation. In Bhutan, the species is widely used for production of handicrafts
<i>Plectocomia himalayana</i> (Pharshi/Patsha) 	A species of palm found in the Himalayan region. The leaves of this palm are utilized for thatching roofs, making baskets, and weaving mats. The shoots are used as vegetables and delicacy
<i>Calamus erectus</i> (Menji) A climbing palm that grows in the tropical and subtropical regions of Asia. The roots of this plant are commercially used in basket weaving, handicrafts, and furniture making	
Edible mushrooms A type of Fungi commonly used in cooking and has various health benefits. They are a great source of vitamins, minerals, and antioxidants and have been known to aid in digestion, reduce cholesterol levels, and boost immunity	

Table 1: Block description of individual NWFPs species

NWFP name	Collection area (name)	Parts harvested	Use purpose (traditional and others)	Harvesting season (months)	Estimated quantity that can be collected
<i>Rubia cordifolia</i> (Laniru)	Nima amadrang, Sengdibali, Kochomo, Mangkhar, Regisharang, Yangmalashing Jab	Stem	Medicine and Dyes	November - February	100 Kilogram
<i>Pouzolzia sanguinea</i>	Sajangzor, Phijimzay and Shonangzor	Bark/Stem	Medicine and incense	August - February	100 Kilogram

Cross-cutting management plan for Yangmalashing Non-Wood Management Group, Decheling Gewog (Second revision)

(Yongiba)			making		
<i>Elatosteme lineolatum</i> (Damru)	Maniri and Soinangdrang	Stem and leaves	Vegetables	February - March	50 bundles
Ferns/ Fiddle head (Dawai)	Marung, Bongbola, Maniri-Soinangdrang	Fiddle-head	Vegetables	March - May	100 bundles
<i>Piper nigrum</i> (Bonzalo)	Yangmalashing jab, Zengri, Bengri, Bongbola, Marung	Fruits	Medicines, spices	September - November	200 Kilograms
<i>Dendrocalamus hamiltonii</i>	Marung, Nima amadrang, Yangmalashing	Shoots	Vegetables	For culms: Nov-Feb For shoots: June-Sept	100 Kilogram
<i>Calamus acanthospathus</i> (Menji)	Gurgang, Sakarzay, Wangdiphodrang,	Shoots, Cane	Vegetables, Handicrafts and furniture	February-March	30 Head loads
<i>Plectocomia Himalaya</i> (Pharshi/Patsha)	Sengdibali, Kotchomo	Shoots, Stems	Vegetables, Handicrafts and furniture	February-March	80 Pieces
<i>Tupistra nutans</i> (Thormom)	Sajangzor, Phijimzay, Zengri, Bengri, Bongbola	Inflorescence	Vegetables	October - November	90 Kilogram
Edible mushrooms (Bamung)	In all 9 areas.	Whole	Vegetables	March - September	50 Kilogram
<i>Neomicrocalamus andropogonifolius</i> (Ringsho)	Bengri and Zengri	Culms and Shoots	Bangchung and other handicrafts, vegetables	December - April	50 bundles

1.3: Harvesting prescriptions for sustainable NWFP harvesting

Table 2: Harvesting prescriptions for sustainable NWFP harvesting.

NWFP species	Harvesting prescriptions for sustainable harvesting
<i>Piper nigrum</i> (Bonzalo)	- Do not uproot or cut down the entire climber. Collect fruits only when fully mature. - Harvest fruits only after the announced starting date for harvesting (Date is usually announced by the coordinator / GFEO). Harvest fruits / spikes by hand picking without damaging the plant or by cutting a few fruit bearing branches. - Do not cut down the host tree to ease harvesting. - Do not cut the entire fruiting portion of the plant.
<i>Elatosteme lineolatum</i> (Damru)	- Collect plants that are 15cm and above. - Retain stump of around 3” for sprouting of new shoots. - Don’t uproot whole plant. - Shouldn’t cut down trees and create more opening.

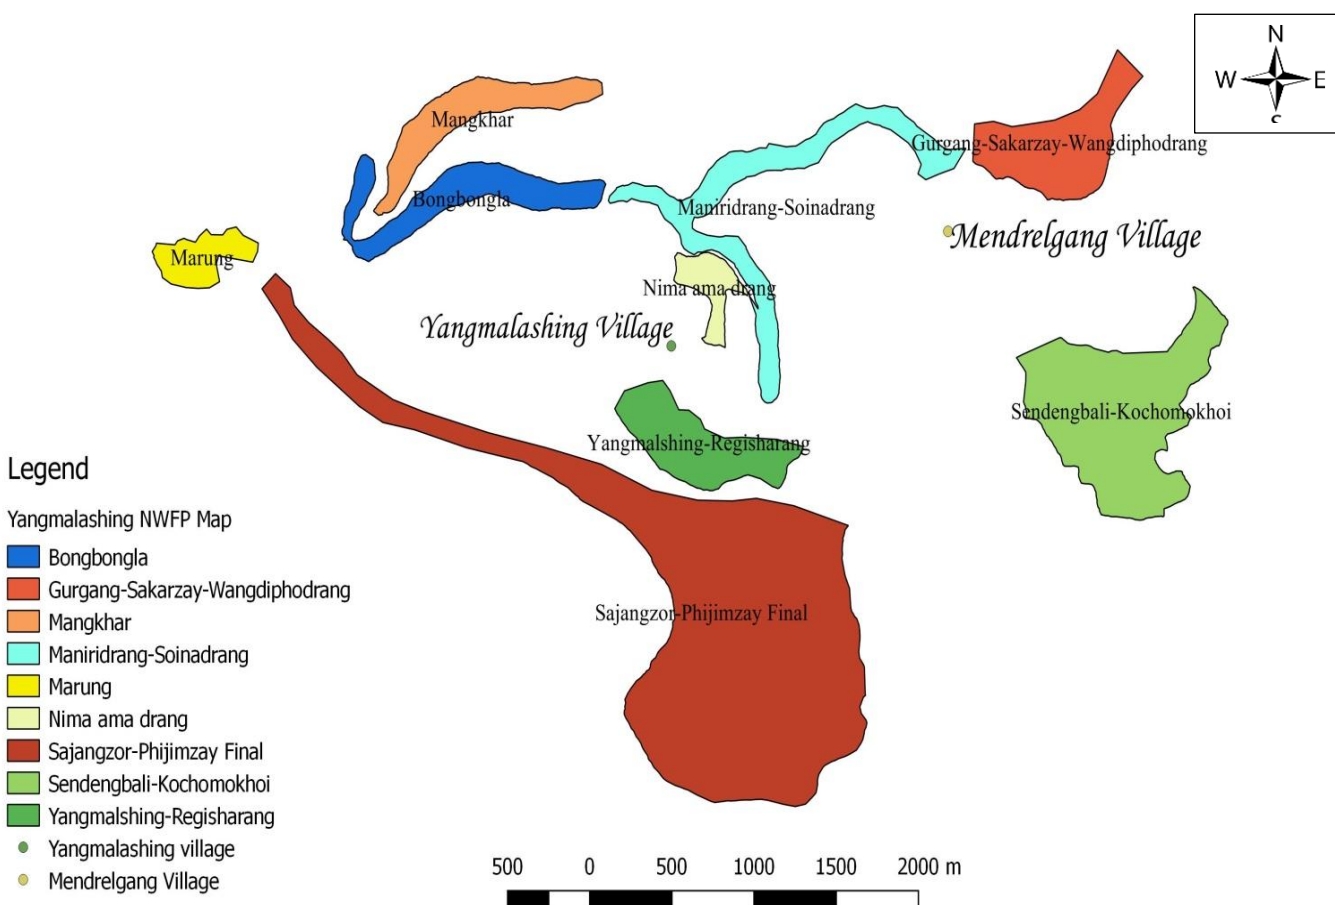

Cross-cutting management plan for Yangmalashing Non-Wood Management Group, Decheling Gewog (Second revision)

	• Shouldn't disturb its catchment area.
<i>Pouzolzia sanguinea</i> (Yongiba)	• Cut the plant at 10 cm above the ground level. • Do not damage the remaining young stands/ seedlings/ saplings. • Should not cutdown surrounding trees to ease harvesting. • Leave at least 10% of the plants to allow natural regeneration. • Harvesting of roots is strictly prohibited for ecological reason
<i>Rubia cordifolia</i> (Laniru)	• Use sharp scissors for the harvesting of the upper part of the plant. • Cut the plant at 5 cm above ground level. • Leave at least 10% of the plants without collecting or harvesting any raw materials from them (these plants shall act as seed plants for natural regeneration). • Do not collect roots. • Do not uproot entire plants
<i>Thysanolaena maxima</i> (Tsakusha)	• Do not damage the rhizomes in order to allow natural regeneration • Cut the matured stem right from base
<i>Dendrocalamus hamiltonii</i>	For culms: • Cut culms above one node from the ground level. • Do not cut culms less than one year old • Retain 50% of healthy culms in a clump • Remove matured culms from centre of the clump. • Do not harvest the culms growing on periphery of the clump. For shoots: • Collect bamboo shoots to a maximum of 25% from a clump • Cut bamboo-shoots with a sharp knife at the ground level without damaging or wounding the other healthy ones • After cutting and collecting the bamboo-shoot, cover that void place with top soil Protect the remaining shoots and let them further develop into culms
<i>Calamus erectus</i> (Menji)	• Select cane which is more than 10 m for cutting. • Pull down the cane from tree top before cutting. • Once pulled down cut it from the base. • Do not damage young regeneration in process of pulling down. • Do not pull down or cut flowering cane stem.
<i>Plectocomia Himalaya</i> (Pharshi/Patsha)	• For mature stems • Cut cane stem only when matured. • Pull down as much of the cane as possible (avoid leaving cane parts high up in the tree) • Cut only canes with a usable length of at least 10 m. • Harvest during winter as canes have a better quality during this season. • Replant the lateral shoots that are attached to harvested cane. • For cane shoots Cut young shoot by bending the cane stem with the help of a hook long and strong stick using sharp knife. • Do not cut tree climbed cane for shoot. • Care shall be taken to avoid damaging sucker buds.

Cross-cutting management plan for Yangmalashing Non-Wood Management Group, Decheling Gewog (Second revision)

<i>Tupistra nutans</i> (Thormom)	• Collect only flowers by hand. • Do not uproot mother plants. • Do not expose plant root to direct sunlight.
<i>Neomicrocalamus andropogonifolius</i> (Ringsho)	• Harvest only culm from clump that has more than five culms. • Harvest culm when it produces secondary shoot at the top. • Retain at least two to three young healthy culms in each clump to favor more shooting in the following season.

Figure 2: Sketch map of the NWFPs collection area.

1.4: Marketing and sales plan

Table 3: NWFP Marketing and Sales plan

NWFP name	Potential market	Estimated quantity for sale per season	Expected price /unit	Total Nu.
<i>Piper nigrum</i> (Bonzalo)	Local Market (Nganglam town and vegetables)	200 Kilograms	200	40000
<i>Pouzolzia sanguinea</i>		100 Kilograms	70	7000

Cross-cutting management plan for Yangmalashing Non-Wood Management Group, Decheling Gewog (Second revision)

(Yongiba)	vendors). Indian Market (Neighbouring Indian town). Trader (Non-perishable NWFP products will be sold through auction)			
<i>Elatosteme lineolatum</i> (Damru)		100 Bundles	20	2000
<i>Rubia cordifolia</i> (Laniru)		80 Kilograms	100	8000
Ferns (Dawai)		150 bundles	20	3000
<i>Dendrocalamus hamiltonii</i> (Tso nyom)		100 kilograms	100	10000
Mushroom (Bamung)		50 Kilograms	150	7500
<i>Tupistra nutans</i> (Thormom)		90 Kilograms	200	18000
<i>Plectocomia himalayana</i> (Patsha)		80 Pieces	80	6400
<i>Calamus species (Minji)</i>		30 Head loads	400	12000
<i>Neomicrocalamus andropogonifolius</i>		50 bundles	200	10000
Expected annual income from sale of NWFP products				123900/-

1.5: Marketing arrangements

The executive committee and members will communicate with local vegetables vendors at Nganglam town and assess the demand in neighboring town and share the information on price and quantity demand of the market. For other Non-perishable NWFP products, the members and executive committee have decided as follows;

- ❖ Chairman will collect the information on NWFP products collected by each member against the collection permit issued to members.
- ❖ Executive committee will then furnish the report to Gewog Ranger about the availability of NWFP products and its quantity and submit to Gewog Ranger whenever asked.
- ❖ Gewog Ranger will then accordingly compile the report and submit to Division office through Range Office.
- ❖ The chairman and executive committee will then take the NWFP products for auction yard upon announcement of auction notification.
- ❖ The executive committee will ensure the quality of products prior to taking it to auction yard.
- ❖ Once the auction is complete, the executive member will maintain proper and clear sale record and deduct the expenditure such as transportation cost and other expenditure incurred during the sale of products.
- ❖ Then the amount will be handed over to concern member against the quantity of product registered in stock register.

1.6: Benefits to the members

- ❖ Any individual registered as member of this group shall have equal opportunities and access to any resources prescribed in this management plan.
- ❖ They will have legal right to collect and sell any NWFP products within Bhutan as prescribed by the management plan and govern by relevant act and rules.

Table 4: Benefits to member mechanism

SN	Particulars	Benefits
1	Income from sale of NWFP products	Individual member will be benefited based on market value and quantity sold.
2	Expenses	• Transportation • Contribution to Group account

1.7: Benefits to the group

- ❖ From the community fund, the group will be able to support the welfare of individual member, thereby enhancing socioeconomic development.
- ❖ Moreover, the group can also save the community fund which they can use for sanctioning of members loan at low interest rate.
- ❖ Fund can be used for any livelihood support activities in the group.
- ❖ The group can also take up activity in a more participatory manner to enhance the productivity through introduction of better management system. In addition, the problem like pressure from outsiders on illegal harvesting can be addressed.

Table 5: Financial projection for the group

SN	Particular	Amount
Income sources		
1	Membership fees (34-member x Nu. 100)	3400 to be deposited in a group account.
2	Sale of NWFP Products	5% of the total amount from the sale of products will be deposited in group account.
3	Fine and penalties Permit fees	Include collection permit fees
4	Other sources (Donations and loan interest).	
Expenditure		
1	Transportation cost	Travel expenses of Nu.650/- for any executive member or any member of group to be compensated during meeting, training and works related to group.
2	Administrative cost	Any administrative cost to be discussed and decide during general meeting.

PART 2: BY-LAWS-GROUP REGULATIONS AND NORMS

2.1: Name of the Group: Yangmalashing Non-Wood Forest Products Management Group. The Yangmalashing Non-Wood Forest Product Management Group is composed of 34 members from Mendrelgang and Yangmalashing Village under Decheling Gewog.

2.2: Membership arrangement

- ❖ All the households with valid Gung registered in the Yangmalashing and Mendrelgang village are eligible to become members.
- ❖ Those households who have not joined the group during the initiation of the group and wish to be member will be entertained after depositing Nu.1000/-
- ❖ Members leaving the group due to old aged, resettlement program, illness, and due to unavoidable circumstances will be paid 80% of his/her shares accumulated till the day of leaving.
- ❖ Members leaving group without genuine reason or due to loss of interest will be fined Nu.5000/- and no benefits will be entertained.
- ❖ Any member not following the management plan and by-laws of the group will be served warning and if repeated for the second time, the offender will be terminated from the group without any benefit.

2.3: Responsibilities and rights of members

- ❖ The group members participating in this management group will have equal rights and responsibilities for controlling, protection, management and harvesting in the identified collection areas.
- ❖ The individual members will not have the rights to collect and harvest at their own will for commercial purpose unless the chairman fixed the date **OR** after obtaining collection permit.
- ❖ Every member of the group will have equal access to report to the committee members for violation of the management rules.

2.4: Executive Committee

The executive committee member's tenure will be for 5 years. Any committee members not performing their duties as desired and in accordance with by-laws and relevant act and rules, he/she will be terminated before the expiry of the tenure. The vacant post shall be filled immediately through unanimous decision of one third of the group members in the assembly.

Table 6: Executive members of the group

SN	Name	Responsibility	Contact Number
1	Tshewang Chogyel	Chairman	17516435
2	Kinzang Chedup	Secretary	17751106
3	Wangchu Dorji	Treasurer	17370926

2.5. Responsibilities of Chairperson

- ❖ To chair the group meeting.
- ❖ To resolve disputes among the members.
- ❖ To maintain contacts with traders and inform the members on the date and venue.
- ❖ To coordinate the sale to traders on the agreed date and venue.
- ❖ To prepare an annual report and submit it to Gewog Ranger.
- ❖ To ensure that the group members carry out the activities as per the prescribed management plan, relevant act and rules.
- ❖ To countersign in the documents related to financial transactions.
- ❖ Initiate and supervise the collection of membership fees, fine and penalties from defaulters.

2.6. Responsibilities of Secretary

- ❖ Provide assistance to the Chairman.
- ❖ Officiate as Chairperson during his absence.
- ❖ Maintain records of any activities implemented related to Pipla management and marketing.
- ❖ Keep minutes of meeting and circulate to relevant agencies.
- ❖ Write official correspondence.
- ❖ Compile the progress report and submitted to the Range Office, Nganglam with copy to Divisional Forest Office, annually.
- ❖ Write warning letter to the members who do not abide to the group norms.

2.7. Responsibilities of Treasurer

- ❖ To maintain the financial matters and present the details funds to Committee and the group members.
- ❖ Officiate Chairperson or Secretary in their absence.
- ❖ Maintain the cash transaction record, submit expenditure statement to Chairman and present it to the general members in meetings.
- ❖ Collection of annual membership fee from the group members.
- ❖ Taking care of financial arrangements in the group

2.8. Compensation to the executive committee

The any executive committee or members representing Yangmalashing NWFP Management Group for meeting, workshops, trainings, sale of NWFP and any related activities, he/she will be compensated **Nu.650/-** per occasion. The compensation shall be applicable only if travel is within Nganglam. If he/she has to travel beyond Nganglam or Pemagatshel, the compensation or expenses incurred shall be discussed and decided during a general meeting. For transparency, the concern must furnish a report with relevant documents attached (Bills, Office order).

2.9. Membership fees

The Yangmalashing NWFPs Management group have agreed to contribute annual membership fee of Nu.100/-

2.10. Community development fund and utilization of fund.

Membership fees, visitor donations, collection of fines and penalties, interest from loan, 5% deposit from sale of NWFPs are the potential sources of group funds

- ❖ The Chairman, Secretary and Treasurer are joint signatory authority of the Bank Account.
- ❖ All sale and expenses details should be well maintained by the Chairman, Secretary and Treasurer and it should be in the notice of members.
- ❖ All expenditure incurred on behalf of the group will be beard from the Joint Account. Technical support will be sought from the concerned forest office.
- ❖ Fund utilization for benefits of group and its members will be decided in a general meeting in presence of concern forestry official.

2.11: Loan and procedures

The loan is eligible to any members of this management plan and shall be governed by these By-laws;

Table 7: Loaning mechanism

SN	Loan ceiling amount (Nu.)	Interest	Loan term	Remarks
1	20,000/-	5 % per Annum	3 Years	The loaning will be entertained only if saving exceeds Nu. 50,000/-
❖ Loan is applicable only to members of this management group. ❖ Applicant shall write an application to Executive committee reasoning the need and shall be verified and decided by the executive committee. ❖ Loan agreement should be dually signed by guarantor and witness, and executive committee. ❖ Failures to payment of loan within stipulated time will lead to penalty of 10%. ❖ Non-payment of loan within extended time shall be governed by financial rules and regulation of Kingdom of Bhutan.				

2.12. Meeting

- ❖ General meeting will be conducted twice a year.
- ❖ Committee meeting will be conducted any time as and when required (However, minimum of 4 times in year).
- ❖ The general meeting will be conducted during collection season and as when required.
- ❖ The secretary shall maintain minutes of meeting (Name of participants, purpose of meeting and resolutions of meeting).

2.13. Conflict resolution

- ❖ Any conflict within NWFP Management group related to NWFP and related issues shall be resolved by Chairman and executive committee.

- ❖ Any conflict related to NWFP with outsider, the executive committee should forward the case to nearest Forest Office and Gewog Administration through Chiwog Tshogpa.
- ❖ If the case is beyond capacity of Gewog Administration and Forest Office, it will be forwarded to the Court.

2.14. Offence and Penalties

Table 8: Description of Fine and penalties

SN	Offence	Penalties
1	Fails to attend the meeting for first time.	Nu. 300/- per occasion.
2	Failures to attend the meeting for second time.	Addition of 50% to previous fine OR Nu.450/-
3	If members fail to collect NWFP and doesn't contribute to themselves and group. At least Kilogram of product should be collected.	Fine of Nu. 500/- shall be imposed annually.
4	Selling of NWFP products independently without consent and ideas of colleagues.	Case will be dealt as per FNCRR-2023
5	Illegal collection by Non-members/ outsider.	Case will be dealt as per FNCRR-2023
6	No members shall collect NWFPs for commercial purpose without valid permit.	Fine of Nu.1000/- will be imposed for every individual
7	Misuse of NWFP group fund.	The offender shall impose penalty of 24% annually. The offender will be given stipulated time to reimburse the amount. The amount shall be deposited along with the amount misused within given dateline.

2.15. Responsibility of Gewog Ranger/ Nganglam Range Office

- ❖ Coordinate and support groups in supply of materials and organization of training to strengthen NWFP management, processing, post-harvest, marketing, record keeping and governance.
- ❖ Monitor the implementation of the group's plan and verify the records maintained by management committee members.
- ❖ Prepare an annual monitoring report and submit it to Division.
- ❖ Conduct and coordinate a mid-term review and a final evaluation of the implementation of the plan.
- ❖ Facilitate and support in the conflict/case resolution and management.
- ❖ Facilitate/Conduct patrolling and inspection in NWFP collection areas.
- ❖ The certificate shall be cancelled after submission of recommendation to the department of forests and park services, if the performance of the group is not as per prescribed management plan as per FNCRR-2023.

2.16. Responsibilities Gewog Administration

- ❖ Support in the conflict resolution and management that are forwarded to the Gewog Tshogdu by the chairman.
- ❖ Support group in supply of materials and organization of training to strengthen NWFP management, processing, post-harvest, marketing, record keeping, etc.

2.17. Power of the Department

- ❖ The DoFPS shall inspect, monitor, review the records and supervise the activities of the group.
- ❖ The DoFPS has the right to cancel the group in case of any violation of the prescribed management plan and in the event of inability to carry out the activities as per the plan.

2.18. Yangmalashing NWFP Management Group Membership
