NOTESHEET

Subject: Approval of Potala Shingmin Drongdey Nagtshel (Pheluma NWFP Management and Marketing Plan)

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. In order to ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group.

In accordance with Section 142 of Forest and Nature Conservation Rules and Regulations of Bhutan 2023, the Department shall facilitate and promote the formation of Non-Wood Forest Product Management Groups to derive Socio-economic and environmental benefits. Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area and forward to this Division for review and recommendation. In reference to the Forest and Nature Conservation Code of Best Management Practices of Bhutan, the plan period for NWFP group is for 10 years.

As per Section 143 of the Forest and Nature Conservation Act of Bhutan 2023, the NWFP management and marketing plans shall be approved by the head of the Department.

Section A: NWFP management and marketing plan

1. Background

The Pheluma chiwog is one of the remotest villages under Orong Gewog and it is almost a half day walk from the Gewog centre. The chiwog comprises of two different hamlets namely Phu with 24 households (including one gungtong) and Pheluma with 29 households (including two gungtongs). The communities are basically agrarian and depend on subsistence agriculture, small scale livestock rearing and forest resources. The villages consist of mainly dry land and maize is cultivated as staple crop by the people. Other varieties of vegetables and chilli are grown for home consumption and meagre quantity of orange is sold for income generation. Agriculture is entirely dependent on seasonal rainfall making the community vulnerable to the climate changes. The Pheluma chiwog lies in the warm broadleaved forest zone and is well known for good natural habitats of NWFPs like bamboo species, cane species, broom species, mushrooms, leafy vegetables, *Rubbia spp.*, etc. Until 2019, the Ringshu in local dialect so called *Neomicrocalamus endropogonifolius* (Yula) was very popular resources available within the jurisdiction, but now it not available due to unsustainable harvesting and over harvesting of the species. The other reason is the natural flowering process in bamboo species causing the death of whole bamboo species and now the species is not available in the area.

The people enjoy their living in harmony with nature and derived livelihoods from natural resources for centuries and as a result, they have developed intimate relationship with the nature and advocated respects for all forms of life. But at the same time, the communities have also realized that the common pool of natural resources might get declined in due course of time if sustainable harvesting strategy is not applied in place at the right time. Therefore, with the kind technical support of the Divisional Forest Office, Samdrup Jongkhar and the concerned forestry staff of Orong, we the community have unanimously decided to continue our NWFPs sustainable management group for all times to come. It is one of the main income sources for all of us.

2. Summary of NWFPs Management areas and Group

The name of the NWFPs management and marketing group is “Potala Shingmin Drongdey Nagtshel”. It consists of 53 households from Phu and Pheluma villages. The NWFPs management areas fall under warm broadleaved forest and have around 26 different NWFPs species. The NWFPs management areas comprised of five blocks namely, Sailang, Potala, Phekang, Khepalang and Seyri with total area of around 4500 acres. It is situated within the traditional boundaries of Dueridrang and Khardizam in the east and south-east, Chunurung and Donko in the south and south-west, Thamri and Nubdorong in the west and North-west, and Dukposa-ye and Redazadrang in the North and North-east.

The review of second phase management plan after five years was done with the full support from chiwog Tshogpa and technical help from Orong Forestry staff.

3. Objectives

The main objectives are:

- i. To further improve the rural livelihood of the local communities through sustainable management, harvesting, utilization and marketing of NWFPs available in the areas.
- ii. To promote handicraft activities and ensure quality products for marketing.
- iii. To protect the NWFPs from illegal and unsustainable extraction

4. Brief review and achievement during the previous management plan

The Potala Shingmin Drondey Nagtshel (NWFP) management group at Pheluma chewog was formed in 2012. Its second phase management plan period of five years has been completed by the end of September 2023. The group members are willing to continue with the further task of managing and protecting the natural resources for future generations. But due to the COVID-19 situation, the group members could not carry out much NWFPs collection and marketing for almost three years which hindered the income generation and rural livelihood enhancement.

However, the group has independently managed to conduct the revision exercise of its second phase NWFP management plan during the month of October 2023. The review and planning program was fully assisted by the GT Tshogpa of Pheluma chewog till the very end and it was very successful.

4.1. Activity achievement

- Annual NWFP management group members meeting – conducted twice a year.
- Patrolling on rotational basis (once in two months) – illegal activities reduced
- Sustainable harvesting and sale of NWFPs – earned amount deposited in bank.
- Improvement of bamboo and cane species over the management plan period

4.2. Financial achievement

5. Description of NWFPs

There are around 26 types of NWFPs found in the forest area of Potala Shingmin Drondey Nagtshel. The different bamboo species and cane species will be sustainably harvested, converted to fine handicraft items for sale while other NWFPs like mushroom, leafy vegetables and brooms will be directly sold in the nearby local markets. Among all, bamboo is widely available in most of the blocks followed by cane species like locally known as “grey and mengi” which indicate the good potential for handicraft promotion. The group has currently identified about 16 NWFPs for commercial harvesting as reflected in Table 4 below. For rest of the 10 species, it will purely depend on the market demands.

Table 4. Brief description of NWFPs for commercial purposes

NWFP name	Harvesting area (s)	Parts harvested	Use / Purpose (traditional & others)	Harvesting season (months)	Estimated quantity that can be collected
Bamboo	Khepalang, Phekang, Barkazor, Brangzor, Khardi, Kelingshing, Shomparung, Lungnadang, Seridaza and Serichelo.	Culm, young shoots	Weaving handicraft items, construction materials etc. Young shoot edible	9th – 1st of Bhutanese calendar	40 Truck load
Cane spp. (mengi)	Sailangye, Miktangla, Dukposangangri and Kuensamru.	Matured stem only	Matured stem used to produce handicraft products.	-do-	5 Truck load
<i>Plectocomia himalayana</i> (Cane spp.)	Lungbaktang-ngangri, Gaysangmo, Miktangla, Wagombrak, Dukposangangri and Wongchelosharang	Matured stem and young shoots	Young shoot as vegetable & mature stem for handicraft.	-do-	7 Truck load
Cane (Rukhirtsim sharchop)	Omshari, Retshung and Bashiborang	Matured stem	Used for handicraft & construction purpose too.	-do-	1.5 Truck load

Cane spp. (Grey in sharchop)	Wagombrak, Mandangri Gogoreyngan, Borangringmo, Katserimshong and Khungrongpo.	Matured stem	To produce handicraft items	9th – 1st of Bhutanese calendar	5 Truck load
Bamboo spp. (Dem in sharchop)	Sailang	Culms	-do-	-do-	1 Truck load
Bamboo spp. (Rashu)	Khamdangye and Tshogaineyta.	Culms	For fencing, house roofing & ceiling.	-do-	20 Truck load
Bamboo spp. (Wey)	Borangringmo, Rashung and Wagombrak.	Culms	-do-	-do-	10 Truck load
<i>Diplazium esculentum</i> (Fern)	Athemowong, Khailanadang, Wongchelo, Potalajab and Demthungye.	Young shoots	Vegetable	6 th - 8 th of Bhutanese calendar	100 head loads
<i>Elatosteme lineolatum</i> (Gremom)	Potala, Miktangla, Omshari and Sailang-ye.	Stem and leaves	-do-	Whole year	1 Truck load
Wild mushroom	Athemo, Khailanadang, Areynadang, Wongchelo and Geysangmo.	Whole plant	-do-	2 nd – 9 th of Bhutanese calendar	300 kg
Wangpemo/ Thormom	Rshawong, Sailangye, Tongtongshingnadang & Borangringmo.	Flowers	-do-	8 th – 9 th of Bhutanese calendar	200 kg
<i>Thysanolaena latifolia</i> (Beyshawwa)	Borangringmo, Fantokari, Basheborang, Busungborang and Wongchelojuk.	Upper parts	Used as soft broom	1 st – 2 nd of Bhutanese calendar	300 bundles
Saitse	Tshogaineyta, Wongchelo and Rashuwong	Leaves and branches	Fodder and hard brooms	Whole year	1000 bundles
<i>Rubbia spp.</i> (Laniru)	Potala, Phekang	Matured stem	Used as dyes		
Wild potatoes (<i>Dioscorea spp.</i>)	-do-	Tubers	Food supplement and used as curry	12 th – 4 th of BC	1000 kg

Table 5. Lists of other NWFPs used by the members.

Other NWFPs	Uses	Availability
<i>Viscum articulatum</i> (Neshingjorma)	Medicine	Reduced drastically need protection
<i>Pouzolzia spp.</i> (Yongjebu)	Adhesive, Incense	Available
<i>Daphne spp.</i> (Shugushing)	Traditional paper	Reduced and need protection
Gaserim (Sh)	Medicine	Available
<i>Oroxylum spp.</i> (Namkaling meto)	Medicine, religious	Reduced and need protection
Pan (Sh)	Stimulant	-do-

<i>Piper spp.</i> (Pansey)	Medicine	-do-
Poskar	Incense	-do-
Brungshing (making Thakchung)	Cloth weaving	-do-
Thoksampa	Medicinal value	-do-

6. Harvesting prescriptions for sustainable NWFP harvesting

The user group members will strictly follow the guidelines and prescriptions formulated as below (Refer Table 6) to ensure sustainable utilization of resources and to sustain natural regeneration and resource base for present and future too. The harvesting for domestic consumption will be free of royalty while for the sale purposes will require clearance and permit from the CFO. Depending on the market demand situation, harvesting prescriptions for the following 10 species will be developed with prior permission from the CFO in future or otherwise refer the guidelines in Interim framework and implement it.

Table 6. Harvesting prescriptions for sustainable harvesting of NWFPs

NWFP species	Harvesting prescription for sustainable harvesting
Bamboo	- Do not harvest during 4th – 8th of Bhutanese month. - Do not cut the culms less than one year old. - Cut the culms above one node from the ground level. - Do not harvest young shoot for sale purposes. - Follow rest of prescriptions steps from interim framework guidebook management and marketing of NWFPs.
<i>Cane spp.</i> (mengi)	- Harvest only on 9th – 1st of Bhutanese month and not allow during rest of the month. - Not allow to cut the young shoot and cut only the matured stem for handicraft weaving purposes. - Make best use of it and do not spoil by un-necessary cutting. - Avoid leaving cane parts high up in the trees, pull down as much of stem as possible. - Trees supporting the cane shall not be felled. - The debris after harvesting canes should be cleaned to avoid insects or fungal infections. - Cutting and uprooting of rhizomes or suckers shall be avoided. - Strict monitoring and supervision will be carried out by the executive committee to ensure the harvesters follow the prescript rules and regulations. - Impose penalty against the violators as per the rules set in the group by-laws.
<i>Plectocomia himalayana</i> (Cane spp.)	
Cane spp. (Rukhirtsim sharchop)	
Cane spp. (Grey in sharchop)	
Bamboo spp. (Dem in sharchop)	- Do not harvest during 4th – 8th of Bhutanese month. - Do not cut the culms less than one year old Cut the

	Khepalang	445	1-2									
	Seyri	956	3-5		0.5T/ L	3.5T/ L	1T/L					
	TOTAL	4500										

Table 8. Information on collection area, distance taken and quantity of NWFPs for sustainable harvesting.

Sl. No	Harvesting areas or blocks	Estimated size of harvesting areas	Distance from the village till collection area (hours)	Estimated quantity of NWFP species that can collected per harvesting area		
				Large bamboo	Soft broom (<i>Thysonolaina spp</i>)	Hard broom (Saitse)
	Phekang	500 acres	1-2	10T/L		
	Khepalang	445 acres	1-2	20T/L	100 bundles	100 bundles
	Seyri	956 acres	3-5	10T/L	200 bundles	600 bundles

7. NWFPs harvesting rotation period.

The area designated for harvesting of non-wood forest products by the group members are divided into five blocks and for sustainable management and harvesting of NWFPs, a rotation harvesting methods is being proposed and to be adopted by the group members. For the initial year of the plan, the group members shall harvest the cane species from Sailang block only and retain the other four blocks for harvesting in the prevailing years of the plan period. This way the cane resources in the Potala, Phekang, Khepalang and Seyri block will have ample time for regeneration of cane species. Similarly, the rotation period for five years will end in the 5th year of the plan period and the group members shall initiate the harvesting of cane species from Sailing block from sixth year onwards and follow the rotation method for next five years.

Table 9. Rotational harvesting and collection of Cane species

Harvesting year	Name of harvesting blocks	Remarks
1 st year 2024	Sailang block	The sustainable harvesting rotation period will be followed while carry out the harvesting and collection of cane species from the respective blocks. Its utilities are vital and lifeline for every handicraft item produced by the people or members.
2 nd year 2025	Potala block	
3 rd year 2026	Phekang block	
4 th year 2027	Khepalang block	
5 th year 2028	Seyri block	
6 th to 10 th 2034	Repeat the rotation from Sailang block	

8. Map of NWFP harvesting area

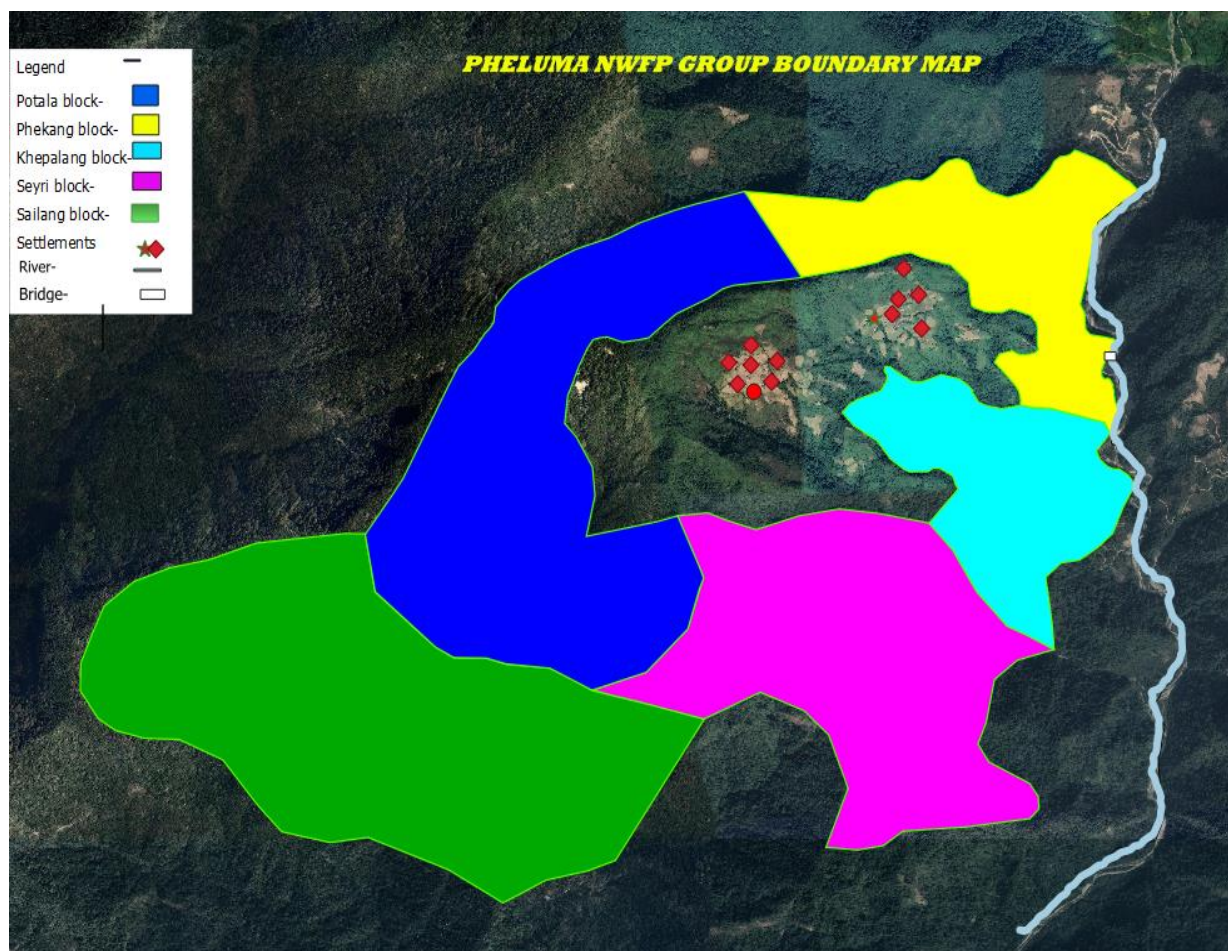

Figure 1. Map of Pheluma NWFP group

9. Marketing and sales plan

NWFPs management group members are planning to produce more quantity and quality of handicraft items from bamboo and cane species for sale and generate lucrative income thereby enhancing the rural livelihood standards. But the group shall do so upon obtaining permit/transit permit from the CFO for selling the products within Gewog/Dzongkhag and outside the Dzongkhag respectively. The NWFPs management group will coordinate the meeting and discussion with the Gewog Administration and seek support from the CFO and other relevant stakeholders if it is beyond their capability to market the finished NWFPs especially the handicraft items. However, the prevailing barter system of handicraft items with other property like grains, potatoes etc., will continue as agreed by all the members during management planning exercise. The farm gate buying and selling price of the handicraft items will be as shown in the table 10 below.

Table 10. Marketing and sales plan (annual)

10. Marketing arrangement

- Handicraft items will be marketed in group as far as possible rather than individual.
- Chairperson on behalf of the group shall obtain permit from the CFO for sale of any NWFPs within and outside the Gewog or Dzongkhag.
- Wild vegetables like Fern and Damroo will be locally marketed upon prior permission from the chairperson and committee members.

- For special arrangement of marketing the huge quantity of NWFPs (handicraft items), the group will seek enough support from Gewog Administration, CFO and other relevant stakeholders.

11. Benefits to the members

- Every member can generate income through sale of handicraft items in group and other perishable NWFPs individually on permit basis from the chairperson.
- Each member has right to get equal share from the accumulated group fund.
- When any group member is under house construction, group will render free labour contribution of five days each and cash contribution of Nu. 100 (one hundred) only. The individual cash donation will prevail until the community development fund status attained the stage of semso disbursement.
- During emergencies (death), natural calamities etc, reasonable amount will be assured to the victim as “semso” upon thorough discussion by the community. But for the time being, each member will contribute Nu. 100 (one hundred) and give to the victim as semso.

12. Benefits to the group

- Easy access to permit for NWFPs harvesting and marketing.
- Sustainable harvesting guidelines and management plan in place.
- Community development fund from the sale of handicraft items and other perishable NWFPs.
- Safe deposits of group fund in the bank.
- Reduce illegal and unsustainable harvesting of NWFPs.

Section B

By-laws: Group regulations and norms

13. Roles and responsibilities of community members

13.1. Roles and responsibilities of group members

	Village	Number of member households	Gewog
	Pheluma	29	Orong
	Phu	24	-do-
	Responsibilities and rights of members: - Every household with definite gung and census from Pheluma and Phu are eligible to become a member of NWFPs management group. - He/she should possess willingness and interest to join the group. - Each member will contribute sum of Nu.100 (one hundred) only as annual membership fee in the month of January every year. - If he/she fragmented from same gung and wanted to become as new member can do so upon realizing the normal annual membership fee of Nu.100 (one hundred) only. - If he/she happened to withdraw from the membership, the group will not entertain any benefits and forest resources from the NWFPs delineated areas base on the traditional boundaries. - The residents from Pheluma and Phu who are non-member of the group at present wanted to join later should pay Nu.500 (five hundred) per year. - If outsiders settled in Pheluma-Phu villages with definite gung and census should also follow the same as above (serial no.f). Responsibilities of members: ➤ Actively participate in general assembly twice a year i.e. on 8th and 2nd of Bhutanese calendar while the frequency of executive committee meeting will be on need basis. ➤ Collect NWFPs and inform/hand over to committee for proper record and marketing. ➤ Obey instructions of the chairperson and committee members with respect and interest, and jointly protect the resources from illegal activities. ➤ Harvest, manage and utilized the NWFPs on sustainable basis.		

Members of the NWFP management & marketing group

13.2. Roles and responsibilities of executive members

Executive committee	
	Name of Chairperson: Sonam Zangmo
	Responsibilities of Coordinator/Chairperson: - Chair the meeting related to NWFPs management, utilization and marketing. - Work in close coordination with other organizations, sectors and agencies, and seek assistance for the development of management group. - To obtain permit for the sale of group's/individual's handicraft items and other NWFPs from CFO. - To arrange and coordinate the marketing of NWFPs and handicraft items. - Represent the group in meetings that will take place in other parts of the country and share new information and ideas acquired from the meeting with the group members.

Chairperson

	f. Resolve disputes and conflicts arising among the group members and maintain good working relations. g. Coordinate the patrolling of NWFPs areas from 9th – 3rd of Bhutanese month. h. Initiate annual planning and progress report submission to CFO and also presentation to the group members during general assembly. i. Jointly sign with the Secretary and Treasurer on the cheque during the withdrawal of community fund.
Secretary	Name of Secretary: Kuenga Chedup Responsibilities Secretary: a. Officiate the chairperson in his absence. b. Inform the date, time and venue of meeting to all the group members. c. Keep minutes of NWFPs related meetings and make presentation at the end. d. Assist the chairperson in solving conflicts arising among members and maintain good working relations, and also in marketing of NWFPs. e. Keep proper record and data of NWFPs collected and marketed. f. Jointly sign with the Chairperson and Treasurer on the cheque during the withdrawal of community fund.
Treasurer	Name of Treasurer: Dorji Yangzom Responsibilities Treasurer: a. Keep proper records and accountings of NWFPs and assist the chairperson and secretary in marketing. b. Issue a receipt to the individual for quantity of NWFPs collected for sale. c. Keep annual financial transaction records and present to the group members during the general assembly. d. Collect and deposit the money in the NWFPs group account maintained with the nearest financial institution. e. Jointly sign with the Chairperson and Secretary on the cheque during the withdrawal of community fund.
Possible additional executive committee members	Name (s): 1. Sangay Wangdi - Pheluma 2. Yangdon -do- 3. Yudon -do- 4. Ugyen Wangdi -Phu- 5. Nimala -do- 6. Sonam Dorji -do- Responsibilities: a. Assist the chairperson, secretary and treasurer in implementation of NWFPs management plan and group by-laws. b. Provide help in coordinating of NWFPs collection and marketing. c. Assist the chairperson, secretary and treasurer during the arrival of visitors and guests.

13.3. Compensation to the executive committee for marketing of products

Compensation to the executive	The committee members in the past had served without any incentives. But with the revision of its second phase management plan in 2023, we have unanimously resolved that group chairperson, secretary and accountant will be given Nu.500
--------------------------------------	--

Committee for marketing	each annually as voucher allowance for they have to make several calls to many stakeholders and organize meetings and discussions. It is also agreed that if there are any opportunities like trainings from the Government and other agencies, priority will be given to them rather than any other members of the group.
--------------------------------	--

13.4. Membership fee, community development fund and utilization of funds

Membership fee and purpose	Every member shall contribute annual membership fee of Nu. 100 (one hundred) only. The amount will be deposited in the nearest bank and utilized the accumulated amount for the welfare of the NWFPs group members in the near future. The amount can even use for pre-financing the marketing cost of NWFPs and various handicraft items.
Community development fund and utilization of fund	The community development fund will be generated through the deduction of certain percentage of amount from the sale of NWFPs and handicraft items. - Nu. 30 per head load will be deducted towards community development fund from the commodities like ferns, mushrooms, damroo, soft broom and hard broom while the deduction for Neshingjorma will be Nu. 25 per kilogram. - For handicraft items, the deduction will be 10% of the total earnings/amount of individual or group based on the farm gate price of the commodities. - The sale percent deduction for Rubia and Yongjebu towards the community fund is also 10% from total earnings based on the farm gate price of the products. - The fund will be utilized for the welfare of the NWFPs group members only. - During emergencies (death), natural calamities etc, reasonable amount will be assured to the victim as “semso” upon through discussion by the community. But for the time being, member will contribute Nu. 100 each and give to the victim as semso. - If a member happens to go for resettlement program, he/she will get the equal share from the community development fund. - When any member is under house construction, group will render free labour contribution of five days each and cash contribution of Nu. 100 (one hundred). The individual cash donation will prevail until the CDF status attained the stage of semso disbursement. - In order to meet the small internal expenses, chairperson and the committee have authority to keep the community fund up to Nu. 5000 (five thousand) only in their hands.

13.5. Conflict resolution and management

Conflict resolution	- The chairperson and executive committee members shall solve the conflict arising among the group members. - If the conflict arises between executive committee members and the group members, the matter shall be forwarded to Gewog Forestry office and Gewog Administration by chairperson for final decision. - If the problem arises between group members and other communities, the matter shall directly forward to Gewog Administration for settlement, and if it is not solved at gewog level, matter shall be further forwarded to the Dzongkhag Administration.
----------------------------	--

13.6. Penalties

<i>Penalties</i>	Collection or harvesting of NWFPs for home consumption purposes will remain free of royalty while for the sale of any NWFPs including handicraft items require approval from CFO. The bamboos planted in Kamzhing and nearby agriculture farmland will be only harvested by concerned land owners. But those growing naturally in private registered land which is far away from settlements will be treated as the common pool resources. However, the fines and penalties against the illegal doers will be imposed both for group members and non-members in the following ways: • NWFPs collection by members without the approval will be fined of Nu. 3000 and seize the products. • The cost of permit will be as usual (Nu. 10 per permit). • If illegal activity of members directly encountered by forestry staff, impose fine of Nu. 6000. • The operation of existing large machineries will be allowed only in group and not allow in individual level. It will be operated by the certified four members only. But if it is the portable items, ECM will allow to individual upon the written application with terms and conditions to replace or bear lost if broken/damaged. Failing to report on time (9.00 am) for meeting, works etc. ➤ Late by few minutes should create or display their hidden talents such as jokes/dance/singing. ➤ Absent for one day = Galyong Lemilacha (Nu. 400) as revised in 2023. Other offences and penalties shall be dealt as per FNCA and FNCRR 2023.
