Table 5: Financial projection of benefits to group	11

Part A: NWFP management and marketing plan

1. Background

The Remung Non wood Forest Products (NWFP) management and marketing group was established in 2010 with financial support from SNV and technical support from SFED and Dzongkhag Forestry Sector, Samdrupjongkhar. The group is formed with members from four villages *i.e* Layphu, Dogorba, Morgaylung and Zophelwong in Remung Chiwog under Orong Gewog. Initially the group was formed by 26 households from those villages and today it has 31 households registered as member. This is a third revision of plan.

The communities are basically agrarian and depend on subsistence agricultural activities. Major land holding is dry land and maize is cultivated as staple crop by the people. They also grow vegetables like beans, chilli and few other varieties of vegetables. Cash crops such as Ginger and orange is also grown in the village and earned reasonable income from its sale.

The village is connected by farm road, grid electricity, B-mobile network and rural water supply scheme but lacks school and health facilities. Their children receive education from Wooling Community Primary School which is more than an hour walk. The health service to people in the village is rendered from Mandar Basic Health Sub-post (BHS).

The Remung Chiwog lies in the warm broadleaved forest zone and is a good natural habitats for Ringshu (*Neomicrocalamus andropogonifolius*) and other NWFP species like Larishabu (broom species), mushroom, Rubia, leafy vegetables etc. In the past planned periods the communities collected these resources and made a good income. During the review on December 2019, group fund has total fund of Nu.89,830/- (eighty nine thousand eight hundred thirty) only deposited in BDBL saving account.

2. Summary of NWFPs Management areas and Group

The name of the NWFPs management and marketing group was kept as “Remung Lhundrup Shingmin Gongphel Detshen” like in the past. The group members strength remain as same with 26 households only. To enable the member to make income, the group will collect NWFP resources from 176ha/1840 acres of land surrounding the villages (Refer: sketch map of Remung

Lhundrup Shingmin Gongphel Detschen). The area has been further divided into nine different blocks to ensure effective management of resources (*Refer Table 1 & 2*). The group will collect around 12 different spices of NWFPs.

3. Objectives

- i. To protect the NWFPs from illegal and unsustainable extraction
- ii. To generate income through sustainable harvesting and marketing of NWFPs
- iii. To promote good harmony among the group members and uplift the poor.

4. Description of NWFPs

There are around 12 species of NWFPs species found in the different blocks of forest in Remung Chiwog. But most of them are not in abundant quantities. The people as of now have made reasonable income from the sale of semi-hard broom species called “Larishabu” in sharchop. It is actually one of the main natural resources from which they generate cash besides livestock and agricultural in meeting the expenses for school going children and other domestic purposes. The Ringshu (*Neomicrocalamus andropogonifolius*) is quite abundant but lacks skills to develop into handicraft products.

According to the community of Remung, after bring the area into community management regime the cane species has greatly improved during the past three years. However, it was also reported that abundance of *Elastostema species* (Damroo) has drastically decline due to invasion growing habitat with invasive weeds which were grazed by local cattle.

Table 1: Brief description of NWFPs for commercial harvesting

NWFP Name	Harvesting area(s) name	Parts harvested	Use purpose (traditional & others)	Harvesting season (month)	Estimated quantity that can be collected
<i>Neomicrocalamus andropogonifolius</i> (Ringshu)	Gamtshalu, Bhudhuridaza, Bhudhurichelu, Leyphuri, Daeyzangnang, Norzangyaey, Dori	Culm	Handicrafts	9 th to 2 nd of Bhutanese months	7 T/L

<i>Trachycarpus</i> spp. (Larishabu)	Gamtshalu, BhudhuriDaza, Bhudhurichelu, Leyphuri, Daeyzangnang, Norzangyaey, Dori	Leaf with branch	Broom	9 th to 12 th of Bhutanese months	9500 B
<i>Elastostema lineolatum</i> (Damroo)	Gamtshalu, Bhudhurichelu, Daeyzangnang,	Stem with leaf	Vegetable	5 th to 10 th of Bhutanese months	220 B
<i>Rubia cordifolia</i> (Laniroo)	Gamtshalu, Bhudhurichelu, Panborang&Leyphugang shong	steam	Color	12 th to 3 rd of Bhutanese months	200 Kgs
Bamboo spp.	Rebalingme, Gaayre, Norzangyaey	Culm	Bamboo Crafts	9 th to 11 th of Bhutanese months	3 T/L
(Cane spp. (Phashi & Menje)	Gamtshalu, Bhudhurichelu,&Bhudur idaza	Matured stem	Handicrafts	9 th to 10 th of Bhutanese months	30 Nos. Only one time harvest per year
Wild mushroom	Gamtshalu, Bhudhuridaza, Leyphuri	Whole	Vegetable	3 rd to 9 th of Bhutanese months	140 Kgs
Saitsee (Hard broom spp.)	Gamtshalu, Bhudhuridaza, Bhudhurichelu, Leyphuri, Daeyzangnang	Branch with leaf	Fodder and broom	12 th to 3 rd of Bhutanese months	1250 B
<i>Adatoda</i> spp. (Khatserim)	All blocks	Flowers	Vegetable	11 th - 1 st BC	15 kgs
<i>Zanthoxylum</i> spp.	-do-	fruits	spice	5 th – 6 th BC	20 kgs
Wild banana plant	-do-	Whole plant	Fodder	11 th – 3 rd BC	46 Nos

(T/L) – Truck Load, (Kgs) – Kilograms, (B) – Bundles

Table 2: List of totally protected NWFPs during first plan period (2010-2013)

SI No	English/ Botanical Name	Local Name	Status before 2013	Status after 2019	Remarks
1	<i>Viscum articulatum</i>	Neshing Jorma	Critically threatened	Illegal collection prevented and product has improved both in quantity and quality	Still needs protection & allow for domestic consumption as well as look for commercial purposes too depending on the

					resources availability
2	<i>Plectocomia</i> spp. (Cane spp.)	Patsa/ Phashi & Menje	Limited	The product has now become just available for the domestic uses/purposes	Needs protection & community will go for one time collection per year only for the domestic purposes upon consultation with the chairperson & secretary (30 Nos/ year) Look for commercial too
3	<i>D. sikkimensis</i> (Bamboo spp.)	Daem	Limited	-do-	Needs protection & community will go for sustainable harvesting for domestic purpose only depending upon availability of resource

Although above listed plant species were totally protected during first plan period (2010-2013), community initiated harvesting of these resources for domestic purpose from 2015 onwards.

5. Harvesting prescriptions for sustainable NWFP harvesting

The user group members will strictly follow the guidelines and prescriptions formulated in Table 3 to ensure sustainable utilization of resources and to promote natural regeneration of resource for present and future use. Also harvesting other species not listed in this plan will also be carried out in line with procedural requirement mentioned in Forest and Nature Conservation Rules & Regulation of Bhutan 2017.

Other NWFPs	Uses	Availability
<i>Pouzolzia</i> spp. (Yongjebu)	Adhesive, Incense	Moderately
<i>Daphne</i> spp. (Shugu shing)	Traditional paper	Low
Pan (Sh)	Stimulant	-do-
<i>Piper</i> spp. (Pansey)	Medicine	-do-

Table 3: Harvesting prescriptions for sustainable harvesting

NWFP species	Harvesting prescription for sustainable harvesting
Ringshu (<i>Neomicrocalamus andropogonifolius</i>)	- Do not clear cut whole clump when harvesting culms. - Harvest only one or two Culm from clump that has more than five culms. - Harvest culm when it produces secondary shoot at the top. - Retain at least two to three young healthy culms in

	each clump to favor more shooting in the following season. • Retain healthy culms to prevent degeneration of clumps.
Larishabu (Broom spp.)	• Don't cut whole plant. • Cut matured branch and leave the seeds for regeneration. • Retain the immature branches. • Don't cut nearby trees.
Saytsam (Hard broom spp.)	• Cut only matured branches and retain immature branches. • Do not cut whole plants and nearby trees.
Damroo/Gremom (<i>Elastostema lineolatum</i>)	• Collect plants that are 15cm and above or matured ones. • Retain stump of around 3'' for sprouting of new shoots. • Do not uproot whole plant. • Should not cut down trees and create more opening. • Should not disturb its catchment area.
Mushroom	• Do not uproot whole plant. • Keep the root parts to soil/dead logs for next time sprouting • Use basket with holes to allow the pores to disperse. • Should not destroy mushroom growing area or habitat.
Cane spp.	• Harvest only on 9th – 10th of Bhutanese month and not allow during rest of the month. One time collection in a year only • Not allow to cut the young shoot and cut only the matured stem for only domestic purposes. • Make best use of it and don't spoil by un-necessary cutting. • Avoid leaving cane parts high up in the trees, pull down as much of stem as possible. • Trees supporting the cane shall not be felled. • The debris after harvesting canes should be cleaned to avoid insects or fungal infections. • Cutting and uprooting of rhizomes or suckers shall be avoided. • Harvesting for commercial purposes is strictly prohibited. • Strict monitoring and supervision will be carried out by the executive committee to ensure the harvesters follow the prescript rules and regulations. • Impose penalty against the violators as per the rules

	set in the group by-laws.
Neshing Jorma (<i>Viscum articulatum</i>)	- Collection for domestic consumption will take place upon approval and instruction of chairperson only. - No felling of trees during collection of product from the forest
Bamboo spp.	- Do not harvest during 4th – 8th of Bhutanese month. - Do not cut the culms less than one year old (retain immature) - Cut the culms above one node from the ground level - Cut the culms of three years and older - Do not harvest young shoot for sale purposes. - Follow rest of prescriptions steps from interim framework guide book for management and marketing of NWFPs.
Laniroo (<i>Rubia cordyfolia</i>)	- Use sharp sickle for the collection of the upper part of the plant. - Cut the plant at 5 cm above ground level. - Leave at least 10% of the plants without collecting for rejuvenation. - Do not uproot entire plants to collect roots
Fern (<i>Diplazium esculentum</i>)	- Harvests young shoot that are 15 cm length. - Do not harvest the entire shoot coming up in a season - Do not harvest the shoots that have developed to leaves. - Retain at least 50% of young shoot of last flush for the development of leaves. - Do not cut down trees which provide shade to the plant.
Wang pemo (flower parts vegetable)	- Do not collect whole flower parts - Keep 30% of it for seed dispersal and natural regeneration - Do not uproots the whole plants.
Soft broom spp. (<i>Thysanolaena latifolia</i>)	- Do not harvest only panicles. - Cut the foliage, inflorescence at 15cm from the ground. - Do not damage the rhizomes in order to allow natural regeneration. - Control from fire hazards in winter season.

To ensure harvesting of resources in sustainable manner, rotational harvesting pattern has been designed to be followed in this plan period.

6. NWFPs harvesting calendar

Harvesting year	Name of harvesting blocks	Remarks
1 st year (2021)	Gamtshalu, Bhuduridaza & Bhudurichelu	Bamboo harvesting from Gayri and Rebalingmi blocks can be done annually based on the management prescriptions and guidelines with prior permission from the chairperson
2 nd year (2022)	Dori, Norzangye and Deyzangnang	
3 rd year (2023)	Layphuri, Gayri and Rebalingmi	

7. Sketch map of the NWFP harvesting areas (based on traditional boundaries, customary practices and availability of NWFP resources)

8. Details of block-wise NWFPs information sheet (ocular estimation drawn through plenary session of group members)

Sl	Harvesting areas or blocks	Estimated size of harvesting areas	Distance from centre point	Estimated quantity of NWFP species that can collected per harvesting area								
				Ringshu (T/L)	Rubiaccordifolia (Kgs)	Larishabu (B)	Patsa	Saaysam (B)	Pakshing (T/L)	Pipla (Kgs)	Mushroom (Kgs)	Daamroo (B)
1	Gumtshalu	200	5	2	100	1500		500		15	20	100
2	Budhuridaza	300	4	1		1000		50			20	
3	Budhurichelu	500	6	2	100	2000		300		10		70
4	Leyphuri	400	4	1		200		300		10	100	
5	Daczangnang	300	1	1		100	(P)	100				50
6	Norzangyaey	30	1	1/3		500				10		
7	Rebalingmi	50	1						1			
8	Gaayre	50	1.5						1			
9	Dori	10	3	1/3		2000						

(P) - Protection, (T/L) - Truck Load, (Kgs) - Kilogram, ((B) - Bundles

9. Marketing and sales plan

The unprocessed Ringshu (Yula) will be sold to Kangpara community under Trashigang and to other needy communities as demanded. The other NWFPs like broom species, fern tops, Damroo etc. will be sold to local market at Narphu. In case production excess demand chairperson will facilitate marketing of products in collaboration with Gewog Administration, CFO and other relevant stakeholders.

Table 4: Marketing and sales plan

NWFPs	Potential market	Estimated quantity for sale per season(unit)	Expected selling price per unit (Nu)	Total (Nu)	Remarks
Ringshu (Yula)	Wherever possible	4 Bolero trips	4000 per trip or 30 per bundle	6000	Uncertain
Larishabu (broom spp.)	Narphu&Morong	500 bundles	25	12500	
Saytsam (hard broom spp.)	-do-	50 bundles	15	750	
Tsakusha (soft broom spp.)	-do-	100 bundles.	30	3000	
Laniroo (<i>Rubia spp.</i>)	Middle men	200 kg	35	7000	
Damroo	Narphu&Morong	100 bundles	10	1000	
Fern tops	-do-	20 bundles	10	200	
Mushrooms					
• Nagor bamung		10 kg	70	700	No dead logs like in the past years
• Tsetsering bamung		5 kg	200	1000	
• Ser bamung	-do-	5 kg	100	500	
• Bedir bamung		10 kg	50	500	
• Tshatshse bamung		10 kg	150	1500	
• Gowayan bamung		10 kg	100	1000	
Khatserim (Basheka in Dz.)	-do-	5 kg	100	500	
Wild Gee (Pepper)	-do-	15 kg	40	600	
Bamboo	Wherever possible	1000 nos.	30	30000	Uncertain
Handicraft items (Dhala)	-do-	30 nos.	150	4500	
Bamboo (Leshing)	From pvt. land	150 nos.	50	7500	
			Total =	78,750	

9.1 Marketing arrangements

- Any NWFPs sale shall take place as per the marketing procedures mentioned in the plan.
- The quantity for NWFP collected for sale by individuals will be first assessed by the chairperson and secretary to ensure proper recording and payment towards community fund after coming back from the market.
- The group members shall market their products individually or in group, which ever find convenient to do so.
- Any member taking NWFPs for sale without permission of chairperson and committee members will be fined with Nu. 2000 (two thousand) and seize the products or the total income earned from the sale.
- If there happen to be huge quantity of NWFPs for marketing, the group chairperson and committee members will seek enough support from the relevant stakeholders through Gewog Administration
- General consultation will be held upon call by chairperson and secretary to address issues related to marketing aspects and to fix any important programs for future.
- At present Narphung is the only market centre for the group. However, additional market will be explored in other areas to have price offer competition.

9.2 Benefits to the members

- Every member can generate income through sale of NWFPs as well as even handicraft items if possible.
- Each member has right to get equal share from the accumulated group fund.
- The group members shall look after the welfare of sick old and needy people of the group and render every possible help
- During emergencies (death), natural calamities etc, each member will contribute Nu. 100 (one hundred) and handed over to the victim as “Semso”.
- The group would assist the needy parents and bear the school fees and other expenditures for one year for the child who is willing to attend the school or is already attending the school.

9.3 Benefits to the group

- Sustainable harvesting guidelines and management plan in place.
- Easy access to permit for NWFPs harvesting and marketing
- Reduce illegal and unsustainable harvesting of NWFPs.
- Community development fund created from the sale of NWFPs.
- Safe deposits of group fund in the bank.

Part B: Group By-laws

	Village	Number of member households	Gewog
	Remung	26	Orong
<i>Members of the NWFP management & marketing group</i>	Membership arrangement and rights of members: i. Interested household members with Gung and census record in Orong Chiwog are eligible to become member. ii. Each member will contribute sum of Nu.100 (one hundred) only as annual Membership fee in the month of January every year. iv. Individuals separated from main gung after formation of group can become a member upon payment of membership registration fees as agreed in annual general meeting addition to annual membership fees. v. The person wishing to join the group must apply to chairperson. His/her membership would be decided by the group members upon meeting all the criteria during the general assembly. vi. Committee members will make a new member aware to group's objectives, purpose, activities and by-laws. vii. Any member wishing to opt-out from membership due to genuine problem shall be entitled 70 percent of individual share from the common fund and 30 percent shall be retained in the common fund. viii. Any member involves in any activities against the welfare of the group shall be terminated without any benefits and shall be charged a fine of Nu.10000 (Ten thousand) only and deposit in the common fund. ix. If a member with non-successor wanted to resign from membership at the end due to his/her disability will get 100% share return from the accumulated fund, Responsibilities of members: ➤ Actively participate in meetings, trainings and also in general assembly twice a year i.e. on 4th and 9th of Bhutanese calendar while the frequency of executive committee meeting will be on need basis. ➤ Fully participate in collection of NWFPs based on instruction given by		

	committee members. ➤ Inform to committee member on NWFPs collected for proper record and marketing. ➤ Protect NWFPs resources from illegal collection. ➤ Harvest, manage and utilized the NWFPs on sustainable basis as per the management guidelines and prescriptions.
<i>Executive committee</i> The three elected executive committee members will act as representative of the NWFP Group in pertaining to the management and utilization of the NWFPs. They are directly accountable to the Gewog Forestry Office and CFO regarding the management and utilization of NWFPs. The terms for three executive committee members were fixed for period of three years. However, they can resign or terminated before the completion of their terms if their performances are not satisfactory. The termination or resignation of executive committee will take place during the general assembly and the NWFP group members will approve the termination/resignation from the executive membership and nominate/elect the substitution through secret voting system. At present all committee members elected are male. However, in future amongst three one should be female to have equal decision.	
<i>Chairperson</i>	Name of Chairperson: Mr. TrashiWangdi Contact No: 77883604
	Responsibilities of Coordinator/Chairperson: i. Chair the meeting related to NWFPs management, utilization and marketing. ii. Coordination with other organizations, sectors and agencies in regards to NWFP work. iii. To arrange and coordinate the marketing of NWFPs and handicraft items. iv. Represent the group in meetings, workshop, seminar, Expo and fares organized at different organizations. v. Resolve disputes and conflicts arising among the group members and maintain good working relations. vi. Coordinate the patrolling of NWFPs collection areas from time to time on rotational basis. vii. Initiate annual planning and implementation of activities. viii. Present annual progress report during general assembly of the group and as

	well to the CFO as and when asked. ix. Supervision of work of treasurer and secretary and provide timely advice. x. Counter sign on the cheque for withdrawal of money from group account.
--	---

Secretary	Name of Secretary: Mr. Norbu Contact No: 17678759
	Responsibilities Secretary: i. Officiate the chairperson in his absence. ii. Inform the date, time and venue of meeting to all the group members. iii. Keep minutes of NWFPs related meetings and make presentation at the end. iv. Assist the chairperson in solving conflicts arising among members and maintain good working relations, and also in marketing of NWFPs. v. Keep proper record and data of NWFPs collected and marketed. vi. Jointly sign with the Chairperson and Treasurer on the cheque during the withdrawal of community fund, keep record and present during meeting.

Treasurer	Name of Treasurer: Mr. Tshering Contact No: 77331535
	Responsibilities Treasurer: i. Keep proper records and accountings of NWFPs and assist the chairperson and secretary in marketing. ii. Issue a receipt to the individual for quantity of NWFPs collected for sale. iii. Keep annual financial transaction records and present to the group members during the general assembly. iv. Collect and deposit the money in the NWFPs group account maintained with the nearest financial institution. v. Jointly sign with the Chairperson and Secretary on the cheque during the withdrawal of community fund.

<i>Possible additional executive committee members</i>	The community has not kept any additional executive committee members owing to the fact that the group being small can be mobilize just by three responsible persons like chairperson, secretary and treasurer.
<i>Compensation to the executive committee for marketing</i>	With the past three years' experience (1 st phase management period), the community members have realized that certain percentage deduction from the products sale of every individual to the executive committee did not make any sense. It was quite negligible to pay as compensation. Therefore, they have unanimously to do away with compensation practice. The three committee members will work for the community without any incentives.

<i>Membership fee and purpose</i>	Every member shall contribute annual membership fee of Nu. 100 (one hundred) only. The amount will be deposited in the nearest BDBL and utilized the accumulated amount for the welfare of the NWFPs group members in the near future. The amount can even use for pre-financing the marketing cost of NWFPs and various handicraft items if possible.
--	--

<i>Community development fund and utilization of fund</i>	The community development fund will be generated through following means; - Membership fees collection - Sale of NWFPs like ferns, mushrooms, damroo, broom species etc. 7% deduction of total sale value of NWFPs from every individual - Fines and penalties of absentees and illegal doers - Interest rate from the loan repayments - Contribution and donation from visitors and other relevant agencies. The common fund will be managed & utilized for the welfare of group members as per the guidelines issued from DoFPS.
--	---

<i>Conflict resolution</i>	- The chairperson and executive committee members shall solve the conflict arising among the group members. - If the conflict arises between executive committee members and the group members, the matter shall be forwarded to Gewog Forestry Office and Gewog
-----------------------------------	---

	Administration by chairperson for final decision. iii. If the problem arises between group members and other communities, the matter shall directly forward to Gewog Administration for settlement, and if it is not solve at Gewog level, matter shall be further forwarded to the Dzongkhag Administration.
--	---

Penalties	Collection or harvesting of NWFPs for home consumption will be free of royalty while for commercial a certain percentage will be deducted and deposited in the community development fund from the total sales of every individual. However, the fines and penalties against the illegal doers will be imposed both for group members as well as non-members in the following ways;	
	Illegal activities	Fine or penalty
	In case a member of the group violates the harvesting rules as set in the management plan (e.g collection without permission of chairperson and committee members)	Nu.2000 (two thousand) per person
	Misuse of fund by the executive committee members	Repay the amount with existing bank interest rate
	If any committee members fail to deliver service	Terminate him/her and appoint new ones through voting system
	Failing to report on time (9.00 am) for meeting, works etc.	- should create jokes/dance/singing.
	➤ Late by few minutes	
	➤ Late by 30 minutes	- should pay Nu. 50 to the community.
	➤ Late by more than 30 minutes	- should pay Nu. 100 & attend meeting too
	➤ Absent for one day	- Galyong Lemi lacha
	Conversion of Thakchung from other tree species is not allowed except from Brungshing on case by case basis.	Nu.2000 (two thousand) per person

Annexure 1: Achievement in past plan period

Activity achievement

- Annual NWFP management group members meeting – conducted twice a year
- Patrolling on rotational basis (once in two months) – illegal reduced drastically
- Imposing of fines against defaulters – imposed fines deposited in the NWFP group account maintained with BDBL. Sustainable harvesting and sale of NWFPs – earned amount deposited in the group account. Improvement of cane species and *Viscum* spp. over the management plan period

Financial achievement

- During the time of first phase management plan revision	= Nu. 10500.00
- Annual membership fees are Nu. 100 x 26 members x 5 years	= Nu.13000.00
- Amount collection from sale of NWFPs (2015 – 2018)	= Nu. 40,145.00
- Fines imposition during the plan period against defaulters	= Nu. 10500.00
- Sale of Ringshu/Yula during the plan period to Kangpara	= Nu. 8000.00
- Sale of broom species during the current FY 2018-2019	= Nu.4625.00
- Sale of Damroo during the current FY 2018 -2019	= Nu. 1100.00
- Sale cane species basket -do-	= Nu. 900.00
- Sale of <i>Zanthozylum</i> species -do-	= Nu. 560.00
- Sale mushroom -do-	= Nu. 500.00
Total = Nu. 89,830.00	

Annexure 2: Buyer - Seller Arrangements

As part of developing the two NWFP Groups (*Remung Lhendup Shingmin Gongphel Tshogpa of Orong and Acho Dongkar Khuenphen Tshogpa of Kangpara*), and to promote the marketing of the NWFP resources and skills development on handicraft production, the buyers-sellers meeting was held in RSPNs' Wamrong Field Office on 20th November 2010. The meeting was facilitated by RSPN with the fund support from SNV-Bhutan, and the meeting was attended by the Executive Members from two NWFP Groups, officials from SNV, Social Forestry Division and Gewog Forest Offices mainly to guide the two groups in framing a sustainable and good marketing guidelines.

The outcomes of the meeting are as follows:

• Raw-Materials Requirement Criteria and the Price

1. One year old culm will be harvested and the length of the split material can be of small, medium and large with girth of 1 metre respectively. The culm has to split into four parts. The inner part and nodes must be excluded. The prices of the raw-materials are as follows:

- i. **Large----->Nu. 45**
- ii. **Medium----->Nu.30**
- iii. **Small----->Nu. 25**

2. The unit of sale would be in bundles and the girth of the bundle must be 1 meter.
3. The quality of material must be maintained by the people of Remung.
4. The young rhizomes of Ringshu would be sold to the people of Kangpara as per their requirement.
5. The block wise harvesting of Ringshu will be as follows:

- 1st year----->Gamtshalu**
- 2nd year----->Budhuridaza**
- 3rd year----->Budhurichelu**
- 4th year----->Daezangnang**
- 5th year----->Norzangyaey**
- 6th year----->Dori**
- 7th year----->Leyphuri**

Remarks: However the people of Remung can harvest the Ringshu from other alternative blocks if needed.

6. The collection permit and transit permit shall be obtained from Divisional forest office by Remung and Kangpara group respectively.
7. The annual requirement of Ringshu of the Kangpara group is estimated at 49 backloads.
8. The people of Kangpara have agreed to send the trainers in 9th months of the Bhutanese calendar every year to train the members of Remung NWFP Group in bamboo craft for the duration of two weeks. Two groups came to consensus to conduct training in Remung village (Lakhang Area). The fooding and logistic arrangement for the trainer shall be arranged by the Remung Group.
9. The Remung NWFP Group has agreed to supply raw materials in return for the training offered by the Group of Kangpara and this will be applied until the Remung NWFP Group Members become well skilled on bamboo handicraft production. However, the Kangpara Group will buy the Ringshu raw-materials from the Remung Group base on their requirement by paying the agreed price of the raw material.
