Part A: NWFP management and marketing plan

1. Background

Sangkha is small village located on a sloppy area bordering Tsirang Dzongkhag. It is located on the northern part of the Gakidling Gewog under Sarpang Dzongkhag. The village has modern facilities such as farm road, electricity and water supply. The population of the village is around five hundreds with dominance of Sherpa and Mongar ethnic group. Currently there are 35 households in the group from Sangkha, Jaisi Dangra, Gaychu and Saag Botey. Most of them are esteemed farmers and dependent on agriculture for their livelihood. They grow crops such as maize and millet for their self-consumption and oranges, cardamom and broom grasses to earn cash income. They usually sell their cash crops to middlemen and income earned are used for buying basic household necessities like rice, sugar, salt, animal feeds and cloths.

Sangkha Soft broom Management and Marketing group was formed in 2015 with an aim to market the soft broom collected from CF & private registered land. During the second revision of the NWFP plan, the group members have discussed and decided to add more NWFPs in their plan in order to increase their income generation through sustainable management and utilization.

Over the years, Sangkha soft broom marketing group has made a tremendous effort in mass planting of soft broom seedlings with financial support the Rural Livelihood Project (RLP) based in Zhemgang. The group has achieved in creation of 4.49 acres plantation. The initiative enabled the members to earn their income through the sale of broom. Therefore, in order to ensure sustainable management of plantation (broom grass) and enhance income earning for the households the revision of plan is paramount important.

2. Goal and objectives

2.1 Goal

Improve social livelihood through sustainable management and marketing of Non wood Forest Products (NWFP).

2.2 General Objectives

- To increase income of the households through sustainable management and marketing of NWFP.

2.3 Specific Objectives

The specific objectives are as given below:

- i. To generate income from the sale of NWFPs.
- ii. To develop better marketing linkages through identification of buyer in urban centers.
- iii. To promote sustainable management and utilization of NWFPs in the area.

3. Description of NWFPs present in the area demarcated for management

Depending upon forest types and vegetation coverage, different species of NWFPs grows in the forest. However, in case of Sangkha, NWFP such as *Thysanolaena latifolia* (Kuchu), Putka (Stingless bee), Mushroom, *Dipazium esculentum* (Fern), *Tupistra nutans* (Nakhima), *Elatostema lineolatum* (Damroo), (*Musa spp*) banana blossom, *Dendrocalamus sikkimesis* (Balubans), *Wallachia denisiflora* (Thakro), *Calamus latifolius* (Cane) and Guli (*Persea fructifera*) are some of the commercially importance NWFP species (10 species) profusely growing within their designated area. These NWFPs has different life forms; hence, incomes can be generated at different seasons. Table below depicts about the detail description of available NWFP species.

<i>NWFP species</i>	<i>Harvesting prescriptions for Sustainable harvesting</i>				
	Who	Where	When	What	How
Kucho (<i>Thysanolaena latifolia</i>)	NWFP Group members	Sangkha NWFP	December March	Inflorescence	• Do not damage the rhizomes in order to allow natural regeneration • Cut the matured stem right from base so that other parts can be used as fodder for cattle. • Dry the inflorescences in the sun before making into bundling to broom. • Cut foliage, inflorescences with secateurs or sharp knife 15 cm above the ground. • Do not damage rhizome to induce good regeneration. • Light controlled fire is recommended to induce regeneration
Putka (<i>Stingless honey bee</i>)	NWFP Group members	Sangkha NWFP	August-April	Honey	• Not allowed to collect from State Reserved forest. • Should be raised in boxes at individual house and provide proper care. • Harvest only once a year - 2 months prior to winter. • The box/hives must be exposed to sun in winter to keep bee active.
Fern (<i>Dipazium esculentum</i>)	NWFP Group members	Sangkha NWFP	July-August	Leaves	• Harvests young shoot that are 15cm length. • Don't harvest all shoot coming up in same cohort. • Retain at least 50% of young shoot of last flush for the development of leaves. • Don't harvest the shoots that have developed to leaves.

Nakhima (<i>Tupistra nutans</i>)	NWFP Group members	Sangkha NWFP	September - November	Flower	• Collect only flowers by hand. • Do not uproot mother plants. • Do not expose plant root to direct sunlight
Damroo (<i>Elatostema lineolatum</i>)	NWFP Group members	Sangkha NWFP	July- October	Leaves	• Collect only the plants that are 15cm and above. • Retain stump of around 3” for sprouting of new shoots. • Don’t uproot whole plant. • Shouldn’t cut down trees and create more opening. • Shouldn’t disturb its catchment area.
Banana blossom (<i>Musa spp</i>)	NWFP Group members	Sangkha NWFP	Any time	Cromb	• Matured banana blossom will be felled. • Only 2 -3 blossoms will be collected from one clump. • Should not damage banana saplings while felling banana plants.
Bamboo (<i>Dendrocalamus sikkimensis</i>)	NWFP Group members	Sangkha NWFP	Anytime	Culm	• Cut culms above one node from the ground level • Do not cut culms less than one year old • Retain 50% of healthy culms in a clump • Remove matured culms (>3yrs) from center of the clump. • Do not harvest the culms growing on periphery of the clump.
Thakroo (<i>Wallachia oblongifolia</i>)	NWFP Group members	Sangkha NWFP	Anytime	Leaves	• Cut only matured leaves. • Do not cut young or immature leaves. • Don’t disturb the root system of the plant.
Cane (<i>Calamus latifolius</i>)	NWFP Group members	Sangkha NWFP	November to March	Stem	• Select cane which are more than 10 m length. • Pull down the cane from tree top before cutting. • Do not pull down or cut flowering cane stem.

					• Do not cut all matured cane stem from the clump for ecological reason.
