PART A: NWFP MANAGEMENT AND MARKETING PLAN

1. Background

The Lemon grass management and marketing plan for Gengkhar Bengtse Detshen is a cross-cutting management regime within the jurisdiction of the Divisional Forest Office, Trashigang. The identified collection and harvesting areas for this cross-cutting plan falls inside the Gengkhar Community Forests and State Reserved Forest Land. The formation of Non-Wood Forest Products (NWFPs) Management and Marketing Groups in Bhutan is legally supported under the Forest and Nature Conservation Act 2023 and its Rules and Regulations, enabling communities to sustainably manage, harvest, and market NWFPs, thereby enhancing livelihoods and promoting the sustainable utilization of natural resources.

The Lemongrass (*Cymbopogon flexuosus*) Management and Marketing Group of Gengkhar, known as Gengkhar Bangtse Detshen, was established in 2021 with the primary objective of improving coordination and promoting sustainable harvesting practices.

The group comprises 8 members from Gengkhar village, Udzorong Gewog, Trashigang Dzongkhag, and manages a total area of 259.69 hectares, divided into three operational blocks: Shunang Pag (117.99 ha), Gengkhar (106.30 ha), and Pheree (35.40 ha). The Pheree block remains unoperated due to water and labor constraints, although the group anticipates commencing operations once these issues are addressed. The area is naturally endowed with abundant lemongrass growing under Chirpine (*Pinus roxburghii*) forests, providing optimal conditions for sustainable utilization. Lemongrass oil from this resource holds high commercial value locally, regionally, and internationally, contributing substantially to household income and community socio-economic development.

The group's lemongrass oil has achieved organic certification under the Bhutan Organic Standards (BOS-CS: 2022), issued by the Bhutan Food and Drug Authority under the Ministry of Health. Over the past 5 years, the group has collectively harvested 584 kg of lemongrass oil, achieving a total income of Nu. 1,008,900, which has significantly improved community livelihoods, supported education, and met essential household needs. Based on resource assessments and yield projections, the area is expected to produce approximately 1,589.30 kg of lemongrass oil annually, with an estimated market value of Nu. 3,019,670.

With the expiry of the previous lemongrass management plan, a revised 10 year management plan is being prepared. The current plan, along with its by-laws, has been developed in accordance with the Forest and Nature Conservation Rules and Regulations of Bhutan, 2023, and the Forest and Nature Conservation Code of Best Management Practices, Volume V.

This management plan presents a structured and participatory framework for resource governance, emphasizing regulated harvesting, conservation of the lemongrass resource base, and equitable benefit-sharing among community members. It serves as a guiding document to ensure that

lemongrass harvesting is both economically viable and ecologically sustainable, thereby supporting community livelihoods while safeguarding natural resources for future generations.

Review and Achievements of the Past Management Plan (2021–2025)

During the previous management period, the group successfully generated income through the sale of lemongrass oil, significantly improving local livelihoods and reducing the need to seek income outside the village. The group strengthened coordination among members, streamlined collection processes through proper permitting, and achieved organic certification under Bhutan Organic Standards, enhancing product credibility and market value. Sustainable harvesting techniques were adopted by all members, ensuring both resource conservation and continued economic benefits. Despite these successes, market access remains limited to Bio-Bhutan. Key recommendations for the next phase include expanding domestic and international markets, investing in packaging and bottling, securing funding and partnerships, developing a strong brand identity, and providing capacity building training to improve marketing, quality control, and competitiveness of lemongrass oil.

Table 1. Financial Achievements of the Group During the Past Management Plan Period.

Product	Quantity (Litres)	Rate	Total Amount	Year
Lemongrass oil (<i>Cymbopogon flexuosus</i>)	50	1400	70,000.00	2022
	163.5	1600	2,61,600.00	2023
	266.5	1800	4,79,700.00	2024
	104	1900	1,97,600.00	2025
Total	584.00		10,08,900.00	

2. Goal and objectives:

1. To sustainably manage the lemon Grass,
2. To generate income through sale of Lemon grass oil.
3. To elevate the poverty and improve the livelihood of community
4. To create employment opportunities for the youth.

3. Description of NWFPs present in the area demarcated for management.

Lemongrasses belong to the family of Poaceae (Graminae). The perennial plants grow in clumps of up to two meters in diameter, while the leaves are up to one meter in length. The grasses survive for a period of at least six years. Lemongrass is aromatic grass native to Southeast Asia, known for its lemon-scented leaves and stalks. It is widely used in culinary dishes, teas, and herbal remedies due to its refreshing flavor and medicinal properties. Lemongrass is also valued in the cosmetic industry for its essential oil, which is used in aromatherapy, massage oils, and skincare products.

Additionally, it has antimicrobial and anti-inflammatory benefits, making it popular in traditional medicine for digestive health, stress relief, and immune support.

4. Participatory mapping and calculation of the area

The group members have mapped the Lemongrass growing areas and created a sketch map. Based on this sketch, ground validation of the management area and boundaries demarcation is being carried out using GPS and SW Map.

Figure 1. Participatory Resource Map

Figure 2. Map showing the area managed by the Lemongrass Management Group.

Table 2. Location and Ownership Details of Distillation Drums.

Area Name	Drum No.	Drum Owner	Members
Shenang Pag	1	Dorji Dema	
Sokpo	2	Ugyen	
Sokpo	3	Kinzang Wangchuk	
Phai Singmo	4	Tenzin Wangdi	
Brokphai	5	Tshewang Gyeltshen	

5. Resource assessment

The resource assessment was conducted in accordance with *the Guidelines for Resource Assessment and Management of Lemongrass (2008)*. Based on historical data from the past four years, the average annual production is 584 liters of lemongrass oil from the area, as details shown in Table 1. Although the guidelines mention that if data is available for previous years, the average

can be used as a reliable basis for resource assessment, this area's data are considered less reliable due to issues such as labor and water shortages that have prevented full operation of all areas. Therefore, the estimation was based on existing research cited in the guidelines, which indicates that the oil yield from wild lemongrass stands can reach up to 9 kg per hectare.

For planning purposes, it has been assumed that approximately 40% of the total area is operable for lemongrass harvesting, accounting for unproductive zones such as barren lands, steep slopes, and other inaccessible or unsuitable areas. Additionally, second harvest yields are estimated at approximately 70% of the first harvest.

Table 3. Overview of the lemon grass production.

Zone	Area (Ha)	1st cut (Kg)	2nd cut (Kg)	Annual Oil Production (Kg)
Gengkhar	106.3	382.68	267.88	650.56
Pheree	35.40	127.44	89.21	216.65
Shunang Pag	117.99	424.76	297.33	722.10
Total	259.69	934.88	654.42	1589.30

Table 4. Brief description of NWFPs for commercial harvesting in each season.

NWFP name	Harvesting area(s) (name)	Parts harvested	Use/purpose (traditional & others)	Harvesting season (months)	Estimated quantity for harvest in a season/year
<i>Cymbopogon flexuosus</i>	Gengkhar	Upper part	Essential oil	Mid July-November	1589.30

6. Harvesting prescriptions for sustainable NWFP harvesting

Table 5. Prescriptions for sustainable harvesting of NWFPs

NWFP species	Harvesting prescriptions for sustainable harvesting
<i>Cymbopogon flexuosus</i>	- Collect lemongrass at maximum 2 times per year - Cut the grass at a height of 20 cm. - Leave at least 3 to 4 flower stalks/tillers per entire clump.

7. Marketing and sales plan

Currently, lemongrass oil (LG Oil) is supplied exclusively to Bio-Bhutan. The lemongrass produced by the group is certified organic under the Bhutan Organic Standard (BOS-CS: 2022). The group aims to standardize packaging to expand its market nationwide and establish a foothold in international export markets.

Table 6. Marketing and sales plan of the group

NWFP	Potential market/buyer	Estimated quantity for sale per season (unit)	Form of Products (dry/fresh)	Expected price per unit	Total (Nu)
Lemon grass	Bio-Bhutan	1589.30	Oil	1900/-	30,19,670.00

8. Marketing arrangements

The Lemon Grass will be collected by the group once the collection date is announced by the Chairman, and the extracted oil will be taken to each member's house. The Forest Office will announce the date for inspection, during which the products will be examined, and Certificates of Origin will be issued to facilitate royalty payments according to the prevailing rates, in the name of the group. Each member will oversee the weighing of their products to ensure accuracy. Afterwards, members can market their products individually or collectively, with the members' consent, upon obtaining an Internal Movement Order (NWFP).

9. Benefits to the members

There are several benefits an individual member can gain, few are provided below:

- ✓ Improved and stable income for each member sale of lemon grass
- ✓ Right to ownership and access to resources (lemon grass)
- ✓ Enhance self-capacity through capacity building and skill development
- ✓ Reduce the cost of expenditure through sharing resources (transportation, processing facilities, storage facilities, etc.)
- ✓ Stronger access to market and negotiation power with supply chain actors
- ✓ Access to financial and institutional support
- ✓ Risk sharing and livelihood resilience
- ✓ Sustainable management of resources
- ✓ Gain self-voice in decision making

Table 7. Financial projection and benefits to the members from NWFP sales

Sl. No	Particulars	Products (names)	Total Amount (Nu)
		Lemongrass oil	
1	Revenues		
a	Total quantity (unit) -	1589.30	
b	Market price (Nu per unit) -	1900	-
c	Total revenues from forest product sales (a*b)		3019670
A	Total revenues		3019670
2	Expenses		
a	Packaging materials		-
b	Royalty	1589.30	7946.50
c	Transportation costs		8000.00
d	Compensation fee to the executive committee for marketing products		5000.00
e	Contribution to community development fund	1% of total sale	30196.70
f	Incidental expenses		5000.00
g	Membership fee	500	4000.00
B	Total expenses		60143.20
C	Total benefit (net income) of group members (Total revenues A-Total expenses B)		2959526.80
D	Average income to group members (C/no of group members)		369940.85
E	Price per unit paid to group members (C/1a		1862.16

10. Benefits to the group

The NWFP management group can have more benefits compared to individual members:

- ✓ Stronger recognition from relevant organizations that can strengthen the responsibility, benefit sharing and transparency of the group initiatives
- ✓ As a collective effort, the group can sustainably plan and harvest the resources, monitor and control overharvesting ensuring the long-term availability of resources and conservation of the habitat
- ✓ The group can collectively aggregate the resources and reduce the cost and expenditure that can be incurred during processing, packaging, storage and transportation
- ✓ The branding and marketing of the products can be improved and expanded through quality assurance, certification and competitiveness in both domestic and international market

- ✓ The group is more likely to receive support and investments from donors, government agencies, NGOs and financial institutions
- ✓ The group can also formally collaborate with the government agencies, private sector, buyers and service providers thereby receiving support in technology transfer and product development
- ✓ The group can collectively manage risk and plan better risk management strategies
- ✓ Knowledge sharing and innovation for the groups through peer learning, adoption of improved management practices and innovations
- ✓ Long-term organizational sustainability through clear procedure, benefit sharing mechanisms and income generating activities

Table 8. Financial projection of the group, the community development fund

SL no.	Particulars	Amount (Nu)
	Revenues	
1	Membership registration fees	4000.00
2	Contribution to the Community Development Fund from sales of product	30,196.70
A	Total Revenue	34,196.70
	Expenses (only include expenses that will be paid from the group funds)	5000.00
	TADA to the Committee and other members for their travel on behalf of the group.	5000.00
B	Total Expenses	10000.00
C	Balance: Total revenues -Total expenses	24,196.70

11. LG collection within the Community Forest

Lemongrass collection within the Community Forest (CF) will be permitted only to individuals who are CF members of the respective location. Each member must obtain a collection permit by paying a lump-sum compensation of Nu. 1,500 to the CF before collection.

12. Collection of firewood for the distillation

Given the remote locations of the distillation drums, procuring firewood from commercial suppliers is not feasible. Therefore, firewood must be sourced from nearby State Reserved Forests. For distillation drums situated within CF areas, firewood shall be obtained from the CF, subject to the payment of applicable royalty to the Community Forest management group.

12. Monitoring and Evaluation

Monitoring will be conducted annually, with frequency adjusted if necessary based on the committee's decision. The primary objective is to assess resource management, detect threats such as diseases, and prevent illegal activities within the management area. After each monitoring, findings will be presented to group members to identify solutions and actions. Any illegal activity must be reported immediately to the Udzorong Beat Office for necessary action. Joint monitoring will be carried out by the group and the Beat Range to evaluate the implementation of the management plan, by-law compliance, financial performance, record-keeping, and overall group governance. This includes physical verification of harvesting blocks to ensure adherence to management prescriptions. The Beat Office will prepare an annual monitoring report for submission to the Range and Divisional Forest Office, Trashigang, and the Department of Forests and Park Services (DoFPS). Additionally, a midterm review will be conducted in the fifth year and a final evaluation in the ninth year by the Forest Monitoring and Information Division (FMID), DoFPS.

13. Waste Management

Effective waste management within NWFP management areas is crucial to ensure environmental sustainability and resource protection. Special emphasis will be placed on managing non-degradable waste generated from various activities. In accordance with the Forest and Nature Conservation Rules and Regulations 2023 and the Waste Prevention and Management Regulation 2012, all NWFP group members are responsible for maintaining cleanliness and ensuring that waste is properly handled. Any waste produced during harvesting, processing, or related operations must be collected, segregated, and disposed of appropriately following the provisions of the Waste Prevention and Management Regulation 2012. Regular awareness and monitoring will also be carried out to promote responsible waste management practices among members.

PART B: GROUP BY-LAWS

Name of the Group	Gengkhar Bangtse Detshen		
Members of the NWFP management & marketing group	Village	No. of member households	Geog
	Gengkhar	8 HH	Udzorong
	Responsibilities and rights of members: ❖ Managing and harvesting of NWFPs in a sustainable manner. ❖ Cross-check illegal activities within the members and also by intruders. ❖ Each member has right to harvest the Lemongrass from the designated area allocated to them within the timeline framed in the by-laws. ❖ Each member has the right to know about the status of the financial transparency matter/CDF utilization. ❖ Membership has the right to re-elect executive members depending upon the membership will and urgency. ❖		
Executive committee			
Chairperson	Name of Chairperson: Tshewang Gyeltshen Contact No.: 77616129		
	Responsibilities of the chairperson: ❖ Coordinate and preside over general meetings and draw conclusions of the discussions based on majority consensus ❖ Plan and formulate annual work plans in consultation with other management committee ❖ Resolve conflict of the members wherever possible and forward to higher authority as per the rules and procedures prescribed under the section Conflict Resolution of these By-Laws. ❖ Exploring market in consultation with the relevant Agency or organization ❖ Responsible for endorsing cheques for withdrawing group funds along with the secretary and treasurer ❖ Make necessary arrangement for the visitor visiting the group ❖ Enforcing fines and penalties for illegal activities ❖ Review and monitor the plan activities ❖ Shoulder the responsibilities of Secretary and Treasurer in their absence ❖ Submit annual progress to relevant organizations / agencies.		

Secretary	Name of the Secretary: Dorji Dema Contact No.: 17427052
	Responsibilities of the Secretary: ❖ Officiate the Chairperson in his absence ❖ Responsible for all correspondence related to the group ❖ Keep all necessary records with regards to implementation of group activities ❖ minutes of all the meetings ❖ Co-sign cheques for withdrawing group fund along with the Chairman and Treasurer ❖ Responsible for preparing annual work plan and progress reports for submission to the relevant organization / Agency or the Department ❖ Resolve conflict of the cooperative members ❖ Enforcement of fines and penalties for illegal activities ❖ Keep inventory of all tools and equipment ❖ Shoulder the responsibilities of Treasurer in his absence
Treasurer	Name of the treasurer: Sonam Tenzin Contact No.: 17717379
	Responsibilities of Treasurer: ❖ Keep all the financial related records and present it to the members during the general meetings ❖ Responsible for withdrawing and depositing of cash in the group Account ❖ Co-sign cheques with the chairperson and the secretary ❖ Officiate as Chairman and Secretary in his/her absence ❖ Resolve conflicts among the members ❖ Enforcement of fines and penalties for illegal activities
Tenure of committee member	❖ The committee members elected from the group members, by the group members unanimously, will serve for 5 years to provide equal opportunity to all members. ❖ However, no executive committee members performing them duties as expected by group members will be terminated before the expiry of the tenure, and the vacant post shall be filled immediately.

Incentives to the committee members	❖ The Travel Allowance (existing local taxi fare) and Daily Allowance (Nu. 200) for the Committee and other members, intended for group purposes, shall be paid from the group fund. However, if the travel and daily allowances are already being provided by the concerned organization during meetings, workshops, or study tours, members will not be entitled to these allowances from the group fund.
Membership fee and purpose	❖ Each member shall contribute a minimum of Nu. 500/- (five hundred) only as a membership fee. ❖ The members who fail to pay the membership fee will be terminated from the group without any benefits. ❖ The new members who are interested & wish to join the group have to make payment as per the individual membership fee collected till the date of joining, as per the record mentioned. ❖ Any member (committee or group member) found misusing the group fund will be liable to a penalty of Nu.10% of the total amount misused.
Group Fund management and Utilization	Financial arrangement: The group will have a joint Bank account that can be operated by two people (Chairman and Treasurer). All Bank transactions will have to be well documented and the financial position (expenditure, income and current balance) have to be informed to the groups during meetings. Withdrawals as well cash deposits have to be well maintained in the books of accounts. Fund Management: The sources of funds for the group shall be from: 1. Fines from penalties and absentees 2. Donations from visitors 3. 1% from commercial sale of products. All expenses required for smooth functioning of the Group have to be authorized by the Executive committee. The Executive Committee submits the financial requirements for the planned activities to the General Assembly. The Bank account has to be operated jointly by two members of the Executive Committee. At the closure of the financial year, the accounts are verified by an external person (e.g. extension agent) who will give a report to the General Assembly. Utilization of group fund: ❖ To purchase necessary tools as required by the group ❖ The fund will be used to meet the administrative and other management costs of the group.

	❖ Will be used for serving refreshment for the visitors and guest ❖ Will be used for serving lunch and refreshment during general meetings and for carrying out management activities whenever necessary. ❖ Contribution during incidents of disaster/mishaps.
Conflict resolution	Any conflict that arises among the members shall be dealt with by the committees. If the case is beyond the level of the committees, then the case shall be forwarded to the Geog Administration and finally to the district court.
Meeting and Purpose	The General Assembly meets at least twice a year. The Chairperson calls for the General Assembly at least 7 days in advance, furnishing the points of the agenda as well as the time and place of the meeting. The ordinary agenda of the General Assembly is: Presentation and approval of the agenda ❖ Reading the previous minutes and information on the actions taken ❖ Election of the management committee and the other as when necessary ❖ Amend and/or modify the By-laws if required by the society ❖ Approval of the terms of reference for the various committees ❖ Presentation and approval of the yearly report and the yearly accounts ❖ Presentation and approval of the business plan and the budget ❖ Information and decision on investments ❖ Miscellaneous decisions which are not covered in the group by-law ❖ Discussion on next meeting and tentative date ❖ Every member has one vote in the General Assembly. Decisions of the General Assembly require a two-thirds majority of the members present and voting. ❖ The group will conduct general meetings 2 times a year.
Penalties	❖ Nu. 415/- will be charged as an absentee fee during the general assembly unless the individual is faced with unavoidable circumstances. ❖ The member shall be terminated without any benefit if found committing offences more than 3 times not complying with the group's NWFP management plan and By-laws. ❖ If any member resigns from the group due to personal issues or unavoidable circumstances, he/she shall submit a written resignation letter to the executive members, addressed to the

	Chairperson, at least one month prior, explaining the reason for the decision. The group must then hold a general assembly to formally relieve the member, providing a share of benefits—50% of the annual membership fee paid to date. ❖ Members resigning without any critical issues shall be subject to a fine of Nu. 1,000/- (One thousand) and shall be relieved without any benefits or shares. ❖ A member can deploy only 3 people to harvest the grass, failure to abide shall be fine Nu.2000/- per person
Roles and responsibilities of other stakeholders	Divisional Forest Office ❖ Technical support ❖ Capacity development ❖ Help in marketing and sale of the products ❖ Monitoring and evaluation of the group Geog Administration ❖ Help in marketing and sale of the products ❖ Conflict resolution ❖ Monitoring and evaluation of the group
Termination / Cancellation/ Dissolve/ Group Deregistration	In the event if the group members plan to dissolve, terminate or de-register the group before the expiry of the plan, the following should be abided by the members and respective field offices: ❖ The ownership / NWFP group certificate shall be surrendered to the Division Office ❖ No harvesting or collection of resources shall be permitted after cancellation or deregistration of the group ❖ If the community wishes to collect the resources, the collection of resources should be facilitated strictly by Rule 260 (1&2) ❖ The members shall not be allowed to form a new group or join any NWFP groups ❖ In the event if the NWFP group is dissolved, then 10% of the proceed acquired through sale of NWFPs shall be forfeited to the Government Revenue.
