NWFP MANAGEMENT PLAN

Approval Sheet

NWFP MANAGEMENT PLAN

Executive summary

Dangchu NWFP management group was established in the year 2018 in consultation with the community of Dangchu Geog. The plan was prepared by SFED Thimphu for management of NWFPs by the group members. Since the establishment of the group the plan was not implemented by the members due to lack of coordination within the members. The NWFP such as Paris polyphylla, Bamboo and Algae (churu) has been listed in the management plan for sustainable management.

There had been a rampant illegal collection of Paris polyphylla in the past years and was almost exhausted in the locality. Similarly, a die back phenomenon was observed in bamboo caused by flowering of the bamboo species which is usually observed every few decades. As the plan was not fully implemented, a consultation was conducted with the members to dissolve the plan but then community expressed their interest to retain the management plan looking into the future benefits.

However, the revision of the management plan was felt necessary to explore the market accessibility for the species and so that the group members can sustainably harvest the bamboo reviving in their locality and harvest other NWFPs listed in the plan. As per the local community, the mushroom species are available in scattered areas are collected during certain growing seasons, hence its commercialization is not recommended. Due these reasons, mushroom has been excluded from the management list during the planning process.

As proposed by the community, only the interested individuals were registered to be the member of management group. The plan has been reviewed in consultation with the SFES, Wangdue Forest Division.

Part A: NWFP Marketing and Management Plan

1. Introduction

Dangchu Geog consist of five chiwogs with 266 households in the Geog. The Geog administration is located at about 20 kilometers away from Nobding Range Office. Dangchu Geog is situated between the altitude of 1927 masl and 3280 masl resulting in low agriculture production. Except Ridha chiwog the rest Chiwog do not grow any food crops due to unfavorable climatic conditions. Some of the cash crops such as potato, Chillies and garlic grown by the community are sold in the local market to earn income. Apart from agriculture, they also depend on livestock.

The people of Geog in the past depended on rearing livestock for their livelihood, however with the modernization and increase in the literacy rate, the community have transected to other alternative ways of living. They were also allowed to collect Cordyceps in their demarcated grazing lands and they do off farm activities in the off season to earn and sustain their families.

All the five Chiwogs in the geog were involved in the NWFP management group in the past but then during the review of the plan, only the interested individuals were involved in the management group from four Chiwogs of Ridha, Tokaling-Tomla, Chuba-Tashiding and Godrang-Tassar to have proper functioning of the group. Total 170 households were involved in the management group out of 266 households in the Gewog. Dangchu NWFP management regime is distributed in and calculated area of 3116.55ha. area in all Chiwogs of Dangchu Gewog.

Upon the interest of the community, the management plan has been reviewed to have sustainable utilization of the resources available in the locality. They were empowered to manage and protect the listed NWFP such as *Paris polyphylla*, *Algae* and *Borinda grossa*.

2. Legal Status of NWFP and Legal Rights of the NWFP Group Members

The NWFP management areas were identified based on the individual chiwog's traditional rights and the mapping has been done accordingly in consultation with the group members. The proposed NWFP management area falls under State Reserved Forest Land which falls within Dangchu Geog excluding the areas falling under Community Forest.

Member of the Dangchu Chigthuen NWFP management group have the right over sustainable utilization as per the management plan prescription. After the approval of the management plan, the members will be allowed for collection of NWFPs after obtaining permit following proper procedures mentioned in the by-laws. However, the technical backstopping for the sustainable harvesting guidelines will be disseminated by the Forestry Officials for Nobding Range and the management plan shall be reviewed in every five years.

NWFP MANAGEMENT PLAN

3. Management Objectives

The objectives of NWFP group are as follows:

1. Harvesting and utilization of NWFP in a sustainable way
2. To generate income through marketing of NWFP
3. To protect NWFP illegal collection by outsider.

4. Description of NWFP

The NWFP species listed in this plan includes bamboo, satwa and algae (churu). The description of each species is provided in the table below.

Sl.No	NWFP species	Description
1	<i>Paris polyphylla</i> (Thoksampa, Satuwa)	It is a rhizomatic perennial plant reaching a height of 1m. It has spider-like flowers with long, thread-like, yellowish green petals, which are followed by small, scarlet berries in autumn. Satuwa grows best in broad-leaved forests bamboo forests, thickets, grassy or rocky slopes and stream sides at altitudes from 100 m up to 3500 masl. It can grow in full or semi -shade but requires moist soil. Each year, plant parts above ground die off and regenerate in spring, flower in April / May and die off again in October/ November. In November new buds are being formed from the rhizome, which remain dormant underground until next germination period.
2	<i>Borinda grossa</i> (bamboo)	The largest bamboo found in the higher altitude scientifically known as <i>Borinda grossa</i> is also found in Dangchu Geog under Wangdue Dzongkhag. As per the guideline it is normally found in the altitude range of 1800 to 3200 meter which can attend the height up 10 meters with 4.5 centimetre in girth. However, bamboo in the management area of Dangchu is found in between the altitude range of 2000-3000 meter. It is preferably well grown in the fertile and humid conditions associated with the Hemlock (<i>Tsuga dumosa</i>) of mixed temperate forest.
3	<i>Algae</i> (churu)	The algae or churu is a type of aquatic sea weed like plant that is usually found growing along the water bodies. The species is widely used in Bhutanese cuisine as churu.

NWFP MANAGEMENT PLAN

Table 1. Detail information on NWFPs

Sl. No	NWFP name	Collection area	Parts harvested	Use purpose (traditional & others)	Harvesting season (months)	Estimated quantity that can be collected
1	Kewa Dochu (<i>Paris polyphylla</i>)	Ngechuphu, Jedhalum, Ney goenpa, Adhgangchu, Mimok, Takalum.	Tuber	Medicinal purposes	October to November	500 kg
2	Bamboo (<i>Borinda grossa</i>)	Jedhalum, Mimok, Adhgangchu, Takalum	Whole stem	For making bamboo mat and other bamboo products.	December to February	1000 bundles
3	Churu (Algae)	Along stream Dangchu	Whole vegetative parts	Consumed as vegetable	December to March	50 kgs

5. Harvesting prescription for sustainable harvesting

Table 2. Guidelines for sustainable harvesting of NWFPs

Sl. No	NWFP species	Harvesting prescription for sustainable harvesting
1	Kewa Dochu (<i>Paris polyohylla</i>)	- Harvest only bigger and matured ones. - Do not uproot all at the same location and have to retain 40% - Do not damage the tender growing stock while collecting. - Do not harvest the plant before the seed dispersal - Leave some portion of the rhizome with bud underground Rotational harvesting is always recommended for harvesting of the species from designated areas. A total of six areas are identified for harvesting of Satuwa, these areas shall be divided for a period of 3 years so that a rotational harvesting is followed. The area harvested in the first year will be left untouched for regeneration in the following year and the members shall collect the species from other identified area and follow these procedures yearly. The rotational harvesting shall take place every after three years.
		- Harvest only the matured stands. - Cut Culm above first internode from the base - Leave bamboo shoot or culm less than one year old intact

NWFP MANAGEMENT PLAN

2	Bamboo (<i>Borinda grossa</i>)	• Cut at maximum 33% of the 1+ and 2+ years old culm per clump • Only 60% of the bamboo should be harvested • Harvesting of the young shoot below 2 meter in height should be prohibited. • Collection of Bamboo should be in rotation basis yearly from place to place. • Do not cut the culm when shoots are sprouting
3	Algae (Churu)	• It is recommended to collect only on prescribed time. • Collection from the same area for the second time is not recommended. • Collection should be in rotation basis from place to place.

6. Marketing and sales plan

Table 3. NWFP marketing and sales plan

NWFP	Potential market	Estimated quantity for sale/season (Unit)	Expected price / unit	Total (Nu)
Kewa Dochu (<i>Paris polyohylla</i>)	Potential marketing agencies.	200kg	800	160,000/-
Bamboo (<i>Borinda grossa</i>)	Other chiwogs of Wangdue. (Bamboo as whole stem)	1000 bundles	70	70000
	Wangdue, Punakha & Thimphu. (Bamboo products)	600 nos. of bamboo products	1000	600,000/-
Algae (Churu)	Wangdue, Punakha & Thimphu.	50kg	600	30,000

7. Marketing arrangement

When the group needs to market the product, the executive members shall explore for the market consulting relevant stakeholders for their guidance. The product will be marketed at the rate of existing market value.

- Till they find the potential buyers or market, they have to keep their collected NWFP or the product with them for safe store.
- If the produce collected were more than the demand, executive members should ensure that the equal quantity of produce is taken from every member who collected the produce.

NWFP MANAGEMENT PLAN

- The NWFP collection permit will be thoroughly checked when executive members collect the product for marketing.
- Members who couldn't produce permit will be withheld until they solved the case.
- The NWFP or the product will be marketed by the executive members under the name of Dangchu Chigthuen NWFP management group.

Royalty for listed product

Table 4. Royalty rate for the listed NWFPs

Sl. No	Product name	Quantity	Royalty
1.	Bamboo (<i>Borinda grossa</i>)	1 head load	100/-
2.	<i>Paris polyphylla</i>	1 day	300/-
	<i>Paris polyphylla</i>	1kg	15/-
3.	Churu (Algae)	1 day	100/-

8. Benefits to the members

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The members will be benefitted in terms of income generation through sale of NWFPs which shall be useful in supporting the family's livelihood. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability of resources in perpetuity.

Table 5. Financial projection from the sale of NWFPs

Sl.No	Particular	NWFPs				Total amount (Nu.)
		<i>Paris polyphylla</i>	<i>Borrinda grossa</i>		<i>Algae (churu)</i>	
1	Revenue					
a	Total Quantity (unit)	200kg	1000 bundles	600 products	50kg	
b	Market price (Nu. per unit)	800	70	1000	600	
c	Total revenue from sale of forest produce (a*b)	160000	70000	600000	30000	
A	Total Revenue					860000
2	Expenses

10.2. Map of NWFP collection area

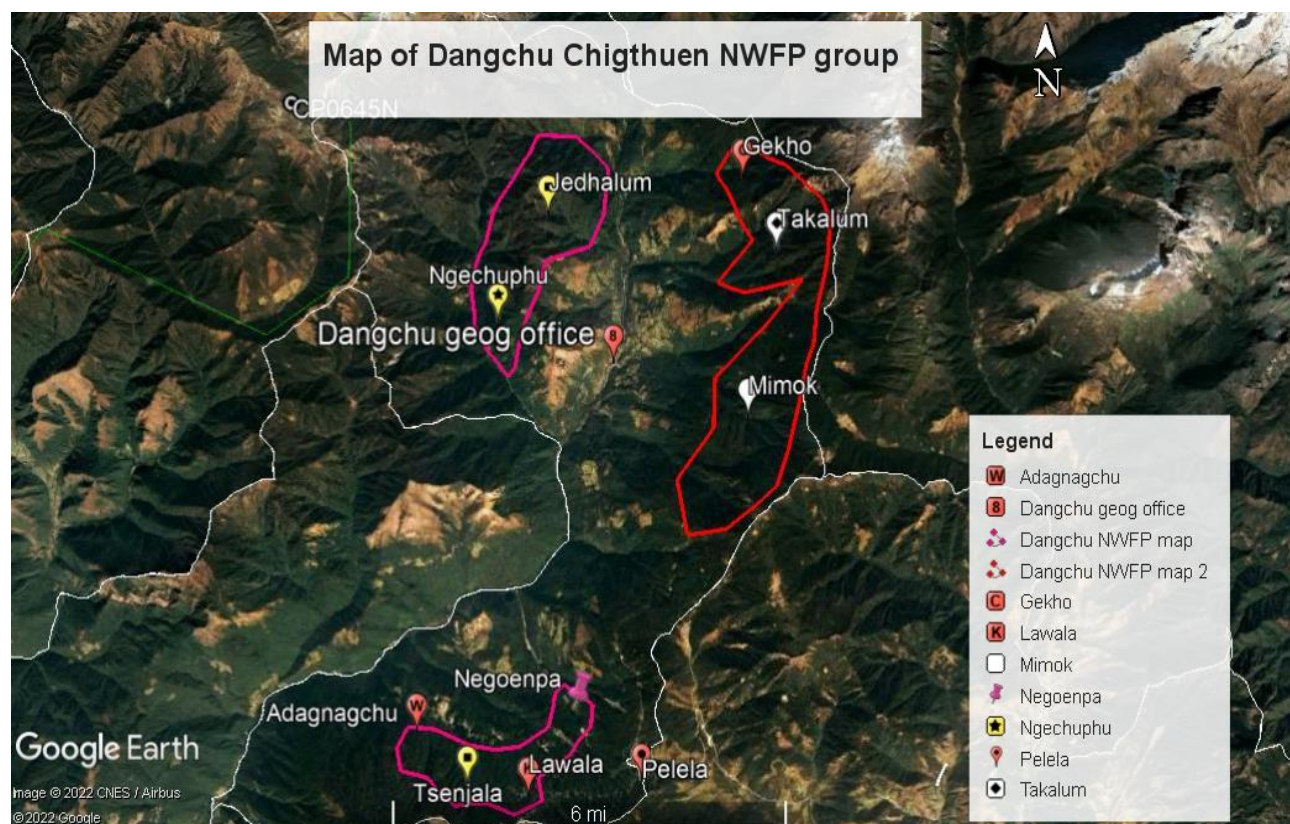

Figure 1. Google map of Dangchu Chigthuen NWFP group

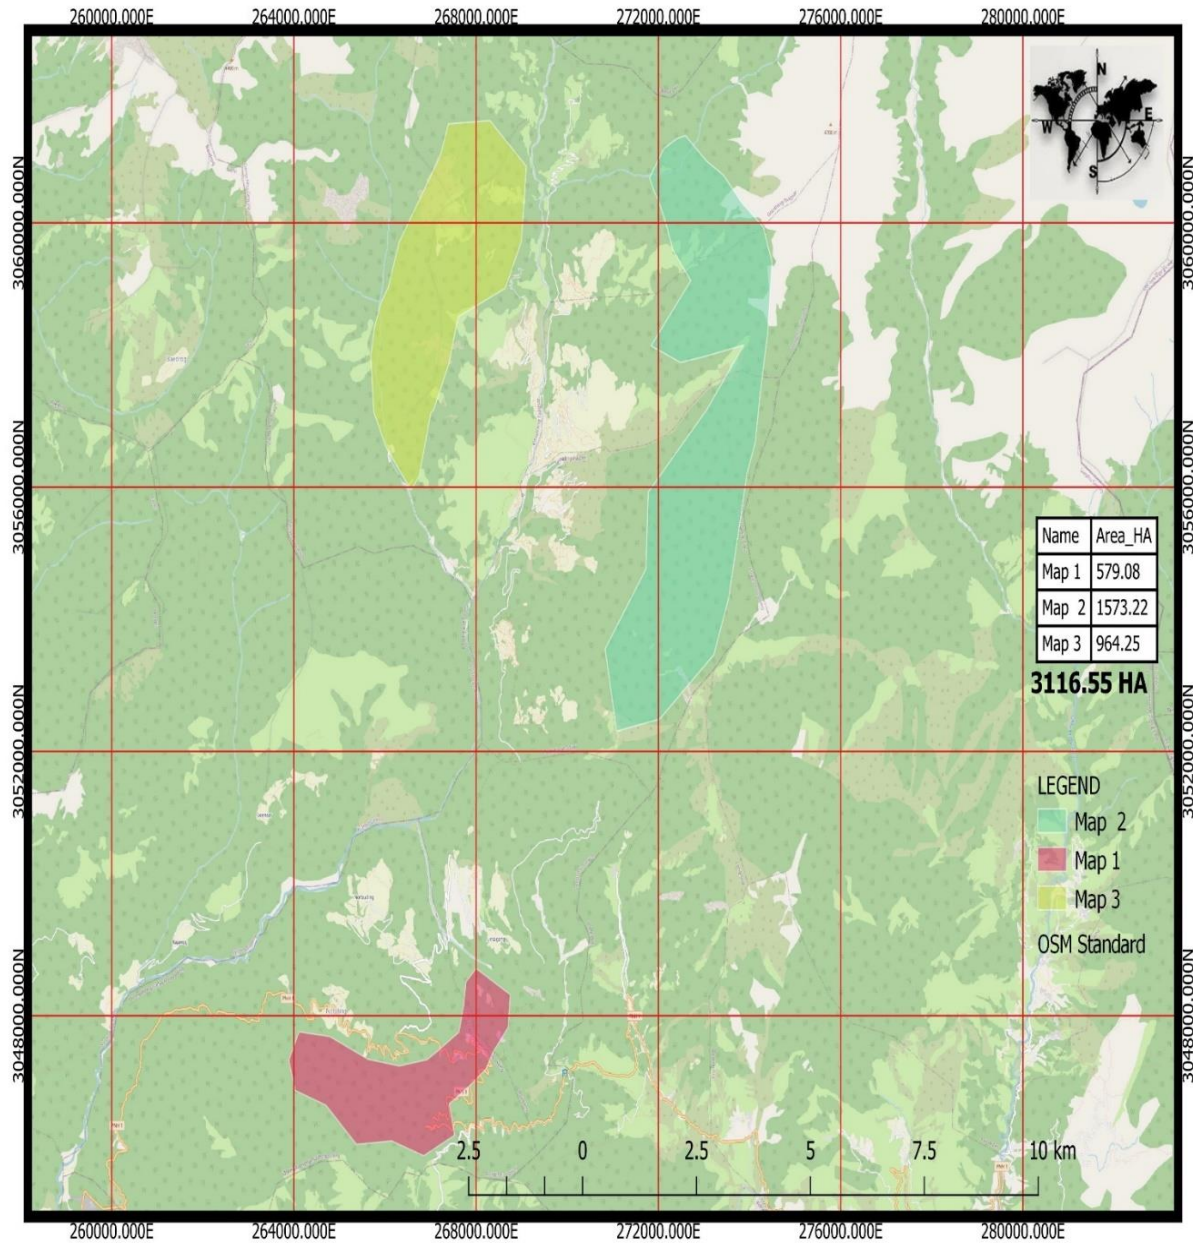

Figure 2. Topographical map of NWFP area

11. Monitoring, Review, Evaluation and Reporting

Executive members shall conduct monitoring and patrolling of the NWFP management area and submit the report to the concerned forest office for further submission. The technical back stopping shall be done by the nearest forest office based on their requirement. The forestry officials shall monitor over all management activities and ensure the sustainable utilization of the available resources. The annual report shall be prepared jointly with forestry officials and NWFP committee members.

NWFP MANAGEMENT PLAN

The NWFP Management plan will be reviewed after **Five** years as per the new rule to make any changes to the existing plan. During the review, any activities or work plans be incorporated if it contributes to enhance the management of the resources. The detail monitoring and evaluation shall be done in the last year to decide whether to review or cancellation of the plan.

Part B: Management Plan By-Laws

12. Membership Arrangements (Eligibility Criteria)

- Dangchu Chigthuen NWFP management group consist of 170 members who area the native of the Dangchu with proper Gung and Thram.
- Only the interested group of households from four chiwogs in Dangchu geog was included in the Management group. Out of five chiwogs in Dangchu geog, Eusagang chiwog has been excluded from the management group due to lack of their interest.
- The members in the group have to contribute Nu. 50/- annually as a membership fees.
- Any households interested to join the member should have to pay the individual share of accumulated amount to the group to become a member.
- Any member wishing to resign from membership due to genuine problem shall be allowed with the 50% share from the accumulated amount.
- Any member resigning with loosing of interest to be the member will not get any benefit/share from the group.
- The resigned members will be not allowed to rejoin the member in the same plan period, however if they were interested to rejoin the member, they shell rejoin the member during the time of review time with payment of Nu. 7000.

12.1. Executive Committee

The executive members from the group are selected based on the maximum votes acquired by individuals. Executive members were elected by hand raising for the selected individuals and they were elected based on the maximum vote they acquired. The committee members will be serving for 2.5 years and the election of the committee members shall be organised if it is required to re-elect the committee members. If any of the committee members would like to resign, they have to put up the application to nearest forest office. The forest office will instruct rest of the committee members to organise meeting for election of the committee members. The plan period is 5 years and the NWFP member decided keep tenure for committee members of 2.5 years. However, they can resign or terminated before the completion of their terms if their performances are not satisfactory.

Table 7. Details of executive members

Sl.	Name	Responsibility	Terms	Contract No
1	Pelba	Chairperson	2.5years	77392861
2	Mani	Secretary	2.5 years	

NWFP MANAGEMENT PLAN

3	Kumbu Dema	Secretary	2.5 years	17462517
4	Namgay	Treasurer	2.5 years	

12.2. Roles and responsibilities of NWFP management group

12.2.1. Chairperson

- Hosting of meeting with the group as and when required.
- Solving of conflict related to NWFP within the group.
- Exploring of the potential markets for their resources.
- Coordinate marketing of the NWFP and its product.
- Seek assistance from other organizations, sectors and agencies for development of management marketing of produces.
- Keep check and balance of the accumulate budget in their joint account.

12.2.2. Secretary

- Secretary shall officiate chairperson in his absence.
- Issuance of permit for the group members.
- Collect fines and membership fees and handing over to the treasurer.
- Implementation of by-laws.
- Preparing of work plan and submission of progress report.
- Taking of attendance during and the meeting and during the group activities.

12.2.3. Treasurer

- Maintaining of financial records of the group.
- Deposition of collected fund to the group account.
- Keeping records of fund raised and expenditure statement.
- Deposition of collected fund within one month time.

12.2.4. Members

- Protecting and managing of the NWFP within the demarcated area.
- Participation in meeting and in activities when committee members initiate.
- Inform the executive members if any outsiders collect NWFP from their demarcated area.
- Apply and obtain permit for the collection of NWFP.
- Inform executive member if anyone collect NWFP without the valid permit.
- Giving support to the executive members for successful group.

13. Fund Raising

The NWFP Management Group will be raising fund from the following sources:

- Through collection of membership fee.
- Through the sale of NWFPs.

NWFP MANAGEMENT PLAN

- Through fines and penalties from illegal activities
- Collection of revenue from absentees from works and meetings.
- Through interest of the loans.

14. Fund Management and Utilization

- The common fund shall be deposited in the NWFP Group account maintained with the nearest Financial Institution.
- Within this plan period, the incentives for member involved in deposition and withdrawal of fund shall not be paid.
- The group have to maintain a minimum of Nu. 50,000/- in the saving bank account.
- Any person wishing to borrow money from the group must put up an application to the executive members and decision would be taken in general assembly.
- When they give loan to the members the interest rate will be based on financial institutions.
- Loans will be disbursed when accumulated fund is more than Nu.50,000/-.
- If any individual fails to repay loan on time, executives will submit the letter to Geog and Forest Officials for settlements.
- Funds will be utilized when there is any common contribution to be made.
- It will be used for refreshment during the meeting and during the course of initiating activities.

15. Benefit Sharing

All the members of Dangchu Chigthuen NWFP management group have the right to get equal share of benefit and they need to contribute the equal shares as well. The NWFP Group members also need to contribute equal labour force and other contributions for the development of NWFP Group. The followings are some of the strategies for benefit sharing:

- Executive member will not claim for any benefits in the first five-year plan.
- The NWFP group shall provide help and support the needy individuals after discussing in the meeting.
- A reward of 25% of the total fine imposed shall be provided to any individuals from the group reporting an illegal case.
- Loans shall be distributed to the genuine ones if there are many applicants.
- If the NWFP resource collected is limited, it will be distributed among the members for own consumption on need basis.
- Otherwise, resources will be equally distributed and shall be given equal opportunity for NWFP marketing.

NWFP MANAGEMENT PLAN

16. Meetings

- The NWFP management group decided to have meeting twice in a year (1st January and 1st July).
- But any meeting shall be conducted as and when required.
- Any decision in the meeting can be decided by the majority.
- The information for meeting shall be shared to the member two days before.

17. Authority of the Group Members

- The members can propose for meeting to make decision to accept the new membership.
- The group members shall decide on the resignation of committee members.
- Members will decide on benefit sharing among the group.
- They shall be empowered to terminate executive members if they do not function well and nomination of new executive members through voting.
- Sustainable utilization and management of the NWFP resource.
- Protection of the resources and penalizing of the offenders.

18. Conflict Management

- If there is any conflict among the members regarding the NWFP management, executive members shall solve the problem.
- If the degree of the conflict is high, matters will be forwarded to nearest forest office and if not solved further forwarded to Geog Administration.
- If the problem arises between group and other communities, the matter shall be forwarded to Geog Tshogdu for settlement and to Dzongkhag Court if the matter is left unsolved by Geog Tshogdu.

19. Fines and Penalties

- Any members fail to attend the meeting shall pay Nu.500/- (Five Hundred) as a penalty for absentees.
- Fail to attend the work have to pay Nu. 650/- (Six Hundred Fifty).
- If any member collects bamboo without permit shall pay Nu1000/- (One Thousand) per head load as fine and product will be released.
- Any member collect *Paris polyphylla* without the valid permit shall have to pay fine of Nu. 1000/- (One Thousand) per kg and the products will be seized. The seized product will be sold by the committee members and amount will be deposited in their group account.
- Collecting of Churu without permit shall have to pay fine of Nu.500/- (Five Hundred) per kg and the product will be released.
- **For the outsiders:** If they are guilty of collecting one head load of bamboo, they have to pay fine of Nu.3000/- (Three Thousand) and the product will be released.

NWFP MANAGEMENT PLAN

- Illegal collection of *Paris polyphylla*, they have pay fine of Nu.3000/- (Three Thousand) per kg and the product will be seized.
- Illegal collection of Churu, they have to pay fine of Nu.1500/- (One Thousand Five Hundred) per kg and product will be released.
- All seized products will be marketed by committee members and deposit the fund to group account.
- If the Executive Members misuse the common fund, he/she shall repay the misused fund with the existing bank interest for one year and resign.

20. Power of Department

Notwithstanding the power of the NWFPs group, the Department is empowered to take action with regards to group, as in any other foresee of Bhutan.

1. Take action against violation of the Acts, Rules or management plan, regardless of whether requested by executive members or not.
2. Take action against violation of within NWFPs Group when requested to do by the executive members
3. Inspect, monitor, review the record and otherwise supervise the activities of NWFPs group.
4. Establish record keeping and financial reporting obligation.
5. Provide support while preparing annual work plan.
6. Provide support in compounding the offences.
7. Inspection of the forest product utilization and movement of the produces.
8. Monitor the activities implemented in NWFPs group areas.
9. Technical inputs in NWFPs group activities
10. Collect annual progress report and work plan for onward submission to DoFPS
