

SEPHU NWFP MANAGEMENT PLAN

SEPHU GEOG, WANGDUEPHODRANG
2024-2033 (10years)
(1st Revision)

NWFP MANAGEMENT PLAN

Executive summary

*In 2018 NWFP management group has been formed involving three chiwogs of Rukubji, Bumilo and Longtey. The group was not functional in the plan period; however, member of the NWFP group would like to retain the management plan looking into future benefits. The list of NWFP such as bamboo (*Borinda grossa*), Jilnamcho Nap (*Auricularia polytricha*) and Churu (Algae) has been listed in the management plan for sustainable management.*

*Bamboo has been the most used NWFP for the management group but then after the gregarious flowering & consequent mass death of the bamboo in the locality they had limited usage of NWFP. Other listed NWFPs were collected seasonally and in lesser quantity. The NWFP Management Group was formed to prevent illegal collection of NWFP from their locality by the outsiders. The group members expressed their interest in retaining the NWFP management group since the bamboo in their locality is reviving. The NWFPs which has economic value in the market such as *Paris polyphylla* were almost exhausted in the locality due to unsustainable collection. Due to limited resources in the locality and as they failed to implement the plan, Forestry officials at the site proposed for the cancellation of the management plan. However, the member of the NWFP Management Group proposed to retain and review the management plan looking at the future benefits.*

NWFP management group formation could enhance the socio-economic development of community and it would also give an easy access to the resources. If the group is properly managed, the resources will be sustainably utilized and will also be preventing the extinction of the species from the locality. The management of the resources by group could make the resources sustainable and available for the future generations.

NOTESHEET

Subject: Approval of Sephu NWFP Management and Marketing Plan

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. To ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group.

Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area. In accordance with the provisions of Forest and Nature Conservation Act and Rules 2023, the Forest Resource Planning and Management Division reviewed the management plan submitted by the field office.

Therefore, as per Chapter 7, Section 143 of the Forest and Nature Conservation Act of Bhutan 2023, the Non-Wood Forest Product Management and Marketing Plan shall be approved by the Department.

NWFP MANAGEMENT PLAN

Part A: NWFP marketing and management plan

1. Introduction

The Sephu Gewog Administration is located along the Wangdue-Trongsa highway. The Gewog administration consist of 354 households with five chiwogs. The non-wood forest management and marketing group is formed with 151 interested households of Rukubji, Bumilo and Longtey Chiwogs for managing an area of 3850 hectares which was demarcated as per their traditional rights. The area is located at 120km from Wangdue Dzongkhag and 25km from Nobding Forest Range Office. It is situated at an altitude ranging from 2995-3198masl.

The livelihood of the community depends on rearing livestock and collection of *Cordyceps*. The community cultivate potatoes and cabbages as the main cash crop for sale and they also do off-farm activities to earn and sustain their families. In the past, the people also depended on collecting and producing bamboo products to earn income for their family since the bamboo resources were abundantly found growing in their locality. The activity was greatly affected by the gregarious flowering phenomenon observed in bamboo species causing the massive death of bamboo resources in their locality. The people have been compelled to continue with their off-farm activities to earn income and sustain their living.

Initially when the NWFP group was formed, a total of 186 households were involved managing the non-wood forest resources but now with revision of the plan, the number of interested households have reduced to 151.

In 2018 Social Forestry Division, Thimphu, initiated the formation of NWFP management group in coordination with the Forest Divisional Office, Wangdue. The implementation of the activities in the management plan failed due to lack of coordination amongst the members. After having informed on content of the management plan, the members have decided to review the management plan considering its future benefits. The NWFP management plan has been reviewed by Nobding Forest Range Office in consultation with the Forest Resource Planning & Management Section, Wangdue Forest Division.

2. Legal Status of NWFP and Legal Rights of the NWFP Group Members

NWFP boundary mapping has been done based on the traditional right of the Chiwogs involved in the group. The Community Forests & private registered land in the Gewog were all excluded from the NWFP management boundary.

The members have the right over the area for collection of the NWFPs mentioned in the management plan only as per the management prescription prescribed in the plan. They have the full right over the area for protecting and managing of the NWFP within the demarcated areas.

NWFP MANAGEMENT PLAN

After the approval of the management plan, the listed NWFP shall be utilized by the members upon issuance of necessary permits as per the process mentioned in the by-laws. However, the technical backstopping of sustainable harvesting guidelines will be disseminated by the forestry officials of Nobding Range and the management plan shall be reviewed in every ten years.

3. Management Objectives

The objectives of NWFP group are as follows:

- ❖ Harvesting and utilization of NWFP in a sustainable way
- ❖ To generate income through marketing of NWFP
- ❖ To minimize the illegal harvesting of NWFP and to ensure sustainable utilization of resources.

4. Description of NWFP

The NWFP listed below were the available NWFP within Sephu Gewog boundary.

Table 1. Description of non-wood forest products

Sl.No	NWFP species	Description
1	<i>Paris polyphylla</i> (Thoksampa, Satuwa)	It is a rhizomatic perennial plant reaching a height of 1m. It has spider-like flowers with long, thread-like, yellowish green petals, which are followed by small, scarlet berries in autumn. Satuwa grows best in broad-leaved forests, bamboo forests, thickets, grassy or rocky slopes and stream sides at altitudes from 100 m up to 3500 masl. It can grow in full or semi -shade but requires moist soil. Each year, plant parts above ground die off and regenerate in spring, flowers in April / May and die off again in October/ November. In November, new buds are being formed from the rhizome, which remain dormant underground until next germination period.
2	<i>Borinda grossa</i> (bamboo)	The largest bamboo found in the higher altitude scientifically known as <i>Borinda grossa</i> is also found in Dangchu Gewog under Wangdue Dzongkhag. As per the guideline, it is normally found in the altitude range of 1800 to 3200 meter which can attend the height up to 10 meters with 4.5 centimeter in girth. However, bamboo in the management area of Dangchu is found in between the altitude range of 2000-3000 meter. It is preferably well grown in the fertile and humid conditions associated with the Hemlock (<i>Tsuga dumosa</i>) of mixed temperate forest.
3	Algae (churu)	The algae or churu is a type of aquatic sea weed like plant that is usually found growing along the water bodies. The species is widely used in Bhutanese cuisine as churu.

NWFP MANAGEMENT PLAN

4	<i>Auricularia polytricha</i> (Jilinamcho Nap)	It is commonly known as wood ear mushroom. Jelly fungus/jelly ear is gregarious in nature. Usually, it grows as a weak parasite to saprophyte. It occurs in clusters growing on tree trunk and dead branches. The general habitat for <i>A. polytricha</i> is moist-deciduous to wet evergreen forests. It is edible; however, it is not found abundant in the locality. It has the medicinal values and study have proven that it might contribute a beneficial effect on postprandial levels of blood sugar.
---	---	--

Table 2. Detail information on NWFPs

Sl. No	NWFP name	Collection area	Parts harvested	Use purpose (traditional & others)	Harvesting season (months)	Estimated quantity that can be collected
1	Kewa Dochu (<i>Paris polyhylla</i>)	Thowla, Tongchila, Palichu, Powtseri	Tuber	Medicinal purposes	December to January	500 kg
2	Bamboo (<i>Borinda grossa</i>)	Thowla, Pelela Juk, Tongchila, Palichu wog.	Whole stem	For making bamboo mat and other bamboo products.	Whole year	1000 bundles
3	Churu (<i>Algae</i>)	Along Chazam chu river.	Whole vegetative parts	Consume as vegetable and sell to local people.	December to March	50 kgs
4	Jili namcho Nap (<i>Auricularia polytricha</i>)	Khomagang areas, Zungkhetse	Whole fungal parts	Consume and market it for other countries	August to October	30kgs

5. Harvesting prescription for sustainable harvesting

The groups have identified the collection area for each of the non-wood forest products. For sustainable harvesting and management of the identified resources, the framework for management and marketing of the NWFPs was referred and accordingly prescribed the harvesting prescriptions for the sustainable harvesting of each non-wood forest products. The NWFP collectors are informed and trained on the basic harvesting prescriptions that needs to be kept in mind while harvesting the resources from the forest. It is the responsibility of the field offices to train and impart the knowledge on harvesting prescriptions to the people before the start of the collection time. The sustainable harvesting prescriptions for each NWFPs are reflected below:

NWFP MANAGEMENT PLAN

Table 3. Harvesting prescriptions for sustainable harvesting of NWFPs

Sl. No	NWFP species	Harvesting prescription for sustainable harvesting
1	Kewa Dochu (<i>Paris polyohylla</i>)	✓ Harvest only bigger and matured ones. ✓ Do not uproot all in the same location and must retain 40% ✓ Do not damage the tender growing stock while collecting. ✓ Harvesting shall be done from four identified areas in rotational basis to ensure the sustainable harvesting of the resources.
2	Bamboo (<i>Borinda grossa</i>)	✓ Harvesting of young shoot is prohibited and only the mature stems shall be allowed to harvest. ✓ Only 50% of the bamboo shall be allowed to harvest from a clump. ✓ Collection of Bamboo should be in rotation basis yearly from different areas within the demarcated boundary of NWFP collection area. ✓ Harvesting shall be allowed from the mature stands from three locations of Rukubji-top, Longmey-top and Longtey-top. Harvesting of resources shall be done starting with Rukubji-top area in the first year followed by Longmey-top and Longtey-top in the second and third year. The harvesting shall be done on a rotational basis every three years.
3	Churu (<i>Algae</i>)	✓ Committee member shall ensure and inform on the collection area. ✓ Collection in same area is not allowed. ✓ Collection should be on rotational basis seasonally. ✓ The location of the collection areas shall be identified by the NWFP committee members during the collection season by the members. They should ensure that the different area is allotted for each collection season.
4	Jili Namcho Nap (<i>Auricularia polytricha</i>)	✓ Collection from same area throughout the year is not allowed. ✓ Mushroom should be collected without damaging the host plant. ✓ The host plant should be managed by the NWFP group members. ✓ Only two months shall be allowed for collection of mushrooms during the season to ensure sustainable harvesting.

6. Marketing and sales plan

The marketing and sale of collected non-wood forest products will be done as per the plan. The members shall sale their products in the local market, nearby district markets, national market and to the international market. The members face challenges in terms of marketing their products and ends up selling to the middleman fetching them lower rates.

NWFP MANAGEMENT PLAN

The table below shows the total quantity of each non-wood forest products to be collected by the group every year and the expected market price for the products. The total income generated by the group may differ since the quantity that can be harvested may keep on change. The members of the groups agree that 1% of their income generated through sale of NWFPs shall be deposited as a compensation fee to the executive members for marketing of their products.

Table 4. Marketing and sales plan for NWFPs

NWFP	Potential market	Estimated quantity for sale per season (Unit)	Expected price per unit	Total (Nu)
Kewa Dochu (<i>Paris polyhylla</i>)	Potential marketing agencies.	250kg	7500/kg	1,875,000
Bamboo (<i>Borinda grossa</i>)	Other chiwogs of Wangdue Dzongkhag.	500 head loads & 650 products	80/head load 250/piece average	40,000
Churu (<i>Algae</i>)	Wangdue, Punakha & Thimphu.	150 pieces	60/piece	9000
Jilnamcho Nap (<i>Auricularia polytricha</i>)	Business men/middle man	25kg	15000/kg	375,000

7. Marketing arrangement

When the group needs to market the product, the executive members shall explore for the market consulting relevant stakeholders for their guidance. The product shall be marketed at the rate of existing market value.

- ✓ Until they find the potential buyers or market, they must keep their collected NWFP or the product with them for safe store.
- ✓ If the produce collected were more than the demand, executive members should ensure that the equal quantity of produce is taken from every member who collected the produce.
- ✓ The NWFP collection permit will be thoroughly checked when executive members collect the product for marketing.
- ✓ Members who couldn't produce permit will be withheld until they solved the case.
- ✓ The NWFP or the product will be marketed by the executive members in the name of Sephu NWFP management group.

NWFP MANAGEMENT PLAN

Table 5. Royalty rate for the listed NWFPs

Sl. No	Product name	Quantity	Royalty
1.	Bamboo (<i>Borinda grossa</i>)	1 head load	150
2.	<i>Paris polyphylla</i>	1 day	350
3.	Churu (Algae)	1 day	100
4.	Jilnamcho Nap (<i>Auricularia polytricha</i>)	1 day	500

8. Benefit to the members

The formation of non-wood forest management group aims at conserving and managing the resources for perpetuity. The communities will build a sense of ownership over the resources and the area so that they will protect, conserve, and sustainably manage the resources found available in their locality. Through the formation of NWFP management group, they will protect the resources from rampant collection and over exploitation. They can protect the resources from collections by outsiders which can ensure the sustainable harvesting. Members will be benefiting with income generation and easy access to market on the name of Sephu NWFP group. All the members will be given the equal rights to collect the NWFP after availing of permit. The non-members of the group shall be allowed for collection of NWFPs for self-use and consumption but not for commercial purposes. They shall obtain permit for collection of the resources.

Table 6. Financial projection from the sale of NWFPs

NWFP MANAGEMENT PLAN

8.3. Map of the Tongzhuna Namrub NWFPs Group

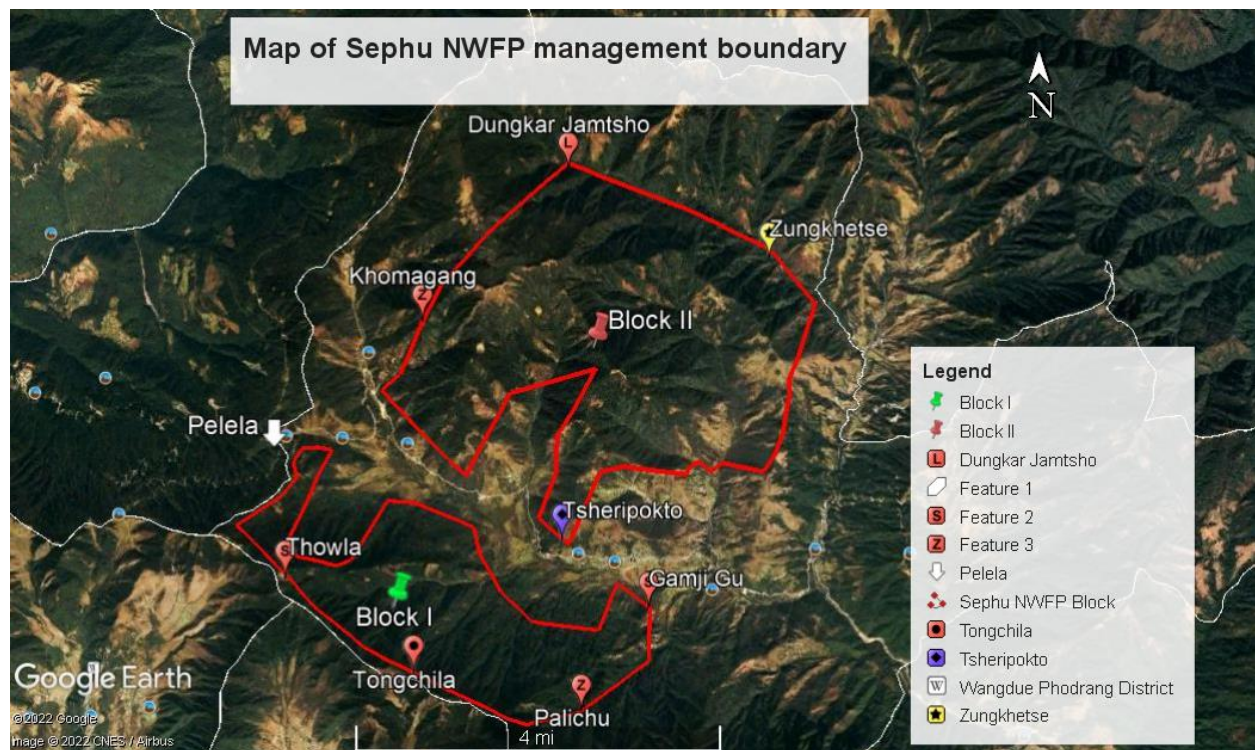

Figure 1. Google map showing the NWFP collection sites.

9. Monitoring, Review, Evaluation and Reporting

Executive members shall conduct monitoring and patrolling of the NWFP management area and submit the report to the concerned forest office for further submission. The technical back stopping shall be done by the nearest forest office based on their requirement. The forestry officials shall monitor over all management activities and ensure the sustainable utilization of the available resources. The annual report shall be prepared jointly with forestry officials and NWFP committee members.

The NWFP Management plan will be reviewed after every ten years as per the new rule to make necessary changes to the existing plan. During the review, any activities or work plans can be incorporated if it contributes to enhance the management of the resources. As per the Forest and Nature Conservation Code of Best Management Practices of Bhutan, three types of monitoring will be conducted to track then management plan. Annual monitoring will be conducted yearly by the field offices, and submit the report on the status of plan, quantity of NWFPs collected by each household and income generated through sale of NWFPs. The midterm review will be done

NWFP MANAGEMENT PLAN

during the 5th year to evaluate the status of the activities planned and implemented in the last five years. The team shall evaluate and suggest correction measures if there is any violation of rules by members. The final evaluation will be done during the 10th year of the plan. The final monitoring and evaluation shall recommend the field office and the group members if the plan can be extended for next 10 years. All the monitoring and evaluation report shall be submitted to respective functional division. Apart from the Department monitoring and evaluation, group members can also conduct the regular monitoring of the NWFP areas and submit the report to respective offices.

Section 2: Management Plan By-Laws

2.1. Membership Arrangements (Eligibility Criteria)

Sephu Shingmen (NWFP) management group consist of 151 members who are the native of Sephu Gewog with proper Gung and Thram excluding two Chiwogs i.e. Nakha and Busa Chiwogs which falls under WCNP park area.

NWFP management group includes three chiwogs namely Rukubji, Bumilo and Longtey chiwogs, from which only the interested households have been included in Sephu NWFP Management group.

The members in the group have to contribute a sum of Nu.50/- as the membership fee annually.

Any household interested to join as a member should have to pay the individual share of accumulated amount to group to become a member.

Any member wishing to resign from membership due to genuine reason shall be allowed to resign with 80% share from the accumulated amount and 20% shall be kept in the joint group account.

Any member resigning with losing of interest to be the member will get 50% of the accumulated fund from the group and 50% will be retained in the joint group account.

The resigned members shall not be allowed to rejoin as a member in the same plan period, however if they are interested to rejoin as a member, they may rejoin the group by paying the share of accumulated amount during the plan review period.

NWFP MANAGEMENT PLAN

2.2. Executive Committee

Executive members were elected by hand raising for the selected individuals and they were elected based on the number of votes they acquired. The plan period is for 10 years, and the NWFP management group member decided to fix the tenure of committee members to 3 years. However, they can resign voluntarily or be terminated before the completion of their terms if their performances are not satisfactory. The election of the committee members shall be organised if it is required to re-elect the committee members. If any of the committee members would like to resign, they have to put up the application to nearest forest office. The forest office will instruct rest of the committee members to organise meeting for re-election of the committee members.

Table 7: Details of the Executive Members

Sl.No	Name	Responsibility	Terms	Contact No
1	Gyem Tshering	Chairperson	2.5 years	77637541
2	Sangay Thinley	Secretary	2.5 years	77397556
3	Rinchen Wangmo	Secretary	2.5 years	17693979

2.3. Roles and Responsibilities of NWFP management group

2.3.1. Chairperson

- Chairing of meeting with the group as and when required.
- Solving conflicts related to NWFP group within the group members.
- Exploring potential markets for their resources.
- Coordinate the marketing of the NWFP resources.
- Seek assistance from other organizations, sectors, and agencies for development of management group.
- Keep check and balance of the accumulated budget in their joint account.

2.3.2. Secretary

- Secretary shall officiate Chairperson in his absence.
- Issuance of permit for the group members.
- Collect fines and membership fees and handing over to the treasurer.
- Implementation of group by-laws.
- Preparing of work plan and submission of progress report.
- Taking attendance during and the meeting and during the group activities.

2.3.3. Treasurer

- Maintaining financial records of the group.
- Depositing collected fund to the group account.
- Keeping records of the source of fund and expenditure statement.
- Deposition of collected fund within one month time.

NWFP MANAGEMENT PLAN

2.3.4. Members

- Protecting and managing of the NWFP within the demarcated area.
- Participation in meeting and in activities initiated by committee members.
- Inform the executive members if any outsiders collect NWFP from their demarcated area without obtaining permit.
- Apply and obtain permit for the collection of NWFP.
- Inform executive member if anyone collect NWFP without a valid permit.
- Giving support to the executive members for successful group management.

2.4. Marketing

For marketing of the NWFP resources:

- The executive members shall explore for the market with guidance from the relevant stake holders. The product will be marketed at the rate of existing market value.
- Till they find the potential buyers or market, they have to keep the collected NWFP or the product with them for safe store.
- If the produce collected is more than the demand, executive members should ensure that the equal amount of produce is taken from every member who have collected and stored.
- The NWFP collection permit will be thoroughly checked when executive members collect the product for marketing.
- Member who fails to produce permit will be withheld until the case is resolved.
- The NWFP or the product will be marketed by the executive members in the name of Sephu NWFP management group.

2.5. Royalty for listed product

Sl. No	Product name	Period	Quantity	Royalty
1.	Bamboo (<i>Borinda grossa</i>)	September, October, November, February, March	1 head load	150/-
2.	Kewa Dochu (<i>Paris polyphylla</i>)	May, June, July & August	1kg	350/-
3.	Churu (<i>Algae</i>)	October, November, December, February	1 kg	100/-
4	Jilinamchu nap (<i>Auricularia polytricha</i>)	April, May & June	1kg	500/-

2.6. Fund Raising

The NWFP Management Group will be raising fund from the following sources:

- Collection of membership fees.
- Selling NWFPs or its product.
- Imposing fines and penalties for illegal activities.
- Collection of revenue from absentees from the works and meetings.
- From the interest of the loans availed to the members.

NWFP MANAGEMENT PLAN

2.7. Fund Management and Utilization

- Any revenue generated from NWFP management group shall be deposited in the NWFP Group account maintained with the nearest Financial Institution.
- Any committee member shall be paid Nu. 1000 per day when he/she attends program/activities in regards to NWFP management group where it includes expenses.
- The group must keep a minimum saving of Nu.50,000/- in their group account.
- Any person wishing to borrow money from the group must put up an application to the executive members and decision would be taken in general meeting.
- When they give loan to the members the interest rate will be based on financial institutions.
- Loans will be disbursed when accumulated fund is more than Nu.50,000/-.
- If any individual fails to repay loan on time, executives have to submit the letter to nearest Forest Office for case settlements.
- Funds will be utilized when there is any common contribution to be made in their locality.
- The funds shall be used for refreshment during the meeting and during the course of initiating activities.
- If the Executive Members misuse the common fund, he/she shall repay the misused fund with the existing bank interest and he/she should resign from the post.

2.8. Benefit Sharing

The NWFP management group members have the right to get equal share of benefit and they need to contribute the equal shares as well. The NWFP Group members also need to contribute equal labour force and other contributions for the management of NWFP Group. The followings are some of the strategies for benefit sharing:

- Group shall look into the needy individuals in the group and for any kind of resource allocation and can be decided in the general meeting.
- Any individuals from the group who report for the illegal case can be rewarded with 25% from the total fine imposed to encourage protection of the resources.
- Loan application shall be approved based on genuineness.
- If the NWFP resource is limited, it will be distributed on need basis if it is for home consumption.
- Otherwise, resources will be equally distributed and shall be given equal opportunity for NWFP marketing.
- For the bulk marketing, committee member shall take responsibility for marketing of the product.

2.9. Meetings

- The NWFP management group decided to have meeting once in a year (9th month of Bhutanese calendar).
- Other meetings shall be conducted as and when required on need basis.
- Any decision shall be decided upon the majority of the vote.

NWFP MANAGEMENT PLAN

- Information for meeting shall be shared among the members 3 days ahead of the meeting.

2.10 Authority of the Group Members

- Inclusion of new member shall be based on majority acceptance.
- NWFP group members shall decide on the resignation of committee members by conducting meeting.
- Benefit sharing of scarce resource shall be decided by conducting meeting.
- Group members shall be empowered to terminate executive members if they do not function well and nomination of new executive members through voting.
- Sustainable utilization of the NWFP resource and management of the resources.
- Protection of the resources and reporting offenders to the executive members.

2.11. Conflict Management

- Conflict among the members related to NWFP management, executive members shall resolve the conflict.
- If the degree of the conflict is high, matters will be forwarded to nearest forest office and if not resolved forward to Gewog Administration and ultimately to the court for severe cases.
- If the problem arises between group and other communities, the matter shall be forwarded to Gewog Tshogdu for settlement and matter shall be further forwarded to Dzongkhag Court if matter could not be resolved by Gewog Tshogdu.

2.12. Fines and Penalties

- If any members fail to attend the meeting shall pay the Nu.300/- (Three Hundred) as a penalty for absentees.
- If any member fails to attend the work have to pay Nu. 500/- (Five Hundred).
- If any member collects bamboo without permit have to pay Nu1000/- (One Thousand) per head load as fine and product will be released.
- Any member found collecting *Paris polyphylla* without the permit have to pay fine of Nu. 1000/- (One Thousand) per kg and the products will be seized. The seized product will be marketed by the committee members and received amount will be deposited in their group account.
- Any member found collecting *Algae* without permit will have to pay fine of Nu.500/- (Five Hundred) per kg and the product will be released.
- Illegal collection of Jilinamcho Nap (*Auricularia polytricha*) by the members will be imposed a fine of Nu.1000/ (One Thousand) and product will be seized. The seized product will be marketed by the committee members and the amount shall be deposited to the group account.

For the outsiders:

- If the person who is not a member is guilty of collecting one head load of bamboo, they must pay fine of Nu.3000/- (Three Thousand) and the product will be released.
- Illegal collection of *Paris polyphylla*, they must pay fine of Nu.3000/- (Three Thousand) per kg and the product will be seized.

NWFP MANAGEMENT PLAN

- Illegal collection of Algae, they must pay fine of Nu.1000/- (One Thousand) per kg and product will be released.
- Illegal collection of Jilnamcho Nap (*Auricularia polytricha*), offender should pay fine of Nu.3000/- and the product will be seized.
- The entire seized product shall be marketed by the committee members in presence of few members from the group.

2.13. Power of Department

Notwithstanding the power of the NWFPs group, the Department is empowered to act with regards to group.

- Take action against violation of the Acts, Rules or management plan, regardless of whether requested by executive members or not.
- Take action against violation of within NWFPs Group when requested to do by the executive members
- Inspect, monitor, review the record and otherwise supervise the activities of NWFPs group.
- Establish record keeping and financial reporting obligation.
- Provide support while preparing annual work plan.
- Provide support in compounding the offences.
- Inspection of the forest product utilization and movement of the produces.
- Monitor the activities implemented in NWFPs group areas.
- Technical inputs in NWFPs group activities.
- Collect annual progress report and work plan for onward submission to DoFPS.

NWFP MANAGEMENT PLAN
