**Part A: NWFP Management and Marketing Plan**

**1. Background**

Goling Jamphel Thoenkhung Tshogpa is administered by 65 households in the Goling Chiwog, situated within Nangkor Gewog, Zhemgang. The community has access to basic amenities like Out Reach Clinic (ORC), electricity, water supply, motorable road and telecommunication network. Goling Chiwog is situated at an elevation ranging from 500-1200masl. The community engages in small-scale agricultural activities and derives its income from the sale of agriculture and livestock surplus product. The community also depends on natural resources such as Non-wood Forest Product (NWFP) for additional income generation.

This is the 2nd reviewed management plan and the previous plan had expired in September, 2022. Before reviewing the management plan, a comprehensive consultation meeting with the management group members was conducted to understand the reason for shortcomings and to assess their interest in continuing further management. Goling Jamphel Thoenkhung Tshogpa demonstrates a keen awareness of resources management, employing sustainable practices and adeptly identifying promising opportunities for development. Through shared knowledge and collective strength, the group has embraced a community-driven approach to sustainable resources utilization. This united effort holds the potentials to unlock economic opportunities, improve resources management and establish a supportive network, empowering each member for a better and resilient future. Having captured their interest in continued management of NWFPs, Divisional Forest Office (DFO), Zhemgang provided technical support to the group in resource assessment and preparation of management plan.

Unlike previous management plan, the group will be managing only one block. The group decided to exclude other two blocks because of accessibility issue. The current management area is called Moidang and the block will be managed for Pipla (locally known as Ragtang). The demarcated NWFP management area with an area of 299.40 acres has gentle slope and it is enveloped by warm broadleaf forest predominantly characterized by *Castanopsis* sp., *Ostodes paniculata* and *Schima wallichii*.

**2. Goals and objectives:**

- To ensure sustainable harvesting of *Piper mullesua* to preserve biodiversity and ecosystem health.
- To empower local communities through fostering collaboration and shared knowledge to improve resources management.
- To facilitate economic growth by tapping into the economic potential of NWFP, creating income-generating opportunities for the members.

**3. Description of NWFPs present in the demarcated area for management.**

The management area has various non-wood forest produce species viz. *Piper mullesua*, *Dendrocalamus hamiltonii*, *Diplazium esculentum*, *Rubia cordifolia*, *Elatostema lineolatum* and *Entada rheedii*. Moidang block with the primary resource being *Piper mullesua*, the species has been identified for management by the group. Each year, every household collects around 13 kilograms of dry *Piper mullesua* for marketing with local traders.

**Pipla/Ragtang (*Piper mullesua*):**

It is a perennial plant growing up to 1 to 2 meter in height and has a thick greenish leave. The plan has a unisexual reproduction unit with male and female plants and only few plants bear fruits. Pipla grows widely under the canopy of broadleaf forest or open area at an altitude range of 200-2200 masl. The plants thrive best in damp and moist soil with good shade. Its fruit start ripening in September.

#### 4. Prescriptions for sustainable harvesting

The Goling Jamphel Thoenkhung Tshogpa is concentrating primarily on management and collection of *Piper mullesua* resources within the demarcated Moidang block. Therefore, the group members have to adhere to specific procedure for the sustainable management of resources.

- The Chairperson will consult with forest office and obtain permit for collection during the onset of harvesting season.
- The Chairperson will announce starting date for harvesting only after obtaining required permits from forest office.
- Only one member from each household will be entitled for collection of NWFP products.
- Collection will be done within the demarcated area only.
- Harvesting prescriptions will be strictly followed by the collectors (Table 2).
- The collectors will declare their harvest to the Chairperson for record keeping, right after collection (fresh) and after post-processing (dry).
- The Chairperson will maintain proper record of harvest and sale of NWFPs for monitoring and evaluation.

Table 2. Prescriptions for sustainable harvesting

| <i>NWFP Species</i>                             | <i>Harvesting prescription</i>                                                                                                                                                                                                                                                                                       |

| <i>Piper mullesua</i><br>(Pipla/<br>Ragtang_Kh) | <ul style="list-style-type: none"> <li>Collect fruits only when fully mature.</li> <li>Harvest fruits only after the announced starting date for harvesting that are usually in September-November.</li> <li>Harvest fruits only by hand picking without damaging, cutting or uprooting the entire plant.</li> </ul> |

#### 5. Location sketch map of the NWFP harvesting areas

| Sl.no | Location | NWFP                            | Area (ac) | Distance from the center (Village) |
|-------|----------|---------------------------------|-----------|------------------------------------|
| 1     | Moidang  | <i>Piper mullesua</i> (Ragtang) | 299.40    | 1hr                                |

#### 6. Marketing and sales plan

The formation of Goling Jamphel Thoenkhung Tshogpa is primarily aimed at conservation and sustainable utilization of *Piper mullesua* resources. During the Participatory Rural Appraisal (PRA), group members formulated innovative marketing strategies. Throughout the tenure of the management plan, they plan to explore and implement these strategies particularly focusing on expanding their marketing efforts through social media.

**Figure 1.** Map of NWFP management area

**Table 3.** Marketing and sales plan

| NWFP                  | Potential market                          | Estimated quantity for sale per season (unit) | Form of Products (dry/fresh) | Expected price/unit (Nu.) | Total (Nu.) |
|-----------------------|-------------------------------------------|-----------------------------------------------|------------------------------|---------------------------|-------------|
| <i>Piper mullesua</i> | India, KNC, local traders and Sowai Rigpa | 800kg                                         | 800kg                        | 150                       | 120,000     |

**7. Marketing arrangement**

The marketing arrangements for Non-Wood Forest Products (NWFP) involves following strategies to promote sustainable utilization of the resources.

**Table 4.** Procedures for NWFP harvesting, marketing and sharing of income

| Activity               | Brief description of how the activities are carried out                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

### 8. Benefit to the members

The Non-wood Forest products (NWFP) group provides its members with a platform to explore and capitalize on the diverse array of resources derived from forests beyond timber. Members benefit from knowledge exchange on sustainable harvesting practices, innovative uses of non-wood products and market opportunities.

The members of the NWFP management group will be allowed to participate for annual collection of the NWFPs found available in their demarcated area. One member from each household shall be allowed for collection of the *Piper mullesua* and drying will be done individually. The auction committee members shall then sale the NWFPs. The income generated per member through the sale of NWFPs will support their family’s livelihood improvement.

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability.

**Table 5.** Financial projection and benefits to the members from NWFP sales
