NOTESHEET

Subject: Approval of NWFP Management Plans

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. In order to ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group. Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area. As such the Forest Resource Planning and Management Division had received and reviewed the following plans submitted and hereby submitted to seek approval:

1. Longkhar NWFP Management & Marketing Group, Bumdeling Gewog, Tashi Yangtse
2. Ratey Pani Soft Broom Management and Marketing Group, Gakidling Gewog, Sarpang
3. Thongjaze Yargay Pakshing Tshogpa, Sompangkha Gewog, Sarpang
4. Pema Yoezerling Bamboo Management and Marketing Group, Serzhong, Sarpang
5. Thuendrel NWFP Management and Marketing Group, Jigmetcholing Gewog, Sarpang
6. Dungmanma Shingmei Gaki Pelzom Tshogpa, Lauri Gewog, Sandrup Jongkhar
7. Baytseling Shingmei Yargay Gongphel Tshogpa, Lauri Gewog, Sandrup Jongkhar
8. Dangchu NWFP Marketing and Management Group, Dangchu Gewog, Wangdi Phodrang

As per the Forest and Nature Conservation Act of Bhutan, 1995, such plans are required to be approved by the head of the Ministry. Submitted for kind approval.

Part A: NWFP Marketing and Management Plan

1. Background

Beytseling Shingmein Yargay Gongphel Tshogpa marketing and management group belongs to Beytseling village, Lauri gewog administration under Jomotsangkha Drungkhag. The village lies at an altitude of 1400 m- 1740 metres above the sea level. The people of Beytseling village depends their livelihood on Agriculture by cultivating maize, buckwheat, potatoes and mustard. Maize is the staple crop of the village. The farmers also grow different green vegetables including green chillies, cabbage, spinach, broccoli, etc. Cereal crops are also grown by the villagers. The NWFP marketing and management group consists of thirteen members.

Different NWFPs, including *Rubia cordifolia*, *Pouzolzia sanguinea*, *Swertia chirayita*, *Illicium griffithii*, *Daphne bolua*, *Juglans regia*, *Elatosteme lineolatum*, *Diplazium esculentum*, *Girardinia diversifolia*, *Paris polyphylla*, *Chimonobambusa callosa*, *Borinda grosa*, mushroom, fern and etc., are found in the forest located nearby their settlement. Other NWFPs are yet to be explored for the benefit of the group or community.

There are five blocks identified as NWFP collection sites. The total area of NWFP block is 2507.34 hectares, equivalent to 6193.13 acres of State Reserved Forest (SRF). The altitude of collection sites lies within the range of 1423.111-2834.335 meters above the sea level. The collection areas are jointly shared with Beytseling village, as per their previous collection practices.

2. Review of the past management plan

The NWFP group members have been greatly benefited through the group formation. The right for collection and trading of NWFPs have supported their household income for meeting various expenditures at home, including the education of their children at school. The farm road connectivity in the village has further created a conducive environment for trading of NWFPs harvested. Prior to group formation, the livelihood and household income of people in the village was not stable economically. The group was established in 2011 and revised once in 2015.

The NWFP group members have sold 2567 kilograms of *Rubia cordifolia*, since the time of establishment earning a sum total of Nu.256300. They also sold 116 kgs of *Swertia chirayita*, earning Nu.9760. The total savings of the group in bank amounts to Nu. 25021(Twenty-five thousand and twenty-one).

The group savings of the NWFP members were not utilized for community contribution so far. However, group members are willing to support important community activities if required. The provisions for loan to NWFP members have been kept for solving the problems and urgent needs of money to NWFP members.

Due to the completion of the second term for NWFP group, the members would be restricted for collection and trading of NWFPs whereby affecting their income generation and livelihood of group members. Thus, the need for revision of the plan was crucial to support the livelihood of people living in the villages. The timeframe for the NWFP Management & Marketing plan is for a period of maximum 5 years. Hence, revision of the Beytseling Shingmein Yargay Gongphel Tshogpa has been initiated.

3. Objectives:

- i. Sustainable management and collection of NWFPs within the designated areas.
- ii. Livelihood improvement through income generation from sale of NWFPs.
- iii. Protection of collection areas from illegal activities.
- iv. Conservation of NWFPs through proper harvesting techniques.

4. Description of NWFPs

Table 1. Brief description of NWFPs for commercial harvesting

<i>NWFP name</i>	<i>Harvesting area(s) (name)</i>	<i>Parts harvested</i>	<i>Use purpose (traditional & others)</i>	<i>Harvesting season (months)</i>	<i>Estimated quantity that can be collected¹</i>
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	1.Menchawang- woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung- namlingchema	Entire plants	Dye, medicine	November - February	4000 kgs
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	1.Menchawang- woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4. Chumbabthung- namlingchema. 5.Lungkuthang	Bark	Incense	August – February	200kgs
<i>Elatosteme</i>	1.Menchawang- woongchiloo	Stem and	Edible	Any time	200 bundles

<i>lineolatum</i> (Drimmom)	2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema	leaves			
<i>Plectocomia himalayana</i> (Phashi-Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema	Young shoot as well as matured stem	Shoots edible, matured stand for baskets	Mature stems: November-March Shoots: April-August	200 nos
Mushroom	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema 5.Lungkuthang	Entire mushroom	Edible	July -October	80kgs
<i>Diplazium esculentum</i> (Dhawai-Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema 5.Lungkuthang	Young shoots	Edible	March - September	200 bundles
<i>Daphne bolua</i> (Shogushing-Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema	Bark	Paper	March-June	70 kgs
<i>Illicium griffithii</i> (Khaila chinang-Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema	Fruits	Medicine	October-December (or when fruits are matured)	200kgs
<i>Litsea cubeba</i> (Nenshing -Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema	Fruits	Essential oil, medicine	August (harvest fruits when it turns black)	30 kgs
<i>Girardina diversifolia</i>	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri	Fiber	Weaving	September-	15 kgs (dried)

(Zangroo-Sh)	3.Drachiluwabrang 4.Chumbabthung-namlingchema			October	
<i>Paris polyphylla</i> (Thoksampa-Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema	Rhizome	Medicine	October to November	3kgs
<i>Gultheria fragrantissima</i> (Sakchongma-Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema	Leaves and twigs	Essential oil	June to September	400 kgs
<i>Calamus acanthospathus</i> (Menji-Sh)	Chumbabthung-Namlingchema	cane	Handicraft	November to March	150 nos.
<i>Zanthoxylum armatum</i> (Ghee-Sh)	1.Menchawang-woongchiloo 2.Dhogsum-Nagchongri 3.Drachiluwabrang 4.Chumbabthung-namlingchema 5.Lungkuthang	Fruit	Essential oil, medicine, pickle & spice, water purifier	August to September	30 kgs
<i>Swertia chirayita</i> (Khalu-Sh)	Chumbabthung-namlingchema	Entire plant	Medicine	November to January	15 kgs

5. Harvesting prescriptions for sustainable NWFP harvesting

There are five collection sites identified for harvesting of *Rubia cordifolia*. The six identified sites, the members will collect from two harvesting sites per year on a rotational basis. Similarly, for the harvesting of *Daphne*, there are three identified sites for collection, and the NWFP members will collect the species on the rotational basis.

In this way, the harvesting of the species will be sustainably managed for this year and the first harvested area will be ready by the next plan revision.

Before collection of NWFPs, approval and collection permit should be obtained from Jomotshangkha Park Range Office. The following harvesting prescriptions provided in the table below shall be strictly followed by the members while collecting the NWFPs.

Table 2. Harvesting prescriptions for sustainable harvesting of NWFPs.

NWFP species	Harvesting prescriptions for sustainable harvesting
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	1. Use sharp sickle for the harvesting of the upper part of the plant. 2. Cut the plant at 5 cm above ground level. 3. Leave at least 10% of the plants without collecting or harvesting any raw materials from them. 4. Do not collect roots. 5. Do not uproot entire plants
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	1. Cut the plant at 10 cm above the ground level. 2. Do not damage the remaining young stands/ seedlings/ saplings. 3. Should not cut down surrounding trees to ease harvesting. 4. Leave at least 10% of the plants to allow natural regeneration. 5. Harvesting of roots is strictly prohibited for ecological reason
<i>Elatostema lineolatum</i> (Drimom-Sh)	1. Collect plants that are 15cm and above. 2. Retain stump of around 3” for sprouting of new shoots. 3. Don’t uproot whole plant. 4. Shouldn’t cut down trees and create more opening. 5. Shouldn’t disturb its catchment area.
<i>Plectocomia himalayana</i> (Phashi-Sh)	For mature stem: 1. Cut cane stem only when matured. 2. Pull down as much of the cane as possible (avoid leaving cane parts high up in the tree) 3. Cut only canes with a usable length of at least 10 m. 4. Harvest during winter as canes have a better quality during this season. 5. Replant the lateral shoots that are attached to harvested cane. For cane shoots 1. Cut young shoot by bending the cane stem with the help of a hook long and strong stick using sharp knife. 2. Do not cut tree climbed cane for shoot. 3. Care shall be taken to avoid damaging sucker buds.
Mush room	1. Do not use knife for harvesting mushrooms 2. Do not scratch or disturb the logs/soil while harvesting 3. Use bamboo baskets rather than plastic bags for collection and transportation of mushrooms.
<i>Diplazium esculentum</i> (Dhawai-Sh)	1. Harvests young shoot that are 15cm length. 2. Don’t harvest all shoot coming up in season. 3. Retain at least 50% of young shoot of last flush for the development of leaves. 4. Don’t harvest the shoots that have developed into leaves.
<i>Daphne bolua</i> (Shogushing-Sh)	1. Cut the plant at 10 cm above the ground level (the left stump will regenerate in the following growing season). 2. Cut only stems that are more than 3 cm in diameter. 3. Do not damage the remaining young stands, seedling and /or saplings

	4. Do not fell the surrounding trees in order to clear the area to ease harvesting Divide harvesting area into 5 blocks for Daphne. Harvesting is rotated over the 5 blocks so that harvesting takes place only in one block per year (Daphne takes 5 years to produce stems of more than 3 cm in diameter).
<i>Illicium griffithii</i> (Khaila chinang-Sh)	1. Hand pick fruits only when fallen on the ground, or 2. Use long bamboo poles to shake off fruits from the trees. 3. Don't cut tree or branches to collect fruits.
<i>Litsea cubeba</i> (Nenshing-Sh)	1. Harvest fruit by handpicking or by lightly lopping of outer branches. 2. Do not cut down the tree for harvesting of fruit
<i>Girardina diversifolia</i> (Zangroo-Sh)	1. Peel out fiber after cutting plant from base. 2. Harvest plant only after seed dispersal. 3. Do not collect all plants from one area.
<i>Paris polyphylla</i> (Thoksampa-Sh)	1. Do not harvest the plant before the seed dispersal 2. Harvest only after bud emerges from the rhizome which remain dormant underground 3. Leave some portion of the rhizome with bud underground while harvesting the rhizome of the plant.
<i>Gultheria fragrantissima</i> (Sakchongma-Sh)	1. Collect leaves by hand picking and twigs by using sharp sickle. 2. From single plant collect only 50% of leaves and twigs. 3. Do not uproot the entire plant.
<i>Calamus acanthospathus</i> (Menji-Sh)	1. Select cane which are more than 10 m for cutting. 2. Pull down the cane from tree top before cutting. 3. Once pulled down cut it from the base. 4. Do not damage young regeneration in process of pulling down. 5. Do not pull down or cut flowering cane stem.
<i>Zanthoxylum armatum</i> (Ghee-Sh)	1. Harvest fruit by handpicking, if possible, climbing on trees. 2. Use long bamboo poles with a hook to facilitate picking of the fruit. 3. Collect only 70% of the fruits and leave 30% to allow natural regeneration
<i>Swertia chirayita</i> (Khalu-Sh)	1. Collect the plant only after seed dispersal commenced. 2. Do not collect the plants late in the season (February) as there are high risk of damaging the germination of new seedlings

6. Location sketch map of Dungmanma and Beytseling NWFP Groups

9. Marketing arrangements

The harvesting of the NWFPs from the identified/designated sites is collection based on the basic harvesting guidelines and prescriptions. For the harvesting of the NWFPs, one member from each household is permitted and the collected products are gathered at a common place for further marketing through auction. The following procedures are followed for sale/marketing of the collected NWFPs.

9.1 Standard Operating Procedure (SOP) for Collection and Marketing of Non-Wood Forest Products (NWFPs)

9.1.1. Harvesting of NWFPs

- Chairperson of NWFP group shall obtain harvesting/collection permit from Range Office in writing
- After approval of the permit, Chairperson shall inform all members stating collection time
- NWFP members must follow collection/harvesting period timeline mentioned in the plan
- NWFP members must strictly follow the harvesting rules mentioned in the management plan
- Chairperson shall inform Range Office of the completion of harvest
- After harvesting, members should store NWFPs following recommended post-harvest practice

9.1.2. Marketing of NWFPs

- Chairperson and Range Office shall decide auction date and notify eligible buyers through social media and other communication channel.
- The notification should contain registration place and the date of auction
- Eligible buyers shall register with Forest Office within the announced date upon payment of Nu.1000 as a registration fee. The registration should be done in person where individual token will be given to the buyer/trader. The registration fee shall be returned

after the auction day. However, the registration fee shall be forfeited if the traders do not turn up for auction.

- Members should bring forest produce to the place of auction on the mentioned date
- Conduct auction as per the announcement
- Highest bidder shall be awarded to buy the products
- Buyer and seller shall weigh the product in the presence of auction committee
- Buyer shall make payment on the spot for all quantity and upon the failure to make spot payment; the product shall be given to next 2nd highest bidder.
- Chairperson shall apply for online permit for NWFP collection prior to application of the export permit. However, the royalty shall be realized from the buyer as per the prevailing schedule rate on the spot.
- Buyer shall apply export permit online for export of NWFP

9.1.3. Bookkeeping

- Committee Members shall keep record of sale proceed against individual members
- Submit a copy of record to the Range Office

9.1.4. Auction Committee.

- One representative from Gewog Administration
- One representative from Forest Office
- Chairperson/Secretary/Accountant of NWFP group

10. Benefits to the members

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs will support their family's livelihood improvement. Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability in perpetuity.

11. Benefits to the group

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs, about 5% of the amount shall be deposited in the group saving account which will ultimately benefit the group.

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability in perpetuity.

Table 5. Financial projection of the benefits to the group, the community development fund.

Sl. No	Particulars	Amount (Nu)
	Revenues
