NOTESHEET

Subject: Approval of NWFP Management Plans

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. In order to ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group. Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area. As such the Forest Resource Planning and Management Division had received and reviewed the following plans submitted and hereby submitted to seek approval:

1. Yumzang Semthuen NWFP Management & Marketing Group, Sakteng Gewog, Tashigang
2. Gangri Phuensum Ngomoen Tshogpa, Naro Gewog, Thimphu
3. Lauri Gaki Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
4. Momring Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
5. Thekecho Choling Goenpa Shingmein Tshogpa, Lauri Gewog, Samdrup Jongkhar
6. Woonthi Shingmein Natshok Thundrel Tshogpa, Lauri Gewog, Samdrup Jongkhar
7. Zangthi-Tshothang Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
8. Patpanadang Shingmein Dondrup Tshogpa, Lauri Gewog, Samdrup Jongkhar

As per the Forest and Nature Conservation Act of Bhutan, 1995, such plans are required to be approved by the head of the Ministry. Submitted for kind approval.

1. Background

The Momring Shingmein Thuenkyed Tshogpa marketing and management group belongs to Momring village, Lauri gewog administration under Jomotsangkha Drungkhag. The village lies at an altitude of 1554 metres above the sea level. The people of Momring village depend their livelihood on Agriculture by cultivating maize, buckwheat, millet, potatoes, and mustard. Maize is the staple crop of the village. The farmers also grow different green vegetables including green chillies, cabbage, spinach, broccoli, etc. Cereal crops are also grown.

The NWFP marketing and management group consists of forty-eight members. The various NWFPs, including *Rubia cordifolia*, *Pouzolzia sanguinea*, *Swertia chirayita*, *Illicium griffithii*, *Daphne bolua*, *Juglans regia*, *Elatosteme lineolatum*, *Diplazium esculentum*, *Girardina diversifolia*, *Paris polyphylla*, *Chimonobambusa callosa*, *Borinda grosa*, mushroom, fern and etc., are found in the forest located nearby their settlement. Other NWFPs are yet to be explored for the benefit of the group or community.

There are eight blocks of NWFP collection sites. The total area of NWFP block is 1369.088 hectares, equivalent to 3383.09 acres of State Reserved Forest (SRF). The altitude of collection sites lies within the range of 1385 - 3142 metres above the sea level.

Review of the past management plan

The NWFP group members have been greatly benefited through the group formation. The right for collection and trading of NWFPs have supported their household income for meeting various expenditures at home, including the education of their children at school. The farm road connectivity in the village has further created a conducive environment for trading of NWFPs harvested. Prior to group formation, the livelihood and household income of people in the village was not stable economically. The group was established in 2011 and revised once in 2015.

The NWFP group members have sold 6372 kilograms of *Rubia cordifolia*, since the time of time of establishment. earning sum total of Nu.390270. The total savings of the group in bank is Nu.43182.36.

The group savings of the NWFP members were not utilized for community contribution so far. However, group members are willing to support important community activities if required. The provisions for loan to NWFP members have been kept for solving the problems and urgent needs of money to NWFP members.

The validity of the present plan has expired. The group members would be restricted for collection and trading of NWFPs whereby their income generation and livelihood of group members would be affected. Thus, the revision of the group is important and mandatory. The timeframe for the NWFP Management & Marketing plan is for a period of maximum 5 years. Hence, revision of the Momring Shingmein Thuenkyed Tshogpa has been initiated.

2. Objectives:

1. Sustainable management and collection of NWFPs within the designated areas.
2. Livelihood improvement through income generation from sale of NWFPs.
3. Protection of collection areas from illegal activities
4. Conservation of NWFPs through proper harvesting techniques.

3. Description of NWFPs

Table 1. Brief description of NWFPs for commercial harvesting

<i>NWFP name</i>	<i>Harvesting area(s) (name)</i>	<i>Parts harvested</i>	<i>Use purpose (traditional & others)</i>	<i>Harvesting season (months)</i>	<i>Estimated quantity that can be collected¹</i>
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	Tshephu Zorjab-phodrang Shangshingzor Phuthung Nagreb- woongchiloo Chorphu	Entire plants	Dye, medicine	November - February	4000 kgs
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	Tshephu Zorjab-phodrang Shangshingzor Phuthung Chorphu	Bark	Incense	August– February	200kgs

4. Harvesting prescriptions for sustainable NWFP harvesting

There are six collection sites identified for harvesting of *Rubia cordifolia*. The six identified sites, the members will collect from two harvesting sites per year on a rotational basis. Similarly, for the harvesting of *Daphne*, there are three identified sites for collection, and the NWFP members will collect the species on the rotational basis.

In this way, the harvesting of the species will be sustainably managed for this year and the first harvested area will be ready by the next plan revision.

The following harvesting prescriptions provided in the table below shall be strictly followed by the members while collecting the NWFPs.

Table 2. Harvesting prescriptions for sustainable harvesting

<i>NWFP species</i>	<i>Harvesting prescriptions for sustainable harvesting</i>
<i>Rubia cordifolia</i> (Laneyru)	1. Use sharp sickle for the harvesting of the upper part of the plant. 2. Cut the plant at 5 cm above ground level. 3. Leave at least 10% of the plants without collecting or harvesting any raw materials from them. 4. Do not collect roots. 5. Do not uproot entire plants
<i>Pouzolzia sanguinea</i> (Yongjiba)	1. Cut the plant at 10 cm above the ground level. 2. Do not damage the remaining young stands/ seedlings/ saplings. 3. Should not cut down surrounding trees to ease harvesting. 4. Leave at least 10% of the plants to allow natural regeneration. 5. Harvesting of roots is strictly prohibited for ecological reason
<i>Elatosteme lineolatum</i> (Drimmom)	1. Collect plants that are 15cm and above. 2. Retain stump of around 3” for sprouting of new shoots. 3. Don’t uproot whole plant. 4. Shouldn’t cut down trees and create more opening. 5. Shouldn’t disturb its catchment area.
<i>Plectocomia himalayana</i> (Cane)	1. Cut cane stem only when matured. 2. Pull down as much of the cane as possible (avoid leaving cane parts high up in the tree) 3. Cut only canes with a usable length of at least 10 m. 4. Harvest during winter as canes have a better quality during this season. 5. Replant the lateral shoots that are attached to harvested cane. For cane shoots

	1. Cut young shoot by bending the cane stem with the help of a hook long and strong stick using sharp knife. 2. Do not cut tree climbed cane for shoot. 3. Care shall be taken to avoid damaging sucker buds.
Mushroom	1. Do not use knife for harvesting mushrooms 2. Do not scratch or disturb the logs/soil while harvesting 3. Use bamboo baskets rather than plastic bags for collection and transportation of mushrooms.
<i>Diplazium esculentum</i> (Dhawai)	1. Harvests young shoot that are 15cm length. 2. Don't harvest all shoot coming up in season. 3. Retain at least 50% of young shoot of last flush for the development of leaves. 4. Don't harvest the shoots that have developed into leaves.
<i>Daphne bolua</i> (Shogushing-Sh)	1. Cut the plant at 10 cm above the ground level (the left stump will regenerate in the following growing season). 2. Cut only stems that are more than 3 cm in diameter. 3. Do not damage the remaining young stands, seedling and /or saplings 4. Do not fell the surrounding trees in order to clear the area to ease harvesting Divide harvesting area into 5 blocks for Daphne. Harvesting is rotated over the 5 blocks so that harvesting takes place only in one block per year (Daphne takes 5 years to produce stems of more than 3 cm in diameter).
<i>Illicium griffithii</i> (Khaila chinang -Sh)	1. Hand pick fruits only when fallen on the ground, or 2. Use long bamboo poles to shake off fruits from the trees. 3. Don't cut tree or branches to collect fruits.
<i>Litsea cubeba</i> (Nenshing -Sh)	1. Harvest fruit by handpicking or by lightly lopping of outer branches. 2. Do not cut down the tree for harvesting of fruit.
<i>Girardina diversifolia</i> (Zangroo-Sh)	1. Peel out fiber after cutting plant from base. 2. Harvest plant only after seed dispersal. 3. Do not collect all plants from one area
<i>Paris polyphylla</i> (Thogsampa)	1. Do not harvest the plant before the seed dispersal 2. Harvest only after bud emerges from the rhizome which remain dormant underground 3. Leave some portion of the rhizome with bud underground while harvesting the rhizome of the plant.
<i>Juglans regia</i> (walnut)	1. Hand pick fruits only when fallen on the ground, or 2. Use long bamboo poles to shake off fruits from the trees. 3. Don't cut tree or branches to collect fruits.
<i>Borinda grossa</i> (Shi-Sh)	1. Cut culm above first internode from the base. 2. Leave bamboo shoot or culm of less than one year old intact. 3. Cut at maximum 33% of the 1+ year and 2+ year old culm per clump. 4. Do not cut culm when new shoots are sprouting.

<i>Chimonobambusa calosa</i> (Rasu-Sh)	1. Cut culm above first internode from the base. 2. Leave bamboo shoot or culm of less than one year old intact. 3. Cut at maximum 33% of the 1+ year and 2+ year old culm per clump. 4. Do not cut culm when new shoots are sprouting.
<i>Swertia chirayita</i> (Khalu-Sh)	1. Collect the plant only after seed dispersal commenced. 2. Do not collect the plants late in the season (February) as there are high risk of damaging the the germination of new seedlings
<i>Onosma hookeri</i> (Demuktsi-Sh)	1. Rhizomes should be harvested using crowbar. 2. Rhizomes should be harvested after seeds dispersal or dying of stems. 3. Leave some portion of the rhizome with bud underground while harvesting the rhizome of the plant.

7. Marketing arrangements

The harvesting of the NWFPs from the identified/designated sites are collection based on the basic harvesting guidelines and prescriptions. For the harvesting of the NWFPs, one member from each household is permitted and the collected products are gathered at a common place for further marketing through auction. The following procedures are followed for sale/marketing of the collected NWFPs.

7.1. Standard Operating Procedure (SOP) for Collection and Marketing of Non-Wood Forest Products (NWFPs)

7.1.1. Harvesting of NWFPs

- Chairperson of NWFP group shall obtain harvesting/collection permit from Range Office in writing
- After approval of the permit, Chairperson shall inform all members stating collection time
- NWFP members must follow collection/harvesting period timeline mentioned in the plan

- NWFP members must strictly follow the harvesting rules mentioned in the management plan
- After harvesting, members should store NWFPs following recommended post-harvest practice
- Chairperson shall inform Range Office of the completion of harvest

1.1.2. Marketing of NWFPs

- Chairperson and Range Office shall decide auction date and notify eligible buyers through social media and other communication channel.
- The notification should contain registration date and the place of auction and the date of auction
- Eligible buyers shall register with Range Office within the announced date
- Members should bring forest produce to the place of auction on the mentioned date
- Conduct auction as per the announcement
- Highest bidder shall buy the products
- Buyer and seller shall weigh the product in the presence of auction committee
- Buyer shall make payment on the spot
- Royalty shall be realized from the buyer as per the prevailing schedule rate on the spot
- Buyer shall apply export permit online for export of NWFP

1.1.3. Bookkeeping

- Committee Members shall keep record of sale proceed against individual members
- Submit a copy of record to the Range Office
- Chairperson shall apply for online permit for NWFP collection prior to application of the export permit

1.1.4. Auction Committee

- One representative from Gewog Administration
- One representative from Forest Office
- Chairperson, NWFP group

1.1.5. Registration Fee

Buyers should pay minimal registration fee of Nu.1000 to NWFP Committee members. The registration fee should be paid before the expiry of registration timeline. If the buyers do not turn up for auction, the money shall be freezed and deposited into the NWFP group account. The registration fee shall be credited back to buyers if participated in the auction.

8. Benefits to the members

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and

individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs will support their family's livelihood improvement.

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability in perpetuity.

9. Benefits to the group

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs, about 5% of the amount shall be deposited in the group saving account which will ultimately benefit the group.

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability in perpetuity.

10. By-Laws: Group Regulations and Norms

<i>Members of the NWFP management & marketing group</i>	Village	Number of member households	Gewog
	Momring	18	Lauri
	Responsibilities and rights of members: - Reporting illegal activities to chairman, secretary and treasurer - Auditing to promote transparency and fairness - Sustainable collection of NWFP products - Follow harvest time and collect only after obtaining permits - Participation in meetings or field works or any group works - Carry out patrolling in selected/perilous unsafe sites		

Management Committee Members	
<i>Chairperson</i>	Name of Chairperson: Tashi 174548
	Responsibilities of Coordinator/ Chairperson: - Coordinate/organize or chair all meetings - Resolve disputes and conflicts among members - Arrange and coordinate marketing of NWFPs - Coordinate obtainment of collection permit in time - Liaise with various governmental agencies and private sector - Initiating annual work plan and reporting to the group - Keep rapport with private entrepreneurs - Impose penalties in accordance with the prescribed rules - Represent group in seminars/workshops/meetings for the benefits of groups. - Monitor the quality of NWFPs

<i>Secretary</i>	Name of Secretary: Karma Phuntsho 17734982
	Responsibilities of Secretary: - Officiate the Chairman - Keep minutes of the meeting - Maintaining records - Assist the chairperson in conflict resolution and marketing - Decision making with group members - Assist the accountant in financial matters - Write Official correspondence - Share/disseminate information - Informing the group about the time, date and venue of meeting - Monitor the quality of NWFPs

	Name of Treasurer: Kelzang Tashi 17832220
	Responsibilities of Treasurer: Keep financial records: money transaction/cash management/expenditure

<i>Treasurer</i>	a) Collect membership fees and deposit in bank b) To maintain the cash books c) Deduct the 5 % from every seller (group members) and deposit in the bank
Compensation to the executive <i>committee</i> for marketing	Pay to and fro vehicle charge and offer working lunch for carrying out group benefit works. If committee members are paid DSA and working lunch from meeting organizers, they should not utilize group fund. If extra expenditures is incurred for hiring vehicles, meeting should be conducted once returned. During the meeting the committee members who have gone for meeting should explain his detail extra expenditures to the rest committee members/members for recovery from group fund. Minutes of meeting should be maintained.
<i>Tshogpa</i>	Lawang Dema Dechen Wangmo Dorji Duba Pema Dorji

11. Membership Arrangement

<i>Membership fee and purpose</i>	✓ Annual membership fee per household– Nu.100 ✓ Money accumulated shall be utilized for meeting expenditures of group related works or buying NWFP office stationeries Membership Registration: 1. New member is allowed to join, but must have tharm/gung, registered in the gewog. 2. Pay compensation to group before entry, i.e., equivalent to individual share (total group saving divided by all members) 3. Son-in-law of family members are allowed to join, after paying bank saving share (compensation as mentioned in serial no.2). 4. New members wishing to join must be resident of the same village 5. Fragmented members (whose parents were members) are allowed to join, but have to pay membership fees. 6. Resignation benefits 7. Members wishing to resign from membership based on conflicting issues/reasons shall not get any benefits. 8. If the reasons are good for leaving, transfer of village/other, shall get the benefits of bank saving 9. No fine for resignation, but will not get any benefits. 10. Termination 11. Terminated members shall not get any benefits
-----------------------------------	--

	12. If the members deny or disagree to join meetings or any group works for 3 times, he/she shall be terminated. 3rd warning will be given in paper and terminated if do not turn up. 13. If the members deny or disagree to pay Nu.5 per kg of NWFPs sold to traders in the group saving, he/she shall be terminated from membership.
--	--

12. Community Fund Use

<i>Community development fund and utilization of fund</i>	1. Maintenance of Community Lhakhang or infrastructure development. 2. Support community festivals or ceremony events. 3. Loan shall be given to members who are in genuine needs. Up to 10,000 shall be given for the duration of 6 months. 4. The interest rate of loan shall be 15% per annum
---	---

13. Conflict resolution

<i>Conflict resolution</i>	Conflicts or disputes within the members should be resolved by the Management Committee Members. If it the conflict is serious, forward to the Gewog Administration or Park Office In case there is a conflict arises between the NWFP group and outsiders regarding NWFP, the case shall be forwarded to the Park Office and Gewog Administration by the Chairperson
----------------------------	---

14. Fines and penalty

<i>Penalties</i>	In case a member of the NWFP Group violates the harvesting rules as set in this plan, he or she will not be allowed to harvest the NWFP anymore for the rest of the season and the next season. (Describe other penalties if desired) ✓ Members absent during meeting has to pay Nu.150 per day as penalty ✓ Members absent during field work has to pay Nu.150 per day as penalty (Momring). -collection time. ✓ Members shall not be allowed to collect NWFP if he/she doesn't follow management plan ✓ Termination from the membership if members disobey executive members for 3 times.
------------------	---

	✓ If illegal harvesting is found, outsiders/insiders, shall be levied a fine of Nu.1000 per kilogram (Rubia and Yongjiba) and seize the produce. If already taken or stolen, and caught later, the offender shall be charged Nu.2000. ✓ If members delay any type of fee collection by 1 month, he/she shall be fine Nu.10 per every day. ✓ If the committee members misuse group fund or do late deposit than 1 month, Nu.1000 penalty, shall be charged. Fund collection completion meeting and minutes should be maintained. ✓ Fund deposit – 1 month. ✓ Members should report illegal collection or trading. The reporter shall get Nu.500 as incentive. ✓ For late comers in meeting or field works, Nu.50 shall be charged as penalty.
