NOTESHEET

Subject: Approval of NWFP Management Plans

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. In order to ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group. Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area. As such the Forest Resource Planning and Management Division had received and reviewed the following plans submitted and hereby submitted to seek approval:

1. Yumzang Semthuen NWFP Management & Marketing Group, Sakteng Gewog, Tashigang
2. Gangri Phuensum Ngomoen Tshogpa, Naro Gewog, Thimphu
3. Lauri Gaki Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
4. Momring Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
5. Thekcho Choling Goenpa Shingmein Tshogpa, Lauri Gewog, Samdrup Jongkhar
6. Woonthi Shingmein Natshok Thundrel Tshogpa, Lauri Gewog, Samdrup Jongkhar
7. Zangthi-Tshothang Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
8. Patpanadang Shingmein Dondrup Tshogpa, Lauri Gewog, Samdrup Jongkhar

As per the Forest and Nature Conservation Act of Bhutan, 1995, such plans are required to be approved by the head of the Ministry. Submitted for kind approval.

Submitted by:

1. Background

Phajogoenpa village falls under Lauri gewog administration in Jomotsangkha Drungkhag lies at an altitude of 1557 m above the sea level. Agriculture is the primary source of livelihood in village. People cultivate maize, buckwheat, millet, potatoes, and mustard. Maize is the staple crop of the village. Farmers also grow different green vegetables, including green chillies, buckwheat, cabbage, spinach, broccoli, etc. Cereal crops are also grown. The source of income for the community includes cardamom, dairy products and Non-Wood Forest Produce.

The Thekcho Choeling Gonpa Shingmein Tshogpa consist of eight members registered for Non-Wood Forest Product (NWFP) group formation. The various NWFPs, including *Rubia cordifolia*, *Pouzolzia sanguinea*, *Swertia chirayita*, *Illicium griffithii*, *Daphne bolua*, *Juglans regia*, *Elatosteme lineolatum*, *Paris polyphylla*, *Chimonobambusa callosa*, *Borinda grossa*, *Viscum nepalense*, Mushroom, fern etc., are found in the forest located nearby their settlement. Other NWFPs are yet to be explored for the benefit of the group or community.

There are 5 blocks identified as NWFP collection sites. The total area of NWFP block is 552.114 hectares, equivalent to 1364.30 acres of State Reserved Forest (SRF). The altitude of collection sites lies within the range of 2029 – 3398 m above the sea level.

Review of the past management plan

The NWFP group members have been greatly benefited through the group formation. The right for collection and trading of NWFPs have supported their household income for meeting various expenditures at home, including the education of their children at school. The farm road connectivity in the village has further created a conducive environment for trading of NWFPs harvested. Prior to group formation, the livelihood and household income of people in the village was not stable economically. The group was established in 2011 and revised once in 2015.

The NWFP group members have sold 919 kgs of *Rubia cordifolia* since the time of establishment, earning a total of Nu.56,940. The total savings of the group in the bank is Nu.23849.

The group savings of the NWFP members were not utilized for community contribution so far. However, group members are willing to support important community activities if required. The provisions for loan to NWFP members have been kept for solving the problems and urgent needs of money for NWFP members.

The validity of the present plan has expired. The group members would be restricted for collection and trading of NWFPs whereby their income generation and livelihood of group members would be affected. Thus, the revision of the group is important and mandatory. The timeframe for the NWFP Management & Marketing plan is for a period of maximum 5 years. Hence, revision of the Thekcho Choeling Goenpa Shingmein Tshogpa has been initiated.

2. Objectives

1. Sustainable collection of NWFPs
2. Livelihood improvement through sale of NWFPs
3. Conservation of NWFPs

3. Description of NWFPs

Table 1. Detail information on NWFPs for commercial harvesting

<i>NWFP name</i>	<i>Harvesting areas</i>	<i>Parts harvested</i>	<i>Use (traditional & others)</i>	<i>Harvesting season (months)</i>	<i>Estimated quantity that can be collected</i>
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	Phung	Entire plant	Dye, medicine	November-February	2500kg
	Ngotyang				
	Barmatay				
	Lazorra-Sukchinangchikchang				
	Dongnagphunggangray				
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	Lazorra-Sukchinangchikchang	Bark	Incense	August-February	200kg
	Phung				
<i>Elatosteme lineolatum</i> (Drimom-Sh)	Phung	Stem and leaves	edible	Any time, summer	200 bundles
	Lazorra-Sukchinangchikchang				
	Ngotyang				
Mushroom (Bamung-Sh)	Phung	Entire mushroom	edible	July -October	50kgs
	Ngotyang				
	Barmatay				
	Lazorra-Sukchinangchikchang				
<i>Diplazium esculentum</i> (Dhawai-Sh)	Phung	Young shoots	Edible	March -September	200 bundles
	Lazorra-Sukchinangchikchang				
	Ngotyang				
<i>Chimonobambusa callosa</i> (Rasu-Sh)	Barmatay	culm	Fencing	December - February	800nos
	Dongnagphunggangray				
<i>Daphne bolua</i> (Shogushing-Sh)	Phung	Bark	Paper	March-June	60kg
	Lazorra-Sukchinangchikchang				
	Ngotyang				
<i>Borinda grossa</i> (Shi-Sh)	Dongnagphunggangray	culm	Roofing	December - February	500 nos.
	Barmatay				

<i>Illicium griffithii</i> (Khaila chinang/ Lishi -Sh)	Dongnagphunggangray Barmatay	fruits	medicine	October-December (or when fruit are matured)	300kgs
<i>Girardinia diversifolia</i> (Zangroo-Sh)	Phung	fiber	weaving	September-October	8 kgs
	Lazorra- Sukchinangchikchang				
<i>Viscum nepalense</i> (Nya-shing- jorma-Sh)	Dongnagphunggangray	Entire plant	Local tea leaves	September - February	20 kgs
	Barmatay				
<i>Swertia chirayita</i> (Khalu-Sh)	Dongnagphunggangray	Entire plan	medicinal	November - January	8 kgs
	Lazorra- Sukchinangchikchang				
<i>Plectocomia himalayana</i> (Phashi-Sh)	Dongnagphunggangray	Young shoot & matured stem	Vegetable, handicraft items	Mature stems- November to March. Shoot April to August	150 nos (shoots) 200 nos (matured stems)
	Barmatay				
<i>Paris polyphylla</i> (Thoksampa-Sh)	Dongnagphunggangray	rhizome	medicine	October-November	2 kgs
<i>Juglans regia</i> (Kheshing -Sh)	Phung	fruits	edible	September-October	200 kgs
	Lazorra- Sukchinangchikchang				

4. Harvesting prescriptions for sustainable NWFP harvesting

The harvesting prescriptions and basic guidelines are prepared in reference to the framework for management and marketing of NWFPs and guidelines developed for *Daphne*, *Illicium griffithii*, *Chirata*, *Rubia*, etc. The following are some of the important points to be followed by every member:

- Collect on right time, on maturity as per harvesting guidelines months/seasons
- Before collection of NWFPs, approval and collection permit should be obtained from Jomotshangkha Park Range Office.

Table 2. Basic guidelines/prescriptions for sustainable harvesting of NWFPs

NWFP species	Harvesting prescriptions for sustainable harvesting
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	1. Use sharp sickle for the harvesting of the upper part of the plant. 2. Cut the plant at 5 cm above ground level. 3. Leave at least 10% of the plants without collecting or harvesting any raw materials from them. 4. Do not collect roots. 5. Do not uproot entire plants

	For the collection of <i>Rubia</i> , the identified collection sites should be divided into three areas for rotational harvesting of the species. Each season, the species shall be collected from one area and move to the next area in the next harvesting season and that way the species will get ample time for its regeneration and sustainable harvesting (<i>Rubia</i> takes three years for regeneration).
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	1. Cut the plant at 10 cm above the ground level. 2. Do not damage the remaining young stands/ seedlings/ saplings. 3. Should not cut down surrounding trees to ease harvesting. 4. Leave at least 10% of the plants to allow natural regeneration. 5. Harvesting of roots is strictly prohibited for ecological reason
<i>Elatosteme lineolatum</i> (Drimom-Sh)	1. Collect plants that are 15cm and above. 2. Retain stump of around 3” for sprouting of new shoots. 3. Don’t uproot whole plant. 4. Shouldn’t cut down trees and create more opening. 5. Shouldn’t disturb its catchment area.
Mush room (Bamung-Sh)	1. Do not use knife for harvesting mushrooms 2. Do not scratch or disturb the logs/soil while harvesting 3. Use bamboo baskets rather than plastic bags for collection and transportation of mushrooms.
<i>Diplazium esculentum</i> (Dhawai-Sh)	1. Harvests young shoot that are 15cm length. 2. Don’t harvest all shoot coming up in season. 3. Retain at least 50% of young shoot of last flush for the development of leaves. 4. Don’t harvest the shoots that have developed into leaves.
<i>Chimonobambusa callosa</i> (Rasu-Sh)	1. Cut culm above first internode from the base. 2. Leave bamboo shoot or culm of less than one year old intact. 3. Cut at maximum 33% of the 1+ year and 2+ year old culm per clump. 4. Do not cut culm when new shoots are sprouting.
<i>Plectocomia himalayana</i> (Phashi-Sh)	1. Cut cane stem only when matured. 2. Pull down as much of the cane as possible (avoid leaving cane parts high up in the tree) 3. Cut only canes with a usable length of at least 10 m. 4. Harvest during winter as canes have a better quality during this season. 5. Replant the lateral shoots that are attached to harvested cane. For cane shoots 1. Cut young shoot by bending the cane stem with the help of a hook long and strong stick using sharp knife. 2. Do not cut tree climbed cane for shoot.

	3. Care shall be taken to avoid damaging sucker buds.
<i>Daphne bolua</i> (Shogushing-Sh)	1. Cut the plant at 10 cm above the ground level (the left stump will regenerate in the following growing season). 2. Cut only stems that are more than 3 cm in diameter. 3. Do not damage the remaining young stands, seedling and /or saplings 4. Do not fell the surrounding trees in order to clear the area to ease harvesting Divide harvesting area into 5 blocks for Daphne. Harvesting is rotated over the 5 blocks so that harvesting takes place only in one block per year (Daphne takes 5 years to produce stems of more than 3 cm in diameter).
<i>Borinda grossa</i> (Shi-Sh)	1. Cut culm above first internode from the base. 2. Leave bamboo shoot or culm of less than one year old intact. 3. Cut at maximum 33% of the 1+ year and 2+ year old culm per clump. 4. Do not cut culm when new shoots are sprouting.
<i>Illicium griffithii</i> (Khaila chinang/Lishi-Sh)	1. Hand pick fruits only when fallen on the ground, or 2. Use long bamboo poles to shake off fruits from the trees. 3. Don't cut tree or branches to collect fruits.
<i>Girardinia diversifolia</i> (Zangroo-Sh)	1. Peel out fiber after cutting plant from base. 2. Harvest plant only after seed dispersal. 3. Do not collect all plants from one area
<i>Viscum nepalense</i> (Nya-shing-jorma-Sh)	1. Do not cut down the host plant to ease collection. 2. Do not collect the whole bunch. Leave at least 25% for flowering and fruiting.
<i>Swertia chirayita</i> (Khalu-Sh)	1. Collect the plant only after seed dispersal commenced. 2. Do not collect the plants late in the season (February) as there are high risk of damaging the the germination of new seedlings
<i>Paris polyphylla</i> (Thoksampa-Sh)	1. Do not harvest the plant before the seed dispersal 2. Harvest only after bud emerges from the rhizome which remain dormant underground 3. Leave some portion of the rhizome with bud underground while harvesting the rhizome of the plant.
<i>Juglans regia</i> (Kheshing -Sh)	1. Hand pick fruits only when fallen on the ground, 2. Use long bamboo poles to shake off fruits from the trees. 3. Don't cut tree or branches to collect fruits.

5. Location sketch map of the NWFP harvesting areas

The sketch map for the identified NWFP harvesting areas is prepared based on the field boundary validation with the members and accordingly overlaid using google earth. The distance of the collection sites from the villages and area (ha) for each site are mentioned in the table below.

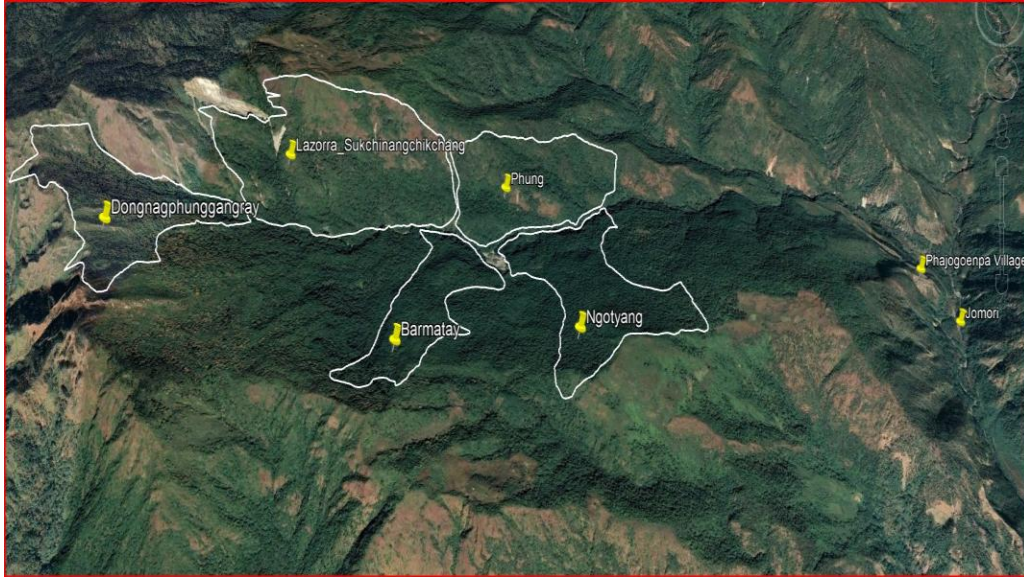

Figure 1. Map of NWFP collection sites

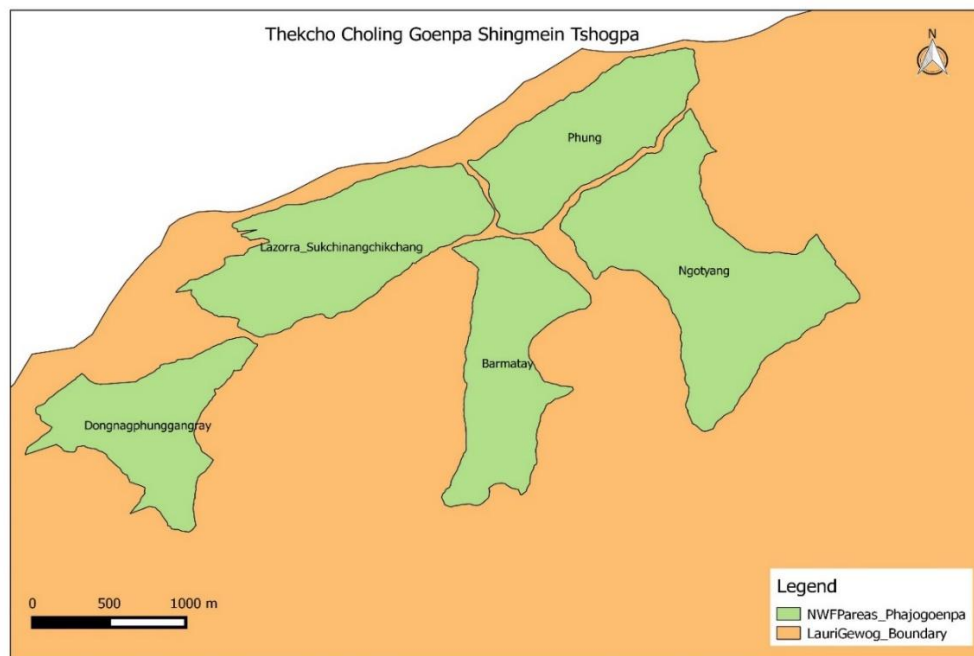

Figure 2. NWFP collection area for Phajogoenpa

Table 3. Detail information on the NWFPs harvesting sites

Sl. No	Location	NWFP	Area (Ha)	Distance (village to collection site)

6. Marketing and sales plan

The members collect or harvest NWFPs following the prescriptions and harvesting guidelines provided for each species. For the sale or marketing of the products, the members prefer to sell their products to the local market based on the market rate. Few species are sold to India, the neighbouring country.

Table 4. Information on the marketing and sales plan of NWFPs

<i>NWFP</i>	<i>Potential Market</i>	<i>Estimated quantity for sale/ season (unit)</i>	<i>Expected price per unit (Nu.)</i>	<i>Total (Nu.)</i>
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	India	2500 kgs	60	150,000
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	Incense Enterprise (Bhutan)	200 kgs	50	10000

<i>Juglans regia</i> (Kheshing-Sh)	Locality market	200kg	40	8000

7. Marketing arrangements

7.1 Standard Operating Procedure (SOP) for Collection and Marketing of Non-Wood Forest Products (NWFPs)

Harvesting of NWFPs

- Chairperson of NWFP group shall obtain harvesting/collection permit from Range Office in writing
- After approval of the permit, Chairperson shall inform all members stating collection time
- NWFP members must follow collection/harvesting period timeline mentioned in the plan
- NWFP members must strictly follow the harvesting rules mentioned in the management plan
- After harvesting, members should store NWFPs following recommended post-harvest practice
- Chairperson shall inform Range Office of completion of harvest

Marketing of NWFPs

- Chairperson and Range Office shall decide auction date and notify eligible buyers through social media and other communication channel
- The notification should contain registration date and the place of auction and the date of auction
- Eligible buyers shall register with Range Office within the announced date
- Members should bring forest produce to the place of auction on mentioned date
- Conduct auction as per the announcement
- Highest bidder shall buy the products
- Buyer and seller shall weigh the product in the presence of auction committee
- Buyer shall make payment on the spot
- Royalty shall be realized from the buyer as per the prevailing schedule rate on the spot
- Buyer shall apply export permit online for export of NWFP

Bookkeeping

- Committee Members shall keep record of sale proceed against individual members
- Submit a copy of record to the Range Office
- Chairperson shall apply for online permit for NWFP collection prior to application of the export permit

Auction Committee

- One representative from Gewog Administration
- One representative from Forest Office
- Chairperson, NWFP group

Registration Fee

Buyers should pay minimal registration fee of Nu.1000 to NWFP Committee members. The registration fee should be paid before the expiry of registration timeline. If the buyers do not turn up for auction, the money shall be freezed and deposited into the NWFP group account. The registration fee shall be credited back to buyers if participated in the auction.

8. Benefits to the members

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs will support their family's livelihood improvement.

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability in perpetuity.

9. Benefits to the group

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs, about 5% of the amount shall be deposited in the group saving account which will ultimately benefit the group.

10. By-Laws: Group Regulations and Norms

<i>Members of the NWFP management & marketing group</i>	Village	Number of member households	Gewog
	Phajogoenpa	8	Lauri
	Responsibilities and rights of members: a) Reporting illegal activities to chairman, secretary and treasurer b) Auditing to promote transparency and fairness c) Sustainable collection of NWFP products d) Follow harvest time and collect only after obtaining permits e) Participation in meetings or field works or any group works Carry out patrolling in selected/perilous unsafe sites		

Management Committee Members

<i>Chairperson</i>	Name of Chairperson: Tashi Tshering 17322378
	Responsibilities of Coordinator/ Chairperson: a. Coordinate/organize or chair all meetings b. Resolve disputes and conflicts among members c. Arrange and coordinate marketing of NWFPs d. Coordinate obtainment of collection permit in time e. Liaise with various governmental agencies and private sector f. Initiating annual work plan and reporting to the group g. Keep rapport with private entrepreneurs h. Impose penalties in accordance with the prescribed rules i. Represent group in seminars/workshops/meetings for the benefits of groups. j. Monitor the quality of NWFPs

<i>Secretary</i>	Name of Secretary: Tshering Dorji 17877506
	Responsibilities of Secretary: 1. Officiate the Chairman 2. Keep minutes of the meeting 3. Maintaining records 4. Assist the chairperson in conflict resolution and marketing 5. Decision making with group members 6. Assist the accountant in financial matters 7. Write Official correspondence 8. Share/disseminate information 9. Informing the group about the time, date and venue of meeting 10. Monitor the quality of NWFPs

<i>Treasurer</i>	Name of Treasurer: Sonam Tobgay 17540515
	Responsibilities of Treasurer: Keep financial records: money transaction/cash management/expenditure - a Collect membership fees and deposit in bank - b To maintain the cash books - c Deduct the 5 % from every seller (group members) and deposit in the bank
<i>Compensation to the executive committee for marketing</i>	Pay to and fro. vehicle charge. If committee members are paid DSA and working lunch from meeting organizers, they should not utilize group fund. If extra expenditures are incurred for hiring vehicles, meeting should be conducted once returned. During the meeting the committee members who have gone for meeting should explain his detail extra expenditures to the rest committee members/members for recovery from group fund. Minutes of meeting should be maintained. Chairperson –400 Secretary – 300 Accountant – 300 During collection time only
<i>Tshogpa</i>	Leki Wangchuk Sonam Choden

11. Membership Arrangement

<i>Membership fee and purpose</i>	✓ Annual membership fee per household– Nu.100 ✓ Collection time duration -15 days ✓ Money accumulated shall be utilized for meeting expenditures of group related works or buying NWFP office stationeries Membership Registration: 1. New member is allowed to join, but must have tharm/gung, registered in the gewog. 2. New members wishing to join must be resident of the same village 3. Fragmented members from old members are allowed to join, but have to pay membership fees. Pay compensation to group before entry, i.e., equivalent to individual share (total group saving divided by all members) Resignation benefits 1. Members wishing to resign from membership based on conflicting issues/reasons shall not get any benefits. 2. If the reasons are good for leaving, transfer of village/other, shall get the benefits of bank saving. Termination 1. Terminated members shall not get any benefits 2. If the members deny or disagree to join meetings or any group works for 3 times, he/she shall be terminated.3rd warning will be given in paper and terminated if do not turn up.
-----------------------------------	---

12. Community Fund Use

<i>Community development fund and utilization of fund</i>	- Maintenance of Community Lhakhang or infrastructure development. - Support community festivals or ceremony events. - Loan shall be given to members who are in genuine needs. Up to 10,000 shall be given for the duration of 6 months. - The interest rate of loan shall 15% per annum
---	--

13. Conflict Resolution

<i>Conflict resolution</i>	Conflicts or disputes within the members should be resolved by the Management Committee Members. If it the conflict is serious, forward to the Gewog Administration or Park Office. In case there is a conflict arises between the NWFP group and outsiders regarding NWFP, the case shall be forwarded to the Park Office and Gewog Administration by the Chairperson
----------------------------	--

14. Fines and penalty

<i>Penalties</i>	In case a member of the NWFP Group violates the harvesting rules as set in this plan, he or she will not be allowed to harvest the NWFP anymore for the rest of the season and the next season. (Describe other penalties if desired) ✓ Members absent during meeting has to pay Nu.100 per day as penalty. ✓ Members absent during field work has to pay Nu.300 per day as penalty -collection time. ✓ Members shall not be allowed to collect NWFP if he/she doesn't follow management plan ✓ Termination from the membership if members disobey executive members for 3 times. Keep record of every call or minutes. ✓ If illegal harvesting is found, outsiders/insiders, shall be levied a fine of Nu.500 per one occasion (Rubia and Yongjiba) and seize the produce. If already taken or stolen, and caught later, the offender shall be charged Nu.2000. ✓ If members delay any type of fee collection by 15th day, he/she shall be fine Nu.10 per every day. ✓ If executive members misuse the group funds, he/she has to pay Nu.5000 as penalty and has to refund the original amount within 1 year. They will be terminated from their post as well. ✓ If the committee members collect fund and deposit later than 1 month, Nu.10 per every day. Fund collection completion meeting and minutes should be maintained. ✓ Fund deposit – 1 month. ✓ If the members deny or disagree to pay Nu.5 per kg of NWFPs sold to traders in the group saving, he/she shall be terminated from membership.
