NOTESHEET

Subject: Approval of NWFP Management Plans

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. In order to ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group. Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area. As such the Forest Resource Planning and Management Division had received and reviewed the following plans submitted and hereby submitted to seek approval:

1. Yumzang Semthuen NWFP Management & Marketing Group, Sakteng Gewog, Tashigang
2. Gangri Phuensum Ngomoen Tshogpa, Naro Gewog, Thimphu
3. Lauri Gaki Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
4. Momring Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
5. Thekcho Choling Goenpa Shingmein Tshogpa, Lauri Gewog, Samdrup Jongkhar
6. Woonthi Shingmein Natshok Thundrel Tshogpa, Lauri Gewog, Samdrup Jongkhar
7. Zangthi-Tshothang Shingmein Thuenkyed Tshogpa, Lauri Gewog, Samdrup Jongkhar
8. Patpanadang Shingmein Dondrup Tshogpa, Lauri Gewog, Samdrup Jongkhar

As per the Forest and Nature Conservation Act of Bhutan, 1995, such plans are required to be approved by the head of the Ministry. Submitted for kind approval.

Submitted by:

(Sonam Tobgay)
Chief Forestry Officer

1. Background

Woongthi and Sezore village falls under the Lauri gewog administration, Jomotshangkha Drungkhag. Woongthi lies at 1328 m and Sezore lies at 1580 m above the sea level. Agriculture is the primary source of livelihood in village and People cultivate maize, buckwheat, millet, potatoes, and mustard. Maize is the staple crop of the village. Farmers also grow different green vegetables, including green chillies, cabbage, spinach, broccoli, etc. Cereal crops are also grown.

The Woongthi Shingmein Natshok Thuendrel Tshogpa consists of Eighteen members from the village that have registered for Non-Wood Forest Product (NWFP) group formation. Various NWFPs, including *Rubia cordifolia*, *Pouzolzia sanguinea*, *Swertia chirayita*, *Illicium griffithii*, *Daphne bolua*, *Elatosteme lineolatum*, *Paris polyphylla*, *Chimonobambusa callosa*, *Borinda grossa*, mushroom, fern and cane etc., are found in the forest located nearby their settlement. Other NWFPs are yet to be explored for the benefit of the group or community.

There are six identified blocks as NWFP collection sites. The collection areas are away from the Community Forest. There is no restriction for them to collect from CF areas too. The total area of NWFP block is 682.49 hectares, equivalent to 1686.47 acres of State Reserved Forest (SRF). The altitude of collection sites lies within the range of 1135 m - 2947 m above the sea level.

Review of the past management plan

The NWFP group members have been greatly benefited through the group formation. The right for collection and trading of NWFPs have supported their household income for meeting various expenditures at home, including the education of their children at school. The farm road connectivity in the village has further created a conducive environment for trading of NWFPs harvested. Prior to group formation, the livelihood and household income of people in the village was not stable economically. The group was established in 2011 and revised once in 2015.

During the plan review meeting, it was found out that NWFP group members sold 9263 kgs of *Rubia cordifolia* (La-nyi-roo), earning sum total of Nu.586,116/ and 90 kgs of *Illicium griffithii* ((Khaila chinang/Lishi-Sh), earning Nu. 3600, since the time of establishment. The total savings of the group in bank is Nu.36502. The group was established in 2011 and revised once in 2015.

The NWFP group contributed Nu.17000 for procuring important items required for repair of Woongthi Dungkarchoeling Community Lhakhang in 2014. Similarly, a total of Nu. 30000 was contributed for second time in 2020 for maintenance and reconstruction of community chorten at Chentenzor in Woongthi. The NWFP group formation have benefited the community immensely.

However, group members are willing to support important community activities if required. The provisions for loan to NWFP members have been kept for solving the problems and urgent needs of money for NWFP members.

The validity of the present plan has expired. The group members would be restricted for collection and trading of NWFPs whereby their income generation and livelihood of

group members would be affected. Thus, the revision of the group is important and mandatory. The timeframe for the NWFP Management & Marketing plan is for a period of maximum 5 years. Hence, revision of the Woongthi Shingmein Natshok Thuendrel Tshogpa has been initiated.

2. Objectives

- i. Sustainable collection and harvesting of NWFPs
- ii. Income generation for members from sale of NWFPs
- iii. Conservation of NWFPs

3. Description of NWFPs

Table 1. Brief description of NWFPs for commercial harvesting

NWFP name	Harvesting area(s) (name)	Parts harvested	Use purpose (traditional & others)	Harvesting season (months)	Estimated quantity that can be collected ¹
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	1.Barkchema 2.Thumringtag 3.Denmaphung 4.Sezorezug 5.Barkachemazug 6.Thuimringzug	Entire plants	Dye, medicine	November - February	2000 kgs
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	1.Barkchema 2.Thumringtag 3.Bakachemazug	Bark	Incense	August– February	200kgs
<i>Elatosteme lineolatum</i> (Drimom-Sh)	1.Denmaphung 2.Thumringtag	Stem and leaves	Edible	Any time	300 bundles
<i>Plectocomia himalayana</i> (Phashi-Sh)	Denmaphung Barkachema	Young shoot as well as matured stem	Shoots edible, matured stand for baskets	Mature stems: November-March Shoots: April-August	200 nos
Mushroom (Bamung-Sh)	1.Barkchema 2.Thumringtag 3.Denmaphung 4.Sezorezug 5.Barkachemazug	Entire mushroom	Edible	July -October	100kgs

<i>Diplazium esculentum</i> (Dhawai-Sh)	1.Thumringtag	Young shoots	Edible	March - September	300 bundles
<i>Daphne bolua</i> (Shogushing-Sh)	Thumringtag Barkachema Denmaphung	Bark	Paper	March-June	100 kgs
<i>Illicium griffithii</i> (Khaila chinang/Lishi-Sh)	Thumringtag Barkachema	Fruits	Medicine	October-December (or when fruits are matured)	500kgs
<i>Litsea cubeba</i> (Nenshing -Sh)	Barkachema Thumringtag	Fruits	Essential oil, medicine	August; harvest fruits when it turns black	80 kgs
<i>Girardina diversifolia</i> (Zangroo-Sh)	Thuimringzug Sezorezug	Fiber	Weaving	September-October	10 kgs(dried)
<i>Paris polyphylla</i> (Thoksampa-Sh)	Denmaphung	Rhizome	Medicine	October-November	3 kgs
<i>Chimonobambusa calosa</i> (Rasu-Sh)	Denmaphung Thuimringtag	culms	Fencing and other use	December-February	700 nos

4. Harvesting prescriptions for sustainable NWFP harvesting

The harvesting prescriptions and basic guidelines are prepared in reference to the framework for management and marketing of NWFPs and guidelines developed for *Daphne*, *Illicium griffithii*, *Chirata*, *Rubia*, etc. Following the management prescription and harvesting guidelines, the NWFP members harvest NWFPs from the designated collection sites. The collection/harvesting of NWFP is allowed after obtaining necessary approvals and collection permit from Jomotshangkha Park Range Office.

The harvesting prescriptions for each NWFPs are provided in the table below (Table 2):

Table 2. Basic guidelines and harvesting prescriptions for sustainable harvesting of NWFPs

NWFP species	Harvesting prescriptions for sustainable harvesting
<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	1. Use sharp sickle for the harvesting of the upper part of the plant. 2. Cut the plant at 5 cm above ground level. 3. Leave at least 10% of the plants without collecting or harvesting any raw materials from them. 4. Do not collect roots. 5. Do not uproot entire plants For the collection of <i>Rubia</i>, the identified collection sites should be divided into three areas for rotational harvesting of the species. Each season, the species shall be collected from one area and move to the next area in the next harvesting season and that way the species will get ample time for its regeneration and sustainable harvesting (<i>Rubia</i> takes three years for regeneration).
<i>Pouzolzia sanguinea</i> (Yongjiba-Sh)	1. Cut the plant at 10 cm above the ground level. 2. Do not damage the remaining young stands/ seedlings/ saplings. 3. Should not cut down surrounding trees to ease harvesting. 4. Leave at least 10% of the plants to allow natural regeneration. 5. Harvesting of roots is strictly prohibited for ecological reason
<i>Elatostema lineolatum</i> (Drimom-Sh)	1. Collect plants that are 15cm and above. 2. Retain stump of around 3” for sprouting of new shoots. 3. Don’t uproot whole plant. 4. Shouldn’t cut down trees and create more opening. 5. Shouldn’t disturb its catchment area.
<i>Plectocomia himalayana</i> (Phashi-Sh)	For stem 1. Cut cane stem only when matured. 2. Pull down as much of the cane as possible (avoid leaving cane parts high up in the tree) 3. Cut only canes with a usable length of at least 10 m. 4. Harvest during winter as canes have a better quality during this season. 5. Replant the lateral shoots that are attached to harvested cane. For cane shoots 1. Cut young shoot by bending the cane stem with the help of a hook long and strong stick using sharp knife. 2. Do not cut tree climbed cane for shoot. 3. Care shall be taken to avoid damaging sucker buds.

Mushroom	1. Do not use knife for harvesting mushrooms 2. Do not scratch or disturb the logs/soil while harvesting 3. Use bamboo baskets rather than plastic bags for collection and transportation of mushrooms.
<i>Diplazium esculentum</i> (Dhawai-Sh)	1. Harvests young shoot that are 15cm length. 2. Don't harvest all shoot coming up in season. 3. Retain at least 50% of young shoot of last flush for the development of leaves. 4. Don't harvest the shoots that have developed into leaves.
<i>Daphne bolua</i> (Shogushing-Sh)	1. Cut the plant at 10 cm above the ground level (the left stump will regenerate in the following growing season). 2. Cut only stems that are more than 3 cm in diameter. 3. Do not damage the remaining young stands, seedling and /or saplings 4. Do not fell the surrounding trees in order to clear the area to ease harvesting Divide harvesting area into 5 blocks for Daphne. Harvesting is rotated over the 5 blocks so that harvesting takes place only in one block per year (Daphne takes 5 years to produce stems of more than 3 cm in diameter).
<i>Illicium griffithii</i> (Khaila chinang/Lishi-Sh)	1. Hand pick fruits only when fallen on the ground, or 2. Use long bamboo poles to shake off fruits from the trees. 3. Don't cut tree or branches to collect fruits.
<i>Litsea cubeba</i> (Nenshing-Sh)	1. Harvest fruit by handpicking or by lightly lopping of outer branches. 2. Do not cut down the tree for harvesting of fruit
<i>Girardina diversifolia</i> (Zangroo-Sh)	1. Peel out fiber after cutting plant from base. 2. Harvest plant only after seed dispersal. 3. Do not collect all plants from one area
<i>Paris polyphylla</i> (Thoksampa-Sh)	1. Do not harvest the plant before the seed dispersal 2. Harvest only after bud emerges from the rhizome which remain dormant underground 3. Leave some portion of the rhizome with bud underground while harvesting the rhizome of the plant.
<i>Chimonobambusa calosa</i> (Rasu-Sh)	1. Cut culm above first internode from the base. 2. Leave bamboo shoot or culm of less than one year old intact. 3. Cut at maximum 33% of the 1+ year and 2+ year old culm per clump. 4. Do not cut culm when new shoots are sprouting.

7. Marketing arrangements

The harvesting of the NWFPs from the identified/designated sites are collection based on the basic harvesting guidelines and prescriptions. For the harvesting of the NWFPs, one member from each household is permitted and the collected products are gathered at a common place for further marketing through auction. The following procedures are followed for sale/marketing of the collected NWFPs.

7.1 Standard Operating Procedure (SOP) for Collection and Marketing of Non-Wood Forest Products (NWFPs)

Harvesting of NWFPs

- Chairperson of NWFP group shall obtain harvesting/collection permit from Range Office in writing
- After approval of the permit, Chairperson shall inform all members the starting collection time
- NWFP members must follow collection/harvesting period timeline mentioned in the plan
- NWFP members must strictly follow the harvesting rules mentioned in the management plan
- After harvesting, members should store NWFPs following recommended post-harvest practice
- Chairperson shall inform Range Office of completion of harvest

Marketing of NWFPs

- Chairperson and Range Office shall decide auction date and notify eligible buyers through social media and other communication channel
- The notification should contain registration date and the place of auction and the date of auction
- Eligible buyers shall register with Range Office within the announced date
- Members should bring forest produce to the place of auction on mentioned date
- Conduct auction as per the announcement
- Highest bidder shall buy the products
- Buyer and seller shall weigh the product in the presence of auction committee
- Buyer shall make payment on the spot
- Royalty shall be realized from the buyer as per the prevailing schedule rate on the spot
- Buyer shall apply export permit online for export of NWFP

Bookkeeping

- Committee Members shall keep record of sale proceed against individual members
- Submit a copy of record to the Range Office
- Chairperson shall apply for online permit for NWFP collection prior to application of the export permit

Auction Committee

- One representative from Gewog Administration
- One representative from Forest Office
- Chairperson, NWFP group

Registration Fee

Buyers should pay minimal registration fee of Nu.1000 to NWFP Committee members. The registration fee should be paid before the expiry of registration timeline. If the buyers do not turn up for auction, the money shall be frozen and deposited into the NWFP group account. The registration fee shall be credited back to buyers if participated in the auction.

8. Benefits to the members

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs will support their family's livelihood improvement.

Through the formation of NWFP groups, the members will take ownership for collection of the NWFPs. The entire members of the group will have equal rights over the collection of resources ensuring the sustainability in perpetuity.

9. Benefits to the group

The members of the NWFP group will be allowed to participate for annual collection of the NWFPs found available in their locality. One member from each household shall be allowed for collection of the NWFPs and deposit the collected NWFPs in common place. The auction committee members shall then sale the NWFPs through auction and individual collector will be benefitted from the sale. The income generated per member through the sale of NWFPs, about 5% of the amount shall be deposited in the group saving account which will ultimately benefit the group.

10. By-Laws: Group Regulations and Norms

<i>Members of the NWFP management & Marketing group</i>	Village	Number of member households	Gewog
	Woongthi and Sezore	18	Lauri
	Responsibilities and rights of members: 1. Reporting illegal activities to chairman, secretary and treasurer 2. Auditing to promote transparency and fairness 3. Sustainable collection of NWFP products 4. Follow harvest time and collect only after obtaining permits 5. Participation in meetings or field works or any group works 6. Carry out patrolling in selected/perilous unsafe sites		

10.1. Management Committee Members

Management Committee Members	
<i>Chairperson</i>	Name of Chairperson: Cheki Gyeltshen 17540482
	Responsibilities of Coordinator/ Chairperson: 1. Coordinate/organize or chair all meetings 2. Resolve disputes and conflicts among members 3. Arrange and coordinate marketing of NWFPs 4. Coordinate obtainment of collection permit in time 5. Liaise with various governmental agencies and private sector 6. Initiating annual work plan and reporting to the group 7. Keep rapport with private entrepreneurs 8. Impose penalties in accordance with the prescribed rules 9. Represent group in seminars/workshops/meetings for the benefits of groups. 10. Monitor the quality of NWFPs
<i>Secretary</i>	Name of Secretary: Tashi Wangchuk 17378068
	Responsibilities of Secretary: 1. Officiate the Chairman 2. Keep minutes of the meeting 3. Maintaining records 4. Assist the chairperson in conflict resolution and marketing 5. Decision making with group members 6. Assist the accountant in financial matters 7. Write Official correspondence 8. Share/disseminate information 9. Informing the group about the time, date and venue of meeting 10. Monitor the quality of NWFPs
<i>Treasurer</i>	Name of Treasurer: Dawa Zangpo 17429615
	Responsibilities of Treasurer: Keep financial records: money transaction/cash management/expenditure 1. Collect membership fees and deposit in bank 2. To maintain the cash books 3. Deduct the 10 % from every seller (group members) and deposit in the bank, during the time of harvest and sale.
Compensation to the executive committee for marketing	Pay to and fro vehicle charge and offer working lunch for carrying out group benefit works. If committee members are paid DSA and working lunch from meeting organizers, they should not utilize group fund. If extra expenditures are incurred for hiring vehicles, meeting should be conducted once returned. During the meeting the committee members who have gone for meeting should explain his detail extra expenditures to the rest committee

	members/members for recovery from group fund. Minutes of meeting should be maintained.
Supporting committee members	Sangay Dorji Dendup Namgyel Tshering Pemo

10.2. Membership Arrangement

Membership fee and purpose	✓ Annual membership fee per household– Nu.50 ✓ Money accumulated shall be utilized for meeting expenditures of group related works or buying NWFP office stationeries Membership Registration: 1. New member is allowed to join, but must have tharm/gung, registered in the gewog. 2. New members whose family is not a NWFP member are allowed to join, but have to pay compensation to group before entry, i.e., equivalent to individual share (total group saving divided by all members) 3. Fragmented family members are allowed to join, but have to pay Nu.250 as a nominal fee. Resignation benefits 1. Members wishing to resign from membership based on conflicting issues/reasons shall not get any benefits. 2. If the reasons are good for leaving, transfer of village/other, shall get the benefits of bank saving 3. Old/disabled members shall get equal share upon discussions with all members Termination 1. Terminated members shall not get any benefits 2. If the members deny or disagree to join meetings or any group works for 3 times, he/she shall be terminated If the members deny or disagree to pay 5% of NWFPs sold to traders in the group saving, he/she shall be terminated from membership
----------------------------	---

10.3. Community Fund Use

<i>Community development fund and utilization of fund</i>	1. Maintenance of Community Lhakhang or infrastructure development. 2. Support community festivals or ceremony events. 3. Loan shall not be given to members.
---	---

10.4. Conflict Resolution

<i>Conflict resolution</i>	Conflicts or disputes within the members should be resolved by the Management Committee Members. If the conflict is serious, forward to the Gewog Administration or Park Office In case there is a conflict arises between the NWFP group and outsiders regarding NWFP, the case shall be forwarded to the Park Office and Gewog Administration by the Chairperson
----------------------------	--

10.4. Fines and penalty

Penalties	In case a member of the NWFP Group violates the harvesting rules as set in this plan, he or she will not be allowed to harvest the NWFP anymore for the rest of the season and the next season. ✓ Members absent during meeting has to pay Nu.215 per day as penalty ✓ Late comers during the meeting have to pay Nu.50 as penalty. ✓ Members absent during field work has to pay Nu.250 per day as penalty ✓ Members shall not be allowed to collect NWFP if he/she doesn't follow management plan ✓ Termination from the membership if members disobey executive members for 3 times ✓ If illegal harvesting is found, outsiders/insiders, shall be levied a fine of Nu.3000 and seize the produce. ✓ The reporter shall get Nu.1000 from the total fine imposed (Nu.3000) ✓ If the product is already sold illegally, fine and penalty would be double of Nu. 3000. That means offenders have to pay Nu.6000 ✓ If harvesting times and guidelines are not followed as per the management plan, they will be charging Nu.500 fine per day and seize the products. ✓ If members delay any type of fee collection by 1 months, he/she shall be terminated from NWFP group membership. ✓ If membership fee is not given on time, member have to pay extra Nu.50. ✓ If executive members misuse the group funds, shall be terminated from current post and have to pay 24% interest rate on principle amount misused. ✓ Uprooting of <i>Rubia cordifolia</i>, Nu.300 per occasion. ✓ Banana stump, Nu.60 per piece. ✓ Fine – double of price. ✓ Illegal collection of <i>Rhaphidophora decursiva</i> (Bregla) from their collection site per headload is Nu.100, and load per Bolero is Nu.3000.
-----------	--

11. Annual Work Plan

Sl. No	NWFP species	Procure collection permit time	Collection time	Auction time
Meetings – For harvest planning (1time) and after auction (2 nd). 2 times meeting/years, and adhoc/emergency meeting shall be done as per the requirement/need basis				
1	<i>Rubia cordifolia</i> (La-nyi-roo-Sh)	November	November-February	February-March
2	<i>Pouzolzia sanguinea</i> (Yongjiba -Sh)	August	August - February	March
3	<i>Elatosteme laneolatum</i> (Drimom -Sh)	anytime	anytime	anytime
4	<i>Plectocomia himalayana</i> (Phashi-Sh)	June-shoot For matured stem- Dec	Shoots: April-August Matured stem: November-March	NA
5	Mushroom	July	July-October	NA
6	<i>Diplazium esculentum</i> (Dawai -Sh)	March	March-September	March-September
7	<i>Daphne bolua</i> (Shogushing -Sh)	March	March-June	NA
8	<i>Illicium griffithii</i> (Khaila chinang/Lishi-Sh)	December	October-December (or when fruits are mature)	February
9	<i>Litsea cubeba</i> (Nenshing-Sh)	August	August; harvest fruit when it turns black	September
10	<i>Girardinia diversifolia</i> (Zangroo -Sh)	August	September-October	October
