# NOTESHEET

## Subject: Approval of NWFP Management Plans

The Non-Wood Forest Products are an important source of livelihood for many rural communities in the country. In order to ensure the sustainable management of resources in the wild, management responsibilities are handed over to the communities through the formation of Non-wood Forest Product Management and Marketing Group. Further, it is mandatory for the group to prepare a resource management and marketing plan and submit it for approval through the Chief Forestry Officer of that area. As such the Forest Resource Planning and Management Division had received and reviewed the following plans submitted and hereby submitted to seek approval:

1. Panabe Bamboo Management Group, Phangkhar Gewog, Zhemgang
2. Pongchula Pemacholing TsharzewTshogpa, Phangkhar Gewog, Zhemgang
3. Jomolhari Ngomoen Tshogpa, Soe Gewog, Thimphu
4. Yaksa Ngomoen Tshogpa, Tseno Gewog, Paro
5. Lengkhar Tsoy Wongbab Tshogpa, Khamdang Gewog, Tashiyangtse

As per the Forest and Nature Conservation Act of Bhutan, 1995, such plans are required to be approved by the head of the Ministry. Submitted for kind approval.

## 1. Introduction

The Panabi and Kulamtii villages of Phangkhar geog, under Zhemgang district, has come up with the first revision of NWFP group formation. There are 16 households(H/H) as members who wishes to mainly focus to sell the bamboo, pipla and amla. In the previous plan period (2019-2022) the Group couldn't generate any income as the Covid pandemic hampered marketing of products to both local and outsiders. This plan is prioritized from the GT (*Geog Tshogde*) and DT (*Dzongkhag Tshogdu*) as missioned from the department of Forest and Park Services (DoFPS). This work was carried out jointly with Forestry staff from Gomphu range, under the guidance of RMNP Gelephu.

The main idea for initiating such program is to generate the annual income through the sale of NWFP and at the same time to manage the forest resources sustainably. There are six blocks (mentioned in the map) divided base on the NWFPs available for harvesting. In total 56 acres of bamboo areas with pipla and amla will be harvested sustainably as per the guideline and management plan. There are also simple by-Laws framed for smooth functioning of management plan by the members.

The management plan period for this community is for 5 years and during the plan period, RMNP and Forest Resources planning and Management Division will provide technical support in implementation of planned activities and also for exploring market opportunities for the sale of products.

## 2. Goals & Objectives

- To generate an income for the people of Panabe community from the sale of bamboo shoots and bamboo culms
- To achieve self-sufficiency through sustainable management NWFP and marketing of Pipla
- To create employment opportunities within the communities and sense of responsibilities for protecting the forest resources like various bamboo species.

## 3. Description of NWFPs

|--------------------------|-------------------|--------------|--------------|
|                          | Year-1            | Year-2,3     | 4years above |
| Nutans                   | 566               | 1200         | 1660         |
| wagaleng                 | 2400              | 5600         | 12600        |
| Blaktang                 | 900               | 1600         | 2400         |
| Panabe                   | 2100              | 3000         | 6340         |
|                          |                   |              |              |
| <b>Total (nos/culms)</b> | <b>5966</b>       | <b>11400</b> | <b>23000</b> |

Bamboo assessment was done base on CF manual partII, (plot size was 25mx20m, and the plots are systematically selected)

## 4. Harvesting prescriptions

To make the harvesting of NWFP sustainable, the Panabe NWFP group has to apply an appropriate harvesting prescription based on the scientific and local knowledge. The chairman will work according to the seasonal calendar and the time period in the guidelines. During the harvesting season the chairman will collect permit from Gomphu Range office for the required head loads in the name of NWFP group then inform the members to proceed for harvesting of the resources. The harvesting areas will be identified to the members as indicated in table No. 1. The monitoring works will be also done by the chairman and *resoop* for the proper harvesting as per the guidelines.

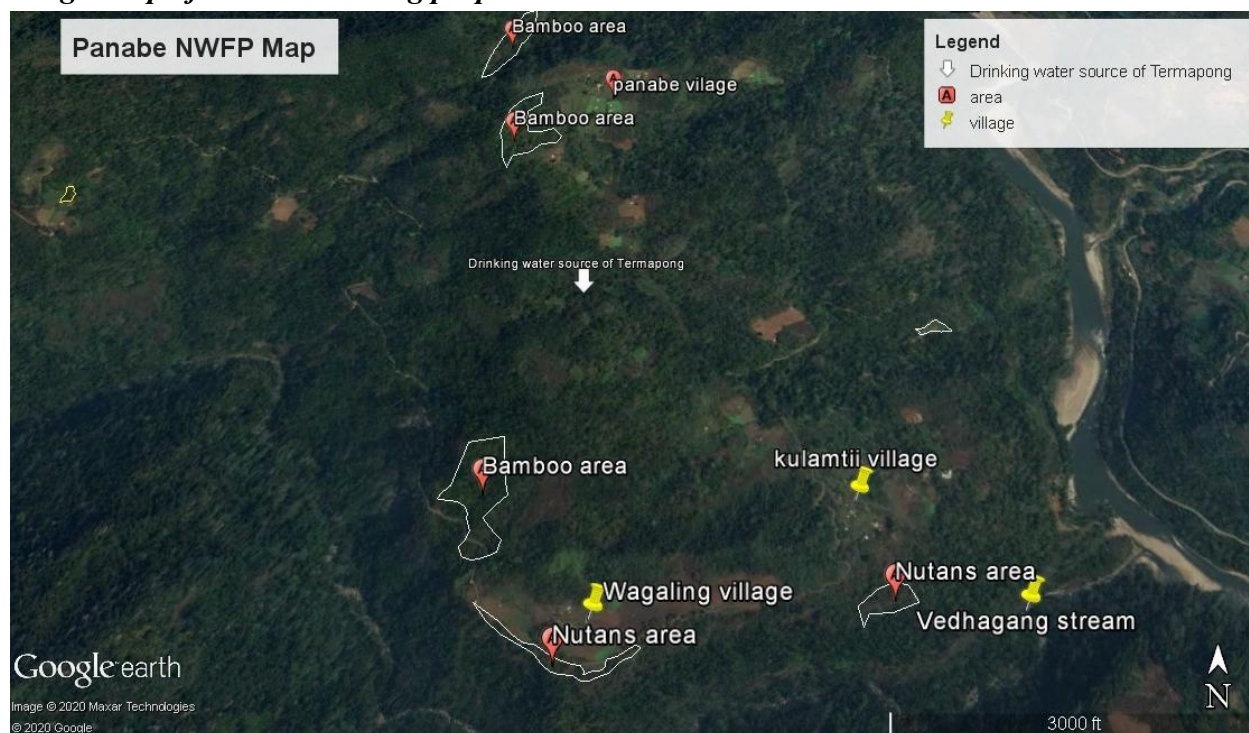

**Table 3: Harvesting prescriptions for sustainable NWFP harvesting:**

| NWFP species                       | Harvesting prescriptions for sustainable harvesting                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## 7. Marketing and sales plan

In the first plan period, which was only for 3 years, the NWFP group members of Panabe couldn't market any products, so they couldn't generate the income. The main reason behind is that during those term (2019-2022), the covid pandemic have hampered their sales plan, both for local and outsiders. For the present plan, following products listed will be the main products that will be sold in the market base on the demand made by the customers. The sale plan was formulated based on the interim frame work for management and marketing of NWFP plan book 2011. The prices are fixed base on the prevailing local market rates as tabulated under.

**Table 4: Marketing and sales plan**

| NWFP                                      | Potential market                                                                                                                                                        | Estimated quantity for sale per season (unit) | Estimated price per unit(Nu) | Total (Nu)      |

## 8. Marketing Arrangements

The products will be carried till road point by the members. The product like cane shoots in smaller quantity can be sold in *panbang*. And when it is collected in larger quantity, it can be sold in *Gelephu/panbang /KNC* market. In order to confirm the smooth functioning of the business, the dealer from market will be arranged by the committee members of the group.

The chairman and Forest officials will monitor and explore the demand from nearby institutes, agents, companies and other business groups. For further arrangement, the support will be sought from the DAMC. In addition, the group will focus more on the diversified handicraft development.

## 9. Benefit to the members

All the members will earn the income after sale of the NWFPs up to 70% of the fund after second year onwards. But in the beginning, they will deposit 100% in their group account. The income will be deposited in the bank for the period of 5 years and after that they will share among themselves. The entire member will have equal rights to collect the resources ensuring the future sustainability.

## 10. By-laws: Group Regulation and Norms
